1. Introduction

- 1.1 The National Planning Policy Framework requires the Council to produce a Strategic Housing Land Availability Assessment (SHLAA). A SHLAA is a piece of evidence which will be used in the preparation of the Staffordshire Moorlands Site Allocations Document and the emerging Local Plan. The SHLAA identifies and assesses the availability, suitability and deliverability of that land as a potential housing site to meet the identified need for housing over the plan period. This evidence will help the Council understand what sites are theoretically available for housing development. The Council will use this information and other pieces of evidence to identify potential locations for housing to be allocated in the Site Allocations Document and the emerging Staffordshire Moorlands Local Plan.

Scoping Report

- 1.2 A SHLAA Scoping Report was published in March 2007. This document set out the partners the Council would be working with to produce the SHLAA, the geographical areas to be covered, which sources of supply would be included, how the supply would be determined and how the Council would decide if the sites are genuinely available for development and are realistically developable in the short, medium and long term. The purpose of issuing the Scoping Report was to raise awareness that the assessment was being undertaken, what its aims are and to invite comments on the methodology and housing market baseline work and to invite consultants and developers to put forward sites for consideration. Consultation was undertaken on the Scoping Report between 20 March and 13 April 2007 with the report being sent to a wide range of key stakeholders including national, regional and local organisations, authorities and agencies, utility companies, developers and consultants.

Coverage

- 1.3 The SHLAA includes the following settlements, based on the hierarchy of settlements in the adopted Core Strategy:

Towns: Biddulph, Cheadle, Leek

Larger Villages: Alton, Biddulph Moor, Blythe Bridge and Forsbrook, Brown Edge, Cheddleton, Endon, Ipstones, Kingsley, Upper Tean, Waterhouses, Werrington & Cellarhead, Wetley Rocks.

Smaller Villages: Bagnall, Blackshaw Moor, Boundary, Bradnop, Caverswall, Checkley, Consall, Cookshill, Cotton, Dilhorne, Draycott, Foxt, Froghall, Heaton, Hollington, Hulme, Kingsley Holt, Leekbrook, Longsdon, Lower Tean, Meerbrook, Oakamoor, Rudyard, Rushton Spencer, Stanley, Stockton Brook, Swinscoe, Whiston, Winkhill.

- 1.4 In addition committed and potential development areas outside of these settlements were also included.
-

2. Methodology

2.1 Following consultation on the Scoping Report, the SHLAA was undertaken in 3 stages.

Stage 1

2.2 This stage identified buildings or areas of land (including previously-developed sites and greenfield sites within and on the edge of settlements) that have development potential for housing in accordance with the Strategic Housing Land Availability Assessments practice guidance.

Sources of sites to be included

- 2.3 The following potential sources were considered to identify this supply:
- Intensification of existing residential areas through garden and infill development and redevelopment of garage blocks
 - Previously-developed (brownfield) vacant and derelict land and buildings
 - The conversion of commercial buildings
 - The redevelopment of land in non-residential use
 - Unimplemented / outstanding planning permissions and sites under construction
 - Existing housing allocations
 - Land allocated in plans for employment and other uses
 - Vacant land not previously developed including greenfield sites
- 2.4 This supply does not include the following sources as these are difficult to identify or, in the case of empty homes, are already allowed for in calculating future housing requirements:
- Subdivision of existing housing
 - Flats over shops
 - Empty homes

Sites and areas to be surveyed

- 2.4 The scope of the survey has been determined by the following factors:
1. The housing requirements for the District in the adopted Core Strategy
 2. The need to have some flexibility for increased housing requirements to ensure choice and competition in accordance with the guidance in the NPPF
 3. The proposed development approach in the adopted Core Strategy which focuses development on the 3 towns and, in the rural areas, on the larger villages and gives priority to development on brownfield sites within urban areas
 4. Evidence from previous housing land availability assessments of limited capacity for development on previously developed sites within the existing urban areas
 5. Advice in the Planning Practice Guidance that sites which have particular policy constraints, should be included in the assessment for the sake of comprehensiveness but these constraints must be set out clearly, including where they severely restrict development
 6. Support in the adopted Core Strategy for non-strategic minor green belt land releases

7. Evidence from the Development Capacity Study of infrastructure capacity and development viability which supports the development approach and potential for development across the District
 8. Evidence of constraints and opportunities from the following studies:
 - Strategic Flood Risk Assessment (level 1)
 - PPG17 Audit
 - Landscape and Settlement Character Assessment
 - Ecological Surveys (phase 1)
 - Employment Land Study
 9. Resources available within the team to undertake and update the survey
- 2.6 In the light of the above factors it was considered that the survey should focus on the following types of sites and locations:
- All sites within the current settlement boundaries of all of the towns, larger villages and smaller villages or infill sites within the smaller villages which currently do not have a settlement boundary, including both previously developed land and greenfield sites, of a single dwelling capacity or more. This also includes, where appropriate, sites which are in existing use if there were known opportunities for reuse.
 - Large sites on the edge of the current settlement boundaries of the towns including greenfield, open countryside and green belt land, generally of 10 dwelling capacity or more.
 - Small sites on the edge of the large and smaller villages, including greenfield, open countryside and green belt land, generally of 6 dwelling capacity or more.
 - Major developed sites and other previously developed sites in the open countryside and green belt, generally of a minimum capacity of 30 dwellings
- 2.7 Whilst in the main current policy restrictions and uses have not been applied in identifying potential sites, the following areas and sites were specifically excluded from the survey because of the need to be realistic regarding the identification of suitable sites:
- Currently protected recreation and open space areas unless submitted for consideration or the area has been assessed in the PPG17 Audit or Landscape & Character Assessment as not suitable for retention
 - Areas subject to clear-cut designations such as SSSIs
 - Areas identified in the Employment Land Study as appropriate for retention
 - Sites in non-residential areas which are considered unsuitable for redevelopment for housing due to the nature of the area (e.g. an industrial estate) or the value of the current use (e.g. public car parks)
 - Isolated rural sites and buildings unless having potential for major redevelopment
- 2.8 Sites were identified from desk-based analysis, site survey fieldwork, other sources of information (e.g. housing land supply monitoring database, NLUD database) and from submissions from landowners, developers and consultants. As part of the consultation on the scoping report there was a general call for sites and since then there has been a continual opportunity for submissions to be made. Consultation on

the Core Strategy and public consultation events, including the Community Conversations, has also brought forward additional sites for consideration.

The survey of sites

- 2.9 A walking survey was carried out for each settlement to check and assess suitable sites. This was combined with evidence from other sources. The analysis of sites considered was based on its current known use, ownership and discernable boundaries on the ground or as put forward by others. It should be noted that whilst the Council has endeavoured to consider all such potential sites identified above, not every potential site may have been included in the assessment. Any additional sites which may therefore come forward for consideration during the subsequent consultation period as a result of representations will be separately assessed on the same basis as the others and added to the list.

Estimating the Housing Potential

- 2.10 Having identified the different sources of housing supply and where to look for them, Officers then quantified the number of dwellings that could be provided on each site based on the following density ranges and examples from neighbouring developments:
- 40 dwellings per hectare or more in or on the edge of town centres
 - 30 – 40 dwellings per hectare in other urban areas and villages
 - 20 – 30 dwellings per hectare in remoter rural areas.
- 2.11 Constraints and opportunities were also identified through the use of on-site assessments, aerial photographs, evidence base from studies and surveys and, where relevant, information provided by landowners, developers and other agencies. Where a site had on-site constraints which affected only part of the site (e.g. floodplain), then the net developable area was reduced to exclude such areas and the number of dwellings which could be accommodated was also reduced accordingly.

Stage 2

- 2.12 This stage considered if the sites are realistically deliverable or developable. This part of the SHLAA was informed by work undertaken by consultants (Halcrow) for the Development Capacity Study which examined the existing level and capacity of key social, physical and accessibility infrastructure elements for settlements in the District and appraised the development viability of different types of land at settlement level within the prevailing market conditions. The Study provided a toolkit which was used to test the viability of different types of sites and a methodology for assessing the suitability of sites for housing¹.
- 2.13 The assessment of **availability** was based on information from current and previous planning applications, submissions made by landowners, developers and consultants for the SHLAA, previous Local Plan evidence and on-site survey evidence.

¹ Further information can be found in the Stages 1 and 2 Development Capacity Study Report (March 2011) available on the Council's website.

- 2.14 The assessment of **suitability** was based on the type of land at present, planning policy designations, the planning status of the site and its committed use, surrounding land uses and character, identifiable physical constraints and potential environmental and sustainability impacts.
- 2.15 The assessment of **viability** was based on cost assumptions (site related costs, infrastructure contributions, access, fees, contingency and developers profit), development site values based on the density assumptions set out above and land costs to give an average residual value for a typical 1 hectare site, highlighting whether the development is economically feasible or not.
- 2.16 Each site was categorised using the following criteria:

Availability

1. Available now –
 - a. site with extant planning permission
 - b. site with developer or owner expression of interest indicating availability within 5 years
 - c. site subject to current planning application which could be developed within 5 years
2. Potentially available –
 - a. site with expired planning permission, subject to current planning application, with extant planning permission which is unlikely to be developed within 5 years, or allocated in adopted local Plan but unimplemented
 - b. site with developer or owner expression of interest indicating availability in medium/longer term
 - c. site with no known legal, ownership or operational constraints which could be made available in medium/longer term
3. Currently unavailable –
 - a. site with known legal, ownership or operational constraints unlikely to be overcome in short or medium term but could become available in longer term

Suitability

1. Suitable –
 - a. brownfield site within current settlement boundaries with no significant policy restrictions, physical problems or limitations, potential impacts or adverse environmental conditions
 - b. other site which has been deemed suitable through planning permissions or allocation
2. Potentially suitable –
 - a. brownfield site within current settlement boundary with problems or conditions which could be overcome
 - b. suitable redevelopment or conversion site in open countryside and green belt;

- c. greenfield site within current settlement boundary with no known significant policy restrictions, physical problems or limitations, potential impacts or adverse environmental conditions;
 - d. sustainable greenfield site on edge of settlement boundary with no significant policy restrictions, physical problems or limitations, potential impacts or adverse environmental conditions;
3. Unsuitable –
- a. brownfield site with significant physical problems or limitations, potential impacts or adverse environmental conditions which are unlikely to be overcome, or considered to be in a highly unsustainable location;
 - b. greenfield site within settlement boundary with significant physical problems or limitations, potential impacts or adverse environmental conditions which are unlikely to be overcome;
 - c. greenfield site outside settlement boundary considered unsustainable due to its location and scale or with significant policy restrictions which cannot be overcome through boundary changes, physical problems or limitations, potential impacts or adverse environmental conditions which are unlikely to be overcome.

2.17 It should be noted that the assessment of suitability for greenfield sites outside settlement boundaries includes both open countryside and green belt sites. It will be through the Site Allocations DPD and emerging Local Plan that the Council needs to make a decision on the best approach to sustainable development and whether local reviews of the Green Belt would be necessary to achieve this (using this assessment as part of the evidence base to justify this). The assessment was also made irrespective of the level of housing provision that is actually needed within each settlement. However, if it was considered that only part of a site would be suitable for development, then the net area for development was reduced accordingly.

Achievability

- 1. Viable – development would be economically viable taking into account all likely costs and planning obligations associated with the site
- 2. Potentially viable – development could be made economically viable through reduced planning obligations
- 3. Unviable – development would not be viable even with reduced planning obligations

2.18 The assessment of achievability was informed by the Halcrow Toolkit which was used to assess the viability of different types of sites in each of the towns and larger villages. This indicated the following achievability scoring for each settlement:

Settlement	Brownfield	Greenfield	Conversions
Alton	1	1	1
Biddulph & Biddulph Moor	2	1	1
Blythe Bridge	1	1	1
Brown Edge	2	1	1
Caverswall & Cookeshill	2	1	1

Cheadle	2	1	1
Cheddleton	2	1	1
Endon	1	1	1
Ipstones	1	1	1
Kingsley	1	1	1
Leek	1	1	1
Oakamoor	1	1	1
Upper Tean	2	1	1
Waterhouses	1	1	1

Classification

- 2.19 Having assessed all sites in terms of their suitability, availability and achievability a judgement could then be made in the plan making context as to whether a site can be considered deliverable, developable or not currently developable for housing development.
- 2.20 In order to be considered **deliverable**, a site should be available now, offer a suitable location for development now and there should be a reasonable prospect that housing will be delivered on the site within five years. Only sites which are under construction or have an extant planning permission (either detailed or outline) are considered to be deliverable, unless there is clear evidence that a scheme cannot be implemented within the 5 years or only part of a scheme can be implemented in which case a reduced 5 year deliver figure is used.
- 2.21 In order to be considered **developable**, a site should be in a suitable location for housing development and there should be a reasonable prospect that it will be available for development within 15 years and could be viably developed even with reduced planning obligations. This does not require that a site should have planning permission, but there should be no significant constraints which would prevent the site being considered as an allocation or potential development site.
- 2.22 Sites which are unlikely to be available within 15 years or are unlikely to be viable due to likely significant development costs even with reduced planning obligations, or are unsuitable due to significant restrictions and limitations or unsustainable location were considered **undeliverable**.
- 2.23 The following matrix was used to help classify each site based on their assessment of availability, suitability and achievability. A judgement was then used based on the degree of availability, suitability or achievability as to whether a site was deliverable in the short term (A), developable in the medium/longer term (B) or had no or limited potential and therefore could not be considered deliverable (C).

Classification		Availability	Suitability	Achievability
A	Deliverable Sites (1-5 years)	1	1	1 or 2
B	Developable Sites (6 – 15 years)	1 or 2	2	1 or 2
C	Undeliverable Sites No or limited potential.	3	3	3

Database Coding

- 2.24 All assessed sites were recorded onto an Access database to enable analysis and reporting to be undertaken. The database contains all of the background site details information regarding each site as well as the officer's assessment of each site and its classification.
- 2.25 Codes were used to record certain site details. These are set out below.

Site Details

Policy - Policy designation (including policies maps from 1998 Local Plan)

- 1 = Within settlement boundary
- 2 = Green belt
- 3 = Open countryside
- 5 = Conservation Area
- 6 = SSSI, Nature Conservation designation
- 7 = Archaeological Site
- 8 = Protected floodplain
- 9 = Listed Building
- 10 = TPO

Status – Current planning status of site

- COM = Completed
- UC = Under construction
- ALP = Site allocated in previous Local Plan
- OPP = Outline planning permission
- FPP = Full planning permission
- NC = No commitment

Commitment -Use for which site is currently committed as a result of planning permission or previous local plan designation

- 1 = Housing
- 2 = Employment
- 3 = Retail
- 4 = Mixed use
- 5 = Open space/recreation/allotments
- 6 = Other
- 7 = None/not applicable

Use – Existing land use of site

- 1 = Housing
- 2 = Employment

- 3 = Retail
- 4 = Mixed use
- 5 = Open space/recreation/allotments
- 6 = Vacant/underused
- 7 = Derelict
- 8 = Agricultural/grazing/forestry
- 9 = Other

Type - Current land use type

- G = Greenfield
- B = Brownfield
- B/G = Part brownfield, part greenfield

Hierarchy – Hierarchy of settlement as defined in Core Strategy

- T = Town
- LV = Large village
- SV = Small village
- OC = Open countryside

Conversion – Type of development

- C = Conversion of existing building
- NB= New build development

Location – Current location of site or building

- U = Within existing urban area
- R = In rural area outside or on edge of existing urban area

Greenbelt – Whether any part of site is within the green belt

Flooding – Whether any part of site is within flood zone 3 and at risk of flooding

Owner - Nature of owner of site or building

- 1 = Local authority
- 2 = Other public body/housing association
- 3 = Privately owned
- 4 = Not known

Site Assessment

Deliverability Assessment -

- Availability -** 1 = Available now
- 2 = Potentially available

3 = Currently unavailable

Suitability -
1 = Suitable
2 = Potentially
3 = Unsuitable

Achievability -
1 = Viable
2 = Potentially viable
3 = Unviable

Classification -
A = Deliverable (within 5 years)
B = Developable (6 – 15 years)
C = Undeliverable

Stage 3

- 2.26 This stage seeks to identify deliverable sites which can go forward to be considered as potential allocations in the Site Allocations DPD and the emerging Staffordshire Moorlands Local Plan.
- 2.27 This initially involved liaising with known landowners, consultants and developers on all sites which are above the minimum threshold for allocations as required in the Core Strategy. This is currently sites with a net capacity of 10 or more dwellings in or on the edge of the towns and generally 6 or more dwellings in or on the edge of the large and small villages and in the open countryside and green belt away from settlements. Sites below this threshold will not be considered for formal allocation unless a site is of strategic significance.
- 2.28 The purpose of this exercise was to ensure that the details of each site are accurate and that the assessment is fair and reasonable - it is not to ascertain at this stage whether a site should or should not be allocated. Consultation on an earlier version of the document was undertaken during August 2012 following which a number of changes and corrections were made. **This study (July 2015) has a base date of 30 September 2014 and the findings are a 'snap-shot' of information held at this time.**
- 2.29 This document underpins the long list of site options which are being consulted on between 6th July and 14th September 2015. Consultation on the content of this SHLAA is also subject to public consultation between these dates.
- 2.30 It should be noted that the identification of potential housing sites within the SHLAA does not imply that planning permission would be granted for residential development. The SHLAA is a high level assessment of potential housing opportunities. It does not determine planning applications. Determination of planning applications will require a high level of detail and understanding of the site constraints. Communities and applicants cannot rely on the findings or conclusions in the SHLAA in isolation.

3. Summary of Results

3.1 It should be noted that the figures included in this summary are an indication only of potential based on a judgment of deliverability and have not involved any decision at this stage on whether a site should or should not be developed, nor have they been constrained by existing planning policies. The inclusion of any site within this summary does not therefore imply that proposals for the development of that site would necessarily be permitted or allocated.

Large Sites

3.2 The threshold for the allocation of sites in the Site Allocations document is 10 dwellings or more in the towns and generally 6 dwellings or more in the rural areas. Sites below this threshold will not be specifically allocated for development unless they are of strategic significance, for example if a significant change of use or policy designation is involved.

3.3 Large sites which meet this threshold will make up the bulk of the requirement for housing in the rural area and are considered key to delivering the objectives of the Core Strategy. This does not mean that small sites which are not allocated will not be supported, but they would be expected to come forward through planning applications in accordance with policies set out in the Local Plan.

3.4 A list of all of the sites above the threshold for allocations including the assessment scores, is set out in Appendix A. Maps and full details of each of these sites including the reasons for the assessment scores are available on the website at:

<http://www.staffsmoorlands.gov.uk/shlaa>

The SHLAA is a live database and as such sites will be continually reviewed and periodically published on this website.

3.5 The results of the assessment are summarised below:

Table 1 - All Assessed Supply of Large Sites by Location

Supply	Urban	Rural	Urban/Rural	Total
Deliverable Supply (A)				
Total Deliverable Supply	756	139	0	895
Developable Supply (B)				
Total Developable Supply	2,302	8,786	318	11,406
Potential Supply (A+B)				
Total Potential Supply	3,058	8,925	318	12,301
Undeliverable Supply (C)				
Total Undeliverable Supply	2,009	23,240	35	25,284
Assessed Supply (A+B+C)				
Total Assessed Supply	5,067	32,165	353	37,585

Table 2 – All Assessed Supply of Large Sites by Land Type

Supply	Conversions	Brownfield	Brownfield/ Greenfield	Greenfield
Deliverable Supply (A)				
Total Deliverable Supply	77	590	129	99
Developable Supply (B)				
Total Developable Supply	10	718	650	10,028
Potential Supply (A+B)				
Total Potential Supply	87	1,308	779	10,127
Undeliverable Supply (C)				
Total Undeliverable Supply	22	440	1,203	23,619
Assessed Supply (A+B+C)				
Total Assessed Supply	109	1,748	1,982	33,746

Table 3 – Distribution of Potential Supply of Large Sites

Location	Deliverable Supply	Developable Supply	Total Potential	Percentage of total
Leek	495	2,716	3,211	26%
Biddulph	127	1,710	1,837	15%
Cheadle	54	3,428	3,482	28%
Rural Areas	219	3,552	3,771	31%
Total	895	11,406	12,301	100 %

Small Sites

- 3.6 Small sites below the threshold of 10 dwellings in the towns and 6 dwellings in the rural areas, whilst not being specifically allocated, will still be supported in appropriate locations through policies in the Local Plan and an allowance will be made for their contribution towards meeting the housing requirements of the District. The nature of small sites means that it is difficult to predict with any degree of certainty where or when such sites may come forward. The SHLAA does however identify small sites in order to give an indication of the potential for such sites to come forward and as evidence to support the allowances made in the Local Plan for their contribution.
- 3.7 Small sites have been assessed and classified in the same way as the larger sites. A list of all of the small sites including the assessment scores, are set out in Appendix B. Details of the location and assessment of small sites are not published on the website for reasons of confidentiality. The results of this assessment are set out below:

Table 4 All Assessed Supply of Small Sites by Location

Supply	Urban	Rural	Total
Deliverable Supply (A)			
Total Deliverable Supply	372	124	496
Developable Supply (B)			
Total Developable Supply	714	352	1,066
Potential Supply (A+B)			
Total Potential Supply	1,086	476	1,562
Undeliverable Supply (C)			
Total Undeliverable Supply	281	225	506
Assessed Supply (A+B+C)			
Total Assessed Supply	1,367	701	2,068

Table 5 – All Assessed Supply of Small Sites by Land Type

Supply	Conversions	Brownfield	Brownfield/ Greenfield	Greenfield
Deliverable Supply (A)				
Total Deliverable Supply	155	146	14	181
Developable Supply (B)				
Total Developable Supply	55	133	73	805
Potential Supply (A+B)				
Total Potential Supply	210	279	87	986
Undeliverable Supply (C)				
Total Undeliverable Supply	13	102	48	343
Assessed Supply (A+B+C)				
Total Assessed Supply	223	381	135	1,329

Table 6 – Distribution of Potential Supply of Small Sites

Location	Deliverable Supply (A)	Developable Supply (B)	Total Potential	Percentage of total
Leek	115	197	312	20%
Biddulph	66	100	166	11%
Cheadle	89	100	189	12%
Rural Areas	226	669	895	57%
Total	496	1,066	1,562	100 %

4. Conclusions

- 4.1 The adopted Core Strategy identifies a net requirement of 6,000 dwellings to be built across the District between 2006 and 2026. Since 2006 a total of 2,623 dwellings had already been built or were committed as at 30th September 2014 leaving a total net requirement 3,377 to be identified on new sites of dwellings (see table 7 below).

Area	Amount	Required Provision	Completions	Commitments	Net Residual requirement
Leek	30%	1,800	495	595	710
Biddulph	20%	1,200	204	182	814
Cheadle	22%	1,320	144	141	1,035
Rural	28%	1,680	555	307	818
Total		6,000	1,398	1,225	3,377

- 4.2 Excluding sites identified as currently deliverable (A), as these have already been accounted for in the commitments, the assessment has identified a total potential additional supply of 11,406 dwellings on large developable sites (B) which could forward in the medium/long term by 2026. A further 25,284 dwellings were also identified on large sites considered presently undeliverable (C).
- 4.3 Whilst the assessment indicates that there is sufficient potential supply to meet the net requirement for the District, this supply does not take account of existing planning policies (such as green belts) which will be subject to review. Further refinement of the potential supply will be necessary to identify sites which could go forward as potential allocations.
- 4.4 In terms of the deliverable supply of sites which could come forward within 5 years, the assessment demonstrates that there is currently a deliverable supply of 1,391 dwellings (large and small sites categorised as 'A'). Taking into account losses and completions on sites under construction this equates to 1,225 dwellings. Of the total deliverable supply, around 80% are on brownfield, conversion or partial brownfield sites and 81% within the urban area. The 5 year land supply assessment at 30th September 2014 identifies 2.08 years supply of deliverable sites. This includes the shortfall from 2006 and a 20% buffer as stated in the National Planning Policy Guidance (para 47).
- 4.5 The developable supply of large sites which could come forward from 6 years onwards is significantly greater at 11,406 dwellings. However, of this only around 14% are on brownfield, conversion or partial brownfield sites and 24% are within urban areas. This includes greenfield sites and sites in the open countryside and green belt which, whilst potentially suitable, may not be deemed necessary or of lower priority for subsequent allocation. It is not therefore implied that all of these sites should be developed.

- 4.6 In terms of the distribution of the potential supply, the assessment indicates that there is sufficient potential to meet the requirements in the Core Strategy for all of the towns and the rural areas.

Area	Amount	Required Provision	Completions and Commitments	Additional Developable Large SHLAA sites	Total Potential Supply
Leek	30%	1,800	1,090	2,716	3,806
Biddulph	20%	1,200	386	1,710	2,096
Cheadle	22%	1,320	285	3,428	3,713
Rural	28%	1,680	862	3,552	4,414
Total		6,000	2,623	11,406	14,029

- 4.7 It should also be noted that the classification of a site as currently undeliverable does not imply that that site could never come forward at some point in the future if, for example, there were changes in circumstances which could make a site more sustainable or environmentally acceptable, or it could be demonstrated that any severe ownership or physical constraints could be overcome. Some sites currently classified as undeliverable may therefore become developable in the future. Similarly in the light of further more detailed assessment of individual sites and subsequent owner or developer interests, some sites currently classified as developable may become deliverable in the future.

Monitoring and Review

- 4.8 The SHLAA is constantly kept under review in terms of the sites contained within it and their assessment of availability, suitability and achievability in the light of more recent evidence or changes in circumstances in order to ensure that it is up-to-date and realistic. This is done by monitoring of planning commitments identified in the Council's Housing Land Supply database, taking account of land availability submissions by landowners and developers, by periodically undertaking on-site surveys, and through regular liaison with key landowners and developers. Detailed assessment work undertaken for the Site Allocations DPD has also fed into the SHLAA up-date.

Appendix A - SHLAA Site Summary - Large Sites by Classification

Reference Number	Address of Site	Status	Type Location	Availability	Suitability	Achievability	Classification	Net Area	Full Capacity	5 Year Capacity
A
