

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

David Abbott

We moved to the village 12 years ago, attracted by the character of the area of the old part -Hollow Lane, the church, Fold Terrace, the Gully and the open fields. We walk the Gully regularly, partly to avoid the main road but mainly it is a walk in the countryside with wonderful views> The fields are a green lung for the village and make it different with their wide range of wildlife - this all adds to the quality of life. To lose the fields would lose the peace and quiet of the area and make Cheddleton no different to any other built up town.

If the fields were to be built on there would be an increase in traffic/pollution, with commensurate access and road safety problems, particularly for parents and children getting to and from school. The village does not need an increase in pressure on its infrastructure 2019-10-14

Comment:

Judith Abbott

These two fields are an important space between the conservation area of the old village and the newer, residential areas. This buffer emphasises the special qualities of the of the ancient church and its surroundings. It has been proven that open spaces and access to nature are important to mental health, especially in these stressful times.

I walk through the gully between these fields at least once a day and love the peace, quiet and safety away from traffic. The hedges are always full of birds and the fields have a wide range of wildlife. The views across the fields to Morridge and the Peak District never fail to delight.

These fields add to the appearance and attraction of the village. The heritage railway and the canal both bring visitors from outside the village who enjoy the peace and beauty here. Losing these open spaces would be so detrimental to this.

These open spaces need to be preserved for the benefit of the village and visitors for evermore. If lost, the peace, beauty and wildlife can never be recovered. 2019-10-14

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be built along the river bank. The access road onto BD 087 is on the narrow side of the river bank approximately 10M wide. I believe that an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land. I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Buy in is key to developing any plan – there is no buy into this plan by any of the people in Biddulph – this cannot be dressed up. No due process has been followed. To push this modified local plan through at break neck speed can only lead to an expensive legal outcome. SMDC has had 8 years to get this local plan right, this Modified Local Plan has taken 3 months from 26th June, no public face to face consultation, and a hurried last minute consultation period with almost no one informed. Only the Site Owners have been kept up to date. Why!

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How can you help?

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

If you would prefer to make a representation by yourself please email forward.plans@staffs Moorlands.gov.uk or by post to Freepost RRLJ-XCTC-JBZK, Forward Plans, Staffordshire Moorlands District Council, Regeneration Services, Moorlands House, Stockwell Street, Leek, ST13 6HQ. **Please make sure you include your name and address.**

For more information visit www.cheddletonresidents.org

Patricia Ash

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment

PLEASE SEE ATTACHED LETTER

To whom it may concern.

I have lived in Village
since retirement (10 yr)
Although I cannot walk etc
Gully now I do remember
walking along it in the past.
I strongly object to this
lovely green space losing
its special status.

Phillip Ash.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM59 page 230

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant

Sound - Positively prepared

Sound - Justified

No

Sound - Effective

Sound - Consistent with national policy

Complies with the Duty to co-operate

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Decision to delete green space designation 47 Caverswall Old Road. I am concerned that this decision will mean that we may lose this small piece of grass and trees in the middle of our community. It is in constant use by children playing and dog walkers and picnics in the summer and sledging when it snows. What is the reason for it's status being removed? There is no explanation I can see in the document and as far as I know no one has been observing how and how often this space is used by us - when did this take place please?

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Redesignate green space designation 47 Caverswall Old Road so that the local community can continue to use this space for recreational activity.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

Objects to deletion of LGS 47 (Caverswall Old Road, Blythe Bridge) MM59. Concerned that as a result the space will be developed and consequently lost to the community. Would like to see LGS designation reinstated.

Officer Response

The green space at Caverswall Old Road is still designated as open space which offers protection under Local Plan Policy C2 (see MM31). Regarding the reasons for deleting the LGS, refer to Inspector's

Post Hearing Advice – Main Modifications and Related Matters – paras. 32 & 33. (EL6.004) and subsequent Inspector's letter (EL6.008). On the basis of the Inspector's recommendations, the Council agreed main modifications to delete the Local Green Space (LGS) at the Council Assembly meeting on 26th June 2019.

Recommendation

No change.

Sansom, Claire

Dear sir/Madam

Please find below my comments on the Main Modifications to the SMDC Local Plan, MM12. Safeguarding of fields in Gillow Heath.

I notice that you omitted part of your evidence base when you made decisions about these sites on 26th June 2019 at the Council Assembly. You omitted the ecological evidence base and also incorrectly stated that these fields are urban / industrial land, which is incorrect.

The decision to safeguard fields in Gillow Heath needs reconsidering both in light of your errors and in light of the evidence contained within the emerging Biddulph Neighbourhood Plan (REG14 closing 4th November 2019).

The SMDC Main Modifications are not Sound and do not Comply with the Duty to Cooperate.

Please acknowledge our comments.

Regards
Mr David and Mrs Katherine Bailey

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

Jane Barlow

Walking the footpath from Ox Pasture towards the Church is like walking back in time.
Hedgerows, birds, blackberries, wildlife, wildflowers and spectacular views of the surrounding countryside
It is a gateway to the historic centre of the village which should be cherished
We need to maintain the integrity of the historic village 2019-10-26

PHILIPPA BARNET

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment

Please see attached letter.

Philippa Barnett

1 September 2019

Dear Sir/Madam

I am writing to you to express my deep concerns regarding the proposed development of the two fields on either side of the Gully in Cheddleton for the purpose of residential housing.

This area not only provides a beautiful, tranquil walk through the heart of the village but is a safer alternative to negotiating the extremely busy main road with the narrow pavements, especially for the elderly and parents with young children.

The fields are full of wildlife and provide a perfect habitat for many protected species. There are spectacular views of the conservation area in the centre of the village and further into the Peak District.

This area should be protected for future generations to enjoy as I and my family have and to ensure the diverse and wonderful wildlife can continue to thrive. Once destroyed by development this beautiful area can ever be replaced.

There are far more suitable 'brownfield' sites that could be developed without having the same devastating impact on the village.

Kind regards

Philippa Barnett

Comment:

Lynne Barnsley

I wish to express my deep concern regarding the proposed removal of Local Green Space (LGS) designation from the fields Ox Pasture East and West in Cheddleton.

I am a resident of Cheddleton and feel that the loss of LGS designation would irretrievably damage these important sites at the heart of the village, both for current users such as myself and for future generations.

FOOTPATHS

Like so many others, I regularly use the footpath to the south of site 29 Ox Pasture West and also that which runs between the two sites, 'the gulley'.

The gulley is well used by villagers and visitors to get from Ox Pastures to the school, church, community centre, tea rooms and pub as well as for walkers simply enjoying the environs. It's especially busy at the start and end of the school day but is heavily used throughout the day and in the evening. With fields on either side, it is a safe, tranquil and green haven away from the noise and pollution of traffic on the main road.

From these footpaths, there are currently uninterrupted views across the fields, including that of our historic village centre.

If these fields were to lose their LGS protection, I believe it would only be a matter of time before the rural, peaceful and historic nature of this area would be lost.

BIOLOGICAL DIVERSITY

The footpaths adjacent to the fields also form part of my regular, several times a week, dog walking routes. Looking out over the fields, there's always something interesting whatever the time of year. Grasses and wildflowers in Summer and, just now, Autumn colour.

Close by, there's the constant sight and sound of a huge variety of birds, both in the hedgerows and the fields themselves. Seeing pheasants in the field on the East side of the gulley, with the moors in the distance, gives a wonderful sense of place.

Only last week, I saw in the western field a heron. This was the first time I'd seen one here, although we shouldn't be surprised, being as we are an important part of the diversity of the Churnet Valley. As local people know, the site boasts a wealth of wildlife and no doubt the heron had come to feed on the frogs, toads and other creatures in this green oasis.

I wonder how many other species, some not yet even glimpsed, would have vital parts of their habitats destroyed if we lose these spaces?

Without the protection of LGS designation I fear these sites, and the biological diversity they contain, will be lost.

HISTORIC HEART OF THE VILLAGE

Both sites are close to the historic heart of the old village and the Conservation Area. This includes listed structures, monuments and buildings.

I feel that retaining the fields' protected status will allow them to continue to form part of the important buffer zone between the historic village and the newer developments.

Without this buffer I feel that the character of the old village, with its medieval church and its rural nature, will be overwhelmed.

I believe that retention of LGS status will help to safeguard this buffer.

"RECOVER NATURE AND LEAVE OUR ENVIRONMENT IN A BETTER STATE THAN WE INHERITED"

Like other bodies, local and national, Staffordshire Moorlands District Council has declared a climate emergency and is drawing up action plans to address it. I note that the Cabinet Member for Climate Change has publicly stated that in this regard the aim is "to recover nature and leave our environment in a better state than we inherited".

I would therefore ask you to consider whether removing LGS designation from these two fields in Cheddleton will help SMDC to progress towards that goal, or would it be in direct opposition to what our locally elected representatives have unanimously agreed?

I believe the latter to be the case and to remove LGS designation would be a mistake. A mistake like those made in the past, large and small, local and national, which we now have the difficult task of trying to recover from.

We must step back from this before it's too late and irrevocable damage is done.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

Janette Barr

These two small fields either side of the ancient footpath known as the gully are particularly special to me and my community for many reasons:

Biodiversity

The area is an important green corridor in the heart of the old village providing valuable habitats for a variety of protected and priority species. The community have been actively involved in recording wildlife sightings on the sites and adjacent gardens and these have formally submitted to the Staffordshire Ecological Record. The species recorded include:

- Bats. There are at least 3 bat roosts recorded in adjacent gardens and bats are regularly seen foraging over the sites;
- Hedgehogs (now classed as a species vulnerable to extinction) have been recorded in several gardens adjacent to the sites and in the gully;
- Badgers have been recorded in the gully and adjacent gardens to the sites. There are visible badger tracks through both sites;
- Grass snakes have been recorded in several adjacent gardens to the sites;
- A Great Crested Newt sighting (confirmed by DNA testing) has been recorded in a garden pond within 100m of Ox Pasture West. This field is the nearest appropriate habitat for this species to overwinter and feed.

It is recognised that fragmentation in habitat is becoming a real problem for biodiversity and retaining these fields as Local Green Space will help prevent further fragmentation and provide a green corridor to the rest of the Churnet Valley.

Tranquillity and Cherished Views

The fields and adjacent footpaths are cherished for their tranquillity, with spectacular and uninterrupted views into the village and out to the Peak District. The gully provides a safe and quiet route for adults and children accessing the

school, church, community centre and local pub. The children from the First School have recently carried out a nature project on the southern footpath adjacent to Ox Pasture West and both fields are a wonderful visual resource for the community.

Rural Character

The village has seen substantial housing development over the decades and the fields provide a visual buffer between the old Conservation Area of the village and the newer housing estates to the south. If the fields were to have LGS status they would only be 2 of 3 sites in the village with this protection. If these sites lose their long-standing protected status and become developed, then the centre of the old village will have lost its rural connection and its character will be irrevocably changed.

Setting of Heritage Assets

The village is part of the Churnet Valley and attracts tourists to the grade 2* listed church, Flint Mill, Caldon Canal and Churnet Valley Railway. Visitors walk the paths through the village and these fields together with the gully and the southern footpath form part of the setting of the village Conservation Area. Any diminution of this setting by development will permanently damage the village's heritage assets and permanently undermine the attractiveness of the village to future tourists.

Localism

The community has demonstrated over and over again that these fields are special and should retain their protected status. In fighting a recent planning application on Ox Pasture West over 370 separate objections were submitted. As part of the current consultation process, the community has passed to the Parish Council an 825-signature petition requesting the Inspector reconsider his recommendation regarding the LGS designation of these sites. This demonstrates yet again that these fields are particularly special to this community and if Localism means anything these fields should have the Local Green Space designation. The community and their elected representatives want this.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. 3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be built along the river bank. The access road onto BD 087 is on the narrow side of the river bank approximately 10M wide. I believe that an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land. I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (please select all that apply)

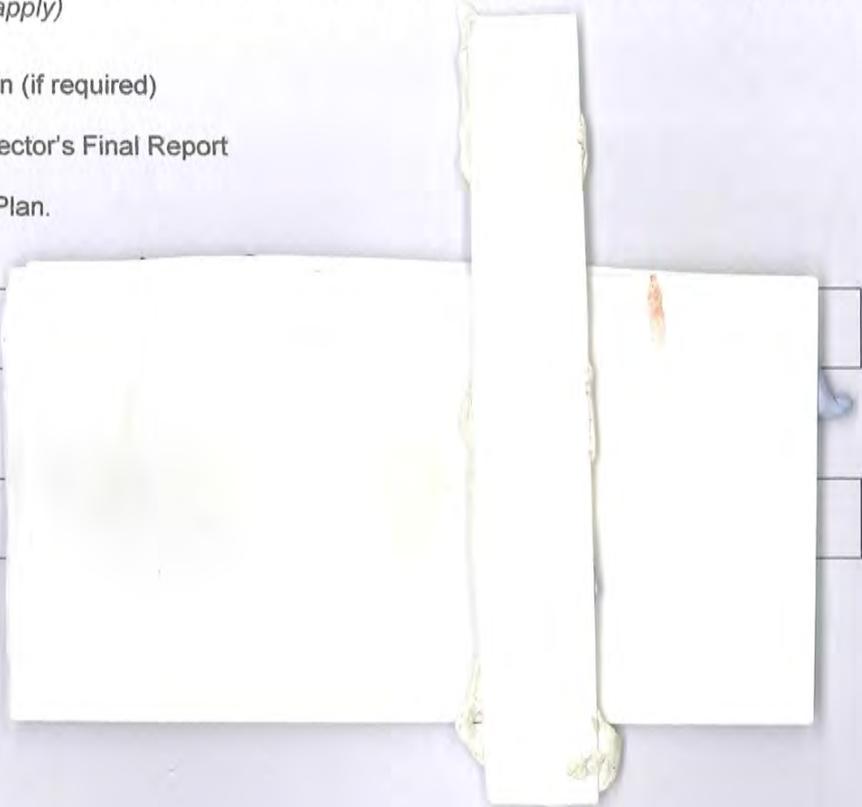

Further hearing session (if required)

Publication of the Inspector's Final Report

Adoption of the Local Plan.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Buy in is key to developing any plan – there is no buy into this plan by any of the people in Biddulph – this cannot be dressed up. No due process has been followed. To push this modified local plan through at break neck speed can only lead to an expensive legal outcome. SMDC has had 8 years to get this local plan right, this Modified Local Plan has taken 3 months from 26th June, no public face to face consultation, and a hurried last minute consultation period with almost no one informed. Only the Site Owners have been kept up to date. Why!

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Staffordshire Moorlands Local Plan Examination

MAIN MODIFICATIONS CONSULTATION - SEPTEMBER 2019

Representations Form 4

Guidance Notes

Please ensure that you have read the accompanying 'Statement of Representations Procedure' before completing this form.

The Local Plan Main Modifications Schedule and related documents, including; the Sustainability Appraisal of Main Modifications, Biddulph options assessment, Sustainability Appraisal of Alternative Development Options for Biddulph, Housing Implementation Strategy, Equalities Impact Assessment, Tunstall Road Masterplan Executive Summary and Wharf Road Masterplan Executive Summary can be viewed on the District Council's Main Modifications consultation webpage, Council offices and local libraries.

Website: <http://www.staffsmoorlands.gov.uk/localplan>

Council offices:

- Leek** Moorlands House, Stockwell Street, Leek, Staffordshire, ST13 6HQ (8.45am - 5.15pm Monday - Thursday and 8.45am - 4.45pm on Friday)
- Cheadle** Councils Connect, 15a-17 High Street, Cheadle, Staffordshire, ST10 1AA (9.00am - 12.30pm & 1.00pm - 5.00pm on Monday, Wednesday and Friday)
- Biddulph** Town Hall, High Street, Biddulph, Staffordshire, ST8 6AR (9.00am - 5.00pm Monday – Friday)

Please return this form by **5pm on 31 October 2019** to the email or postal address given below or by completing the online questionnaire at : <http://www.staffsmoorlands.gov.uk/localplan>

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be built along the river bank. The access road onto BD 087 is on the narrow side of the river bank approximately 10M wide. I believe that an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land. I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (please select all that apply)

Further hearing session (if required)

Publication of the Inspector's Final Report

Adoption of the Local Plan.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Buy in is key to developing any plan – there is no buy into this plan by any of the people in Biddulph – this cannot be dressed up. No due process has been followed. To push this modified local plan through at break neck speed can only lead to an expensive legal outcome. SMDC has had 8 years to get this local plan right, this Modified Local Plan has taken 3 months from 26th June, no public face to face consultation, and a hurried last minute consultation period with almost no one informed. Only the Site Owners have been kept up to date. Why!

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

To Whom it may Concern
Cheddleton Green Spaces

Freda Bekan

I have lived in this property for seven years and have enjoyed the wonderful views over the fields to the Old Heritage Village church of Cheddleton + beyond to the magnificent Roaches. A breathtaking unrestricted view.

My whole family + now my Grandchildren enjoy walking along the footpath + Gully between the two fields on route to school. We watch the seasons change in the hedgerows + can listen to the birdsong without the disturbance of road noise!

On warm evenings we have all watched out for the bats to fly over the fields into our garden at dusk whilst they feed on the wing.

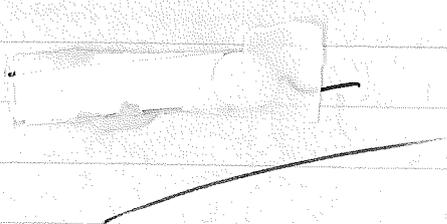

I cannot imagine Cheddleton being without this wonderful Oasis of Land! The Heart + Lungs of our beautiful village. Once they lose their protected status they will be gone forever. I personally will find that very hard to contemplate.

I would also find it hard to explain to my Grandchildren why this Sanctuary for all wildlife could be lost for all time.

I would love for them to be able to walk the paths on searches for the various wildlife bugs & flowers they so enjoy now. In safety away from busy roads & traffic.

Please protect what small Greenspace this Village has left for our future Generations to enjoy before it is lost & is gone forever!

"They paved Paradise & put up a parking lot"
Joni Mitchell

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How can you help?

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

If you would prefer to make a representation by yourself please email forward.plans@staffs Moorlands.gov.uk or by post to Freepost RRU-XCTC-JBZK, Forward Plans, Staffordshire Moorlands District Council, Regeneration Services, Moorlands House, Stockwell Street, Leek, ST13 6HQ. **Please make sure you include your name and address.**

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment

PLEASE SEE ATTACHED LETTER

4th September 2019

To whom it may concern.

Reference fields adjacent to the footpath known locally as the Gulley.

I previously lived in the Staffordshire Moorlands up in the hills just outside leek. After next living abroad for 12 years it was time to return to our roots. As our family were settled in the East Midlands and the North we had a large area to consider. Our choice was Cheddleton. The reason was it's pleasant semi rural open aspect, a village feel centred around old Cheddleton conservation area which was a little oasis amongst more recent developments. The fields either side of the Gulley protect the conservation area and the Church of St Edwards. We didn't want to live in a busy urban centre but in a vibrant community in touch with the natural environment.

We have never regretted our choice and one of our sons and his family so impressed with Cheddleton has also relocated his family to the area.

It's a delight to walk our grandchildren to school along the gulley with fields either side. The children see this as a mini playtime as they can run along the gully without fear of cars. Additionally the fresh smells and sounds of the fields either side are a real delight. A special treat is to stay up late in the twilight and watch the bats swooping on insects rising from the fields.

The loss of these fields would be an absolute disaster for Cheddleton. The identity of the village, particularly the conservation area would be lost forever. Cheddleton now is a semi rural village the loss of these significant green spaces enjoyed for generations would be lost and our beautiful village would become just another urban sprawl.

Hikers regularly set Cheddleton as their destination, particularly the ancient pub in its historic setting within the conservation area. Lose our green space and who on earth would target a huge urban sprawl and local business would suffer.

In summary these beautiful natural fields help Cheddleton cling to its semi rural aspect. Please don't put this under threat by making our fields pray to predatory developers.

Yours sincerely

NT Belson

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

Rob Belson

These fields are special to me now as a place that holds echoes of my childhood. They were the space where my group of friends used to go to hang out, make dens and where the 'important business of the day were discussed. Today they provide a different sort of distraction, an area to rest unwind and get back to nature. There are no roads bordering this space, something that's quite unique and so it's quiet and great place to just spend a few moments in contemplation.

A place where there is opportunity to escape the modern Cheddleton and approach the older part of the village as generations before us may have done, on foot from a field without a motorcar.

There are rabbit holes, a fox set and I have found newts and other creatures in this area.

This area should remain a local green space for now and the future. Once it's gone it will never be brought back 2019-10-14

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How can you help?

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the [Local Plan website](#) and in the [Statement of Representations Procedure Document](#) on the SMDC website.

If you would prefer to make a representation by yourself please email forward.plans@staffs Moorlands.gov.uk or by post to Freepost RRLJ-XCTC-JBZK, Forward Plans, Staffordshire Moorlands District Council, Regeneration Services, Moorlands House, Stockwell Street, Leek, ST13 6HQ. **Please make sure you include your name and address.**

Comment

Please see attached letter.

Non urban and green areas are so important to the urban world. They make them so much more liveable. I think these 'cracks in the concrete' are essential. Imagine if all our town's and city's green parks and spaces were filled-in with brick and mortar, what aesthetic impoverishment that would be. Thus it is, that I appeal for the beautiful green open areas adjacent to Cheddleton's historic centre, to be protected from developers and preserved in perpetuity by being classed as Green Spaces. This corridor of species rich nature connecting two housing areas, with spectacular views of the Peak District National Park is so inspiring and uplifting. It is a minor miracle that it has been preserved this long. With access from three footpaths it is available to all in the village and is particularly used by shoals of children and parents twice a day making their way to and from the local primary school.

I hope you will give this plea due consideration.

Mr Raymond Berringer,

[Redacted address block]

Please see attached letter

Green Space, Cheddleton

Walking from our home, down either the front or the pleasant leafy back of Ox Pasture, we reach the ancient walkway of the Gully with green fields on either side. This area contributes to physical and mental health adding exercise on a village walk through the tranquillity of being surrounded by beautiful nature, clean air and safely away from traffic noise.

This is a place that walkers can gaze at the magnificent views of Staffordshire Moorlands, can hear birds singing and the wind in the trees. Each small change of season is here to be noted from this Green Lung of the village.

We encounter others, walking in this safe, clear air pathway, some taking children to and from school, where parents can be seen to stop and point out natural features (wild flowers, birds, fungi) to their children. It's a place where people stop and talk, pass on news, point out changes in the habitat, or birds and mammals they have spotted.

This beautiful haven provides a refuge and corridor for wildlife and supports vital bio diversity. We have seen Owls, badger tracks, bats, small mammals and many types of birds, bees and butterflies on our way to and from the old village centre, going past the ancient Animal Pound and on to the Listed Building of St. Edwards Church with its stained glass windows by Edward Burne-Jones and William Morris.

This area provides a green, quiet, safe, clean air, social corridor, away from the road, and the fumes.

I suggest that the land be offered for purchase to the Cheddleton Land Charity Trust for REWILDING as part of the Climate Emergency strategy as a way of promoting not only a green corridor for bio diversity, but also a tranquil area to sooth the soul as well as providing physical exercise. All vital for this village.

Victoria B. Berringer

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Biddulph Town Council

Sent by email

Tuesday 29 October 2019

Dear Sir/Madam

**Planning and Compulsory Purchase Act 2004
Town and Country Planning (Local Planning) Regulations 2012
Staffordshire Moorlands Local Plan Consultation – Main Modifications
Response of Biddulph Town Council**

We are writing in response to the proposed main modifications to the Staffordshire Moorlands Local Plan.

In general, we welcome the Local Plan, which sets out a planning framework for the entire district, including Biddulph as one of the three main towns. We support most of the policies relevant to Biddulph, but do have reservations about some of the proposed main modifications, including the masterplans. Our concerns are set out in this letter.

As the neighbourhood plan qualifying body for Biddulph, the Town Council has embarked on the preparation of a neighbourhood plan and neighbourhood development order. There is clearly a requirement for the local planning authority and neighbourhood plan body to work in close liaison. The comments contained in this representation have been prepared against that context.

MM1:

We acknowledge the amended dates of 2014 to 2033, as recommended in the inspectors post-hearing advice.

MM12:

Paragraph 7.50: The emerging Biddulph Neighbourhood Development Plan also encourages the re-use of buildings for residential accommodation. It is important for the Local Plan to recognise here and in other sections that neighbourhood plans can also include policies to help deliver growth.

New Paragraph between 7.50 and 7.51: The addition of this paragraph states *“These sites have been removed from the Green Belt but are located outside of the “Biddulph Town Boundary.”* We suggest re-wording this to ‘Biddulph Town Centre Boundary’ for clarity and to avoid confusion.

Policy SS6 Biddulph Area Strategy:

Bullet Point 1: This has been modified to remove the requirement for starter homes. The Housing Needs Assessment April 2018 by AECOM to support the neighbourhood plan concluded that:

Biddulph Town Council

e: biddulph@staffordshire.gov.uk www.biddulph.co.uk

Biddulph Town Council

"Owner occupation has been the dominant trend in tenure; however, as we have seen, this tenure is beyond the means of the vast majority of households; planners should therefore encourage other forms of tenure to come forward, such as shared ownership, starter homes and the private rented sector."

The modification to remove the reference to starter homes is clearly out-of-kilter with recent evidence on housing need. The modification would therefore be at odds with national policy and guidance.

A copy of the housing needs assessment can be found at: https://biddulph.co.uk/wp-content/uploads/2019/03/HNA_Biddulph_FinalVersion.pdf

Bullet Point 6: This is the first point where the safeguarded sites are identified (BD062, BD068 and BD087). They are described as *"being between the urban area and the Green Belt"*. This does not reflect the character or nature of these sites. This should be amended to say *'removed from the Green Belt and designated as Safe Guarded land'* to make clear the transition, if this is agreed.

More fundamentally, it is not clear when this land was identified for safe-guarding, nor the process to arrive at this decision. There has been no liaison with Biddulph Town Council, which is also a statutory planning body. We have not yet taken advice on the legal implications of this, but at best it represents very poor practice.

Biddulph Town Council has raised concerns over disparities between the way these sites are dealt with in the emerging local plan and neighbourhood plan. They are proposed Local Green Space designations in the neighbourhood plan, which currently in Regulation 14 consultation (closing on the 4th November 2019). This follows two rounds of independent consultation (including land-owners and the local planning authority). This is clearly a difficult situation, with potential to cause confusion and to reflect badly on both the District Council and the Town Council. With this in mind, we are currently seeking advice from the Ministry for Housing, Communities and Local Government (MHCLG).

Ecological and environmental habitat mapping has been undertaken by Staffordshire Wildlife Trust across the neighbourhood area. We discussed the Staffordshire Wildlife Trust data with you earlier this year and we understand that they have spoken to you directly also.

The maps produced in 2018 to support the neighbourhood plan include Nature Recovery Network; Wildlife Corridor and Habitat Distinctiveness, together with further details of the proposed Local Green Space contained within some of the proposed safe guarded sites, can be viewed at: <https://biddulph.co.uk/neighbourhood-plan/>.

The evidence base for the local plan sites include the Wardell Armstrong Landscape Character Assessment and Maps from 2008 and the Landscape, Local Green Space and Heritage Impact Study, August 2016 which is not as current as our data. Furthermore, we do not see how the Phase 1 Ecological Survey evidence has been applied in the assessment to create safe guarded land.

Flood risk is a further issue (see comments below). The safe-guarded sites are being proposed without clearly understanding if they are developable. It would be premature to include these without fully understanding the constraints of each site, including natural habitat, access, flood risk and other factors. It is clearly inappropriate to

Biddulph Town Council

e: biddulph@staffordshire.gov.uk www.biddulph.co.uk

Biddulph Town Council

remove the sites from the green belt, before it has been established that they are capable of development. This is clearly at odds with national policy and guidance.

MM15:

This policy on flood risk is of particular importance to Biddulph. It identifies that new development will be guided to areas at the lowest risk. The proposed additional three safe-guarded sites fail to respond to this policy, as they include partially areas of high and medium flood risk in each, as shown on Environment Agency mapping data. This can be seen on the enclosed maps.

BD087 was highlighted by the Environment Agency previously in June 2016, when these sites were originally being considered before later being discounted. The Environment Agency made clear that inclusion of BD087 would require a level 2 assessment. This does not appear to be included in the additional evidence base for the main modifications. Given that MM39 and MM40 also have identified flood risk, the removal of any requirement for site-specific flood risks assessments in the main modifications is at odds with national policy and guidance.

MM25:

We support the modification to provide clarity on large-scale out-of-town developments. Biddulph Town Council is keen to ensure that the existing Town Centre remains viable and prospers in the longer term.

MM27:

Biddulph Town Council strongly supports the 'Counting our Heritage' initiative, with Town Councillors actively participating in the project as volunteers. We would support SMDC to recruit volunteers for a future project and further raise awareness on our built heritage, including its economic value.

MM29:

We have been unable to find the evidence to support the modification about 'most' of the Local Green Space. It is unclear why some were chosen, and others discounted at this stage. It has not been demonstrated that the requirements of national policy and guidance have been met.

In amendments to policy DC4, we would suggest using similar wording to that in the emerging neighbourhood plan NE3 Local Green Space:

"Local Green Spaces must remain as open space and their community value must be maintained or enhanced."

This would then continue with the modification about being assessed against Green Belt policy. It should be noted that, whilst the protection for LGS is similar to that for green belts, the purpose is different.

MM31:

We support the requirement for additional provision of playing pitches. Biddulph Town Council is keen to ensure access for all to suitable sports and playing pitches.

Biddulph Town Council
Town Hall, High Street, Biddulph, Staffordshire Moorlands
ST8 6AR

Tel: 01782 297845
e: biddulph@staffordshire.gov.uk www.biddulph.co.uk

Biddulph Town Council

MM39:

The Wharf Road Strategic Development Area Concept Masterplan is deeply flawed and fails to provide a clear framework for sustainable development. It fails to respond to the constraints and opportunities of the area.

The transition from allocating land for retail and then housing requires an evidence base. The Masterplan does not provide that. Nor is it clear how consideration has been made of the impact of potential commercial uses in proximity to residential development. It is unclear how this land identified would meet the requirements of Policy MM25.

The lack of meaningful and informative consultation with the wider community is problematic and at best poor practice. There was also a lack of liaison with Biddulph Town Council as a statutory planning body, responsible for preparation of the neighbourhood plan and a neighbourhood development order.

We do not support the removal of the text to paragraph 9.36. This seeks to inform future design and highlight the landscape sensitivities.

Paragraph 9.43 should make reference to the wildlife and habitat mapping 2018, prepared for the emerging neighbourhood plan.

Policy DSB1 identifies a singular large mature tree to be retained. SMDC should place a tree preservation order on the tree to ensure it is retained and suitably protected.

Environmental Health has advised that careful design is required to reduce the impact of air quality of the by-pass on occupiers of the new dwellings. We are therefore confused by the removal of the following text: *"positioning of housing away from the immediate edge to prevent noise and air quality issues"*. This would be contrary to the advice of Environmental Health and to national policy and guidance.

MM41:

The lack of meaningful and informative consultation with the wider community is problematic and at best poor practice. There was also a lack of liaison with Biddulph Town Council as a statutory planning body.

The emerging Biddulph Neighbourhood Plan seeks to reduce car journeys and encourage people to use traffic free routes. The suggested removal of the intention to encourage developer contributions to cycle and improved pedestrian routes is clearly unsustainable.

Development of this site should include making positive links to the town centre and wider residential areas, to reduce the need to travel by car.

Biddulph Town Council

Conclusion

In conclusion, key issues are:

- The lack of liaison with Biddulph Town Council as a statutory planning body, which has created incompatibilities between the emerging local and neighbourhood plans, in particular between proposed Local Green Space Designations and safeguarded land. As mentioned, we are seeking guidance from MHCLG on this issue.
- The premature decision to remove land from the Green Belt, before it is established that it is capable of being developed.
- The lack of adequate consultation in the preparation of the two masterplan documents and the inadequate quality of those documents.
- Failure to meet the requirements of national policy and guidance in some of the main modifications.
- The lack of an adequate evidence base to support the main modifications.

Given the identified need for the statutory planning bodies to work in close liaison, we would suggest an urgent meeting to discuss the above matters.

Yours faithfully

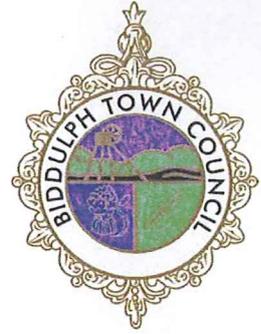

Sarah Haydon

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

No Buy in by the people of Biddulph
Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable?

These sites are on a Flood plain and have soil issues. Running sand has been a frequent issue for many sites in Biddulph. During the course of creating a soakaway for rainwater run-off in the garden of my house, at a site only 2.5 meters away from the site it discovered that beneath a thin layer of heavy clay, there is a deep deposit of very soft running sand. Photographic evidence is attached. The presence of running sand is confirmed by the British Geological Survey who made the following statement:-

"Some rocks can contain loosely-packed sandy layers that can become fluidised by water flowing through them. Such sands can 'run', removing support from overlying buildings and causing potential damage.

Running sand hazards can occur where excavations in the sand go below the water table, where springs occur at the base of sand outcrops, around leaking drains or mains water supply pipes or in entire sand bodies if vibrated (liquefaction) e.g. by an earthquake.

A property affected by running sand may experience the following problems:

- access paths and roads may be broken and disrupted*
- service connections to water, gas and electricity supplies may break*
- structural damage to foundations and to the fabric of the building if uneven sinking occurs under the foundations. "*

Construction on this site would be likely to allow the sand to run causing subsidence and damage to existing properties in Portland Drive, for which consequential damage SMDC may be partly liable. All of these factors would mean that any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

During the course of creating a soak away for rainwater run-off in the garden of my house, at a site only 2.5 meters away from the site I discovered that beneath a thin layer of heavy clay, there is a deep deposit of very soft running sand. Photographic evidence is attached. The presence of running sand is confirmed by the British Geological Survey who made the following statement: -

"Some rocks can contain loosely-packed sandy layers that can become fluidised by water flowing through them. Such sands can 'run', removing support from overlying buildings and causing potential damage.

Running sand hazards can occur where excavations in the sand go below the water table, where springs occur at the base of sand outcrops, around leaking drains or mains water supply pipes or in entire sand bodies if vibrated (liquefaction) e.g. by an earthquake.

A property affected by running sand may experience the following problems:

- Access paths and roads may be broken and disrupted*
- Service connections to water, gas and electricity supplies may break*
- Structural damage to foundations and to the fabric of the building if uneven sinking occurs under the foundations. "*

Construction on this site would be likely to allow the sand to run causing subsidence and damage to existing properties in Portland Drive, for which consequential damage SMDC may be partly liable. All of these factors would mean that any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action which in the end would prove very expensive to the local council.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendments) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. 3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Access road
 Marsh Green Road does not meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy. The road is too narrow & there is a pinch point over the bridge on Marsh Green Road before the access to BD067. Marsh Green Road is too narrow along its total length & has no footpath for most of its length. Road Widening will require the compulsive purchase of gardens near its junction with Congleton Road
 Marsh Green Road falls below the minimum required of distributor roads by the Residential Design Guide. Within the Guide it is clarified that minimum acceptable local distributor roads width must be 6.7m; Marsh Green Road is 3.25m wide, therefore not meeting the minimum requirements (Residential Design Guide. Supplementary Planning Guidance on Design Quality in Residential Areas Staffordshire County and District Councils 2000).

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

BIODIVERSITY

Key points are:

- The SMDC Phase 1 Ecological Survey evidence base is being ignored.
- The assessment for Local Wildlife Sites by Ecus (2017) was incorrectly carried out.
- The ranking exercise which was used to inform SMDC Council Members and guide decision making At the SMDC Council Assembly on 26th June 2019 was missing the ecological part of the SMDC evidence base. The methodology employed is unsound.
- Removing the Gillow Heath Fields from the green belt and designating them as 'safeguarded sites' for future development (especially BD062) is in direct conflict with the emerging Biddulph Neighbourhood Plan which has a more recent and detailed evidence base which has designated BD062 as Local Greenspace. This had already passed through two local public consultations, which SMDC was well aware of.

Details for the above points:

Biodiversity - The SMDC Local Plan Phase 1 Habitat Survey (Site BD062 / FID122, 2014) concluded " *...the site is not recommended for potential development...*" [1] and that the site is " *...very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site*" (<https://www.staffsmoorlands.gov.uk/article/1368/Ecological-studies>).

The site is a wet meadow/grassland and plays a key role in natural flood management in a key position at the bottom of the valley. It lies within the species rich farmland zone (Staffordshire Moorlands Biodiversity Opportunities Map) and has been mapped as part of a major Wildlife Corridor by SMDC Map7.5 pg.77 (https://www.staffsmoorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10_SMDC_Green_Infrastructure_Strategy_May_2018.pdf)

The emerging Biddulph Neighbourhood Plan commissioned external consultants to provide additional detail and evidence for wildlife corridors and potential Local Wildlife Sites across the Biddulph Parish. The mapping for BD062 indicates semi-natural grassland habitat and found to be sited in an important location bringing together two key wildlife corridors - that of the Biddulph Brook and the Biddulph Valley Way (<https://biddulph.co.uk/neighbourhood-plan/>).

The entire ecological evidence base was missed out of the assessment and ranking exercise carried out by SMDC and reported to Council Members on 26th June 2019 which led to the designation of these fields as 'Safeguarded'. The sources used for the exercise are listed and ecological assessments are missing (<https://democracy.staffsmoorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>). This omission is then reflected in the assessment tables in Appendix C and Appendix D and the conclusions drawn (which are unclear and not sound).

This is despite the fact that this information was contained within the previous Sustainability Appraisal Report which accompanied the local plan submission version (Feb 2018) where it was reported that BD062 was 'deemed to have ecological value.'

Only evidence regarding the Green belt review, Landscape Sensitivity, Heritage impact and Agricultural classification was included alongside other economic and development criteria (Options Assessment Tables list pg.30 (<https://democracy.staffsmoorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>)). The land classification used in this SMDC report on 26th June 2019 is also wrong for all 3 sites in Gillow Heath. They were reported to be urban/industrial land when in fact they are classed as agricultural grassland on the Dudley Stamp Land Use Classification system (Magic Map (<https://magic.defra.gov.uk/MagicMap.aspx>)) and a quick search on google earth reveals that they are indeed semi-natural habitat (BD062) or agricultural grassland (BD068 / BD087).

Ignoring the ecology in this decision making process totally disregards any value that semi-natural habitats provide for biodiversity and for natural flood management. This contradicts Section 40 of the *Natural Environment and Rural Communities Act 2006*, which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity.

Sites also need to be considered on an individual basis. Ranking and considering sites as a group leads to misleading conclusions, which is evidenced in the report given to SMDC Council Members on 26th June 2019. Examples where this is misleading include suggesting that all sites are within 800m of the town centre when they clearly are not at Gillow Heath. The ranking method is unsound.

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Sewage works

BD062 and BD068 are both immediately adjacent to a sewage works. Residents who live on Essex Drive, York Close and Long Valley Road already suffer from ad-hoc issues of odour and noise and have registered complaints to United Utilities and SMDC, especially since they learned of plans to build houses even closer. Photographic and video evidence exists of repeated raw sewage flooding into the brook at the end of Essex Drive (13/9/2016) where pressure builds up inside the junction box and the lid blows off, especially following heavy rain. This happened again in August 2019. This junction forms the point where pipes from the east and west sides of the valley come together. The raw sewage contaminates part of BD062 (proposed eastern site access) and sites downstream, including BD068 and BD087.

It is an ongoing and dangerous issue which will continue to affect current residential areas and BD062. People should not live any closer than the current housing provision and the

field needs to be kept as a natural buffer. Local residents should be listened to in this matter instead of repeatedly being ignored. Building adjacent to the sewage works will create even more of a statutory nuisance (noise, odour, sewage flooding) and an unhealthy neighbourhood.

We do not believe the opinion of developers who have interests in these fields that issues of odour and noise can be overcome through design as reported by SMDC Council Planning Officers on 26th June 2019 in the meeting which led to these fields being put forward for 'Safeguarding'.

(<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>) (ie. making a building air-tight does not change the situation outside or inside the home when windows and doors are open). Adding more houses and increasing surface runoff from built up areas will only make this situation worse. In addition to this, climate change increases the likelihood of increased extreme rainfall events in this area which will compound this issue.

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Objections to the Proposed

Housing Development off Marsh Green Road.

Rathleen Boulton.

Tel

1. The infrastructure of Biddulph is not able to meet the demand placed on it by any extra development.

The sewage works cannot cope as it is now. The smell is often so bad that they resort to spraying out disgusting artificial perfumes. The constant droning noise keeps people awake at night and can only be compared to "chinese torture".

(I am currently considering an appeal to the noise abatement authorities. Warmer weather will only make things worse

At times there has been a problem of effluent leaking into the fields, toxic waste soaked into the ground and quick sand where the houses would be built. It is marshland (hence the name of the area)

2. The access road is narrow and dangerous to traffic as it is and if widened would necessarily mean compulsory purchase

purchase of land from other properties. 2

3. The project will mean loss of green belt land, the destruction of mature trees (already begun in anticipation of planning consent — what about global warming? ^{& carbon storage}) and loss of the habitats of endangered and protected species.

4. Schools and medical facilities are overstretched. Additional resources are not the answer. We have a multi million pound 'white elephant' built as a medical centre, the cost being justified on the grounds that it could be a kind of "cottage hospital" with facilities for minor operations. ~~Cost~~^{to} be performed. The centre, despite the best efforts of the doctors is unable to recruit staff and at present is unable to give anyone a routine blood test.

5. This area is undermined and in the past subject to earth tremors, which could affect the sewage works adversely. In the time we have lived here, one such tremor caused our patio to crack we had it replaced until a later tremor caused it to crack again in the same place.

3
It is completely shocking and an insult
to our intelligence that these schemes are
even being considered. Why cannot
derelict buildings in the town be
converted into accommodation or other
simpler solutions found?

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. 	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph
 Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

<p>No Buy in by the people of Biddulph Short cutting of the Modification selection process is not acceptable.</p> <p>Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?</p> <p>I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.</p>

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please find below my comments on the Main modifications to the SMDC Local Plan, MM12. Safeguarding of fields in Gillow Heath.

I noticed that you omitted part of your evidence base, when you made decisions about these sites on 26th June 2019 at the Council assembly. You omitted the ecological evidence base and also incorrectly stated that these fields are Urban/industrial land, which is incorrect.

The decision to safeguard fields in Gillow Heath needs reconsidering both in light of your errors and in light of the evidence contained within the emerging Biddulph Neighbourhood plan(REG14 closing 4th November 2019).

The SMDC Main Modification are not sound and do not comply with the Duty to co-operate

Please acknowledge my comment.
Maureen Brindley

Please find below the final concern myself and my husband share regarding the SMDC modified local plan.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Buy in is key to developing any plan – there is no buy into this plan by any of the people in Biddulph – this cannot be dressed up. No due process has been followed. To push this modified local plan through at break neck speed can only lead to an expensive legal outcome. SMDC has had 8 years to get this local plan right, this Modified Local Plan has taken 3 months from 26th June, no public face to face consultation, and a hurried last minute consultation period with almost no one informed. Only the Site Owners have been kept up to date.

I would appreciate that the concerns of myself and my husband be considered as part of this consultation.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be built along the river bank. The access road onto BD 087 is on the narrow side of the river bank approximately 10M wide. I believe that an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.
3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan

I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – “When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

In 2015 the Environmental Agency and United Utilities requested that the SMD Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.
2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please find below the final concern myself and my husband share regarding the SMDC modified local plan.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Buy in is key to developing any plan – there is no buy into this plan by any of the people in Biddulph – this cannot be dressed up. No due process has been followed. To push this modified local plan through at break neck speed can only lead to an expensive legal outcome. SMDC has had 8 years to get this local plan right, this Modified Local Plan has taken 3 months from 26th June, no public face to face consultation, and a hurried last minute consultation period with almost no one informed. Only the Site Owners have been kept up to date.

I would appreciate that the concerns of myself and my husband be considered as part of this consultation.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be built along the river bank. The access road onto BD 087 is on the narrow side of the river bank approximately 10M wide. I believe that an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.
3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan

I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – “When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

In 2015 the Environmental Agency and United Utilities requested that the SMD Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.
2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Reference: Main Modifications Consultation – Blythe Bridge

Dear Sir/Madam

My wife and I are writing in response for the requested comments to the main modifications from the Examination hearings for development land in the Local plan.

We feel that a monitoring review to the local plan every 5 years should be inline with the NPPF. In Blythe Bridge currently, the plan leans towards increasing the size of the St Modwen's development site at Blythe Vale. I feel due to the size of this development it limits potential for other planning opportunities in the Blythe Bridge area.

We also feel that within our current climate for reducing Carbon footprint and the effects it has on the environment. All plans should be accountable for the potential impact it has. Previously overlooked greenbelt sites should be revisited due to having more accessible transport links such as railway stations therefore lowering the impact they have on the environment. The current development at Blythe Vale will certainly lead to more traffic congestion unless major redevelopment of surrounding highways is planned. The new volume of traffic will come from new home owners from the development.

We feel that it is therefore vital a five-year supply is maintained by the Council. This could be done with regular contact with landowners and developers so that potential sites with better local amenities and transport links are at the forefront of any future local plans.

We hope that our comments are received and recorded.

Yours faithfully,

Mr Trevor Brough & Mrs Doreen Brough

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan
 The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.
 The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.
 In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph
 Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Staffordshire Moorlands Local Plan Examination

MAIN MODIFICATIONS CONSULTATION - SEPTEMBER 2019

Representations Form 4

Guidance Notes

Please ensure that you have read the accompanying 'Statement of Representations Procedure' before completing this form.

The Local Plan Main Modifications Schedule and related documents, including; the Sustainability Appraisal of Main Modifications, Biddulph options assessment, Sustainability Appraisal of Alternative Development Options for Biddulph, Housing Implementation Strategy, Equalities Impact Assessment, Tunstall Road Masterplan Executive Summary and Wharf Road Masterplan Executive Summary can be viewed on the District Council's Main Modifications consultation webpage, Council offices and local libraries.

Website: <http://www.staffsmoorlands.gov.uk/localplan>

Council offices:

- Leek** Moorlands House, Stockwell Street, Leek, Staffordshire, ST13 6HQ (8.45am - 5.15pm Monday - Thursday and 8.45am - 4.45pm on Friday)
- Cheadle** Councils Connect, 15a-17 High Street, Cheadle, Staffordshire, ST10 1AA (9.00am - 12.30pm & 1.00pm - 5.00pm on Monday, Wednesday and Friday)
- Biddulph** Town Hall, High Street, Biddulph, Staffordshire, ST8 6AR (9.00am - 5.00pm Monday – Friday)

Please return this form by **5pm on 31 October 2019** to the email or postal address given below or by completing the online questionnaire at : <http://www.staffsmoorlands.gov.uk/localplan>

Email: forward.plans@staffsmoorlands.gov.uk

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be built along the river bank. The access road onto BD 087 is on the narrow side of the river bank approximately 10M wide. I believe that an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land. I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

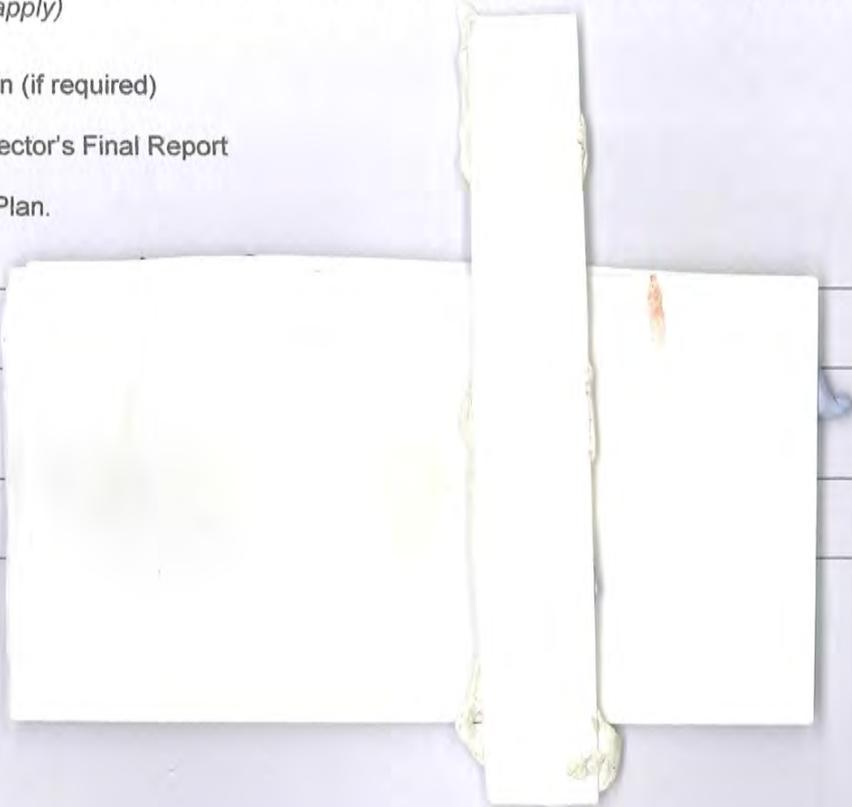

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (please select all that apply)

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Buy in is key to developing any plan – there is no buy into this plan by any of the people in Biddulph – this cannot be dressed up. No due process has been followed. To push this modified local plan through at break neck speed can only lead to an expensive legal outcome. SMDC has had 8 years to get this local plan right, this Modified Local Plan has taken 3 months from 26th June, no public face to face consultation, and a hurried last minute consultation period with almost no one informed. Only the Site Owners have been kept up to date. Why!

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM21

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant . Yes

Sound - Positively prepared . Yes

Sound - Justified . Yes

Sound - Effective . Yes

Sound - Consistent with national policy . Yes

Complies with the Duty to co-operate . Yes

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

The allocation of land at Mobberley Farm (Policy DSC2) is both logical and long overdue.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

None

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

The allocation of land at Mobberley Farm (Policy DSC3) is both logical and long overdue.

Officer Response

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM22

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

- Legally compliant** Yes
- Sound - Positively prepared** No
- Sound - Justified** No

- Sound - Effective . No
- Sound - Consistent with national policy . No
- Complies with the Duty to co-operate . Yes

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

The level of affordable housing required in larger developments should not be arrived at by the Zoning system now introduced. Paragraph 64 of the NPPF sets a minimum figure of 10%. The target figure of 33% is too high particularly in relation to sites such as the Mobberley Strategic Development Area where developers are going to be faced with a raft of other requirements which will collectively threaten the financial viability of the developments. The important feature of the allocated sites is that they must all be developed in the Plan period if the housing requirement for the District is to be met and so too many obstacles should not be placed in the way of that being achieved. Various infrastructure requirements must be met and that should take priority over a quota for affordable housing which in the case of Cheadle in particular is likely to be set too high by inclusion of the sites in Zone 3.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Delete reference to the zonal system for calculating the percentage of affordable housing that each new residential site should provide. Refer to the minimum of 10% in the NPPF but indicate that some sites may be required to contribute up to 20% depending on individual circumstances to be negotiated on a case by case basis.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

The level of affordable housing required in larger developments should not be arrived at by the Zoning system now introduced. Paragraph 64 of the NPPF sets a minimum figure of 10%. The target figure of 33% is too high particularly in relation to sites such as the Mobberley Strategic Development Area where developers are going to be faced with a raft of other requirements which will collectively threaten the financial viability of the developments. The important feature of the allocated sites is that they must all be developed in the Plan period if the housing requirement for the District is to be met and so too many obstacles should not be placed in the way of that being achieved. Various infrastructure requirements must be met and that should take priority over a quota for affordable housing which in the case of Cheadle in particular is likely to be set too high by inclusion of the sites in Zone 3.

Officer Response

The Inspector requested that viability information relating to affordable housing in different parts of the district (Zones 1 to 4) was included in the supporting text. The Zones do not set the level of affordable housing. Policy H3 states that on sites of 10 dwellings (or 0.5ha) or more shall provide 33% affordable housing. Where justified the Council will consider a lower level of provision taking into account the Local Plan and Site Allocations Viability Study, other up to date viability evidence and other contributions.

Recommendation

No change.

Response Date 24/10/19 15:05

Consultation Point 1 Main Modifications Consultation ([View](#))

Status Submitted

Submission Type Web

Version 0.4

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM44

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant . Yes
Sound - Positively prepared . No
Sound - Justified . No

Sound - Effective . No
Sound - Consistent with national policy . No
Complies with the Duty to co-operate . Yes

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

The approach to releases of green belt at the southern end of Cheadle is not consistent with paragraph 139(f) of the NPPF which requires the clear definition of boundaries using physical features that are readily recognisable and likely to be permanent. Given the importance of the Mobberley area to meeting the housing requirement and the lack of importance of the land to the west and south of the allocation in meeting green belt objectives, the approach in the submitted Plan and these Modifications of only taking the vet's land out of the green belt is too restrictive. The watercourses to the west and south of the allocation would be more appropriate boundaries. The exceptional circumstances required by paragraph 136 of the NPPF are outlined in the remainder of the policy particularly the need for the masterplan to address screening of the southern edge of the development area.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Take more land out of the green belt so that the southern and western boundaries of the Strategic Development site are the two watercourses. Delete reference to the vet's land as being the only land that is to be removed from the green belt. The approach should be to do not the minimum but what is best in the long term for this area.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

The approach to releases of green belt at the southern end of Cheadle is not consistent with paragraph 139(f) of the NPPF which requires the clear definition of boundaries using physical features that are readily recognisable and likely to be permanent. Given the importance of the Mobberley area to meeting the housing requirement and the lack of importance of the land to the west and south of the allocation in meeting green belt objectives, the approach in the submitted Plan and these Modifications of only taking the vet's land out of the green belt is too restrictive. The watercourses to the west and south of the allocation would be more appropriate boundaries. The exceptional circumstances required by paragraph 136 of the NPPF are outlined in the remainder of the policy particularly the need for the masterplan to address screening of the southern edge of the development area. Take more land out of the green belt so that the southern and western boundaries of the Strategic Development site are the two watercourses. Delete reference to the vet's land as being the only land that is to be removed from the green belt. The approach should be to do not the minimum but what is best in the long term for this area.

Officer Response

The Inspector has not indicated that any further Green Belt release is required.

Recommendation

No change.

Staffordshire Moorlands Local Plan Examination

MAIN MODIFICATIONS CONSULTATION - SEPTEMBER 2019

Representations Form

Part A – Personal details and notifications

	Personal details

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice> .

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference MM8 and MM21

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	√
Sound - Positively prepared	<input type="checkbox"/>	<input type="checkbox"/>
Sound - Justified	<input type="checkbox"/>	<input type="checkbox"/>
Sound - Effective	<input type="checkbox"/>	<input type="checkbox"/>
Sound - Consistent with national policy	<input type="checkbox"/>	√
Complies with the Duty to co-operate	<input type="checkbox"/>	√

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Cheadle Town Council comments on the Main Modifications (MM) to the Staffordshire Moorlands Local Plan Submission version 2018 are as follows:

- 1) The proposed housing level increase of 6000 dwellings for the Staffordshire Moorlands in the original Local plan was already significantly higher than DCLG household projections of 2015, which detailed a net housing requirement of only 2573 dwellings across the Moorlands.

MM8 retains a very high figure of 6080 dwellings.

The 2016 ONS figures (Released late 2018) showed a further drop in the population growth projections for Staffordshire Moorlands, now only 1.58% growth to 2036 and genuine Household need projections of 6.4% growth to 2036 which goes beyond the Local Plan period.

Building over 6000 houses for a net ONS increase in the population of 1,534 across the Moorlands does not reflect the aspirations of the local community. SMDC have presented the Planning Inspector with an 'Oxford Economics' model that significantly inflates the perceived level of housing need. The claim that such high levels of net migration (7,697) to increase the working population by just 85 to 2031 is seriously flawed. It is not a sustainable model. The net migration makeup cannot be defined and is likely to contain a significant older none-working population, especially as these properties are unlikely to be affordable to the local community. This is likely to exacerbate the demand on infrastructure, roads and services not least in the promotion of a commuter town and is not a sustainable model in line with UK commitments to health (including Nitrogen Oxides NOx levels) and the environment.

Instead of an average growth of 6.4% to 2034 in line with the 2016 ONS figures, the plan as presented shows a much higher local population growth of over 20%. MM21 details 1026 dwellings for Cheadle alone in less than 15 years. With a UK average occupancy of 2.4 residents per household' this relates to a population increase of 2,462 residents on an existing population of 12,165 which is over 20% swell. The promotion of a commuter/service town with access to HS2 will have minimal impact on the vitality of the town but maximum impact on the environment and accessibility of the town with increased road traffic and demand on our schools, doctors and dentists.

Further, the headline ONS figures for 2018 publicised at the time of writing this response (21st Oct 2019) reflect a further National population growth drop with respect to the 2016 Figures, now 400,000 lower by 2028 and 900,000 lower by 2043 this reflects a national population drop of over ½ million over the local plan period in comparison to the 2016 figures above. The ONS have consistently reduced population prediction figures since 2010 and none of this has been reflected in the local plan.

Further the local plan sets out to monitor house-build performance against these unrealistic figures.

It is our opinion that the planned housing levels are excessive, will place unsustainable pressure on our infrastructure not least our roads, has the potential to damage the character of the town and is not sensitive to a sustainable environmental policy. It does not align with the aspirations of the local community ascertained through numerous consultations and as such the planned level of housing should be significantly reduced (i.e. by over 50%) and any assessment of build against unrealistic targets should be removed. This reduction can be done on a proportional (pro-rata) basis without any further impact on the local plan.

- 2) There is no ongoing evidence that the Duty to co-operate with Stoke on-Trent and the Potteries is taking place with a focus on regeneration of sustainable Brownfield sites around road and rail networks in a way that promotes a long term need to address green and sustainable housing policies and for a co-ordinated transport policy to reduce pollution, our carbon footprint and address long term health concerns in encouraging a commuter town strategy. There is a need to ensure our annual average Nitrogen Oxide (NOx) levels are below 40ug/m³ and not to increase that figure. Without a co-ordinated policy including public transport that level is set to increase to unacceptable levels with the promotion of a Cheadle as a commuter /service town.

(Continue on a separate sheet / expand box if necessary)

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

In relation to Point 1 (The level of housing) raised above:

i) The planned level of housing should be significantly reduced (i.e. by over 50%). This reduction can be done on a proportional (pro-rata) basis without any further impact on the local plan.

ii) Any assessment of build against these unrealistic targets should be removed.

In relation to point 2 (Duty to Co-operate) raised above:

iii) Genuine collaboration with Stoke on-Trent and the Potteries to work on a long term sustainable strategy for the reasons stated.

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process *(please select all that apply)*

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

H Hunter

Date:

23rd October 2019

**Cheadle Unite comments (29th October 2019) on the
Main Modifications (MM) to the Staffordshire Moorlands Local Plan Submission version 2018 are as follows:**

We believe the Local Plan should reflect the aspirations of the local community and their way of life, be collaborative with neighbouring authorities in delivering a sustainable strategy on employment, transport and infrastructure, and be environmentally sound whilst sympathetic to National Policy and the need for housing, striking an appropriate balance.

We feel the local plan over-rides local aspirations as evident from many thousands of consultation responses and is competitive with neighbouring authorities rather than collaborative, the growth trajectory is not sustainable or environmentally sound. The plan should sit within a 50+ year strategy that looks to protect our environment and recognises that the economic based term ‘sustainable growth’ is by definition a contradiction in a world of finite resource and hence should be a plan that looks beyond economic costing models, which have repeatedly proven to be unreliable with dire impacts on society.

- 1) The proposed housing level increase of 6000 dwellings for the Staffordshire Moorlands in the original Local plan was already significantly higher than the DCLG household projections of 2015 (and 2012 ONS Sub National Population Projection based figures) , which detailed a net housing requirement of only 2573 dwellings across the Moorlands.

MM8 retains a very high figure of 6080 dwellings to 2033.

The 2016 ONS SNPP figures [1] Released late 2018 with new Local Authorities figures published April 2019 have been available for 6 months during the Major Modifications review.

The tables below published April 2019, show the ONS data with the percentages calculated at the right of the table to years 2031, 2036 and 2041.

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q
1	Table 428: Total change, average change and percentage change in household population projections mid-2016 to mid-2041																
2	England, counties, local authorities																
3	Thousands																
4																	
5	Area code	Area name	2016	2021	2026	2031	2036	2041	Total change	Average change	Percentage change						
138	E07000193	East Staffordshire	115	117	119	120	122	123	8	0	7						
139	E07000194	Lichfield	101	102	103	103	104	105	4	0	4						
140	E07000195	Newcastle-under-Lyme	124	127	130	132	134	136	12	0	10						
141	E07000196	South Staffordshire	108	109	110	111	112	112	4	0	4	Population Projection: Percentage Changes From 2016					
142	E07000197	Stafford	130	132	134	135	136	136	6	0	5	To 2031	To 2036	To 2041			
143	E07000198	Staffordshire Moorlands	97	98	98	98	98	98	2	0	2	1.46%	1.58%	1.67%			

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q
1	Table 425: Total change, average change and percentage change in household projections, mid-2016 to mid-2041																
2	England, counties, local authorities																
3	Thousands																
4																	
5	Area code	Area name	2016	2021	2026	2031	2036	2041	Total change	Average change	Percentage change						
138	E07000193	East Staffordshire	49	50	52	53	55	56	7	0	14						
139	E07000194	Lichfield	43	44	45	46	46	47	5	0	11						
140	E07000195	Newcastle-under-Lyme	55	57	58	60	61	62	8	0	14						
141	E07000196	South Staffordshire	46	47	49	49	50	51	5	0	11	Household Projection: Percentage Changes From 2016					
142	E07000197	Stafford	58	59	61	62	63	63	6	0	10	To 2031	To 2036	To 2041			
143	E07000198	Staffordshire Moorlands	43	44	45	45	46	46	3	0	7	5.37%	6.40%	7.45%			
144	E07000199	Tamworth	32	33	33	34	34	34	2	0	6						

The above figures shows a further drop in the “Population projection” growth for Staffordshire Moorlands, now only 1.58% growth to 2036 and “Household Projection” of 6.4% growth to 2036 which goes beyond the Local Plan period to 2033.

If we add these figures onto the graphs already presented by Cheadle Unite to SMDC and the planning inspection we have the following 2016 SNPP figures for the Staffordshire Moorlands:

Figure 2.2 presents a similar picture for Staffordshire Moorlands, albeit the 2012 starting point is considerably higher than for the 2008-based SNPP and 2010-based SNPP equivalents. However, whilst these historic projections increase by 5,200 and 7,100 respectively between 2012 and 2031, Table 2.2 indicates that the latest 2012-based SNPP increase by only 2,600 over that time period.

Figure 2.2 Comparison ONS 2008/2010/2011/2012 based SNPPs for Staffordshire Moorlands District

Source: NLP Analysis / ONS 2008/2010/2011/2012-based sub-national population projections

The new 2016 Figures in black show just how far the sub national population projections have dropped since 2010 in blue. The graph shows a natural tendency to levelling off, a process that should be celebrated in lowering our carbon footprint and working towards a sustainable future for our children.

The 2016 ONS figures now show a population increase of only 1491 to the Year 2031 and 1534 to 2036. Based on the UK National average of 2.4 occupants per household this would suggest a natural demand of under 650 homes to 2036 across the Staffordshire Moorlands

The 2016 SNPP projections by definition "Provide statistics on the potential future size and age structure of the population in England at regional, county and local authority .. levels. They are used as a common framework for informing local Level policy and planning as they are produced in a consistent way."

Building over 6000 houses for a net ONS increase in the population of 1,534 across the Moorlands does not reflect the aspirations of the local community as detailed by numerous consultations including at least 5,500 responses.

SMDC have presented the Planning Inspector with an 'Oxford Economics' model that significantly inflates the perceived level of housing need. The claim that such high levels of net migration (7,697) to increase the working population by just 85 to 2031 is seriously flawed. It is not a sustainable model (what for 2033 to 2048 another 10,000?). The net migration makeup cannot be defined and is likely to contain a significant older none-working population, especially with properties that are unlikely to be affordable to the local community. This is likely to exacerbate the demand on infrastructure, roads and services not least in the promotion of a commuter / service town as presented in the local plan and is not a sustainable model in line with UK commitments to health (including Nitrogen Oxides NOx levels) and the environment.

Instead of planning for an average population growth of 1.58% and household growth of 6.4% to 2034 in line with the 2016 ONS figures (produced nationally in a consistent way), the local plan as presented targets a much higher local population growth of over 20% based on an obscure model best described by Secretary of State for Housing Sajid Javid in 2017 as an 'assessments commissioned by individual authorities according to their own requirements, carried out by expensive consultants using their own methodologies. The result is an opaque mish-mash of different figures that are consistent only in their complexity.'

MM21 details 1026 dwellings for Cheadle alone in less than 15 years. With a UK average occupancy of 2.4 residents per household' this relates to a population increase of 2,462 residents on an existing population of 12,165 which would relate to a swell of over 20%.

The promotion of a commuter/service town with access to a HS2 hub at Crewe will have minimal impact on the vitality of the town but maximum impact on the environment and accessibility of the town with increased road traffic and demand on our schools, doctors and dentists.

Further, In addition to the 2016 ONS Local Authority Population figures published April 2019, the headline ONS base figures for 2018 have just been published (21st Oct 2019) they reflect a further National population growth drop with respect to the 2016 Figures, now 400,000 lower by 2028 and 900,000 lower by 2043. This reflects a national population growth drop of over ½ million over the local plan period in comparison to the 2016 based figures above.

The ONS have consistently reduced population prediction figures since 2010 and none of this has been reflected in the local plan.

The planned level of housing should factor in a wider set of metrics, examples include:

- Consultation responses 2009,2010,2012,2014,2015,2017,2019 Over 5,500 Responses
- Local Petitions to Central Government
- SMDC Responses to community engagements on Strategy (e.g. the big debate)
- 2015 Road traffic Surveys for Cheadle
- Local Nitrogen Oxide (NOx) level readings for Cheadle [2]
- Climate Change Act 2008
- UK Committee on Climate Change - Risk Assessments 2012 and 217
- UK Committee on Climate Change - Reducing UK emissions 2019
- ONS Population Predictions
- DCLG Housing Projections
- Campaign to Protect Rural England guidance
- Current huge Level of undeveloped Planning Applications (nationally and locally) and land banking
- Collaboration with the Potteries to support the DEFA Air Quality Plan UK0014 2017 e.g Sect 4.3
- DCLG Guidance on Transport Assessment 2007

Instead all the above is ignored in favour of a single [3] flawed 'Oxford Economics Model', which sits at odds with the local community.

2) MM2 Implementation and Monitoring

(Including other references to Implementation and/or Monitoring MM8 7.24, SS3, MM9, MM54, MM55)

In the context of a local plan that sits at odds with realistic ONS statistics and is against the aspirations of the local community, it is not reasonable to introduce an 'Implementation and Monitoring' process, on the level of housing build, if the objective of the Implementation is to continually leverage development at any cost especially if the process is increasingly against the wishes of the local community, the environment and a sustainable future.

Examples of leveraging development would include,

- Accepting arguments for reducing or dropping affordable housing
- Pressing for approval of houses that do not meet M2 Accessibility standards for older age
- Dropping 106 commitments or failing to contribute to the required commitment to infrastructure

- Producing houses that do not meet national NDSS recommendations on room sizes eg. Bedrooms for health and wellbeing
- Forcing additional land release due to undeveloped sites e.g. land banking
- Allowing developments with infrastructure issues (road congestion, road safety concerns, environmental impact)
- Allowing developments that do not meet the needs of the local community e.g lack of starter homes, lack of provision for the elderly such as bungalows
- Allowing developments with inadequate parking, street furniture, curbs, footpaths drainage etc

It is our opinion that the planned housing levels are excessive, will place unsustainable pressure on our infrastructure not least our roads, has the potential to damage the character of the town and is not sensitive to a sustainable environmental policy. It does not align with the aspirations of the local community ascertained through numerous consultations and as such the planned level of housing should be significantly reduced (i.e. by over 50%) and any assessment of build against unrealistic targets should be removed. This reduction can be done on a proportional (pro-rata) basis without any further impact on the local plan.

- 3) There is no ongoing evidence that the Duty to co-operate with Stoke on-Trent and the Potteries is taking place with a focus on regeneration of sustainable Brownfield sites around road and rail networks in a way that promotes a long term need to address green and sustainable housing policies and for a co-ordinated transport policy to reduce pollution, our carbon footprint and address long term health concerns in encouraging a commuter town strategy. There is a need to ensure our annual average Nitrogen Oxide (NOx) levels are below 40ug/m³ and not to increase that figure. Without a co-ordinated policy including public transport that level is set to increase to unacceptable levels with the promotion of a Cheadle as a commuter /service town.

To Make the Local Plan sound:

- i) The planned level of housing should be significantly reduced (i.e. by over 50%). This reduction can be done on a proportional (pro-rata) basis without any further impact on the local plan.
- ii) Any assessment of housing build against unrealistic targets should be removed. Unrealistic targets would be figures that don't tally with consistent national metrics (ONS figures), the local community and a sustainable environmental strategy.
- iii) Genuine collaboration with Stoke on-Trent and the Potteries to work on a long term sustainable strategy for the reasons stated.

[2] Additional Information (Forwarded by a resident 2019) Nitrous Dioxide Levels are up to UK/EU Limits of 40ug/m3 on the main roads through Cheadle. As stated earlier it is a legal responsibility to ensure levels are brought down. The Local Plan promotes long distance commuting, sighting links to the A50 and HS2 requiring significant travel. The plan promotes a service/commuter town with huge numbers seeking employment outside Cheadle (>50% and growing making a daily commute for work) on roads already detailed as at capacity at work run times. This strategy does not deliver on a commitment to reduce pollution and protect the environment and health of the community.

Request:

Under the Freedom of Information Act 2000, please provide copies of all NOx (nitrogen oxide) readings taken in Cheadle Staffordshire for the past 6 years to date (28/10/2017) and any related Air Quality readings /comparisons.

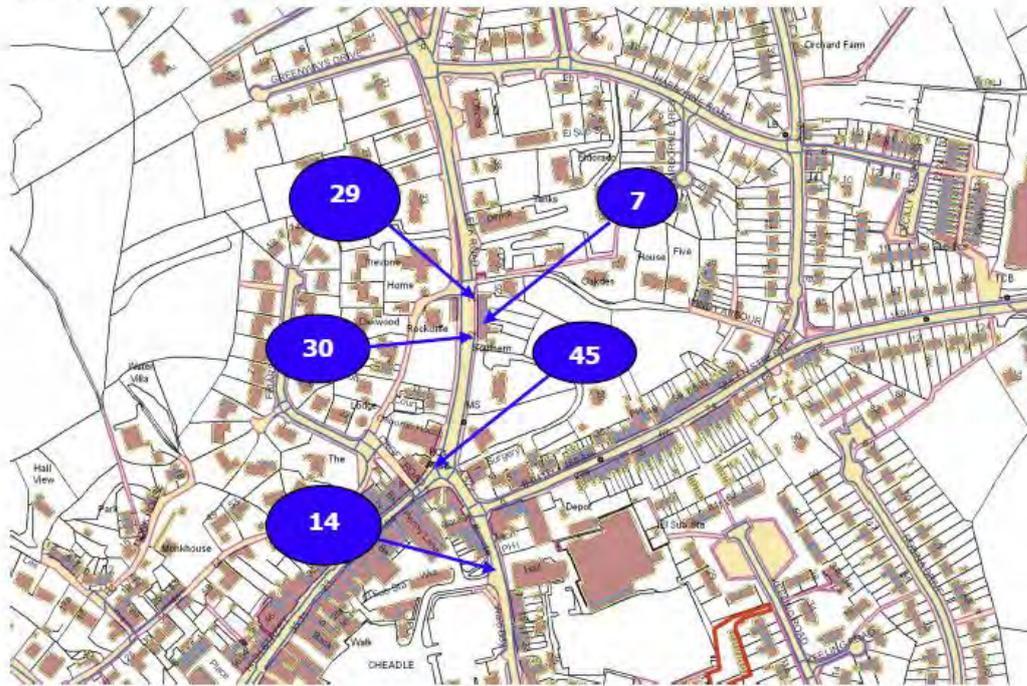

Response:

NOx data presented below. Results are expressed as an average annual mean, which is the average concentration of NOx over a year. Results for 2017 have not yet been completed and so are not yet available. The Annual Mean Objective for NOx is 40µg/m³

Results of NO₂ Diffusion Tubes, 2011 - 2016

[3] At the Planning Inspection Hearings, on suggesting the Oxford Economics Model be removed from the evidence base, the Consultant from Lichfields acting on behalf of SMDC stated without that Oxford Model SMDC will not have a plan.

STAFFORDSHIRE MOORLANDS LOCAL PLAN – LOCAL GREEN SPACE DESIGNATIONS

NAME/NUMBER OF LGS: Ox Pasture (west) / 29

ORGANISATION RESPONDING: Cheddleton Parish Council

This small field sits in the historic heart of Cheddleton village immediately adjacent to the Conservation Area. It is bounded on the east by a traditional hedge and an historic public footpath. On the southern boundary is another well used public footpath. To the north from this path the field slopes down to the old village. The field shares several characteristics with the adjacent LGS 30 to form an open space which is bisected by the first footpath. The field was designated as Visual Open Space (VOS) in 1998, reassessed and confirmed in 2008, and a study in 2016 used the NPPF criteria to recommend LGS designation. This area is special to the community of Cheddleton and holds particular local significance for the following reasons:

1. TRANQUILLITY

With the adjacent field it provides a valuable area of tranquillity in the heart of the village. There are no roads around it, so users of the footpaths appreciate the tranquillity and visual relief that the field provides, away from nearby traffic noise and pollution. The eastern path is used by young and old on a daily basis, being the main safe pedestrian walkway from the newer housing estates in the south of the village to the school, church, community centre, tearoom / craft centre, and pub. The 2016 study described the field as having “high tranquillity”. The tranquillity has not changed since that assessment.

2. BEAUTY

The open nature of the field and its slope away from the southern footpath enable uninterrupted access to exceptional and cherished public views into and beyond the historic settlement to the Roaches and Hen Cloud in the Peak District National Park. Locals and visitors alike particularly appreciate the beauty of the panoramic views from the southern footpath. The VOS criteria included allowing “the public to enjoy significant external views.” The 2016 study described “Very attractive views from footpath on southern boundary out towards wider countryside (including church and roaches).” The views and their beauty have not changed since those assessments.

3. RECREATIONAL VALUE

Recreational walking groups that visit the village specifically include the paths around the Ox Pasture fields in their walks, and value the visual amenity that the fields offer.

4. CHARACTER

Along with LGS 30 this field contributes to the special character of the village by providing a significant green buffer and sense of separation between the historic core and the more recent residential development that has grown up to the south. Consequently, the community and successive authorities have protected these fields from encroaching urbanisation throughout eight decades of extensive expansion of the village. Most of the properties surrounding the fields have restrictive covenants which effectively prevent access to the fields, illustrating their long-standing special significance and the wish to retain the open space. Cheddleton village is included in the Churnet Valley Master Plan.

5. HERITAGE VALUE

The open views through and beyond the field allow the significance of designated heritage assets to be appreciated in their historic rural context. The field forms the southern setting of the Cheddleton Conservation Area, which contains several listed buildings including the Grade II* listed church of St Edward the Confessorⁱ. The mediaeval alignment of the village with the Churnet valley can be appreciated with the prominent church marking the historic core.

The field is still used for haymaking, contributing to the rural character of the separate and distinct old village. As part of the former Fould farm, the buildings of which are still in the centre of the old settlement, the field has an historic and economic link to the Conservation Area.

6. BIODIVERSITY and ECOLOGICAL VALUE

The richness of wildlife in the field and its surrounds makes it important to local biodiversity, as was evidenced in a professional ecological appraisal of the field carried out in March 2019ⁱⁱ. The ecologist concluded that the five habitats identified have the potential to be utilized by a variety of animal species, including several priority and protected species. The Staffordshire Ecological Record holds recent records of many species on the field and/or in adjoining gardens, including bats, badgers, hedgehogs, grass snakes, common frogs, common toads, and smooth newts. In addition, great crested newts (GCNs) have recently been confirmed as present, via eDNA testing, in a pond less than 100m from the field. The field includes undeveloped terrestrial habitat suitable for newts and there is a direct route to it, so there is a possibility of GCNs being present.

Over 40 bird species have been observed on or immediately around the field. The Ecologist commented that the field "...could be a pivotal ecological network and developments need to ensure resilience to current and future change by preserving said networks...". These fields function as a wildlife foraging area, refuge and dispersal corridor; they form a network with the Churnet valley.

7. COMMUNITY SUPPORT

A petition confirming that fields 29 and 30 are special to the local community, are of particular local significance and supporting their designation as LGS attracted 825 signatures (summer of 2019). Designation is supported by all three District Councillors for the Ward and unanimously by the Cheddleton Parish Council.

Staffordshire Moorlands Local Plan – Main Modifications Consultation October 2019.

This consultation response is from the Cheddleton Parish Council in support of retention of Local Green Space designations 29 and 30. The Inspector recommended their removal from the Local Plan as detailed in Main Modifications 61 and 73.

Subject: LGS consultation statement

Hi David

Could you please include the following in the material going to the inspector?

STATEMENT FROM CHEDDLETON PARISH COUNCIL

Cheddleton Parish Council believes that the material previously submitted to the LGS consultation, concerning Main Modifications 61 and 73, (Land adjacent to Ox Pasture, Cheddleton) did not receive sufficient consideration in order to make a sound decision.

Unfortunately, time restraints did not allow a full local investigation to take place at the time.

In the intervening period, much more work has taken place in order, we believe, to strengthen our submission.

The bulk of this has been undertaken by our residents, who feel strongly that the loss of our green space would be very detrimental to our village and its community.

We are of the opinion that the wealth of material now submitted, answers all the 3 criteria required by the NPPF and that the protection we enjoyed by the Visual Open Space designation, put in place in the Local Plan of the 1970s, should be restored in its latest incarnation.

It is further interesting to note that in a recent Government announcement on Climate Change, it was stated that there is an intention to increase the number of green spaces in our cities, towns and villages, if necessary, by creating new ones.

This begs the question, 'Why, then, are we in danger of losing our precious green space, which has been in existence for so many years?'

We trust that on this occasion our submission will receive the consideration it deserves.

Cllr Michael Bowen, Chairman, Cheddleton Parish Council

Thanks David

Regards

Mike

STAFFORDSHIRE MOORLANDS LOCAL PLAN – LOCAL GREEN SPACE DESIGNATIONS

NAME/NUMBER OF LGS: Ox Pasture (east) / 30

ORGANISATION RESPONDING: Cheddleton Parish Council

This small field sits in the historic heart of Cheddleton village adjoining the Conservation Area. It is bounded on the west by an historic public footpath and a traditional hedge. To the east from the path the field slopes away to a valley such that the busy A520, and most of the houses lining it, are obscured. The field shares several characteristics with the adjacent LGS 29 to form an open space which is bisected by the footpath.

The field was designated as Visual Open Space (VOS) in 1998, reassessed and confirmed in 2008, and a study in 2016 used the NPPF criteria to recommend LGS designation.

This area is special to the community of Cheddleton and holds particular local significance for the following reasons:

1. TRANQUILLITY

With the adjacent field it provides a valuable area of tranquillity in the heart of the village. There are no roads around it, but there is a well-used public footpath running north / south along the western boundary, the path takes a sharp turn to run along part of the northern boundary. Users of this footpath appreciate the tranquillity and visual relief that the field provides, away from nearby traffic noise and pollution. The path is used by young and old on a daily basis, being the main safe pedestrian walkway from the newer housing estates in the south of the village to the school, church, community centre, tearoom / craft centre, and pub.

The 2016 study described the field as having “high tranquillity”. The tranquillity has not changed since that assessment.

2. BEAUTY

The open nature of the field and the slope away from the footpath enables uninterrupted access to exceptional and cherished public views beyond the settlement to Morridge edge (225 metres higher); the edge is the boundary of the Peak District National Park. Locals and visitors alike particularly appreciate the beauty of this panoramic view.

The VOS criteria included allowing “the public to enjoy significant external views.” The 2016 study described “Very attractive views from footpath on western boundary out towards wider countryside...” The views and their beauty have not changed since those assessments.

3. RECREATIONAL VALUE

Recreational walking groups that visit the village specifically include the paths around the Ox Pasture fields in their walks, and value the visual amenity that the fields offer.

4. CHARACTER

Along with LGS 29 this field contributes to the special character of the village by providing a significant green buffer and sense of separation between the historic core and the more recent residential development that has grown up to the south. Consequently, the community and successive authorities have protected these fields from encroaching urbanisation throughout eight decades of extensive expansion of the village. Most of the properties surrounding the fields have restrictive covenants which effectively prevent access to the fields, illustrating their long-standing special significance and the wish to retain the open space.

Cheddleton village is included in the Churnet Valley Master Plan.

5. HERITAGE VALUE

The field is part of the rural setting of the adjoining Cheddleton Conservation Area which contains several listed buildings and is the mediaeval core of the old village. It is also the western setting of the Grade II listed Grange Farmhouse. This medieval grange farmstead, and the fields behind, are viewed over the valley that hides the A520.

The field is still used for haymaking, contributing to the rural character of the separate and distinct old village. As part of the former Fould farm, the buildings of which are still in the centre of the old settlement, the field has an historic and economic link to the Conservation Area.

6. BIODIVERSITY and ECOLOGICAL VALUE

The richness of wildlife in the field and its surrounds makes it important to local biodiversity, as was evidenced in a professional ecological appraisal of the adjacent field carried out in March 2019ⁱ. The ecologist concluded that the five habitats identified on the similar field have the potential to be utilized by a variety of animal species, including several priority and protected species. The Staffordshire Ecological Record holds recent records of many species in adjoining gardens, including bats, badgers, hedgehogs, grass snakes, common frogs, common toads, and smooth newts. In addition, great crested newts (GCNs) have recently been confirmed as present, via eDNA testing, in a pond 160m from the field. The field includes undeveloped terrestrial habitat suitable for newts, so there is a possibility of GCNs being present.

Over 40 bird species have been observed on or immediately around the two fields.

The Ecologist commented that field 29 "...could be a pivotal ecological network and developments need to ensure resilience to current and future change by preserving said networks...". These fields function as a wildlife foraging area, refuge and dispersal corridor; they form a network with the Churnet valley.

7. COMMUNITY SUPPORT

A petition confirming that fields 29 and 30 are special to the local community, are of particular local significance and supporting their designation as LGS attracted 825 signatures (summer of 2019). Designation is supported by all three District Councillors for the Ward and unanimously by the Cheddleton Parish Council.

Staffordshire Moorlands Local Plan – Main Modifications Consultation October 2019.

This consultation response is from the Cheddleton Parish Council in support of retention of Local Green Space designations 29 and 30. The Inspector recommended their removal from the Local Plan as detailed in Main Modifications 61 and 73.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

--

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Flag Status: Flagged

Categories: Yellow Category

Re Page 63, Policy SS6 - Biddulph Area Strategy

6. Include areas of 'Safeguarded Land' - BD062, BD068 & BD087

Sound - justified - **NO** - there are errors - parts of the evidence were missed out when decisions on the main modifications were taken

Sound - Effective - **NO** - no, safeguarding here will not work well due to reasons stated below about sewage, wildlife, access etc

Sound - consistent with national policy - **NO** - failing in duty to have regard to biodiversity

Complies with Duty to Co-operate - **NO** - not consulting appropriately with Biddulph Town Council or paying heed to the more recent evidence base of the emerging Biddulph Neighbourhood Plan

Concern 1 - Sewage Works - Health Concerns

BD062 and BD068 are both immediately adjacent to a sewage works. Residents already suffer from ad-hoc issues of odour and noise and have registered complaints to United Utilities and SMDC, especially since they learned of plans to build houses even closer. Photographic and video evidence exists of repeated raw sewage flooding the brook at the end of Essex Drive (13/9/16) where pressure builds up inside the junction box and the lid blows off, especially in heavy rain. This happened again in August 2019. This junction forms the point where pipes from the east and west sides of the valley come together. The raw sewage contaminates part of BD062 (proposed eastern site access) and sites downstream, including BD068 and BD087.

It is an ongoing and dangerous issue which will continue to affect current residential areas and BD062. People should not live any closer than the current housing provision and the field needs to be kept as a natural buffer.

We do not believe the opinion of developers who have interests in these fields that issues of odour and noise can be overcome through design as reported by SMDV Council Planning Officers on 26th June 2019 which led to these fields being put forward for 'Safeguarding' (<https://democracy.staffsmoorlands.gov.uk/ieListDocuments.aspx?CIId=284&MIId=1368&Ver=4>) (i.e. making a building air-tight does not change the situation outside or inside the home when windows are doors are open). Adding more houses and increasing surface run off from built up areas will only make this situation worse. In addition to this, climate change increases the likelihood of increased extreme rainfall events in this area which will compound this issue.

In a letter sent on the 27th May 2016 United Utilities stated *"The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"*

Concern 2 - Biodiversity

Key points are:

- The SMDC Phase 1 Ecological Survey evidence base is being ignored.
- The assessment for Local Wildlife Sites by Ecus (2017) was incorrectly carried out.
- The ranking exercise which was used to inform SMDC Council Members and guide decision making At the SMDC Council Assembly on 26th June 2019 was missing the ecological part of the SMDC evidence base. The methodology employed is unsound.
- Removing the Gillow Heath Fields from the green belt and designating them as 'safeguarded sites' for future development (especially BD062) is in direct conflict with the emerging Biddulph Neighbourhood Plan which has a more recent and detailed evidence base which has designated BD062 as Local Greenspace. This had already passed through two local public consultations, which SMDC was well aware of.

Details for the above points:

Biodiversity - The SMDC Local Plan Phase 1 Habitat Survey (Site BD062 / FID122, 2014) concluded "...the site is not recommended for potential development..." [1] and that the site is "...very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site"
<https://www.staffsmoorlands.gov.uk/article/1368/Ecological-studies>).

The site is a wet meadow/grassland and plays a key role in natural flood management in a key position at the bottom of the valley. It lies within the species rich farmland zone (Staffordshire Moorlands Biodiversity Opportunities Map) and has been mapped as part of a major Wildlife Corridor by SMDC Map7.5 pg.77
<https://www.staffsmoorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10>
[SMDC Green Infrastructure Strategy May 2018.pdf](#))

The emerging Biddulph Neighbourhood Plan commissioned external consultants to provide additional detail and evidence for wildlife corridors and potential Local Wildlife Sites across the Biddulph Parish. The mapping for BD062 indicates semi-natural grassland habitat and found to be sited in an important location bringing together two key wildlife corridors – that of the Biddulph Brook and the Biddulph Valley Way
<https://biddulph.co.uk/neighbourhood-plan/>).

The entire ecological evidence base was missed out of the assessment and ranking exercise carried out by SMDC and reported to Council Members on 26th June 2019 which led to the designation of these fields as 'Safeguarded'. The sources used for the exercise are listed and ecological assessments are missing
<https://democracy.staffsmoorlands.gov.uk/ieListDocuments.aspx?CID=284&MID=1368&Ver=4>). This omission is then reflected in the assessment tables in Appendix C and Appendix D and the conclusions drawn (which are unclear and not sound)

This is despite the fact that this information was contained within the previous Sustainability Appraisal Report which accompanied the local plan submission version (Feb 2018) where it was reported that BD062 was 'deemed to have ecological value.'

Only evidence regarding the Green belt review, Landscape Sensitivity, Heritage impact and Agricultural classification was included alongside other economic and development criteria (Options Assessment Tables list pg.30 <https://democracy.staffsmoorlands.gov.uk/ieListDocuments.aspx?CID=284&MID=1368&Ver=4>). The land classification used in this SMDC report on 26th June 2019 is also wrong for all 3 sites in Gillow Heath. They were reported to be urban/industrial land when in fact they are classed as agricultural grassland on the Dudley Stamp Land Use Classification system (Magic Map <https://magic.defra.gov.uk/MagicMap.aspx>) and a quick search on google earth reveals that they are indeed semi-natural habitat (BD062) or agricultural grassland (BD068 / BD087).

Ignoring the ecology in this decision making process totally disregards any value that semi-natural habitats provide for biodiversity and for natural flood management.

This contradicts Section 40 of the *Natural Environment and Rural Communities Act 2006*, which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity.

Sites also need to be considered on an individual basis. Ranking and considering sites as a group leads to misleading conclusions, which is evidenced in the report given to SMDC Council Members on 26th June 2019. Examples where this is misleading include suggesting that all sites are within 800m of the town centre when they clearly are not at Gillow Heath. The ranking method is unsound.

ISSUE 3: Community access

The local community have had unfettered access to this site since the estate was built. For over 40 years, there has been total open access and the land has been used by local residents for events and walking dogs. As recently as 7th July 2019 (and repeatedly since) local residents organised a work party to clear the overgrown footpaths which cross this site and have been doing this for over 40 years. This land has been designated as Local Greenspace by the emerging Biddulph Neighbourhood Plan (currently undergoing REG14 consultation) as it was found to meet the criteria required (<https://biddulph.co.uk/neighbourhood-plan/>).

ISSUE 4 - Access roads

Neither the *distributor road* (Mow Lane) nor the *feeder roads* (Essex Drive and York Close) meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane to the east and west of the access to BD062, and a new sewage pump on Mow Lane all of which reduce the feeder road to a single carriageway in at least 3 locations. There is no alternative access to BD062.

Planning permission has been refused on highways grounds in the past and the situation has only got worse with the creation of the third pinch-point on Mow Lane. **The actual distributor road width (Mow Lane) falls below the minimum required of distributor roads by the Residential Design Guide.** Within the Guide it is clarified that minimum acceptable local distributor roads width must be 6.7m; Mow Lane is 4.25m wide, therefore not meeting the minimum requirements (Residential Design Guide. Supplementary Planning Guidance on Design Quality in Residential Areas Staffordshire County and District Councils 2000).

Access to BD068 & BD087 - Road Safety issues.

Public safety issue - The land proposed for the access road for BD068 & BD087 and the bridge on to BD087 is only 1.5m above normal river height and we know that in the latest flash flood, water reached 2.6m. This land has been identified as Flood Risk 2/3. It is the only access road an bridge on to BD068 and BD087 both enclosed sites. What happens in a flash flood? Will there need to be an Emergency Evacuation Plan in place? Have the emergency services been involved in the pre selection of these sites?

The maximum rise of the river during a flash flood is 2.6m (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6m wide (4m + 2m) single access road and bridge on to these sites, a support wall will have to be built along the river bank. The access road on to BD087 is on the narrow side of the river bank approx 10m wide. Has an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible, given the ground condition is marsh land?

Surely BD068 & BD087 should be dismissed as sites from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested parties (not just the site owner) and provided all the necessary information, including a SFRA Level 2 Flood Risk Assessment, Public Safety Risk Report, Soil sample reports and a SCC Transport report? This should provide the necessary information to ensure that BD068 & BD087 could even be put forward for future planning permission?

ISSUE 5 - Flooding

BD062 (land at end of York Close / Essex Drive) suffers from a high amount of surface water flooding. It is classed as a wet meadow (evidenced by certain marsh flora) and plays an important role in slowing down rainwater flowing into the Biddulph Brook (natural flood management). This field drains part of the Biddulph Valley way as evidenced by the Environment Agency flood maps (<https://flood-warning->

information.service.gov.uk/long-term-flood-risk/map). The proposed eastern site access of Essex Drive is in a floodplain. The field should remain as semi-natural habitat and its' role in natural flood management enhanced.

Concern 6 - Out of date information used to develop the Modified Plan

On June 26th 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had no objections to these sites, however, no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified plan reintroduced sites BD062, BD068 & BD087.

Past information supplied to the SMDC by the Environmental Agency stated "*When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*"

It was also stated at this meeting that they used findings from 2014, 2015 & 2026 to justify their developmet/conclusion to support the modified local plan. This excluded information from 2017, 2018 & 2019 - why?

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood Risk Analysis for BD087, however, when checking with the Environmental Agency (2nd September 2019), this has not been completed. There is only a SFRA Level 1 on record?

In a letter dated 26th August 2015 the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before these sites. BD062, BD068 & BD087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only identified 12 sites of the original housing plan in 2014 of which there was 27. The 3 sites chosen as level 1, BD062, BD068 & BD087, were all considered at great length and excluded.

- The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector - Reason for rejection - a site called BDNEW was to be removed from the Local Plan as it was Green Belt land. All 3 of the above sites are all on Green Belt land.

- In the 2015 Green Belt report commissioned by the SMDC stated that all 3 sites should only be considered under Exceptional circumstances but the same report stated that land to the south of Akemoor Lane on which BDNEW is situated should be considered for consideration for future development. Why has this report not been used as a factual base for the development of Biddulph?

- Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up to date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potentially 3-5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Kind Regards

Sansom, Claire

Subject: Safeguarding of fields in Biddulph

Follow Up Flag: Follow up
Flag Status: Flagged

Categories: Yellow Category

Please find below my comments on the Main Modifications to the SMDC Local Plan, MM12. Safeguarding of fields in Biddulph and Gillow Heath.

I notice that you omitted part of your evidence base when you made decisions about these sites on 26th June 2019 at the Council Assembly. You omitted the ecological evidence base and also incorrectly stated that these fields are urban / industrial land, which is incorrect.

The decision to safeguard fields in Biddulph and Gillow Heath needs reconsidering both in light of your errors and in light of the evidence contained within the emerging Biddulph Neighbourhood Plan (REG14 closing 4th November 2019).

The SMDC Main Modifications are not Sound and do not Comply with the Duty to Cooperate.

Thanks

Stephen Clowes

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be built along the river bank. The access road onto BD 087 is on the narrow side of the river bank approximately 10M wide. I believe that an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land. I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (please select all that apply)

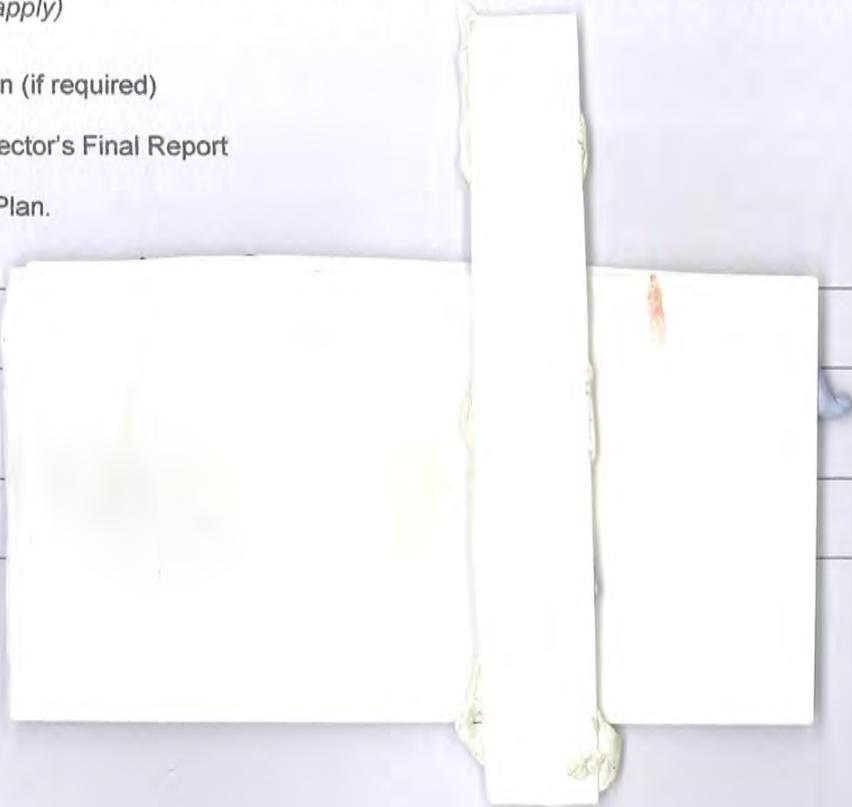

Further hearing session (if required)

Publication of the Inspector's Final Report

Adoption of the Local Plan.

Staffordshire Moorlands Local Plan Examination

MAIN MODIFICATIONS CONSULTATION - SEPTEMBER 2019

Representations Form 5

Guidance Notes

Please ensure that you have read the accompanying 'Statement of Representations Procedure' before completing this form.

The Local Plan Main Modifications Schedule and related documents, including; the Sustainability Appraisal of Main Modifications, Biddulph options assessment, Sustainability Appraisal of Alternative Development Options for Biddulph, Housing Implementation Strategy, Equalities Impact Assessment, Tunstall Road Masterplan Executive Summary and Wharf Road Masterplan Executive Summary can be viewed on the District Council's Main Modifications consultation webpage, Council offices and local libraries.

Website: <http://www.staffsmoorlands.gov.uk/localplan>

Council offices:

- Leek** Moorlands House, Stockwell Street, Leek, Staffordshire, ST13 6HQ (8.45am - 5.15pm Monday - Thursday and 8.45am - 4.45pm on Friday)
- Cheadle** Councils Connect, 15a-17 High Street, Cheadle, Staffordshire, ST10 1AA (9.00am - 12.30pm & 1.00pm - 5.00pm on Monday, Wednesday and Friday)
- Biddulph** Town Hall, High Street, Biddulph, Staffordshire, ST8 6AR (9.00am - 5.00pm Monday – Friday)

Please return this form by **5pm on 31 October 2019** to the email or postal address given below or by completing the online questionnaire at : <http://www.staffsmoorlands.gov.uk/localplan>

Email: forward.plans@staffsmoorlands.gov.uk

Post: Freepost RRLJ-XCTC-JBZK, Forward Plans, Staffordshire Moorlands District Council, Regeneration Services, Moorlands House, Stockwell Street, Leek, ST13 6HQ

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Buy in is key to developing any plan – there is no buy into this plan by any of the people in Biddulph – this cannot be dressed up. No due process has been followed. To push this modified local plan through at break neck speed can only lead to an expensive legal outcome. SMDC has had 8 years to get this local plan right, this Modified Local Plan has taken 3 months from 26th June, no public face to face consultation, and a hurried last minute consultation period with almost no one informed. Only the Site Owners have been kept up to date. Why!

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access road
 Marsh Green Road does not meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy. The road is too narrow & there is a pinch point over the bridge on Marsh Green Road before the access to BD067. Marsh Green Road is too narrow along its total length & has no footpath for most of its length. Road Widening will require the compulsive purchase of gardens near its junction with Congleton Road
 Marsh Green Road falls below the minimum required of distributor roads by the Residential Design Guide. Within the Guide it is clarified that minimum acceptable local distributor roads width must be 6.7m; Marsh Green Road is 3.25m wide, therefore not meeting the minimum requirements (Residential Design Guide. Supplementary Planning Guidance on Design Quality in Residential Areas Staffordshire County and District Councils 2000).

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

BIODIVERSITY

Key points are:

- The SMDC Phase 1 Ecological Survey evidence base is being ignored.
- The assessment for Local Wildlife Sites by Ecus (2017) was incorrectly carried out.
- The ranking exercise which was used to inform SMDC Council Members and guide decision making At the SMDC Council Assembly on 26th June 2019 was missing the ecological part of the SMDC evidence base. The methodology employed is unsound.
- Removing the Gillow Heath Fields from the green belt and designating them as 'safeguarded sites' for future development (especially BD062) is in direct conflict with the emerging Biddulph Neighbourhood Plan which has a more recent and detailed evidence base which has designated BD062 as Local Greenspace. This had already passed through two local public consultations, which SMDC was well aware of.

Details for the above points:

Biodiversity - The SMDC Local Plan Phase 1 Habitat Survey (Site BD062 / FID122, 2014) concluded " *...the site is not recommended for potential development...*" [1] and that the site is " *...very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site*" (<https://www.staffsmoorlands.gov.uk/article/1368/Ecological-studies>).

The site is a wet meadow/grassland and plays a key role in natural flood management in a key position at the bottom of the valley. It lies within the species rich farmland zone (Staffordshire Moorlands Biodiversity Opportunities Map) and has been mapped as part of a major Wildlife Corridor by SMDC Map7.5 pg.77

(https://www.staffsmoorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10_SMDC_Green_Infrastructure_Strategy_May_2018.pdf)

The emerging Biddulph Neighbourhood Plan commissioned external consultants to provide additional detail and evidence for wildlife corridors and potential Local Wildlife Sites across the Biddulph Parish. The mapping for BD062 indicates semi-natural grassland habitat and found to be sited in an important location bringing together two key wildlife corridors - that of the Biddulph Brook and the Biddulph Valley Way (<https://biddulph.co.uk/neighbourhood-plan/>).

The entire ecological evidence base was missed out of the assessment and ranking exercise carried out by SMDC and reported to Council Members on 26th June 2019 which led to the designation of these fields as 'Safeguarded'. The sources used for the exercise are listed and ecological assessments are missing

(<https://democracy.staffsmoorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>). This omission is then reflected in the assessment tables in Appendix C and Appendix D and the conclusions drawn (which are unclear and not sound).

This is despite the fact that this information was contained within the previous Sustainability Appraisal Report which accompanied the local plan submission version (Feb 2018) where it was reported that BD062 was 'deemed to have ecological value.'

Only evidence regarding the Green belt review, Landscape Sensitivity, Heritage impact and Agricultural classification was included alongside other economic and development criteria (Options Assessment Tables list pg.30

<https://democracy.staffsmoorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>). The land classification used in this SMDC report on 26th June 2019 is also wrong for all 3 sites in Gillow Heath. They were reported to be urban/industrial land when in fact they are classed as agricultural grassland on the Dudley Stamp Land Use Classification system (Magic Map (<https://magic.defra.gov.uk/MagicMap.aspx>) and a quick search on google earth reveals that they are indeed semi-natural habitat (BD062) or agricultural grassland (BD068 / BD087).

Ignoring the ecology in this decision making process totally disregards any value that semi-natural habitats provide for biodiversity and for natural flood management. This contradicts Section 40 of the *Natural Environment and Rural Communities Act 2006*, which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity.

Sites also need to be considered on an individual basis. Ranking and considering sites as a group leads to misleading conclusions, which is evidenced in the report given to SMDC Council Members on 26th June 2019. Examples where this is misleading include suggesting that all sites are within 800m of the town centre when they clearly are not at Gillow Heath. The ranking method is unsound.

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Sewage works

BD062 and BD068 are both immediately adjacent to a sewage works. Residents who live on Essex Drive, York Close and Long Valley Road already suffer from ad-hoc issues of odour and noise and have registered complaints to United Utilities and SMDC, especially since they learned of plans to build houses even closer. Photographic and video evidence exists of repeated raw sewage flooding into the brook at the end of Essex Drive (13/9/2016) where pressure builds up inside the junction box and the lid blows off, especially following heavy rain. This happened again in August 2019. This junction forms the point where pipes from the east and west sides of the valley come together. The raw sewage contaminates part of BD062 (proposed eastern site access) and sites downstream, including BD068 and BD087.

It is an ongoing and dangerous issue which will continue to affect current residential areas and BD062. People should not live any closer than the current housing provision and the

field needs to be kept as a natural buffer. Local residents should be listened to in this matter instead of repeatedly being ignored. Building adjacent to the sewage works will create even more of a statutory nuisance (noise, odour, sewage flooding) and an unhealthy neighbourhood.

We do not believe the opinion of developers who have interests in these fields that issues of odour and noise can be overcome through design as reported by SMDC Council Planning Officers on 26th June 2019 in the meeting which led to these fields being put forward for 'Safeguarding'.

(<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>) (ie. making a building air-tight does not change the situation outside or inside the home when windows and doors are open). Adding more houses and increasing surface runoff from built up areas will only make this situation worse. In addition to this, climate change increases the likelihood of increased extreme rainfall events in this area which will compound this issue.

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the

MM/ document reference MM/12

Sustainability Appraisal, please identify the document and paragraph/page number etc.

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land - No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

No buy in by the people of Biddulph
Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable?

These sites are on a Flood plain and have soil issues. Running sand has been a frequent issue for many sites in Biddulph. During the course of creating a soak away for rainwater run-off in the garden of my house, at a site only 2.5 meters away from the site I discovered that beneath a thin layer of heavy clay, there is a deep deposit of very soft running sand. Photographic evidence is attached. The presence of running sand is confirmed by the British Geological Survey who made the following statement: -

"Some rocks can contain loosely-packed sandy layers that can become fluidised by water flowing through them. Such sands can 'run', removing support from overlying buildings and causing potential damage.

Running sand hazards can occur where excavations in the sand go below the water table, where springs occur at the base of sand outcrops, around leaking drains or mains water supply pipes or in entire sand bodies if vibrated (liquefaction) e.g. by an earthquake.

A property affected by running sand may experience the following problems:

- *Access paths and roads may be broken and disrupted*
- *Service connections to water, gas and electricity supplies may break*
- *Structural damage to foundations and to the fabric of the building if uneven sinking occurs under the foundations. "*

Construction on this site would be likely to allow the sand to run causing subsidence and damage to existing properties in Portland Drive, for which consequential damage SMDC may be partly liable. All of these factors would mean that any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action which in the end would prove very expensive to the local council.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendments) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Re Page 63, Policy SS6 - Biddulph Area Strategy

6. Include areas of 'Safeguarded Land' - BD062, BD068 & BD087

Sound - justified - **NO** - there are errors - parts of the evidence were missed out when decisions on the main modifications were taken

Sound - Effective - **NO** - no, safeguarding here will not work well due to reasons stated below about sewage, wildlife, access etc

Sound - consistent with national policy - **NO** - failing in duty to have regard to biodiversity

Complies with Duty to Co-operate - **NO** - not consulting appropriately with Biddulph Town Council or paying heed to the more recent evidence base of the emerging Biddulph Neighbourhood Plan

Concern 1 - Sewage Works - Health Concerns

BD062 and BD068 are both immediately adjacent to a sewage works. Residents already suffer from ad-hoc issues of odour and noise and have registered complaints to United Utilities and SMDC, especially since they learned of plans to build houses even closer. Photographic and video evidence exists of repeated raw sewage flooding the brook at the end of Essex Drive (13/9/16) where pressure builds up inside the junction box and the lid blows off, especially in heavy rain. This happened again in August 2019. This junction forms the point where pipes from the east and west sides of the valley come together. The raw sewage contaminates part of BD062 (proposed eastern site access) and sites downstream, including BD068 and BD087.

It is an ongoing and dangerous issue which will continue to affect current residential areas and BD062. People should not live any closer than the current housing provision and the field needs to be kept as a natural buffer.

We do not believe the opinion of developers who have interests in these fields that issues of odour and noise can be overcome through design as reported by SMDV Council Planning Officers on 26th June 2019 which led to these fields being put forward for 'Safeguarding'

(<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CIId=284&MIId=1368&Ver=4>) (i.e. making a building air-tight does not change the situation outside or inside the home when windows are doors are open). Adding more houses and increasing surface run off from built up areas will only make this situation worse. In addition to this, climate change increases the likelihood of increased extreme rainfall events in this area which will compound this issue.

In a letter sent on the 27th May 2016 United Utilities stated "*The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works*"

Concern 2 - Biodiversity

Key points are:

- The SMDC Phase 1 Ecological Survey evidence base is being ignored.
- The assessment for Local Wildlife Sites by Ecus (2017) was incorrectly carried out.
- The ranking exercise which was used to inform SMDC Council Members and guide decision making At the SMDC Council Assembly on 26th June 2019 was missing the ecological part of the SMDC evidence base. The methodology employed is unsound.
- Removing the Gillow Heath Fields from the green belt and designating them as 'safeguarded sites' for future development (especially BD062) is in direct conflict with the emerging Biddulph Neighbourhood Plan which has a more recent and detailed evidence base which has designated BD062 as Local Greenspace. This had already passed through two local public consultations, which SMDC was well aware of.

Details for the above points:

Biodiversity - The SMDC Local Plan Phase 1 Habitat Survey (Site BD062 / FID122, 2014) concluded "*...the site is not recommended for potential development...*"^[1] and that the site is "*...very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site*" (<https://www.staffs Moorlands.gov.uk/article/1368/Ecological-studies>).

The site is a wet meadow/grassland and plays a key role in natural flood management in a key position at the bottom of the valley. It lies within the species rich farmland zone (Staffordshire Moorlands Biodiversity Opportunities Map) and has been mapped as part of a major Wildlife Corridor by SMDC Map7.5 pg.77 (<https://www.staffs Moorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10> SMDC Green Infrastructure Strategy May 2018.pdf)

The emerging Biddulph Neighbourhood Plan commissioned external consultants to provide additional detail and evidence for wildlife corridors and potential Local Wildlife Sites across the Biddulph Parish. The mapping for BD062 indicates semi-natural grassland habitat and found to be sited in an important location bringing together two key wildlife corridors – that of the Biddulph Brook and the Biddulph Valley Way (<https://biddulph.co.uk/neighbourhood-plan/>).

The entire ecological evidence base was missed out of the assessment and ranking exercise carried out by SMDC and reported to Council Members on 26th June 2019 which led to the designation of these fields as 'Safeguarded'. The sources used for the exercise are listed and ecological assessments are missing (<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CIId=284&MIId=1368&Ver=4>). This omission is then reflected in the assessment tables in Appendix C and Appendix D and the conclusions drawn (which are unclear and not sound)

This is despite the fact that this information was contained within the previous Sustainability Appraisal Report which accompanied the local plan submission version (Feb 2018) where it was reported that BD062 was '*deemed to have ecological value.*'

Only evidence regarding the Green belt review, Landscape Sensitivity, Heritage impact and Agricultural classification was included alongside other economic and development criteria (Options Assessment Tables list pg.30 <https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CIId=284&MIId=1368&Ver=4>). The

land classification used in this SMDC report on 26th June 2019 is also wrong for all 3 sites in Gillow Heath. They were reported to be urban/industrial land when in fact they are classed as agricultural grassland on the Dudley Stamp Land Use Classification system (Magic Map (<https://magic.defra.gov.uk/MagicMap.aspx>) and a quick search on google earth reveals that they are indeed semi-natural habitat (BD062) or agricultural grassland (BD068 / BD087).

Ignoring the ecology in this decision making process totally disregards any value that semi-natural habitats provide for biodiversity and for natural flood management.

This contradicts Section 40 of the *Natural Environment and Rural Communities Act 2006*, which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity.

Sites also need to be considered on an individual basis. Ranking and considering sites as a group leads to misleading conclusions, which is evidenced in the report given to SMDC Council Members on 26th June 2019. Examples where this is misleading include suggesting that all sites are within 800m of the town centre when they clearly are not at Gillow Heath. The ranking method is unsound.

ISSUE 3: Community access

The local community have had unfettered access to this site since the estate was built. For over 40 years, there has been total open access and the land has been used by local residents for events and walking dogs. As recently as 7th July 2019 (and repeatedly since) local residents organised a work party to clear the overgrown footpaths which cross this site and have been doing this for over 40 years. This land has been designated as Local Greenspace by the emerging Biddulph Neighbourhood Plan (currently undergoing REG14 consultation) as it was found to meet the criteria required (<https://biddulph.co.uk/neighbourhood-plan/>).

ISSUE 4 - Access roads

Neither the *distributor road* (Mow Lane) nor the *feeder roads* (Essex Drive and York Close) meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane to the east and west of the access to BD062, and a new sewage pump on Mow Lane all of which reduce the feeder road to a single carriageway in at least 3 locations. There is no alternative access to BD062.

Planning permission has been refused on highways grounds in the past and the situation has only got worse with the creation of the third pinch-point on Mow Lane. **The actual distributor road width (Mow Lane) falls below the minimum required of distributor roads by the Residential Design Guide.** Within the Guide it is clarified that minimum acceptable local distributor roads width must be 6.7m; Mow Lane is 4.25m wide, therefore not meeting the minimum requirements (Residential Design Guide. Supplementary Planning Guidance on Design Quality in Residential Areas Staffordshire County and District Councils 2000).

Access to BD068 & BD087 - Road Safety issues.

Public safety issue - The land proposed for the access road for BD068 & BD087 and the bridge on to BD087 is only 1.5m above normal river height and we know that in the latest flash flood, water reached 2.6m. This land has been identified as Flood Risk 2/3. It is the only access road an bridge on to BD068 and BD087 both enclosed sites. What happens in a flash flood? Will there need to be an Emergency Evacuation Plan in place? Have the emergency services been involved in the pre selection of these sites?

The maximum rise of the river during a flash flood is 2.6m (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6m wide (4m + 2m) single access road and bridge on to these sites, a support wall will have to be built along the river bank. The access road on to BD087 is on the narrow side of the river bank approx 10m wide. Has an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible, given the ground condition is marsh land?

Surely BD068 & BD087 should be dismissed as sites from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested parties (not just the site owner) and provided all the necessary information, including a SFRA Level 2 Flood Risk Assessment, Public Safety Risk Report, Soil sample reports

and a SCC Transport report? This should provide the necessary information to ensure that BD068 & BD087 could even be put forward for future planning permission?

ISSUE 5 - Flooding

BD062 (land at end of York Close / Essex Drive) suffers from a high amount of surface water flooding. It is classed as a wet meadow (evidenced by certain marsh flora) and plays an important role in slowing down rainwater flowing into the Biddulph Brook (natural flood management). This field drains part of the Biddulph Valley way as evidenced by the Environment Agency flood maps (<https://flood-warning-information.service.gov.uk/long-term-flood-risk/map>). The proposed eastern site access of Essex Drive is in a floodplain. The field should remain as semi-natural habitat and its' role in natural flood management enhanced.

Concern 6 - Out of date information used to develop the Modified Plan

On June 26th 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had no objections to these sites, however, no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified plan reintroduced sites BD062, BD068 & BD087.

Past information supplied to the SMDC by the Environmental Agency stated "*When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*"

It was also stated at this meeting that they used findings from 2014, 2015 & 2026 to justify their developmet/conclusion to support the modified local plan. This excluded information from 2017, 2018 & 2019 - why?

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood Risk Analysis for BD087, however, when checking with the Environmental Agency (2nd September 2019), this has not been completed. There is only a SFRA Level 1 on record?

In a letter dated 26th August 2015 the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before these sites. BD062, BD068 & BD087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only identified 12 sites of the original housing plan in 2014 of which there was 27. The 3 sites chosen as level 1, BD062, BD068 & BD087, were all considered at great length and excluded.

- The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector - Reason for rejection - a site called BDNEW was to be removed from the Local Plan as it was Green Belt land. All 3 of the above sites are all on Green Belt land.

- In the 2015 Green Belt report commissioned by the SMDC stated that all 3 sites should only be considered under Exceptional circumstances but the same report stated that land to the south of Akemoor Lane on which BDNEW is situated should be considered for consideration for future development. Why has this report not been used as a factual base for the development of Biddulph?

- Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up to date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potentially 3-5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should

be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Staffordshire Moorlands Local Plan - Main Modifications Consultation

Thank you for your notification received on the 18 September 2019 in respect of the above consultation.

I can confirm that the Coal Authority has no specific comments to make on the Main Modifications proposed.

Regards

Melanie Lindsley

Melanie Lindsley BA (Hons), DipEH, DipURP, MA, PGCertUD, PGCertSP, MRTPI
Development Team Leader (Planning)

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.
2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

<p>Access to BD 068 and BD 087 - Road Safety Issues Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site? The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have</p>
--

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

<p>No Buy in by the people of Biddulph Short cutting of the Modification selection process is not acceptable.</p> <p>Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?</p> <p>I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.</p>

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM12

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant	. Yes
Sound - Positively prepared	. Yes
Sound - Justified	. Yes
Sound - Effective	. Yes
Sound - Consistent with national policy	. Yes
Complies with the Duty to co-operate	. Yes

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Considers the plan is sound, legally compliant and complies with the duty to co-operate.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

No

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

Considers the plan is sound, legally compliant and complies with the duty to co-operate.

Officer Response

Support noted.

Recommendation

No change.

Version	0.3

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM73 Page 284/5

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant

Sound - Positively prepared

Sound - Justified

No

Sound - Effective

Sound - Consistent with national policy

Complies with the Duty to co-operate

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

It was proposed to allocate the green space east and west of Dorset Drive as local green space. However, the inspector has recommended their removal which puts them at risk of future development. Paragraphs 99-101 of the national planning policy framework allows for the designation of local green space, and the proposed designations clearly meet with the criteria. We, the undersigned, petition Staffordshire Moorlands District Council to robustly challenge the Inspector's recommendations and retain the green space off Dorset Drive as designated local green space.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Maintain Dorset Drive East and West as Local Green Space as recommended in the neighbourhood plan.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

Summary of response

Dorset Drive East and West clearly meet the LGS designation criteria so should be retained as LGS. Deletion of the designation puts them at risk of future development.

Officer Response

Refer to Inspector's Post Hearing Advice – Main Modifications and Related Matters – paras. 32 & 33. (EL6.004) and subsequent Inspector's letter (EL6.008). On the basis of the Inspector's recommendations, the Council agreed main modifications to delete the Local Green Space (LGS) at the Council Assembly meeting on 26th June 2019. The green space at Dorset Drive is still designated as open space which offers protection under Local Plan Policy C2 (see MM31).

Recommendation

No change.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Subject: Local SMDC Plan MM12 Safeguarding of fields in Gillow Heath

Follow Up Flag: Follow up
Flag Status: Flagged

Categories: Yellow Category

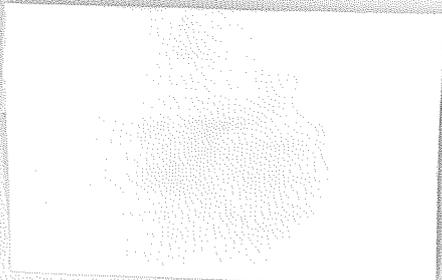

"Please find below my comments on the Main Modifications to the SMDC Local Plan, MM12. Safeguarding of fields in Gillow Heath.

I notice that you omitted part of your evidence base when you made decisions about these sites on 26th June 2019 at the Council Assembly. You omitted the ecological evidence base and also incorrectly stated that these fields are urban / industrial land, which is incorrect.

The decision to safeguard fields in Gillow Heath needs reconsidering both in light of your errors and in light of the evidence contained within the emerging Biddulph Neighbourhood Plan (REG14 closing 4th November 2019). The SMDC Main Modifications are not Sound and do not Comply with the Duty to Cooperate.

Please acknowledge my comment."

Event Name	Main Modifications Consultation
Comment by	Mrs Dianne Copeland (1229311)
Comment ID	MMC73
Response Date	30/10/19 15:44
Consultation Point	1 Main Modifications Consultation (View)
Status	Submitted
Submission Type	Web
Version	0.4

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM12

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant

Sound - Positively prepared

Sound - Justified . No

Sound - Effective . No

Sound - Consistent with national policy

Complies with the Duty to co-operate . No

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Parts of the evidence were missed out when decisions on the main modifications were taken
Safeguarding here will not work well -there is a sewage works on this site which doesn't work properly.
There is a lot of wildlife on this land which we all look after, it's a little piece of paradise for our wild friends. There is a failing in duty to have regard to biodiversity

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

You should not build on this land it's wet, unsafe and there is no way a road can be put through for the extra traffic this would entail. It should be kept for the wildlife.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

No

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

Summary of response

- Parts of the evidence were missed out when decisions on the main modifications were taken. -
Safeguarding here will not work well -there is a sewage works on this site which doesn't work properly.
There is a lot of wildlife on this land which we all look after, it's a little piece of paradise for our wild friends. - There is a failing in duty to have regard to biodiversity.

Officer Response

See standard officer response in MMC256.

Recommendation

See MMC256.

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ 12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.
2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

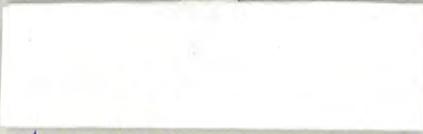

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ 12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate; please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

30 OCT 2019

SMDC
Moorlands House
Stockwell Street
Leek

27 October 2019

Dear Sir,

Herewith are my comments on the latest modifications to the Moorlands Local Plan. You will notice that my address indicates that I should declare an interest but I make these comments without prejudice.

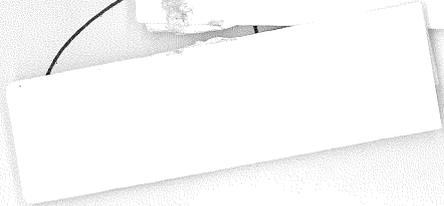

1. Reorienting the plans for Wharf Road, in that housing will now be preferred, instead of the formerly proposed retail/business use and making the old Meadows site available for retail, instead of housing, will be detrimental to the already struggling businesses in the High Street, by dragging footfall and trade to the top of the Biddulph Inner Ring Road.
2. The apparent plan for the proposed Mill Hayes/Victoria Road site, of a mix of residential and business premises is acceptable. Except that, please, do not develop it in such a way as to force the current residents in Victoria Row to look out onto industrial units. That would be unfair in terms of loss of light, noise and pollution from the businesses and the vehicular traffic that serves them. Better that the residential properties are built on their boundaries.
3. I believe the removal of the Gillow Heath sites adjacent to the sewage works and Biddulph Brook are not sustainable environmentally, economically or in terms of infrastructure. I note that these three sites were removed from the plan after being preferred sites in the early draft of the Local Plan. The question now is why have they been reinstated? What are the "exceptional circumstances" that have caused them to be changed, to now make them prime, (albeit "safeguarded") sites? I should like to see how you demonstrate their sustainability in terms of the NPPF para 135.
4. When the original draft of the Local Plan was made public, I and many other residents, commented on various aspects of it, including the choice of the (then) four sites around the sewage works. Concerns remain the same if any of these sites are retained in the Plan. They are flood risk, especially as the climate changes; smells, noise and flies emanating from the sewage works; the surrounding roads are nothing but tarmac covered farm tracks and are dangerously narrow; the junctions with Congleton Road are overburdened with traffic, especially at peak times.
5. But my biggest complaint is that this modified plan has taken no account whatsoever, of the environmental assessments performed by the members of the Biddulph Neighbourhood Plan Working Group, even though its draft document was sent to SMDC in May 2019, well in advance of the release of the modified Local Plan. I and many residents regard this as a dereliction of your duty to take all matters in to account, when drawing up the Plan.

6. Finally, you must be aware that the proposed site behind Portland Drive and the proposed site off Marsh Green Road are valuable pasture land, for many months of the year playing host to grazing cattle and being used for silage production. In my view, this should be taken into account as Brexit approaches, which will change our farming to make us more self sustaining.
7. As a general comment, I am extremely concerned that our local infrastructure, in terms of Primary Health Care and Schools capacity are already overstretched. I hope the Government Inspector is made aware of this, when he reviews the Modified Local Plan.

I'm grateful for the opportunity to comment on the Plan and trust my comments will add to your database, along with all the other comments from Biddulph residents.

Yours sincerely,

Janet Court

Dear Sir,

Herewith are my comments on the latest modifications to the Moorlands Local Plan. You will notice that my address indicates that I should declare an interest but I make these comments without prejudice.

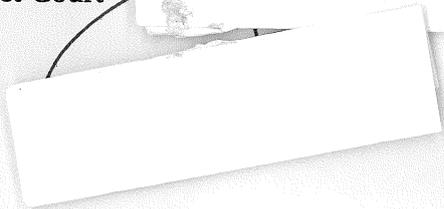

1. Reorienting the plans for Wharf Road, in that housing will now be preferred, instead of the formerly proposed retail/business use and making the old Meadows site available for retail, instead of housing, will be detrimental to the already struggling businesses in the High Street, by dragging footfall and trade to the top of the Biddulph Inner Ring Road.
2. The apparent plan for the proposed Mill Hayes/Victoria Road site, of a mix of residential and business premises is acceptable. Except that, please, do not develop it in such a way as to force the current residents in Victoria Row to look out onto industrial units. That would be unfair in terms of loss of light, noise and pollution from the businesses and the vehicular traffic that serves them. Better that the residential properties are built on their boundaries.
3. I believe the removal of the Gillow Heath sites adjacent to the sewage works and Biddulph Brook are not sustainable environmentally, economically or in terms of infrastructure. I note that these three sites were removed from the plan after being preferred sites in the early draft of the Local Plan. The question now is why have they been reinstated? Staffordshire Moorlands Local Plan Examination

MAIN MODIFICATIONS CONSULTATION - SEPTEMBER 2019

Representations Form 1

Part A – Personal details and notifications

	Personal details
Title	MRS
First name	JANE
Last name	COOK
Address line 1	
Address line 2	
Address line 3	
Post code	
Telephone number	
Email address	

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ 12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

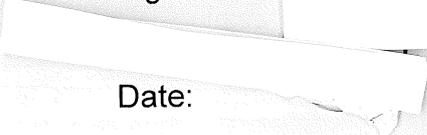

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Dear Sir,

Herewith are my comments on the latest modifications to the Moorlands Local Plan. You will notice that my address indicates that I should declare an interest but I make these comments without prejudice.

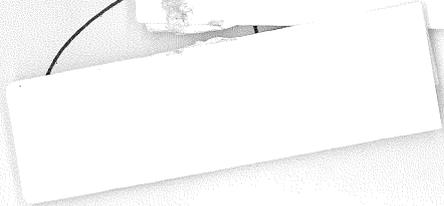

1. Reorienting the plans for Wharf Road, in that housing will now be preferred, instead of the formerly proposed retail/business use and making the old Meadows site available for retail, instead of housing, will be detrimental to the already struggling businesses in the High Street, by dragging footfall and trade to the top of the Biddulph Inner Ring Road.
2. The apparent plan for the proposed Mill Hayes/Victoria Road site, of a mix of residential and business premises is acceptable. Except that, please, do not develop it in such a way as to force the current residents in Victoria Row to look out onto industrial units. That would be unfair in terms of loss of light, noise and pollution from the businesses and the vehicular traffic that serves them. Better that the residential properties are built on their boundaries.
3. I believe the removal of the Gillow Heath sites adjacent to the sewage works and Biddulph Brook are not sustainable environmentally, economically or in terms of infrastructure. I note that these three sites were removed from the plan after being preferred sites in the early draft of the Local Plan. The question now is why have they been reinstated? What are the "exceptional circumstances" that have caused them to be changed, to now make them prime, (albeit "safeguarded") sites? I should like to see how you demonstrate their sustainability in terms of the NPPF para 135.
4. When the original draft of the Local Plan was made public, I and many other residents, commented on various aspects of it, including the choice of the (then) four sites around the sewage works. Concerns remain the same if any of these sites are retained in the Plan. They are flood risk, especially as the climate changes; smells, noise and flies emanating from the sewage works; the surrounding roads are nothing but tarmac covered farm tracks and are dangerously narrow; the junctions with Congleton Road are overburdened with traffic, especially at peak times.
5. But my biggest complaint is that this modified plan has taken no account whatsoever, of the environmental assessments performed by the members of the Biddulph Neighbourhood Plan Working Group, even though its draft document was sent to SMDC in May 2019, well in advance of the release of the modified Local Plan. I and many residents regard this as a dereliction of your duty to take all matters in to account, when drawing up the Plan.

6. Finally, you must be aware that the proposed site behind Portland Drive and the proposed site off Marsh Green Road are valuable pasture land, for many months of the year playing host to grazing cattle and being used for silage production. In my view, this should be taken into account as Brexit approaches, which will change our farming to make us more self sustaining.
7. As a general comment, I am extremely concerned that our local infrastructure, in terms of Primary Health Care and Schools capacity are already overstretched. I hope the Government Inspector is made aware of this, when he reviews the Modified Local Plan.

I'm grateful for the opportunity to comment on the Plan and trust my comments will add to your database, along with all the other comments from Biddulph residents.

Yours sincerely,

Janet Court

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	<input type="checkbox"/>
Sound - Positively prepared	<input type="checkbox"/>	<input type="checkbox"/>
Sound - Justified	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Effective	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Consistent with national policy	<input type="checkbox"/>	<input type="checkbox"/>
Complies with the Duty to co-operate	<input type="checkbox"/>	<input type="checkbox"/>

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Policy DC 4

CPRE Staffordshire believes that it would be considered inappropriate for "Development proposals within a Local Green Space to be assessed against national Green Belt policy."

Reasons

- a. The proposed policy attempts to apply national policy to a local designation. We do not think that this accords with Government or Inspectorate advice.
- b. In our view, as a matter of planning principle, Green Belt policies should only be applied to areas of designated Green Belt. (not to Local Green Space or other land outside Green Belt)
- c. Some villages and identified Local Green Space may be considered to be 'within Green Belt', by virtue of being surrounded by it, but the village itself, and open spaces within it, are not designated as Green Belt.
- d. Identified Local Green Space in a Local Plan may not necessarily be within Green Belt - but is still worth protecting on its own merits.

Also

In villages outside designated Green Belt we suspect that the proposed policy would be argued, at appeal, to be a nullity since, as written in the modifications, it tries to use National Policy on Green Belts to apply to land outside designated Green Belt

Our requests:-

CPRE Staffordshire thinks that as Local Green Space is a local designation (Green Belts are national) the policy (DC4) should be free-standing with no reference to Green Belt and therefore:-

- i) We respectfully suggest the proposed Modification should now be withdrawn.
- ii) We ask that the Policy DC4) should stand as originally presented as a local policy in the Submitted Local Plan.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Staffordshire Moorlands Local Plan Examination

MAIN MODIFICATIONS CONSULTATION - SEPTEMBER 2019

Representations Form

Part A – Personal details and notifications

	Personal details
Title	MRS
First name	ANN-MARIE
Last name	CUMBERBATCH

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>.

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	0	X
Sound - Positively prepared	0	X
Sound - Justified	0	X
Sound - Effective	0	X
Sound - Consistent with national policy	0	X
Complies with the Duty to co-operate	0	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past information supplied to the SMDC - The Environmental Agency stated –
"When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted."

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would

potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land - No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

Ian Dakin

Like many residents of, and visitors too Cheddleton, I value the green spaces on either side of The Gully. These spaces are important to my health and well-being, as they provide a place of tranquillity with great views to the hills and down onto other parts of Cheddleton. I have a feeling of calm and connection to nature as I walk along here. Especially with my dog, as he loves the smells of nature around him too. Walking along the gully or the footpath that runs from Ostlers Lane is always relaxing and there is abundant bird life from the established hedges, trees, bushes and meadows. The meadows also provide habitat for insects, and in the summer evenings you can see bats feeding over the meadows. I have also seen amphibious life in the area. It is a great joy to me, and when family and friends have visited from other parts of the country, they too have enjoyed this walk into the centre of the village. Loss of these green spaces would also adversely affect the environment and contribute to climate change, through release of carbon from the fields and from any development that would take place. Climate change is a source of concern to me and others. It is of particular concern to the young in our village. They face the future knowing that what my generation do is adversely affecting their future. The loss of these green spaces would also go against the aims of the District Council and the target of carbon neutrality by 2030. The council was unanimous on this matter and was democratically elected in 2019 to represent the people of Cheddleton and the Moorlands as a whole. I will feel a great sense of loss, and of failure to protect these green and open spaces for future generations. I say this also as a local Parish Councillor for Cheddleton.

Another resident (Dennis Parker-Jones) and I made a video recording the thoughts of local people. I also submit this as evidence in favour of protecting the green spaces, and evidence of how much our community values them. Here is a link to YouTube where you can see the video. I urge you to accept this as evidence of the beliefs of several generations of villagers.

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM41

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant

Sound - Positively prepared

Sound - Justified

Sound - Effective

Sound - Consistent with national policy

Complies with the Duty to co-operate

No

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

I am concerned that the development plan for this site BD 117 has been produced without due concern for the residents of Victoria Row and therefore does not satisfy the requirement of 'duty of co-operation'. The development plan shows industrial buildings opposite Victoria Row. No residents want this or requested it in the consultation about the site development.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

A more acceptable arrangement would be for the houses proposed in Mill Hayes Road to be placed opposite Victoria Row and the industrial development extended to Mill Hayes Road.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required)
- Publication of the Inspector's Final Report

Summary of response

Concerned that the development plan for site BD117 has been produced without due concern for the residents of Victoria Row and therefore does not satisfy the requirement of 'duty to co-operate'. The development plan shows industrial buildings opposite Victoria Row. No residents want this or requested it in the consultation about the site development. A more acceptable arrangement would be for the houses proposed in Mill Hayes Road to be placed opposite Victoria Row and the industrial development extended to Mill Hayes Road.

Officer Response

MM41 shows the amended policy wording and supporting text for the Tunstall Road Strategic Development Area. It refers to the increased number of houses which can be accommodated on the

site as a result of detailed masterplan work and states that layout details (e.g. position of access, housing and employment uses) will be determined as part of the masterplan taking into account amenity impacts in relation to neighbouring land uses. Consequently the Local Plan allocation does not cover the detailed layout of the site. The masterplan is a separate document and was reported to Service Delivery Overview & Scrutiny Panel on the 25th September 2019. In any case before the site could be developed it would need planning permission and residents would then have the opportunity to raise any concerns they have about the detailed layout of the scheme which could differ from the masterplan.

Recommendation

No change.

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM39

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant

Sound - Positively prepared . No

Sound - Justified . No

Sound - Effective

Sound - Consistent with national policy

Complies with the Duty to co-operate . No

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

I am concerned that the development plan for Wharf Road shows a retail park at the southern end of the site. This is in conflict with other areas of the Local Plan. SS6 states that town centre regeneration will be supported, development away from the town centre will not comply with this. MM 39 9.33 states that the new store should be sustainably located so that 'linked trips to the town can be achieved'. In the position proposed this cannot be achieved. The proximity of listed buildings also makes the proposed position non-compliant.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

The proposed retail development should be at the north end of the site, a sustainable position near the town centre, away from listed buildings and offers the possibility of linked shopping trips. This would make the development Local Plan compliant.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required)
- Publication of the Inspector's Final Report

Summary of response

Concerned that the development plan for Wharf Road shows a retail park at the southern end of the site. This is in conflict with other areas of the Local Plan. SS6 states that town centre regeneration will be supported, development away from the town centre will not comply with this. MM 39 9.33 states that the new store should be sustainably located so that 'linked trips to the town can be achieved'. In the position proposed this cannot be achieved. The proximity of listed buildings also makes the proposed position non-compliant. The proposed retail development should be at the north end of the site, a sustainable position near the town centre, away from listed buildings and offers the possibility of linked shopping trips. This would make the development Local Plan compliant.

Officer Response

MM39 shows the amended policy wording and supporting text for the Wharf Road Strategic Development Area. It refers to the increased number of houses which can be accommodated on the site as a result of detailed masterplan work. The layout and position of individual uses e.g. retail is not covered in the Local Plan. This is covered in the masterplan, a separate document. A planning approval will be needed for the development to go ahead so any scheme would need to be in line with the Local Plan and national planning policy. The masterplan was reported to Service Delivery Overview & Scrutiny Panel on the 25th September 2019.

Recommendation

No change.

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM12

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant

Sound - Positively prepared

Sound - Justified

No

Sound - Effective

Sound - Consistent with national policy

Complies with the Duty to co-operate

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

MM 12 New paragraph between 7.50 and 7.51. Inclusion of 'safeguarded' sites BD 062, BD 068 and BD 087. These sites are an unsound inclusion for the following reasons: United Utilities requested using other sites in preference, also noise and smell particularly in the summer (verified by residents living near sewage plant). Poor access via Marsh Green Road and difficult uphill egress onto A527. Documented flood risk on BD 087 and to access. Sensitive strategic wildlife area and wildlife corridor with diverse flora, clearly documented in the Biddulph Neighbourhood Plan documentation. Not a sustainable site regarding access to town centre.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

The removed BDNEW is in a sustainable location and has potentially good access and non of the other problems of the replacement sites. This should be reinstated as a 'safeguarded' site. It has been noted that this site could be brought forward in the future by Amec Foster Wheeler in their 'Recommendations for Green Belt release and Settlement Boundary Adjustment'. The inspector noted in his report that his advice could change on the receipt of suitable evidence. Confirmation of the flood risk on BD 087 and the documentation in the Biddulph Neighbourhood Plan provides this evidence.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

Publication of the Inspector's Final Report

Summary of response

Object to MM12 - Inclusion of 'safeguarded' sites BD 062, BD 068 and BD 087. These sites are an unsound inclusion for the following reasons: United Utilities requested using other sites in preference, also noise and smell particularly in the summer (verified by residents living near sewage plant). Poor access via Marsh Green Road and difficult uphill egress onto A527. Documented flood risk on BD 087 and to access. Sensitive strategic wildlife area and wildlife corridor with diverse flora, clearly documented in the Biddulph Neighbourhood Plan documentation. Not a sustainable site regarding access to town

centre. The removed BDNEW is in a sustainable location and has potentially good access and non of the other problems of the replacement sites. This should be reinstated as a 'safeguarded' site. It has been noted that this site could be brought forward in the future by Amec Foster Wheeler in their 'Recommendations for Green Belt release and Settlement Boundary Adjustment'. The inspector noted in his report that his advice could change on the receipt of suitable evidence. Confirmation of the flood risk on BD 087 and the documentation in the Biddulph Neighbourhood Plan provides this evidence.

Officer Response

These sites were included as options during an earlier Local Plan consultation in 2016 and the issues of noise, odour, access, flood risk and ecology etc. were all considered at that time. Refer to Biddulph Topic Paper (Document 13.2). Relevant references are: BD062 (pages 217-237), BD068 (pages 258-280), BD087 (pages 303 – 323). Land not considered to be suitable for release from the Green Belt in the Council's Green Belt Review (Document 22.4 and appendices) was not considered for safeguarding. The boundary of BD087 has been drawn to exclude land in the flood plain. United Utilities have not formally objected to the safeguarding of these sites. Ecological evidence has been gathered for the areas proposed for safeguarding. (Documents 14.1 and 14.8 in the Examination Library). However, as these sites are not proposed for development during this plan period, more ecological and other supporting evidence would be needed at any such time that they were considered for a possible housing allocation. The Inspector's Post Hearing Advice (document EL6.004) recommends removal of BDNEW from the Local Plan. On the basis of the Inspector's recommendations, the Council agreed main modifications to delete BDNEW at the Council Assembly meeting on the 26th June 2019.

Recommendation

To further emphasise that ecology, flooding and other relevant issues will be considered as part of any site allocation, it is suggested that if the Inspector considers it appropriate, an amendment to Policy SS6 could be made. For example, addition of wording such as "Any future development of the sites would require consideration of matters such as ecological surveys, layout, residential amenity and flood plain boundaries".

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:
Pat Day

Whilst I accept the need for 'affordable' housing, I feel the the development of the village and particularly the older part of the village, around the church, could cause major traffic and safety problems. Development needs to be done sensitively and sensibly. 2019-10-10

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at [HYPERLINK "https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice"](https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice) <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice> .

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference WE003 WE0052

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Positively prepared	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Justified	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Effective	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Consistent with national policy	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the Duty to co-operate	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

As far as I understand the modification is to remove sites WE003 and WE0052 out of the greenbelt. I strongly object to more encroachment on the greenbelt when there is a better site on the border with Stoke-on-Trent on a brownfield for intensive affordable residential housing.

The two proposed sites in the green belt also provide an important role as a buffer zone to the prison and also gives Werrington it's rural feel and feeling of open space. It provides a sense of well being for the people of Werrington and the people passing through.

The buffer zone is also important and building homes within such close vicinity will cause serious problems, I refer to:-

<https://www.bbc.co.uk/news/uk-england-stoke-staffordshire-48756060>

“A young offender institution has been found by inspectors to have become less safe. The number of assaults on teenagers at HMYOI Werrington was "high" and violence against staff had doubled since a previous inspection, chief inspector of prisons Peter Clarke said.

It was found in February to have become less safe since being visited in 2018.”

<https://www.stokesentinel.co.uk/news/local-news/he-imprints-footprints-head-teenage-3401640>

“Two inmates at a youth prison subjected another teenager to such a vicious attack that he spent 12 days in intensive care. The 'vicious' assault happened in the exercise yard at Werrington Young Offender Institution”

Building homes at such close proximity to the exercise yard will be a terrible decision if allowed to progress. I recently spoke to the prison officers on their lunch break and they said this is going to be one more extra problem they will have to deal with. There is also a lot of bad language and racist language that can be heard from the prison at night and I recently spoke to someone who lives over on the Weston Heights estate several miles away and they can hear it as well.

Who is going to want to buy a house next to a prison and the village is already experiencing enough anti social problems, so building an estate of social housing where the residents are all claiming housing benefits next to a prison is not going to be a sound planning decision. I have no idea what Staffordshire Moorlands District Council planning officers are thinking as they pursue this crazy proposal. It is not even answering the ageing population crisis in the village, this proposal will just create more problems.

(Con
tinue on a separate sheet / expand box if necessary)

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Since the consultation process was a flawed process and became an exercise of nimbyism it did not answer the major problem facing the village of ageing residents. I propose a facility to be built on the Meigh Road playing fields for elderly people who wish to remain in the village but require assisted living like Bagnall Heights. I understand there is a covenant in place to stop the building of residential homes but when it was created the population were not living as long as they are now and there was not the elderly crisis we have at the national level. The covenant can be circumvented as this proposal is a facility which will be within its remit. I believe a covenant was not adhered to in Stockton Brook close by, we can do the same here.

There is the mothballed site available to build on in the Washerwall Ward just off Weston Close and Langton Court on the Meigh Road estate. Recently two local business people with national recognition in John Cauldwell and Denise Coates said there was a lack of executive housing in the area and this site would be perfect for families with children.

We have the brownfield site just on the border with Stoke-on-Trent on the old Mitchell High School off Corneville Road where affordable housing can be built and closer proximity to the City.

Please do not allow our green belt to be encroached on when there are better alternatives which will not cause any social problems, building in the buffer zone of a prison that houses violent prisoners is a failure in any duty of care.

(Continue on a
separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Yes I would like to attend the hearing sessions.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

Further hearing session (if required)

Publication of the Inspector's Final Report

Adoption of the Local Plan.

Signature: Paul Dean

Date: 31.10.19

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

Marj Edwards

Having lived in the village all my life the two fields are special to the community of Cheddleton and are particular significance as they provide a valuable area of tranquillity and are in the heart of the village.

There are no roads adjacent to either site therefor no vehicular access but there are well used public footpaths to the south of site 29 and running north/south between the sites, users of the two footpaths appreciate the tranquillity, beauty and abundance of wildlife that is the natural habitat for them. These paths are away from the traffic, pollution and noise making them a safe walk for young and old on a daily basis. The paths are a main safe route for the children to and from school and frequently used by young and old to the church, churchyard, community centre and tea rooms. I object strongly to this application and extremely concerned for the wildlife that have made it their home.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Dear Sir/Madam

STAFFORDSHIRE MOORLANDS LOCAL PLAN EXAMINATION

MAIN MODIFICATIONS

Thank you for consulting the Environment Agency on this consultation, which we received on 18 September 2019.

We have reviewed the proposals within the context of our statutory remit, the supporting evidence base such as the Level 1 SFRA and associated Water Cycle Study and previous advice given with regards to the development of these policies and proposals.

Modification MM12

We note the proposed modifications reference MM12 in relation to the safeguarding of land at Gillows Heath, and have no objection to this land being removed from the greenbelt. We specifically note the text on page 63 which clarifies that *'This land is not allocated for development at the present time. Planning permission for the permanent development of this land will only be granted following a Local Plan review which proposes the development'* as does page 62 where it states *'NPPF policy makes it clear that safeguarding land is not the same as allocating land. The intention is that it is set aside to meet future needs (rather than needs within the plan period like an allocation)'*. We do however have concerns regarding the suitability of this land in terms of its susceptibility to flooding which may affect its ability to meet future needs, and if not taken into consideration now will need to be addressed should this land come forward for development as a site allocation or a planning application in the future.

The site boundaries of BD068 and BD087 have been drawn along the line of the floodplain as identified within your Level 1 Strategic Flood Risk Assessment (SFRA) which is based upon our Flood Map for Planning. We assume this has been specifically undertaken to ensure the sites lie wholly within Flood Zone 1. Our flood mapping at this

Environment Agency
9, Sentinel House Wellington Crescent, Fradley Park, Lichfield, WS13 8RR.

www.gov.uk/environment-agency

Cont/d..

location is indicative only and based on JFLOW modelling which provides a broadbrush indication of areas which may be at risk.

Should these sites (and also potentially BD062) come forward to be allocated for development at a later stage we would therefore look for Level 2 Strategic Flood Risk Assessments to be undertaken in support of their allocation, due to their close proximity to the floodplain, and uncertainty about the accuracy of the mapping in this location. This may affect the capacity of the sites for built development and affect the sites layout. This would not however be required for the land to be safeguarded. As the Biddulph Options Planning Analysis document clarifies, the same level of detailed information as would be needed for an allocation is not necessarily required when land is safeguarded as the position would be reviewed in the next plan before an allocation was made. We are happy that the proximity to the floodplain was acknowledged within this assessment, however we would also recommend it is flagged that the Biddulph Brook is at this location, a Main River and as such we would require a minimum 8m development easement to be maintained from the top of the bank of the brook, in order to provide essential space for overland flood flows, essential flood defence maintenance work and as a green corridor for water-based ecology.

As the sites are located within low risk Flood Zone 1 only, the Sequential Test would not be required to be undertaken in order for them to be allocated.

Modification MM15

We have no objection to the proposed changes to Policy SD15 Flood Risk as proposed under MM15, and support the principles outlined within the changes to encourage natural flood risk management measures, and discourage the discharge of surface water into the public main sewer unless absolutely necessary.

We would expect that should the above safeguarded sites would come through as planning applications prior to the local plan review, the requirements of this policy to be strictly adhered to in order to address the issues outlined above and to ensure that full assessment of how flooding may affect the site is undertaken, and appropriate mitigation in terms of site layout and mitigation be proposed.

Modification MM47

We note that through modification MM47 relating to Policy DSR2 Land east of Brooklands Way, Leekbrook the specific flood risk requirements have been removed with reference instead to wider planning policies (specifically in this case SD15 Flood Risk). We have no objections to this in principle, however recommend that some reference to how flood mapping does affect the site would be useful to highlight this issue at an early stage for potential developers as it will likely involve substantial work to address. The site EM2 (assumed to relate to this policy) as shown on the Leekbrook map includes outlines from our indicative JFLOW modelling partially across the northern boundary of the site. This indicative modelling is partially modified and as such reduced by the replacement of the JFLOW extents with information from our 2014 Hazard Mapping Study, and as part of any planning application we would expect this more detailed modelling to be extended across the length of the site to fully inform on how flooding may affect proposals.

Modification MM50

We note the addition of Policy DSR5 under MM50 which relates to Bolton Copperworks at Froghall, and removal of some associated text from Policy SS10 as detailed under MM13.

We note that through this policy the site is identified as an ‘*opportunity site*’ as it is referenced within the associated Churnet Valley SPD. We welcome the acknowledgement of the significant flood risk and contaminated land issues that affect this land.

It should be clarified however, that if this policy in any way *allocates* this land for development by establishing the principle of redevelopment, significantly more work will be required to support such an allocation at this stage in order that it meets flood risk policy outlined within the NPPF. Namely, the application of the Sequential Test and support of a Level 2 SFRA.

Should the Sequential Test not be required to be undertaken as part of the Local Plan process, it will be required as part of any subsequent planning application, regardless of whether a detailed FRA is undertaken and appropriate mitigation measures are proposed. Flood risk affecting the site will need to be assessed and quantified, and the site layout be sequentially laid out to avoid flood risk areas wherever possible. Where this is not possible it is essential that appropriate mitigation is proposed to ensure not only the end users of the site are safe, but that flood risk is not increased elsewhere. It will need to be demonstrated that there are no other sites at a lower risk of flooding that could accommodate such an end land use.

Sustainability Appraisal

We have no objections to the SA undertaken for both the Main Modifications and the Biddulph site options, submitted in support of this consultation.

If you have any queries regarding the above, please contact me on the details below.

Yours sincerely

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. 	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be built along the river bank. The access road onto BD 087 is on the narrow side of the river bank approximately 10M wide. I believe that an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land. I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (please select all that apply)

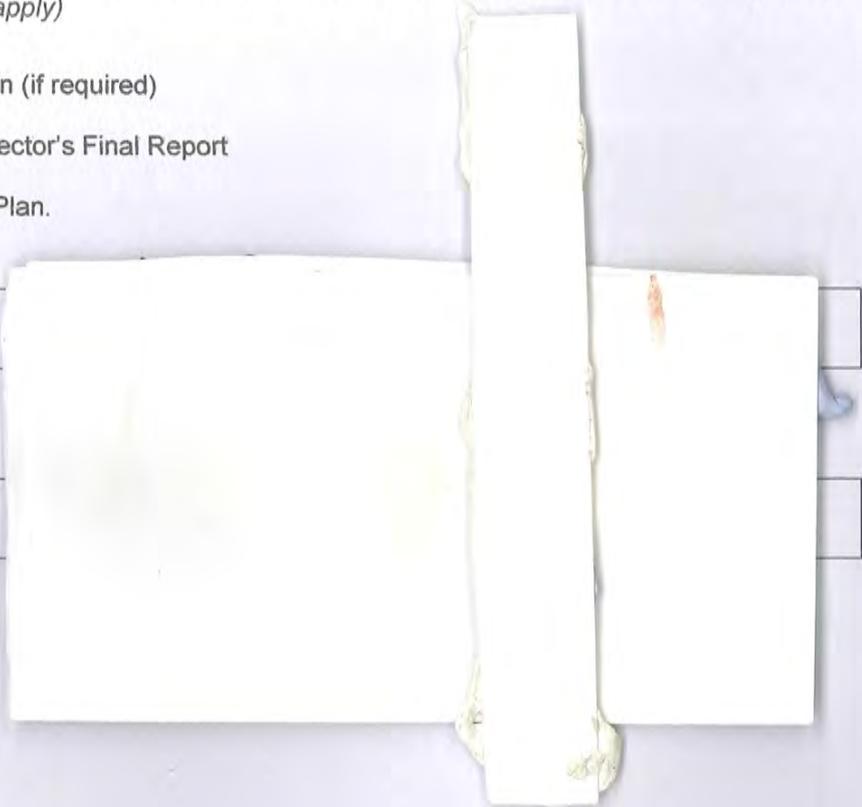

Further hearing session (if required)

Publication of the Inspector's Final Report

Adoption of the Local Plan.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Buy in is key to developing any plan – there is no buy into this plan by any of the people in Biddulph – this cannot be dressed up. No due process has been followed. To push this modified local plan through at break neck speed can only lead to an expensive legal outcome. SMDC has had 8 years to get this local plan right, this Modified Local Plan has taken 3 months from 26th June, no public face to face consultation, and a hurried last minute consultation period with almost no one informed. Only the Site Owners have been kept up to date. Why!

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Access road
 Marsh Green Road does not meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy. The road is too narrow & there is a pinch point over the bridge on Marsh Green Road before the access to BD067. Marsh Green Road is too narrow along its total length & has no footpath for most of its length. Road Widening will require the compulsive purchase of gardens near its junction with Congleton Road
 Marsh Green Road falls below the minimum required of distributor roads by the Residential Design Guide. Within the Guide it is clarified that minimum acceptable local distributor roads width must be 6.7m; Marsh Green Road is 3.25m wide, therefore not meeting the minimum requirements (Residential Design Guide. Supplementary Planning Guidance on Design Quality in Residential Areas Staffordshire County and District Councils 2000).

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B - Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the

MM/ document reference MM/12

Sustainability Appraisal, please identify the document and paragraph/page number etc.

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land - No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

No buy in by the people of Biddulph
Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable?

These sites are on a Flood plain and have soil issues. Running sand has been a frequent issue for many sites in Biddulph. During the course of creating a soak away for rainwater run-off in the garden of my house, at a site only 2.5 meters away from the site I discovered that beneath a thin layer of heavy clay, there is a deep deposit of very soft running sand. Photographic evidence is attached. The presence of running sand is confirmed by the British Geological Survey who made the following statement: -

"Some rocks can contain loosely-packed sandy layers that can become fluidised by water flowing through them. Such sands can 'run', removing support from overlying buildings and causing potential damage.

Running sand hazards can occur where excavations in the sand go below the water table, where springs occur at the base of sand outcrops, around leaking drains or mains water supply pipes or in entire sand bodies if vibrated (liquefaction) e.g. by an earthquake.

A property affected by running sand may experience the following problems:

- Access paths and roads may be broken and disrupted*
- Service connections to water, gas and electricity supplies may break*
- Structural damage to foundations and to the fabric of the building if uneven sinking occurs under the foundations. "*

Construction on this site would be likely to allow the sand to run causing subsidence and damage to existing properties in Portland Drive, for which consequential damage SMDC may be partly liable. All of these factors would mean that any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action which in the end would prove very expensive to the local council.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendments) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

BD068

Dear Sir,

To sum up. There are a number of reasons why no one in their right mind would build on BD068.

1) It can easily flood, I have seen the water half way up the back gardens in Essex Drive. I have seen water up to $4\frac{1}{2}$ feet deep. I have seen the little bridge, where the main access to two of the new housing areas, gushing with as much water as it could take and this was only two days ago. The brook can break its banks in a moderate rainfall.

2) The field is bordered by the

1

2

into the brook contaminating the water and the land - you don't build on contaminated land. In warmer weather it emits a smell.

3) To make accesses to the fields very expensive, not easy to create and would cause mayhem ~~of~~ in Marsh Green Rd. adding 250+ extra cars to the Marsh Green Rd. traffic.

4) Tetanus, plague and foot and mouth disease have all been associated with BD068.

5) There is no way to eradicate midges - just ask the Ode's Hebrideans.

6) Our wildlife is in great danger and we have a wonderful sanctuary in the field. Mr Simmonds has threatened to obliterate this.

③ 7) The main sewage pipe runs. ③
down one side of the field not
far below the surface.

8) Because of the marshy ground
foundations have to be deep adding
to the cost of the houses.

9) This is a tranquil place enjoyed
by people from Biddulph and
surrounding areas.

I believe that there is a
stipulation that if a landscape
would be ruined then development
would not be permitted. I enclose
a photo of our beautiful valley.
Why is this green belt up for grabs
when there are 27 other areas
available? Surely this has to be
saved. Build on this and all we
will have left will be the sewage
works.

Yours Faithfully

Dear Sir,

In the 35 yrs that I have lived in Portland Drive I have studied the wildlife in our field with joy and kept diaries over the years, with my husband. Nowhere have I seen so many animals, birds and insects - or photographed and many others.

We have the return of the Kingfishers, bats, owls (Tawny & Little) and the endangered and protected hedgehogs.

Many of the residents here are over 60 and have taken a great deal of interest in the wildlife over the years providing food and housing in their gardens.

At the moment there are Pleas young out from all the wildlife organisations to provide sandwiches

For wildlife and to plant trees to provide clearer air. (2)

It's this valley was once part of the Biddeford Forest. It would be nice to keep it that way. I enclose a photo of the valley as it is today. It may look beautiful but it hides a host of expensive problems.

No-one would choose to buy a £200,000 house on a serene flood plain without the chance of a mortgage or house insurance next to a sewage farm. The council would not build there knowing the problems and social housing would not be good planning in amongst houses some of which are worth £250,000+.

Please turn down this

③

application where the costs.
of alterations far out-weigh
the costs of the houses. Who
pays for this?

Yours Faithfully

The brook in flood in the field July 2007

①
BD068

Dear Sir

Some detail of the field which lies between us and the brook may be of interest.

1) It is a serious flood plain Evidence through photographs shows this - Flooding to over 4 1/2 feet and only this week breaking its banks in several places ending with gushing water through the little bridge which is supposedly going to be the main access for the new houses onto Marsh Green Rd. This verges on the ridiculous!

2) It is next to the main sewage farm which in heavy rain can

② Leak into the flooding brook contaminating the water and the land which it flows over.

This means BD068 and BD087 are contaminated and unsuitable for development.

The smell from the sewage works is most evident particularly in the summer.

Mr Simmonds' inspection was taken in May - by no means the hottest month. Try July!

The noise from the sewage works can keep residents awake and forcing the closure of windows in the summer. A sewage works is a sewage works.

3) The field was once the site

③ of the Victorian horse fair and the soil still contains tetanus from those days and medical advice when I cut my hand badly was to have an anti-tetanus jab because I lived in Portland Drive.

4) We are called Marsh Green for a good reason!

5) Gillow's Heath is a plague village. Bodies from those times were buried in pits outside the village boundaries. The fields would have bordered the village { see the winegar stone in Marsh Green Rd } No-one is sure where the plague pits are located or whether the disease is merely dormant. This fact prevented open-cast mining here.

④
6) The main sewage pipe lies the length of the field on the left hand side facing Marsh Green Rd. and is not far below the surface of the field. As the ground is marshy how deep would the foundations have to go down? Past the sewage pipe's depth, I think, Foundations for any extensions in existing houses have had to be deep.

7) The mound at the Marsh Green Rd end of the field is where the carcasses of the cattle in the foot and mouth epidemic of 1968 were buried. This would have to be cleared

(5)

at some considerable cost,
 8) Underground streams run down from Biddulph Moor to the brook causing some gardens to have soakaways and pipes to take the water down through the field to the brook. Any alterations to the brook cannot stop this.

9) With the field being marshy most of the year it can be knee deep in mudges on a warm evening. I notice that the only inspection for this was made for Mr Simmewicks in May - not warm enough for mudges. Residents avoid going near the field in warm weather. I had 18 mudge

(6)

likes retrieving a trossel from the bottom of our garden in Simmewicks. How would people cope who had to live in the field?

All in all, water is the main problem in our field and yet there is no mention of flooding in BD068 in Mr Simmewicks report.

The alterations needed on this land and the adjoining road would cost more than the houses.

Yours Faithfully,

Staffordshire Moorlands Local Plan Examination

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan
 The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.
 The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.
 In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph
 Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Access road
 Marsh Green Road does not meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy. The road is too narrow & there is a pinch point over the bridge on Marsh Green Road before the access to BD067. Marsh Green Road is too narrow along its total length & has no footpath for most of its length. Road Widening will require the compulsive purchase of gardens near its junction with Congleton Road
 Marsh Green Road falls below the minimum required of distributor roads by the Residential Design Guide. Within the Guide it is clarified that minimum acceptable local distributor roads width must be 6.7m; Marsh Green Road is 3.25m wide, therefore not meeting the minimum requirements (Residential Design Guide. Supplementary Planning Guidance on Design Quality in Residential Areas Staffordshire County and District Councils 2000).

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land - No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

No buy in by the people of Biddulph
Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable?

These sites are on a Flood plain and have soil issues. Running sand has been a frequent issue for many sites in Biddulph. During the course of creating a soak away for rainwater run-off in the garden of my house, at a site only 2.5 meters away from the site I discovered that beneath a thin layer of heavy clay, there is a deep deposit of very soft running sand. Photographic evidence is attached. The presence of running sand is confirmed by the British Geological Survey who made the following statement: -

"Some rocks can contain loosely-packed sandy layers that can become fluidised by water flowing through them. Such sands can 'run', removing support from overlying buildings and causing potential damage.

Running sand hazards can occur where excavations in the sand go below the water table, where springs occur at the base of sand outcrops, around leaking drains or mains water supply pipes or in entire sand bodies if vibrated (liquefaction) e.g. by an earthquake.

A property affected by running sand may experience the following problems:

- Access paths and roads may be broken and disrupted*
- Service connections to water, gas and electricity supplies may break*
- Structural damage to foundations and to the fabric of the building if uneven sinking occurs under the foundations. "*

Construction on this site would be likely to allow the sand to run causing subsidence and damage to existing properties in Portland Drive, for which consequential damage SMDC may be partly liable. All of these factors would mean that any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action which in the end would prove very expensive to the local council.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

BDD68

Dear Sir,

Why have all the decisions made in 2016 giving us a 15 year stay on development because the field was totally unsuitable for building, been completely reversed, I can understand one or two being changed but all of them - no!

Why, when United Utilities would not to develop the fields, have they reneged on this (without any noticeable alterations) even though we have evidence of sewage overflow.
If this proposed development was to go ahead they would have to

extend the sewage works as it is running at full capacity now. This would bring the works closer to the houses increasing the problems and causing a great deal of expense. Who would pay for it?

Yours Faithfully,

[Redacted signature]

straighten what was, as a winding country lane with Farns and converted barns along its length leading into Willow Heath, a former plague village, still with its plague stone on its boundary on Marsh Green Rd. would destroy the whole character of the area,

The northward of Bidulph is the site of the National Trust property Bidulph Grange which is next to an ancient church in whose grounds are buried Saracens from the days of.

During the summer the traffic increases with tourists adding to the problem at the Marsh Green Rd junctions. There would also be an increase

Access

Dear Sir,

One of the major issues in the planning proposals for the fields BDO68, BDO87 and BDO83 is access.

Marsh Green Rd is widely considered to be one of the most dangerous roads in Bidulph especially at its junction with Congleton Rd. Access to Congleton Rd. by car can take a number of minutes as it opens onto two blind summits either side of the exit. As most houses have at least two cars this could mean an extra 225+ cars using this exit.

Mr Symcock's plan to widen and

③ in noise and pollution seriously damaging what is a well established neighbourhood and wildlife habitat.

The Biddulph Valley and the Biddulph Valley Way are widely acknowledged as beauty spots and are used and enjoyed by walkers, horse-riders and cyclists regularly. These would be lost and at what cost? The only green belt left to us would be the sewage plant!

I don't know how anyone could think of doing this?

Yours faithfully,

[Redacted signature]

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

Denise Gee

Is it of no coincidence that local residents have a Bounty of Queen Covenant on their deeds connected to the entrance and land of the fields to protect this beautiful area for generations to come. Consequently, the area has been a much loved and treasured part of the village for hundreds of years and continues to be so. The abundance of natural habitat, foxes, bats, hedgehogs, greater crested newts and badgers to name a few. The abundance of flora.

The area has a significant part to play for our future generations. Local school children use this part of the village for its historic value, environmental lessons and emotional health and well being learning. Government, Councils and schools now have emotional health and well being at the top of their remit as we see currently from Government advertising. Schools have had this on their curriculum for the past two years. This local area is seen by local people as a welcome break to contemplate and "just breath" and to take in the beautiful and peaceful view. Much Government consensus has also been to celebrate and teach " British values" and the agenda for schools to do so . This area does this in abundance and once again this connects with past generations recognising the need to place a Queen Anne Covenant to properties. Lastly, the 1200 St. Edwards the Confessor church which can be seen clearly from this area. This church connects the whole village and the significance that it holds to the villagers both young and old. Please protect our village and give this area the Green Space that it deserves which people along the generations have deemed right to do so. 2019-10-13

Robert Gee

It is not without reason that a Crown (Queen Anne) Covenant covers the entrance and land to the fields. They were valued hundreds of years ago and are still valued today as " Green Open Space", to be protected, valued and appreciated for all who reside in the village and to appreciate the significance of the historic heritage of this part of the village. A local farmer traditionally farms the areas. The local school children use it to enhance their environmental lessons. Ramblers pass through it and it is no coincidence that there is such abundance of wildlife. due to its cause of tranquility and undisturbed habitat. This peacefully leads you to our 1200 century gem of a church. 2019-10-13

PLEASE SEE ATTACHED LETTER.

To whom it may concern.

Mrs B. Giddart

I have lived in Cheddleton since 1961. I have walked the Gully many times with children + Grandchildren. I have found the Gully safe + secure to walk to the church + tea rooms

Why lose this oasis of Green in the middle of the housing and to never have it again for future Generation to enjoy

Staffordshire Moorlands Local Plan 2016-2031
Proposed Main Modifications and Associated Documents
Consultation

Gladman Development's Representations

October 2019

1. INTRODUCTION

- 1.1 This submission is in response to the above consultation and provides Gladman Developments' representations on Proposed Main Modifications to the Staffordshire Moorlands Local Plan 2016-2031 and associated documents. This follows our previous submissions to our statements to the Local Plan Examination in Public (EiP) held in October 2018 and to the consultation on the Housing Implementation Strategy earlier in 2019.
- 1.2 Through our previous representations to the Council and the EiP, Gladman has questioned the plan's ability to adequately deliver a 5 year housing land supply on adoption and the ability of the plan to deliver its development needs over the plan period. The Council has now prepared a significant list of main modifications which seek to make the plan 'sound'. It is also consulting on a number of documents supporting the proposed Main Modifications including a revised Housing Implementation Strategy. Whilst welcoming the preparation of this work and in supporting some of the changes made by the Council, Gladman still has serious concerns about the soundness of the plan. Even with the proposed main modifications and the Council's responses, Gladman considers that the Plan remains fundamentally unsound.
- 1.3 The National Planning Policy Framework (NPPF) sets out four tests that must be met for Local Plans to be considered sound. In this regard, Gladman reiterates that the Staffordshire Moorlands Local Plan is not positively prepared, justified, effective or consistent with national policy as it is evident that the Local Plan will not provide a sufficient supply of deliverable and developable housing land to produce a 5 year supply of housing land upon adoption and has not demonstrated that the housing requirement for the Plan will be met in full.

2. MAIN MODIFICATIONS

MM8

- 2.1 Gladman considers that the proposed modification to paragraph 7.22 should be amended as follows *“In order to address the objectively assessed needs for housing in the District the Local Plan proposes **at least** 6,080 dwellings for the period 2014 – 2033 (320 per year) which is expected to meet the projected household increase for the District over this period.”* This amendment would then be consistent with Paragraph 7.24 which makes it clear that the figure of 6,080 is a target and not an absolute ceiling.
- 2.2 Gladman objects to the application of the “Liverpool method” to the calculation of the 5 year housing land supply and disagrees with the Council’s view that the “Sedgefield” method would result in a five year requirement that is not realistically achievable. Gladman does not agree that the five year supply that would result from utilising the Sedgefield method is unachievable.
