- 2.3 Given a wide range of deliverable sites without land assembly issues and /or significant infrastructure requirements, Gladman considers that the house building industry has the capacity to deliver a significant increase in building rates in the District. In Gladman’s view, the low building rates experienced in recent years in the District can largely be attributed to a lack of allocated sites. Housebuilders have consequently been forced to rely on the submission of speculative planning applications, many of which have been refused but subsequently granted on appeal. The Council’s approach in utilising the Liverpool methodology in its housing land supply calculation does not accord with the Government’s objective of significantly boosting housing supply and is therefore unsound.

MM9

- 2.4 Policy SS4 states that *“in order to meet the housing requirements identified in Policy SS3, sufficient land will be identified to accommodate 3802 additional dwellings.”* Gladman considers that this should read *“**at least** 3802 dwellings”*.

- 2.5 The policy then goes on, in Table 7.7, to specify how this requirement will be met in the four sub areas of the District in terms of new allocations, large windfall site allowance and small sites allowance, as follows:

Area	Total Potential Provision
Leek	889
Biddulph	734
Cheadle	1,136
Rural	660
Total	3,419

- 2.6 The table provides for an expected provision of 3,419 dwellings against a minimum requirement of 3,802, representing an apparent shortfall of at least 383 dwellings over the plan period. The policy therefore fails to identify sufficient land to accommodate 3,802 dwellings which is its stated objective. Accordingly Gladman considers that the policy is unsound in that it is not effective. In order for the Plan to be found sound, Gladman considers that it will be necessary for the Council to allocate additional sites for residential development that are capable of coming forward during the plan period.

3. HOUSING IMPLEMENTATION STRATEGY

- 3.1 In his letter to the Council dated 11th April, the Inspector requested the Council to include a section in the Housing Implementation Strategy (HIS) about measures to be used to ensure that a five year supply of housing will be maintained over the Plan period to meet the housing target.
- 3.2 The Inspector also requested that the five year supply position and trajectory be updated with a base date of 31st March 2019, that the trajectory be also be revisited

to sense check delivery expected in 2018-19 and that the Council should consider the delivery of housing on specific sites having regard to comments received during the consultation on the HIS and the conclusions of *“Start to Finish: How Quickly do Large-Scale Housing Sites Deliver? (Nathaniel Lichfield and Partners, November 2016)”*.

- 3.3 The Council has accordingly updated the five year supply position and the housing trajectory, and consequently calculates that as at 31st March 2019 it can demonstrate a 5.16 years housing land supply.
- 3.4 The Council, in Section 10 of the HIS, states that “in addition to applying evidence from the Local Plan and Site Allocations Viability Study, consultation responses on the draft Housing Implementation Strategy in early 2019, regard to “Start to Finish” (Nathaniel Lichfield & Partners, 2016) and officers’ knowledge and experience of the area, the assumptions regarding the rate of development have been updated”.
- 3.5 More detail regarding the Council’s delivery assumptions in updating the housing trajectory are contained in Appendix 2 of the HIS.
- 3.6 Gladman has carefully analysed the Council’s delivery assumptions and considers that Council’s assessment in respect of allocated sites remains overly optimistic and fails to have proper regard to the Lichfield conclusions. In particular:
 - The Council’s site size categories (0-50; 50-199 and 200 – 499) do not directly accord with those used in the Lichfield report (0-99; 100-499; and 499+);
 - In respect of allocated sites, the Council’s timescales are from the submission of the first planning application to the first delivery of housing on the site. The Council’s timescales fail to include the lead in time for the submission of the first application. Lichfield’s research found a significant variation in lead in times for the sites that it sampled, however on average it was 3.9 years from the first identification of the site for housing to the submission of the first planning application. The Lichfield sample, however, only included sites of over 500 dwellings; Gladman concedes that it is feasible that smaller sites may have a shorter lead in time and therefore, for the purposes of this submission and its reworked trajectory, Gladman has therefore included only one and a half year lead in time for allocations less than 200 dwellings and two years for sites of 200 dwellings or more;

- Council has wrongly calculated the delivery time of large allocated sites (2.3 planning then 1.8 years delivery = 4.1 years not 3.1 years as stated by the Council)

3.7 In the light of these defects in the Council's reworked trajectory, Gladman has therefore produced a revised housing trajectory as set out in Appendix 1 of this submission. Gladman's reworking is based on the following assumptions in accordance with the Lichfield research.

Sites in the trajectory	Site size	Lead in time: allocation to first p.a	Delivery: first p.a to delivery on site	Revision
Allocated Sites	0-50	1.5 years	Planning approval 1.1 years then 1.7 years to delivery = 2.8 years	4.3 years till first dwelling delivered
	50-199	1.5 years	Planning approval 1.1 years then 1.7 years to delivery = 2.8 years	4.3 years till first dwelling delivered
	200-499	2.0 years	Planning Approval 2.3 years then 1.8 years delivery	6.1 years till first dwelling delivered

3.8 On the basis of this revised trajectory, Gladman has also reworked the five-year housing supply calculation as at 31st March 2019. This results in a supply of only 3.65

years. The Plan is therefore unsound as it will not provide for a five year supply of housing land upon adoption.

- 3.9 It is also important to note that this recalculation has been carried out on a plan-making basis i.e. having regard to advice in NPPF (2012). In the decision-making context (i.e. in respect of future planning applications for housing) the five-year supply calculation would be undertaken in the context of NPPF (2019) which contains a more rigorous definition of what constitutes a deliverable site. The Glossary to the NPPF (2019) states that “Sites with outline planning permission, permission in principle, allocated in the development plan or identified on a brownfield register should only be considered deliverable where there **is clear evidence** that housing completions will begin on site within five years”. (our emphasis)
- 3.10 Gladman considers that for many of the sites with outline planning permission or allocated sites included within the Council’s trajectory, no clear evidence has been provided by the Council that housing completions will take place on these sites within five years. Gladman considers that for there to be any certainty that a site will come forward within five years that the Council must be able to confirm to the Inspector that there is a willing housebuilder involved with the intention and resources to deliver the site within the timescales proposed by the Council, otherwise sites should not be included within the five year housing land supply calculation in any future appeal situation. This would therefore result in an even lower housing land supply than that shown in Gladman’s revised calculation.

4. CONCLUSIONS

- 4.1 Gladman considers that the proposed Main Modifications fail to make the Plan sound. Policy SS4, as proposed to be modified, identifies insufficient land to accommodate 3,802 new dwellings within the Plan period. The Council’s revised Housing Trajectory remains unrealistic in terms of the expected delivery of housing on allocated sites within the first five years of the Plan following adoption. Gladman’s revised Trajectory and 5 year housing land supply calculation indicates that there is only 3.65 years housing land supply on adoption. Further deliverable allocations are therefore required to render the Plan sound.

A. Completions from April 2014 to 30 March 2019	=	812
B. Sites in the trajectory including under construction	=	1745
10% lapse rate on commitments		-98
Sites in the trajectory including under construction		1647
C. Housing Requirement (2014-2033) 320 x 19	=	6080
D. Annual Requirement (C/19)	=	320
E. Target Completions (April 2014 to March 2019) (Dx5)	=	1600
F. Current Shortfall (E-A)	=	788
G. 5 Year requirement with shortfall [(Dx5) + ((F/14) x 5)) x 1.2]	=	2257
H. Annual 5 year requirement with shortfall (G/5)	=	451
I. No. of years of supply (B/H) (1647/451)	=	3.65 years

Staffordshire Moorlands Local Plan Examination

MAIN MODIFICATIONS CONSULTATION - SEPTEMBER 2019

Representations Form

Guidance Notes

Please ensure that you have read the accompanying 'Statement of Representations Procedure' before completing this form.

The Local Plan Main Modifications Schedule and related documents, including; the Sustainability Appraisal of Main Modifications, Biddulph options assessment, Sustainability Appraisal of Alternative Development Options for Biddulph, Housing Implementation Strategy, Equalities Impact Assessment, Tunstall Road Masterplan Executive Summary and Wharf Road Masterplan Executive Summary can be viewed on the District Council's Main Modifications consultation webpage, Council offices and local libraries.

Website: <http://www.staffsmoorlands.gov.uk/localplan>

Council offices:

- Leek** Moorlands House, Stockwell Street, Leek, Staffordshire, ST13 6HQ (8.45am - 5.15pm Monday - Thursday and 8.45am - 4.45pm on Friday)
- Cheadle** Councils Connect, 15a-17 High Street, Cheadle, Staffordshire, ST10 1AA (9.00am - 12.30pm & 1.00pm - 5.00pm on Monday, Wednesday and Friday)
- Biddulph** Town Hall, High Street, Biddulph, Staffordshire, ST8 6AR (9.00am - 5.00pm Monday – Friday)

Please return this form by **5pm on 31 October 2019** to the email or postal address given below or by completing the online questionnaire at : <http://www.staffsmoorlands.gov.uk/localplan>

Email: forward.plans@staffsmoorlands.gov.uk

Post: Freepost RRLJ-XCTC-JBZK, Forward Plans, Staffordshire Moorlands District Council, Regeneration Services, Moorlands House, Stockwell Street, Leek, ST13 6HQ

Email address	r.house@gladman.co.uk	

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice> .

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference MM8

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound - Positively prepared	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Justified	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound - Effective	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Consistent with national policy	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the Duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Gladman considers that the proposed modification to paragraph 7.22 should be amended to be consistent with Paragraph 7.24 which makes it clear that the figure of 6,080 is a target and not an absolute ceiling.

Gladman objects to the application of the "Liverpool method" to the calculation of the 5 year housing land supply and disagrees with the Council's view that the "Sedgefield" method would result in a five year requirement that is not realistically achievable. Gladman does not agree that the five year supply that would result from utilising the Sedgefield method is unachievable.

(Continue on a separate sheet / expand box if necessary)

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Paragraph 7.22 should be amended as follows *"In order to address the objectively assessed needs for housing in the District the Local Plan proposes **at least** 6,080 dwellings for the period 2014 – 2033 (320 per year) which is expected to meet the projected household increase for the District over this period."*

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

Further hearing session (if required)

Publication of the Inspector's Final Report

Adoption of the Local Plan.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference MM9

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Sound - Positively prepared	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Justified	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Effective	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Consistent with national policy	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the Duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Table 7.7 provides for an expected provision of 3,419 dwellings against a minimum requirement of 3,802, representing an apparent shortfall of at least 383 dwellings over the plan period. The policy therefore fails to identify sufficient land to accommodate 3,802 dwellings which is its stated objective. Accordingly Gladman considers that the policy is unsound in that it is not effective.

Please refer to attached submission for further detail.

(Continue on a separate sheet / expand box if necessary)

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

In order for the Plan to be found sound, Gladman considers that it will be necessary for the Council to allocate additional sites for residential development that are capable of coming forward during the plan period.

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. Sound - Justified	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Effective	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Consistent with national policy	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the Duty to co-operate	<input checked="" type="checkbox"/>	<input type="checkbox"/>

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

The Council's revised Housing Trajectory remains unrealistic in terms of the expected delivery of housing on allocated sites within the first five years of the Plan following adoption. Gladman's revised Trajectory and 5 year housing land supply calculation indicates that there is only 3.65 years housing land supply on adoption.

Please refer to attached submission for further detail

(Continue on a separate sheet / expand box if necessary)

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

The Housing Trajectory should be revised to provide for more realistic delivery expectations for allocated sites.

The Five Year Housing Supply Calculation needs reworking accordingly.

Further allocations for housing need to be included in the Plan.

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

Subject: LOCAL PLAN CONSULTATION FOR TWO FIELDS

HAROLD GLEAVE

[redacted]

IF THE TWO FIELDS ARE LOST TO OUR COMMUNITY THEN CHEDDLETON WILL NEVER BE THE SAME AGAIN, IT WILL NOT FEEL LIKE A VILLAGE ANY MORE.
A GREEN AREA IS ESSENTIAL TO THE HEART OF EVERY VILLAGE AND WE HAVE NO DESIRE TO SLOWLY TURN INTO A SMALL TOWN.

WE HAVE A SCHOOL, A CHURCH, A PUB, A COMMUNITY CENTRE, AND WE MUST KEEP OUR GREEN CENTRAL HEART.
NO ONE WHO LIVES IN CHEDDLETON WANTS TO LOOSE THIS GREEN SPACE. AS WE ARE THE ONES WHO LIVE HEAR WHY SHOULD WE NOT BE THE ONES WHO MAKE THE DECISION.

I CANT THINK OF A SINGLE EXAMPLE OF HOW THIS DEVELOPMENT WOULD ENHANCE THE QUALITY OF LIFE EITHER NOW OR IN THE FUTURE. HOWEVER THERE ARE MANY REASONS WHY IT WOULD BE A DISADVANTAGE. (THESE DISADVANTAGES HAVE ALREADY BEEN LISTED WITH THE PLANNING OFFICE.)

THE BOTTOM LINE IS THAT -- WE THE PEOPLE OF CHEDDLETON DO NOT WANT IT --

OX PASTURE HAS ALREADY STARTED TO TURN INTO A CAR PARK PARTICULARLY AT CRITICAL TIMES..
ACCESS TO THE SIGHT HAS ITS DANGERS PARTICULARLY AT SCHOOL TIMES WITH INCREASED NOISE AND POLLUTION.
MORE POLLUTION, MORE NOISE, MORE TRAFFIC, MORE PEOPLE, BUT NO MORE JOBS IN CHEDDLETON.

I DO HOPE THAT OUR ELECTED COUNCIL IS ON THE SIDE OF THE PEOPLE.

REGARDS 

HAROLD GLEAVE

Dear Sirs

Re:- MAIN MODIFICATIONS CONSULTATION – BLYTHE BRIDGE

We write in response to comments requested to the main modifications from the Examination Hearings for development land in the Local Plan.

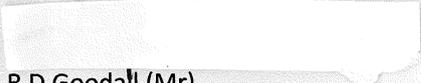

We suggest that the monitoring review to the Local Plan every five years be in line with the NPPF because the current situation in Blythe Bridge favours the increasing size of St Modwen's development at Blythe Vale. The size of the site and housing number restricts other potential planning opportunities in Blythe Bridge.

At the moment there is a great need for housing in the countryside which supports rural diversification and sustainability. You need to revisit overlooked green belt sites which support a reduction in CO 2 emissions by just utilising better transportation links, viz on the doorstep to the railway station. The Blythe Vale is located a very long walk from the local railway station and the St.Modwen site is and will undoubtedly cause severe traffic congestion, delays all due to a new concentrated volume of traffic. Even now along the stretch to the site there is pavement mounting of vehicles which is just an accident waiting to happen.

Your Council need to ensure a five year supply is maintained and engage with landowners, developers in order for potential sites to continue to be brought to the forefront of this Local Plan which have far greater amenities and transport links.

We trust the above comments are considered and recorded.

Yours faithfully

R D Goodall (Mr)
For and on behalf of S J Malpass (Mrs) J M Belcher (Mrs)

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please find below my comments on the Main Modifications to the SMDC Local Plan, MM12. Safeguarding of fields in Biddulph and Gillow Heath.

I notice that you omitted part of your evidence base when you made decisions about these sites on 26th June 2019 at the Council Assembly. You omitted the ecological evidence base and also incorrectly stated that these fields are urban / industrial land, which is incorrect. The decision to safeguard fields in Biddulph and Gillow Heath needs reconsidering both in light of your errors and in light of the evidence contained within the emerging Biddulph Neighbourhood Plan (REG14 closing 4th November 2019).

The SMDC Main Modifications are not Sound and do not Comply with the Duty to Cooperate.

Thanks

Ann Gratton

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

BIODIVERSITY

Key points are:

- The SMDC Phase 1 Ecological Survey evidence base is being ignored.
- The assessment for Local Wildlife Sites by Ecus (2017) was incorrectly carried out.
- The ranking exercise which was used to inform SMDC Council Members and guide decision making At the SMDC Council Assembly on 26th June 2019 was missing the ecological part of the SMDC evidence base. The methodology employed is unsound.
- Removing the Gillow Heath Fields from the green belt and designating them as 'safeguarded sites' for future development (especially BD062) is in direct conflict with the emerging Biddulph Neighbourhood Plan which has a more recent and detailed evidence base which has designated BD062 as Local Greenspace. This had already passed through two local public consultations, which SMDC was well aware of.

Details for the above points:

Biodiversity - The SMDC Local Plan Phase 1 Habitat Survey (Site BD062 / FID122, 2014) concluded " *...the site is not recommended for potential development...*" [1] and that the site is " *...very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site*" (<https://www.staffsmoorlands.gov.uk/article/1368/Ecological-studies>).

The site is a wet meadow/grassland and plays a key role in natural flood management in a key position at the bottom of the valley. It lies within the species rich farmland zone (Staffordshire Moorlands Biodiversity Opportunities Map) and has been mapped as part of a major Wildlife Corridor by SMDC Map7.5 pg.77

(https://www.staffsmoorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10_SMDC_Green_Infrastructure_Strategy_May_2018.pdf)

The emerging Biddulph Neighbourhood Plan commissioned external consultants to provide additional detail and evidence for wildlife corridors and potential Local Wildlife Sites across the Biddulph Parish. The mapping for BD062 indicates semi-natural grassland habitat and found to be sited in an important location bringing together two key wildlife corridors - that of the Biddulph Brook and the Biddulph Valley Way (<https://biddulph.co.uk/neighbourhood-plan/>).

The entire ecological evidence base was missed out of the assessment and ranking exercise carried out by SMDC and reported to Council Members on 26th June 2019 which led to the designation of these fields as 'Safeguarded'. The sources used for the exercise are listed and ecological assessments are missing

(<https://democracy.staffsmoorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>). This omission is then reflected in the assessment tables in Appendix C and Appendix D and the conclusions drawn (which are unclear and not sound).

This is despite the fact that this information was contained within the previous Sustainability Appraisal Report which accompanied the local plan submission version (Feb 2018) where it was reported that BD062 was 'deemed to have ecological value.'

Only evidence regarding the Green belt review, Landscape Sensitivity, Heritage impact and Agricultural classification was included alongside other economic and development criteria (Options Assessment Tables list pg.30

<https://democracy.staffsmoorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>). The land classification used in this SMDC report on 26th June 2019 is also wrong for all 3 sites in Gillow Heath. They were reported to be urban/industrial land when in fact they are classed as agricultural grassland on the Dudley Stamp Land Use Classification system (Magic Map (<https://magic.defra.gov.uk/MagicMap.aspx>) and a quick search on google earth reveals that they are indeed semi-natural habitat (BD062) or agricultural grassland (BD068 / BD087).

Ignoring the ecology in this decision making process totally disregards any value that semi-natural habitats provide for biodiversity and for natural flood management. This contradicts Section 40 of the *Natural Environment and Rural Communities Act 2006*, which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity.

Sites also need to be considered on an individual basis. Ranking and considering sites as a group leads to misleading conclusions, which is evidenced in the report given to SMDC Council Members on 26th June 2019. Examples where this is misleading include suggesting that all sites are within 800m of the town centre when they clearly are not at Gillow Heath. The ranking method is unsound.

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access road
 Marsh Green Road does not meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy. The road is too narrow & there is a pinch point over the bridge on Marsh Green Road before the access to BD067. Marsh Green Road is too narrow along its total length & has no footpath for most of its length. Road Widening will require the compulsive purchase of gardens near its junction with Congleton Road
 Marsh Green Road falls below the minimum required of distributor roads by the Residential Design Guide. Within the Guide it is clarified that minimum acceptable local distributor roads width must be 6.7m; Marsh Green Road is 3.25m wide, therefore not meeting the minimum requirements (Residential Design Guide. Supplementary Planning Guidance on Design Quality in Residential Areas Staffordshire County and District Councils 2000).

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Sewage works

BD062 and BD068 are both immediately adjacent to a sewage works. Residents who live on Essex Drive, York Close and Long Valley Road already suffer from ad-hoc issues of odour and noise and have registered complaints to United Utilities and SMDC, especially since they learned of plans to build houses even closer. Photographic and video evidence exists of repeated raw sewage flooding into the brook at the end of Essex Drive (13/9/2016) where pressure builds up inside the junction box and the lid blows off, especially following heavy rain. This happened again in August 2019. This junction forms the point where pipes from the east and west sides of the valley come together. The raw sewage contaminates part of BD062 (proposed eastern site access) and sites downstream, including BD068 and BD087.

It is an ongoing and dangerous issue which will continue to affect current residential areas and BD062. People should not live any closer than the current housing provision and the

field needs to be kept as a natural buffer. Local residents should be listened to in this matter instead of repeatedly being ignored. Building adjacent to the sewage works will create even more of a statutory nuisance (noise, odour, sewage flooding) and an unhealthy neighbourhood.

We do not believe the opinion of developers who have interests in these fields that issues of odour and noise can be overcome through design as reported by SMDC Council Planning Officers on 26th June 2019 in the meeting which led to these fields being put forward for 'Safeguarding'.

(<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>) (ie. making a building air-tight does not change the situation outside or inside the home when windows and doors are open). Adding more houses and increasing surface runoff from built up areas will only make this situation worse. In addition to this, climate change increases the likelihood of increased extreme rainfall events in this area which will compound this issue.

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. 3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph
 Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.
2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

<p>Access to BD 068 and BD 087 - Road Safety Issues</p> <p>Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). --

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph
 Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Planning Dept.

I would like to put forward my objections to the proposal that sites BD 062, BD 068 and BD 087 be reintroduced in the Modified Local Plan.

Picking on one aspect from so many. Access to the sites.

Access to these sites will be from the A527 onto two of the worst roads in Staffordshire and the land proposed for access to BD 068 and BD 087 would pose many problems taking into account the flooding aspects and site conditions.

Mow Lane and Marsh Green roads are the worst roads in Staffordshire because they are not easily improved requiring large sums of money and meeting countless objections from residents, as the viability of peoples houses would be seriously compromised. Mow Lane starts as a cutting with houses much higher than the road, both junctions would need considerable improvement. These costs would be of such proportions that they would not be able to be met through the profits of the housing to be built.

Mow Lane has the added complication of Sewage. In conditions of heavy rainfall the manholes 'blow' filling Mow Lane with sewage. This situation is well known to United Utilities who have spent a great deal of money already on mitigation, but say that to alleviate this problem would be too costly! This situation happens once or twice each year putting residents at risk of disease not to mention the smell and detritus left on the road, a busy road spreading these materials to a much wider community. Changes on the sites in question would undoubtedly increase this problem which is unacceptable as it is. The sewage works even if it can cope with the added sewage its infrastructure in the surrounding area, the sites in question, can not. Adding the cost of new infrastructure not only on the sites but throughout the system would make these sites unviable.

There are many other aspects to show the unsuitability of these sites, which I am sure you will have had from other people in our community, so I hope you will consider them carefully and remove these sites from the local plan.

D A Hall.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

Mrs Marion Hammond

The fields provide an area of fresh air for adults and children walking the gully, away from pollution and traffic. In 1953 my husband and I came to live in this area of Cheddleton for health reasons. My husband had contracted TB during the war and was advised to live where there were open fields, fresh air and trees. In 1953 there were very few houses in this part of the village and I have seen the development of the large housing estates over the years. The two fields are the last small area in the centre of the village kept as green fields and this where the church and school are. There are a number of established veteran trees on the edge of the fields which help cleanse the air and add to the beauty of the area.

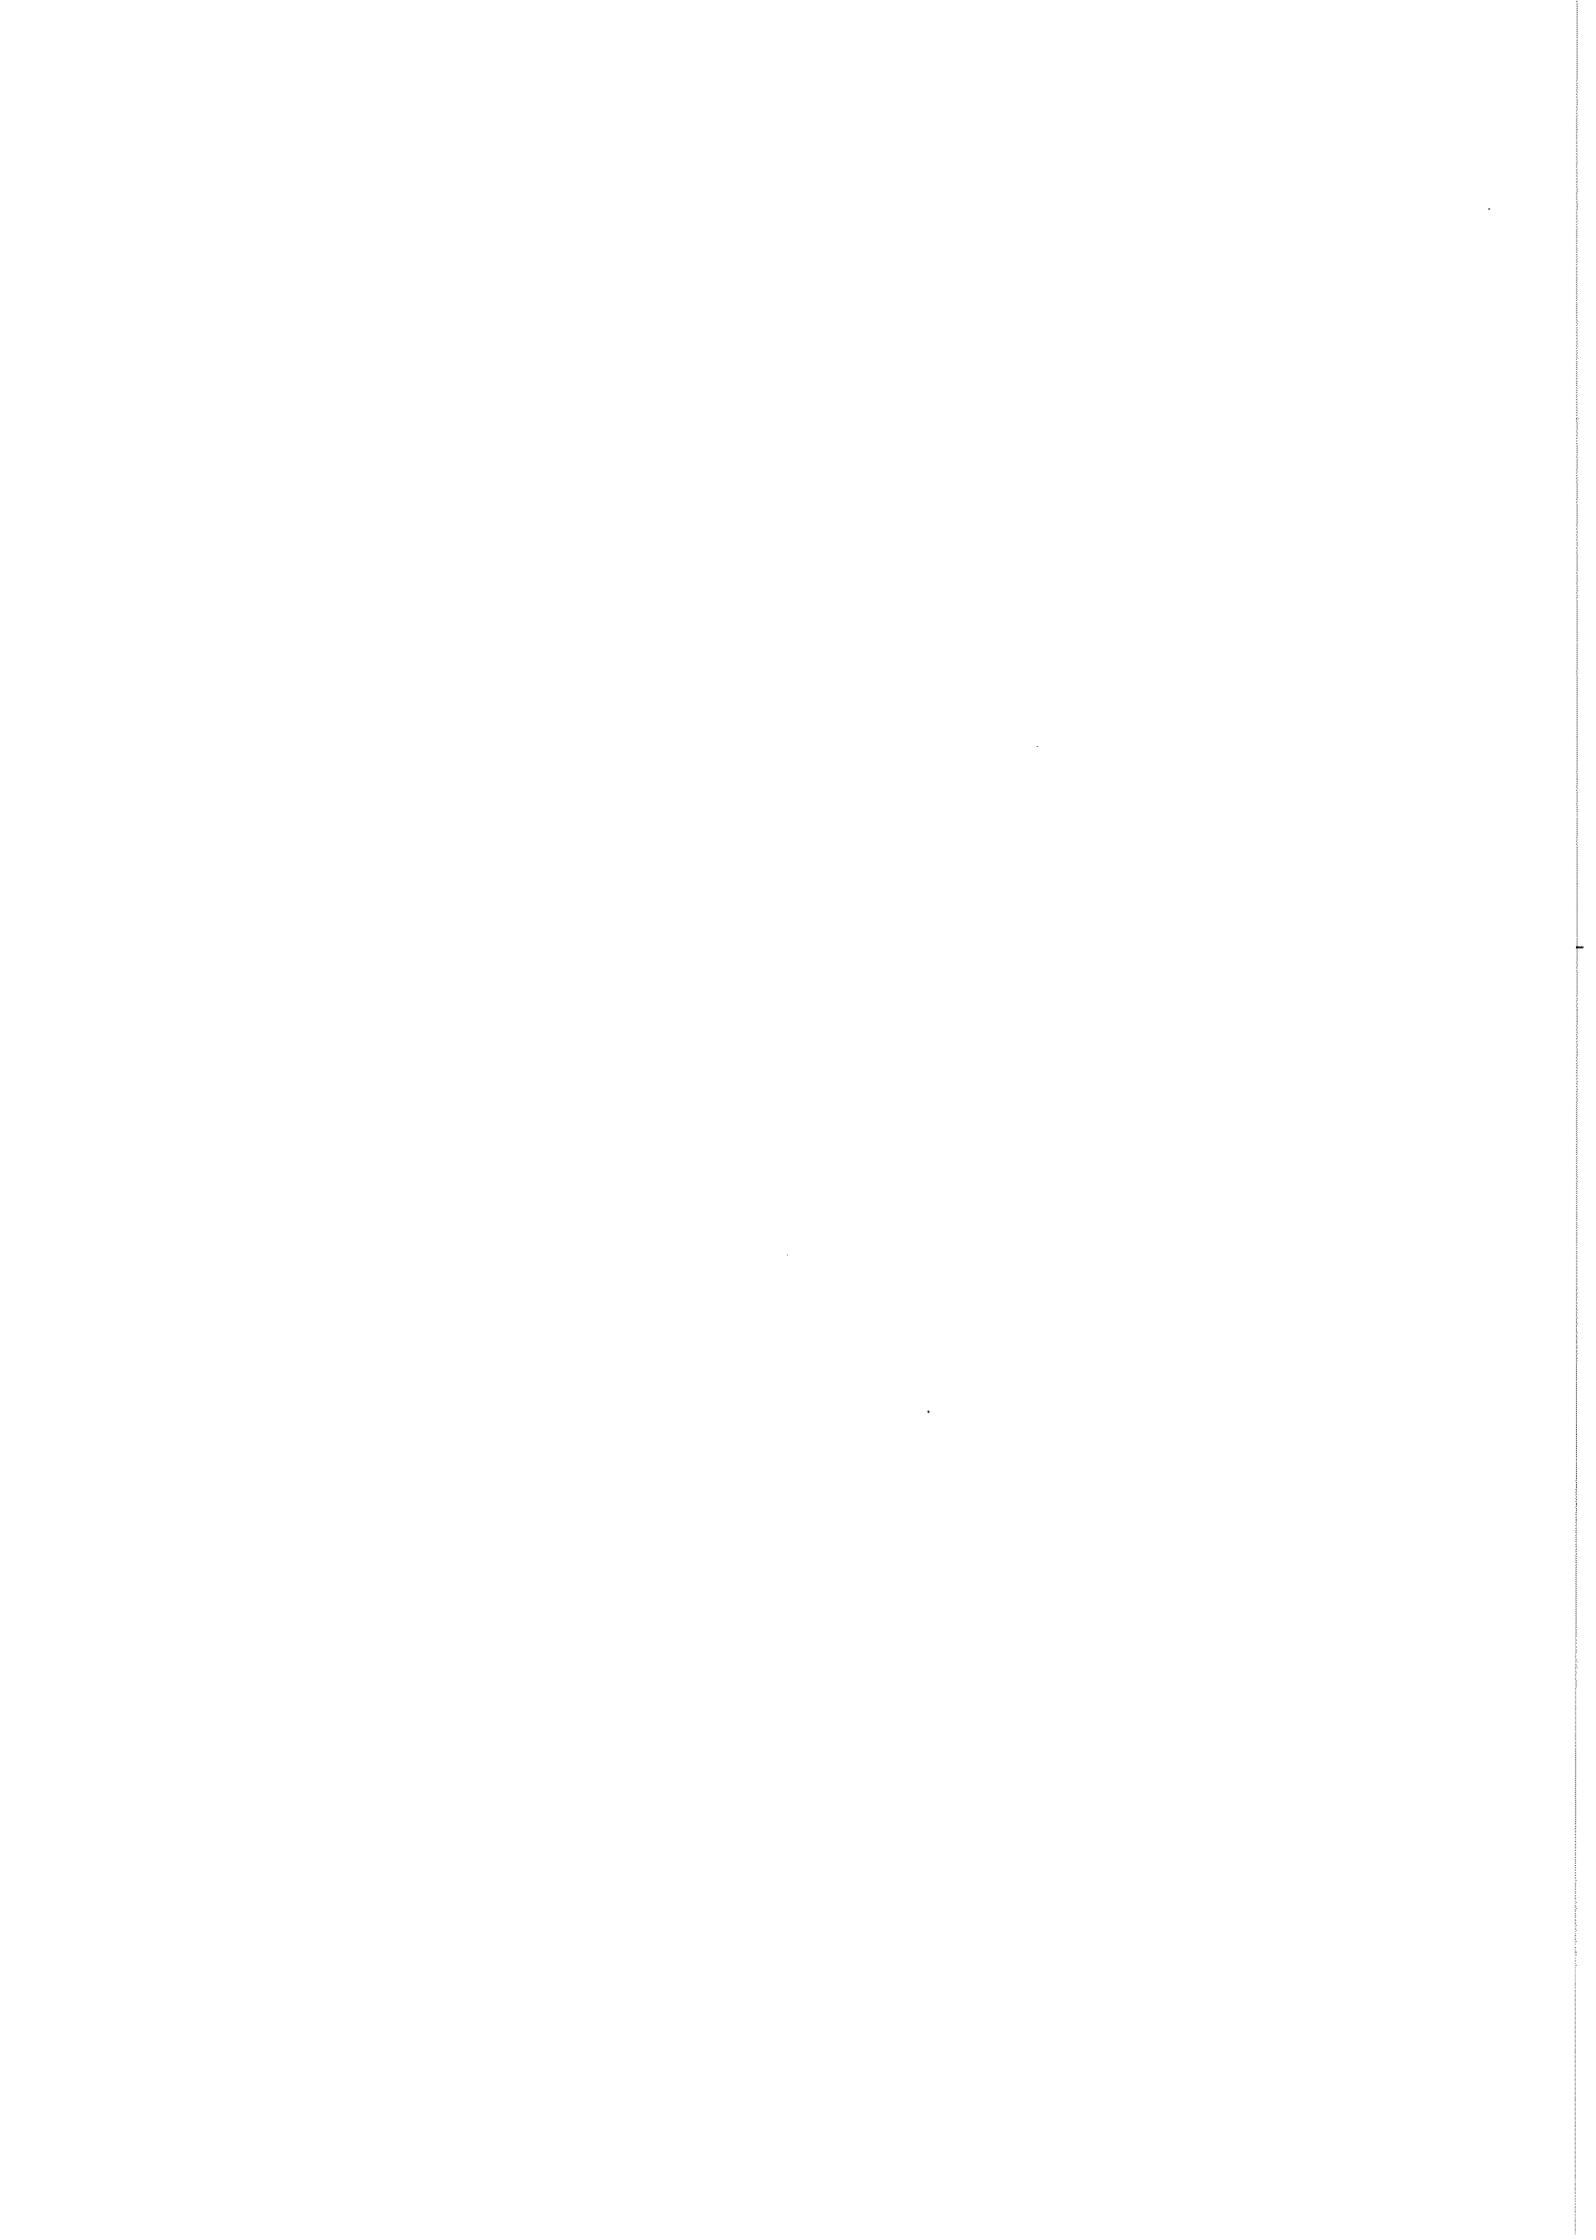

I have walked through the gully collecting my children from school and walked the southern footpath which has wonderful views across to the Roaches.

I am a watercolourist and have painted this part of the village a number of times especially because of the beautiful views and trees. I have attached 2 photos of my paintings done in the mid 1990s to show how special this area is to me.

Notifications and Confidentiality

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference:

MM12

'Safeguarding' the field at the end of York Close/ Essex Drive via Mow Lane – Site BD062 / FID 122,

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	<input type="checkbox"/>
Sound - Positively prepared	<input type="checkbox"/>	<input type="checkbox"/>
Sound - Justified	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Effective	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Consistent with national policy	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the Duty to co-operate	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Sound – justified: NO. There are errors - parts of the evidence were missed out when decisions on the main modifications were taken.

Sound – Effective: NO Safeguarding here will not work well - sewage, wildlife, access, etc. *See below*

Sound - consistent with national policy: NO Failing in duty to have regard to biodiversity. *See below*

Complies with Duty to Co-operate: NO Not consulting appropriately with Biddulph Town Council or paying heed to the more recent evidence base of the emerging Biddulph Neighbourhood Plan. *See below*

Please see issues raised below as to why *modifications should not be deemed justified, effective, consistent with national policy an in compliance with duty to co-operate.*

ISSUE 1. Sewage works

BD062 is immediately adjacent to a sewage works. Residents who live on Essex Drive, York Close and Long Valley Road already suffer from ad-hoc issues of odour and noise and have registered complaints to United Utilities and SMDC, especially since they learned of plans to build houses even closer. Photographic and video evidence exists of repeated raw sewage flooding into the brook at the end of Essex Drive (13/9/2016) where pressure builds up inside the junction box and the lid blows off, especially following heavy rain. This happened again in August 2019 and most recently October 2019. This junction forms the point where pipes from the east and west sides of the valley come together. The raw sewage contaminates part of BD062 (proposed eastern site access) and sites downstream, including BD068 and BD087.

It is an ongoing and dangerous issue which will continue to affect current residential areas and BD062. People should not live any closer than the current housing provision and the field needs to be kept as a natural buffer. To suggest otherwise would be irresponsible. Local residents should be listened to on this matter instead of repeatedly being ignored. Building adjacent to the sewage works will create even more of a statutory nuisance (noise, odour, sewage flooding) and an unhealthy neighbourhood. We do not believe the opinion of developers who have interests in these fields that issues of odour and noise can be overcome through design as reported by SMDC Council Planning Officers on 26th June 2019 in the meeting which led to these fields being put forward for 'Safeguarding' (<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>) (ie. making a building air-tight does not change the situation outside or inside the home when windows and doors are open). Adding more houses and increasing surface run-off from built up areas along with removal of existing trees and vegetation will only make this situation worse. In addition to this, climate change increases the likelihood of increased extreme rainfall events in this area which will compound this issue.

Please see attached image of sewage overflow.

ISSUE 2: Community access

The local community have had unfettered access to this site since the estate was built. For over 40 years, there has been total open access and the land has been used by local residents for events and walking dogs. As recently as 7th July 2019 (and repeatedly since) local residents have organised work parties to clear the overgrown footpaths which cross this site and have been doing this for over 40 years. This land has been designated as Local Greenspace by the emerging Biddulph Neighbourhood Plan (currently undergoing REG14 consultation) as it was found to meet the criteria required (<https://biddulph.co.uk/neighbourhood-plan/>). It is a valuable local amenity for residents of Essex Drive, York Close and Long Valley Road, and surrounding areas in Gillow Heath, as highlighted by the 431 signatures on a petition of local residents objecting to the safeguarding of the fields.

ISSUE 3. Biodiversity

Key points are:

- The SMDC Phase 1 Ecological Survey evidence base is being ignored.
- The assessment for Local Wildlife Sites by Ecus (2017) was incorrectly carried out.
- The ranking exercise which was used to inform SMDC Council Members and guide decision making At the SMDC Council Assembly on 26th June 2019 was missing the ecological part of the SMDC evidence base. The methodology employed is unsound.
- Removing the Gillow Heath Fields from the green belt and designating them as 'safeguarded sites' for future development (especially BD062) is in direct conflict with the emerging Biddulph Neighbourhood Plan which has a more recent and detailed evidence base which has designated BD062 as Local Greenspace. This had already passed through two local public consultations, which SMDC was well aware of.

Details for the above points:

Biodiversity - The SMDC Local Plan Phase 1 Habitat Survey (Site BD062 / FID122, 2014) concluded "...the site is not recommended for potential development..."^[1]and that the site is "...very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site"
<https://www.staffsmoorlands.gov.uk/article/1368/Ecological-studies>).

The site is a wet meadow/grassland and plays a key role in natural flood management in a key position at the bottom of the valley. It lies within the species rich farmland zone (Staffordshire Moorlands Biodiversity Opportunities Map) and has been mapped as part of a major Wildlife Corridor by SMDC Map7.5 pg.77
(<https://www.staffsmoorlands.gov.uk/media/3355/Green-Infrastructure->

The emerging Biddulph Neighbourhood Plan commissioned external consultants to provide additional detail and evidence for wildlife corridors and potential Local Wildlife Sites across the Biddulph Parish. The mapping for BD062 indicates semi-natural grassland habitat and found to be sited in an important location bringing together two key wildlife corridors – that of the Biddulph Brook and the Biddulph Valley Way (<https://biddulph.co.uk/neighbourhood-plan/>).

The entire ecological evidence base was missed out of the assessment and ranking exercise carried out by SMDC and reported to Council Members on 26th June 2019 which led to the designation of these fields as 'Safeguarded'. The sources used for the exercise are listed and ecological assessments are missing (<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?Cid=284&Mid=1368&Ver=4>). This omission is then reflected in the assessment tables in Appendix C and Appendix D and the conclusions drawn (which are unclear and not sound).

This is despite the fact that this information was contained within the previous Sustainability Appraisal Report which accompanied the local plan submission version (Feb 2018) where it was reported that BD062 was 'deemed to have ecological value.'

Only evidence regarding the Green belt review, Landscape Sensitivity, Heritage impact and Agricultural classification was included alongside other economic and development criteria (Options Assessment Tables list pg.30 <https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?Cid=284&Mid=1368&Ver=4>).

The land classification used in this SMDC report on 26th June 2019 is also wrong for all 3 sites in Gillow Heath. They were reported to be urban/industrial land when in fact they are classed as agricultural grassland on the Dudley Stamp Land Use Classification system (Magic Map (<https://magic.defra.gov.uk/MagicMap.aspx>) and a quick search on google earth reveals that they are indeed semi-natural habitat (BD062) or agricultural grassland (BD068 / BD087).

Ignoring the ecology in this decision making process totally disregards any value that semi-natural habitats provide for biodiversity and for natural flood management.

This contradicts Section 40 of the Natural Environment and Rural Communities Act 2006, which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity.

Sites also need to be considered on an individual basis. Ranking and

considering sites as a group leads to misleading conclusions, which is evidenced in the report given to SMDC Council Members on 26th June 2019. Examples where this is misleading include suggesting that all sites are within 800m of the town centre when they clearly are not at Gillow Heath. The ranking method is unsound.

ISSUE 4 - Access roads

Neither the distributor road (Mow Lane) nor the feeder roads (Essex Drive and York Close) meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy.

The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane to the east and west of the access to BD062, and a new sewage pump on Mow Lane all of which reduce the feeder road to a single carriageway in at least 3 locations. There is no alternative access to BD062.

Planning permission has been refused on highways grounds in the past and the situation has only got worse with the creation of the third pinch-point on Mow Lane. The actual distributor road width (Mow Lane) falls below the minimum required of distributor roads by the Residential Design Guide. Within the Guide it is clarified that minimum acceptable local distributor roads width must be 6.7m; Mow Lane is 4.25m wide, therefore not meeting the minimum requirements (Residential Design Guide. Supplementary Planning Guidance on Design Quality in Residential Areas Staffordshire County and District Councils 2000).

ISSUE 5 - Flooding

BD062 (land at end of York Close / Essex Drive) suffers from a high amount of surface water flooding. It is classed as a wet meadow (evidenced by certain marsh flora) and plays an important role in slowing down rainwater flowing into the Biddulph Brook (natural flood management). This field drains part of the Biddulph Valley way as evidenced by the Environment Agency flood maps (<https://flood-warning-information.service.gov.uk/long-term-flood-risk/map>). The proposed eastern site access of Essex Drive is in a floodplain. The field should remain as semi-natural habitat and its' role in natural flood management enhanced.

Please see attached images and video of standing water and brook in flood.

MM21

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant	<input type="checkbox"/>	Yes
Sound - Positively prepared	<input type="checkbox"/>	Yes

Sound - Justified . Yes
Sound - Effective . Yes
Sound - Consistent with national policy . Yes
Complies with the Duty to co-operate . Yes

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Mr and Mrs Hamnett support the continued inclusion of the land at the corner of Brookfield Avenue/Stoney Lane, Endon (Policy DSR1).

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

N/A.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

Mr and Mrs Hamnett support the continued inclusion of the land at the corner of Brookfield Avenue/Stoney Lane, Endon (Policy DSR1).

Officer Response

Support noted.

Recommendation

No change.

Version 0.2

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM57

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant . Yes

Sound - Positively prepared . Yes

Sound - Justified . Yes
 Sound - Effective . Yes
 Sound - Consistent with national policy . Yes
 Complies with the Duty to co-operate . Yes

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

This modification now omits privately owned land in the Green Belt from the Open Space designation in Cheadle Park. This land is not used as open space and was included in error in the Submission Local Plan.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

This modification now omits privately owned land in the Green Belt from the Open Space designation in Cheadle Park. This land is not used as open space and was included in error in the Submission Local Plan.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Moorlands House
Stockwell Street
Leek
Staffordshire
ST13 6HQ

Dear Sirs

Response to the Consultation on Proposed Main Modifications to the Staffordshire Moorlands Local Plan Strategy on Behalf of Harlequin Development Strategies Limited

This letter is submitted on behalf of Harlequin Development Strategies (Crewe) Limited in response to the consultation on the Schedule of Proposed Main Modifications to the submitted Staffordshire Moorlands Local Plan. This letter considers the following modifications which are all inter-related as far as housing delivery and supply are concerned. These are:

- MM54
- MM55
- MM8
- MM72
- MM21

The second paragraph proposed to be inserted as part of **MM54** on page 105 of the Schedule of Main Modifications states that:

Policy SS4 details the housing land supply and includes an allowance for windfalls, the housing trajectory also includes windfalls which form an element of the rolling 5 year housing land supply. The Plan will be monitored to consider whether windfall sites are coming forward as anticipated and also if the windfall sites, particularly in the rural areas, are delivering affordable housing.

The fourth paragraph then states:

The Local Plan will be reviewed every 5 years in accordance with the National Planning Policy Framework 2019. The need for a full or partial review of the Local Plan will also be considered when the Monitoring Report identifies housing delivery has not met the housing requirements in the Local Plan or the Housing Delivery Test. The table below identifies which indicators relate to housing delivery and will be taken into

Knights plc
The Brampton
Newcastle-under-Lyme
Staffordshire
ST5 0QW

T 01782 619225
W knightsplc.com

account when determining if a Local Plan review is necessary. A full or partial review may be considered where there is a significant change in national policy, the evidence base or needs of the adjoining authorities, should it be necessary.

MM55 provides amendments to the monitoring table which is provided at Appendix 2 to the Schedule of Main Modifications.

MM8 sets out the proposed modifications to Policy SS3 and SS4, which includes changes to the plan period and updates to the housing delivery and residual requirement figures, taking into account recent permissions and completions.

Table 7.2 sets out the amended figures for commitments, taking into account a lapse rate and updated commitments and completions. Table 7.3 has also been updated in relation to each sub area. Paragraph 7.3 is proposed to be modified to include the slippage allowance of 10% to commitments that will be factored in to the housing trajectory.

The proposed modification to SS4 under MM8 inserts the following text:

The council has published a Housing Implementation Strategy (HIS) document which sets out how the five year housing land supply will be maintained in accordance with the trajectory.

MM72 seeks to provide at Appendix 7 the HIS and amended housing trajectory to reflect updated housing figures as of 31 March 2019.

The HIS published in July 2019 is provided as a supporting document to the Schedule of Main Modifications. The HIS contains the housing trajectory, schedule of sites and a 5 year housing land supply calculation.

With regard to the housing trajectory, the Inspector's letter to the Council dated 11 April 2019 in response to the HIS consultation (EL9.001) explicitly set out the following:

Sites with planning permission (generally) – if permissions have expired, they should be removed from the trajectory, unless they are proposed to be allocated in the Plan. Conversely large sites that have been granted planning permission in 2018/19 should be added to the trajectory

In light of the above factors, it is our position that the Barnfields site, Leek (Ref 2339), contributing 175 dwellings to the overall trajectory, and 75 within the 5 year period, should be removed from the trajectory because it no longer has planning permission and is not proposed for allocation. Outline consent for this site expired on 17/08/2019. The planning permission allowed four years for the submission of reserved matters under condition 2 and no reserved matters applications have been submitted.

It is acknowledged that the approval expired beyond 1 April 2019 base period, however even if this site were to be retained within the trajectory, then using the council's delivery assumptions for allocations (i.e. sites without planning permission), then development would not commence on this site until 2022/23.

This would have the effect of removing 30 dwellings from the housing trajectory in the first 5 years of the Local Plan following adoption.

We also note that in addition to the above, that the approval at London Mill, Leek (Ref 1810) has now expired, although again beyond the 1 April 2019 base date. We also note that the site has been marketed since 13 January 2015, and continues to be marketed without any apparent interest. We therefore respectfully suggest that the site is removed from the trajectory, or at the very least, the estimated commencement date for the delivery of this site is reviewed in line with the assumptions provided at Appendix 2 of the HIS, which would result in the commencement date of this site falling back by at least another 12 months resulting in 30 units being removed from the supply, and again, this would affect the housing land supply position.

In addition, the outline planning permission for 67 dwellings on land at Cheadle Road Upper Tean that is included within the trajectory expired on 15 June 2016. We therefore respectfully suggest that this site is removed from the trajectory, or at the very least, the estimated commencement date for the delivery of this site is reviewed in line with the assumptions provided at Appendix 2 of the HIS, which would result in the commencement date of this site falling back by at least another 12 months resulting in 22 units being removed from the supply, and again, this would affect the housing land supply position.

The above considerations therefore remove a minimum of 82 dwellings from the 5 year housing land supply, even if these sites were proposed to be allocated.

The Council has not provided an up to date housing land supply calculation for the purposes of the Local Plan Examination with the current consultation on Main Modifications. The calculation provided within the HIS gives a supply figure of 5.16 years, however the calculation does not take into account the factors identified above and the 10% lapse rate figure provided in the HIS is provided as -98. In the Schedule of Main Modifications, the lapse rate figure is provided as 119.

Taking into account the above factors and the Schedule of Main Modifications, we have amended the five year housing land supply calculation provided in the HIS below (existing figures indicated with a strikethrough and amended figures are underlined):

A.	Completions from April 2014 to 30 March 2019	= 812	
B.	Sites in the trajectory including under construction	= 2427	<u>2345</u>
	10% lapse rate on commitments	-98	<u>-119</u>
	Sites in the trajectory including under construction	2329	<u>2226</u>
C.	Housing Requirement (2014-2033) 320 x 19	= 6080	
D.	Annual Requirement [C/19]	= 320	
E.	Target Completions (April 2014 to March 2019) [Dx5]	= 1600	

F.	Current shortfall [E-A]	= 788
G.	5 year requirement with shortfall [(Dx5) + ((F/14) x5)) x1.2] (166 + (788/14x5=281) x1.2	= 2257
H.	Annual 5 year requirement with shortfall [G/5]	= 451
I.	No. of years supply [B/H] (23292226/451)	= 5.16 <u>4.93</u> Years

In light of the above considerations, it is our position that the Council will be unable to demonstrate a 5 year housing land supply upon the adoption of the Local Plan.

Furthermore, we note from the trajectory that the cumulative completions over the plan period result in a shortfall of 400 dwellings over the life of the plan against the requirement. Bullet point 2 of para 159 of the Framework is very clear that land should be identified to meet the need for housing over the plan period, and bullet point 3 of paragraph 182 is clear that in order for the plan to be effective, it should be deliverable over the plan period.

Even if the Inspector were to disagree with our submissions relating to housing land supply, the current figure that the LPA rely on of 5.16 years as set out in the HIS is only marginally above the minimum requirement, and it is still considered essential that the Council in this case identifies additional sites for housing development in the Local Plan to ensure a sufficient level of supply that can withstand any changes in circumstances that could reduce expected delivery rates. In effect, delivery only has to fall short by 73 dwellings to result in supply dipping below 5 years.

It is our contention that the updated housing supply and delivery figures provided within the Schedule of Main Modifications, and the trajectory provided within the HIS are unsound.

Other Modifications

We note that for **MM21**, the density of the proposed allocation at Tunstall Road, Biddulph increases the proposed housing numbers from 85 dwellings to 105 dwellings. The housing trajectory within the HIS identifies that development is expected to commence in 2022/23. Accompanying the Main Modifications consultation is the Tunstall Road Strategic Development Area Concept Masterplan which was commissioned by the Council. This masterplan document sets out the following:

1. Page 2 states that research suggests that the site is most suited to a housing mix of two and three-bedroom medium to high density dwellings. It then goes on to state that based upon the delivery of the adjacent industrial site that there is a reasonable level of confidence for the delivery of the site;
2. Page 5 states that there are several land ownerships and then goes on to state that the problem with the site is that viability at present, without some form of public sector support shows a negative land value and that land owners aspirations for value will have to be carefully managed.

This section of the masterplan document then goes on to state that a “master developer” for the site needs to be sought or the site progressed through a joint venture. The Council also prefers the delivery of the industrial development, key infrastructure and landscaping first before the residential element of the site comes forward. This section of the masterplan document also suggests that acquisition and funding options for the site remain to be explored.

The above clearly demonstrates that the deliverability of this site, due to viability and the need to agree land values and purchase with multiple land owners, is questionable in the short term. It is certainly not the case that this site will deliver housing in the next 5 years. The Council considers that this site would start to deliver in 2022/23, however owing to the known viability constraints and with no evidence of any funding coming forward from, for example, the Housing Infrastructure Fund, the Council’s delivery assumptions are not considered to be realistic. Furthermore, there is no evidence that a planning application is forthcoming. There is therefore an additional reason to amend the housing trajectory further, and again, this will have implications on the Council’s ability to demonstrate a 5 year housing land supply upon the adoption of the plan.

The above issues are considered to be important in this case. Whilst the Local Plan is being examined against the 2012 version of the National Planning Policy Framework, as soon as 12 months has passed following adoption of the plan, it is highly likely that there will be a shortfall in both housing land supply and delivery. Therefore, the Local Plan would not be effective over its lifetime because it would quickly become out of date, the tilted balance would be engaged and non-allocated sites outside of the settlement boundary would need to come forward to deliver housing to meet the identified shortfall.

In light of the above considerations, in order to make the Local Plan sound we believe that further sites need to be allocated. In such an event, we can, should the opportunity arise, bring forward potential attractive sites, which were reviewed favourably by the Council in both the SHLAA and the Green Belt review and would help to resolve the open market and affordable housing delivery objectives for the authority, in particular site reference BE041.

Should the Inspector deem it necessary to conduct further hearing sessions to examine the proposed main modifications in further detail, then we would welcome the opportunity to attend such hearing sessions.

Yours faithfully

ALAN CORINALDI-KNOTT

Subject: Local SMDC Plan MM12 Safeguarding of Fields in Gillow Heath

Follow Up Flag: Follow up
Flag Status: Completed

Categories: Yellow Category

To the Planning Officer.

"Please find below my comments on the Main Modifications to the SMDC Local Plan, MM12. Safeguarding of fields in Gillow Heath".

I notice that you omitted part of your evidence base when you made decisions about these sites on 26th June 2019 at the Council Assembly. You omitted the ecological evidence base and also incorrectly stated that these fields are urban / industrial land, which is incorrect.

The decision to safeguard fields in Gillow Heath needs reconsidering both in light of your errors and in light of the evidence contained within the emerging Biddulph Neighbourhood Plan (REG14 closing 4th November 2019).

The SMDC Main Modifications are not Sound and do not Comply with the Duty to Cooperate.

Please acknowledge my comment.

Mrs. V. Harries

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How can you help?

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

If you would prefer to make a representation by yourself please email forward.plans@staffs Moorlands.gov.uk or by post to Freepost RRLJ-XCTC-JBZK, Forward Plans, Staffordshire Moorlands District Council, Regeneration Services, Moorlands House, Stockwell Street, Leek, ST13 6HQ. **Please make sure you include your name and address.**

For more information visit www.cheddletonresidents.org

DAVID HATCHARD

Email: _____

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment

PLEASE SEE ATTACHED LETTER.

D, Hatchard,

5th September 2019

Planning Inspector.

Regarding fields behind Ox Pastures and Ostlers Lane, bisected by a public footpath known as "the gully"

For over thirty years myself and family often used to walk this area (gully footpath) when visiting relations in the area, the views to the church and village were not only spectacular but also enchanting, you also had a wide vista of many miles to the east and the distant hills from the roaches and along most of the Morridge top.

The early morning sunrises, a wide blue sky with fluffy white clouds, to grey winter days with snow showers passing to the distance hills, and all the other variations between make this a jewel for anyone to remember and hopefully continue to do so in the future.

The adjacent fields on both side of the gully footpath had the usual mixed growth of hedgerows, these were cut as is the usual farming practice every two years or so, this kept the visual open space for all to enjoy.

The hedges of these fields also supported a large variety of flora and fauna which were a delight for all to see.

I moved into Ostlers Lane eighteen years ago, after a few years I enquired of the farmer who was mowing the fields adjacent to my property when would they be cutting the hedges, the reply was "we are leaving them to grow so we can lay them" but this has never happened, the hedges are now encroaching into the fields by at least two meters in places and the height that makes the footpath dark even on the sunniest days and the street lights are on all day in the summer !

I now see why.

The overgrown trees and hedges have now given these fields an unkempt and derelict appearance, the openness and the views have by this utter neglect are now disappearing. This is a well known practice now being used by developers who buy land and speculate that if it is allowed to become run down, unused and derelict it will be easier to obtain planning permission or have VOS .

If the LGS is removed then all of the above will be lost forever and will be an utter disaster for not only the residents of Cheddleton but also the public at large. It would be by far more acceptable to have development within the local green belt than losing this gem for the public.

Yes there has been development in the nineteen thirties along Ostlers Lane, but this development is like an umbilical cord, joining the newer development towards the South of the old village thus separating the historic village from all the newer development outside of the historic centre and should stay that way.

So once again I plead with you, look at this site again, visualise it how it was before it was neglected and what it would / could become if the LGS is kept for the benefit of all.

D, J, Hatchard.

Staffordshire Moorlands Local Plan Examination

MAIN MODIFICATIONS CONSULTATION - SEPTEMBER 2019

Representations Form

Guidance Notes

Please ensure that you have read the accompanying 'Statement of Representations Procedure' before completing this form.

The Local Plan Main Modifications Schedule and related documents, including; the Sustainability Appraisal of Main Modifications, Biddulph options assessment, Sustainability Appraisal of Alternative Development Options for Biddulph, Housing Implementation Strategy, Equalities Impact Assessment, Tunstall Road Masterplan Executive Summary and Wharf Road Masterplan Executive Summary can be viewed on the District Council's Main Modifications consultation webpage, Council offices and local libraries.

Website: <http://www.staffsmoorlands.gov.uk/localplan>

Council offices:

- Leek** Moorlands House, Stockwell Street, Leek, Staffordshire, ST13 6HQ (8.45am - 5.15pm Monday - Thursday and 8.45am - 4.45pm on Friday)
- Cheadle** Councils Connect, 15a-17 High Street, Cheadle, Staffordshire, ST10 1AA (9.00am - 12.30pm & 1.00pm - 5.00pm on Monday, Wednesday and Friday)
- Biddulph** Town Hall, High Street, Biddulph, Staffordshire, ST8 6AR (9.00am - 5.00pm Monday – Friday)

Please return this form by **5pm on 31 October 2019** to the email or postal address given below or by completing the online questionnaire at : <http://www.staffsmoorlands.gov.uk/localplan>

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice> .

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

document reference E/F

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	√	<input type="checkbox"/>
Sound - Positively prepared	<input type="checkbox"/>	√
Sound - Justified	<input type="checkbox"/>	√
Sound - Effective	<input type="checkbox"/>	√
Sound - Consistent with national policy	<input type="checkbox"/>	√
Complies with the Duty to co-operate	<input type="checkbox"/>	√

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

BD062, BD068 and BD087

There are concerns with the process of selecting these sites, out of date information was used.

Data provided by the Biddulph Neighbourhood plan was ignored this included upto date mapping, Environmental and Biodiversity data.

The sites have environmental and biodiversity value including wildlife trails, protected species and rare plants.

The sites are on a floodplain and regularly flood after heavy rain, they are close to the sewerage works and consequently undesirable material is evident when these floods take place.

The closeness to the sewerage works would mean that no future expansion could take place which is likely in the event of the number of additional dwellings proposed in the town.

In fact BDNEW which they are replacing is a far better option as a safeguarding site than these.

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

The process of proposing safeguarding sites should be reviewed and the most up to date data should be used with further consultation with the Environment Agency and United Utilities.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

document reference G

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	√	<input type="checkbox"/>
Sound - Positively prepared	<input type="checkbox"/>	√
Sound - Justified	<input type="checkbox"/>	√
Sound - Effective	<input type="checkbox"/>	√
Sound - Consistent with national policy	<input type="checkbox"/>	√
Complies with the Duty to co-operate	<input type="checkbox"/>	√

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

The proposals put forward have been done with no consultation with Biddulph Town Council or the towns residents.

In the proposed option the retail industrial sites are away from the town centre. The original idea was that the industrial/retail sites should be close to the town centre which is what is required to support investment in the town centre. Also the proposed option seems to swap the school playing field and the old school.

The proposed option is not acceptable

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

There needs to be consultation with the town council and residents with respect to any proposal suggested. This has not yet happened.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

Staffordshire Moorlands Local Plan Examination

MAIN MODIFICATIONS CONSULTATION - SEPTEMBER 2019

Representations Form

Guidance Notes

Please ensure that you have read the accompanying 'Statement of Representations Procedure' before completing this form.

The Local Plan Main Modifications Schedule and related documents, including; the Sustainability Appraisal of Main Modifications, Biddulph options assessment, Sustainability Appraisal of Alternative Development Options for Biddulph, Housing Implementation Strategy, Equalities Impact Assessment, Tunstall Road Masterplan Executive Summary and Wharf Road Masterplan Executive Summary can be viewed on the District Council's Main Modifications consultation webpage, Council offices and local libraries.

Website: <http://www.staffsmoorlands.gov.uk/localplan>

Council offices:

- Leek** Moorlands House, Stockwell Street, Leek, Staffordshire, ST13 6HQ (8.45am - 5.15pm Monday - Thursday and 8.45am - 4.45pm on Friday)
- Cheadle** Councils Connect, 15a-17 High Street, Cheadle, Staffordshire, ST10 1AA (9.00am - 12.30pm & 1.00pm - 5.00pm on Monday, Wednesday and Friday)
- Biddulph** Town Hall, High Street, Biddulph, Staffordshire, ST8 6AR (9.00am - 5.00pm Monday – Friday)

Please return this form by **5pm on 31 October 2019** to the email or postal address given below or by completing the online questionnaire at : <http://www.staffsmoorlands.gov.uk/localplan>

Email: forward.plans@staffsmoorlands.gov.uk

Post: Freepost RRLJ-XCTC-JBZK, Forward Plans, Staffordshire Moorlands District Council, Regeneration Services, Moorlands House, Stockwell Street, Leek, ST13 6HQ

Part A – Personal details and notifications

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice> .

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

document reference H

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	√	<input type="checkbox"/>
Sound - Positively prepared	<input type="checkbox"/>	√
Sound - Justified	<input type="checkbox"/>	√
Sound - Effective	<input type="checkbox"/>	√
Sound - Consistent with national policy	<input type="checkbox"/>	√
Complies with the Duty to co-operate	<input type="checkbox"/>	√

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

The options put forward have been done with no consultation with Biddulph Town Council or residents.

The consultation event on the options was flawed with those residents closest to the site having no idea it was taking place.

The suggested option is totally unacceptable, you cannot put industrial units next to existing housing. They need to be as far away as possible, probably backing onto Mill Hays Road.

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

There needs to be consultation with the town council and residents with respect to any options suggested. This has not yet happened. Then a formal consultation period.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

Further hearing session (if required)

Publication of the Inspector's Final Report

Adoption of the Local Plan.

Version	0.2

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM73 Page 284/5

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant

Sound - Positively prepared

Sound - Justified

No

Sound - Effective

Sound - Consistent with national policy

Complies with the Duty to co-operate

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

It was proposed to allocate the greenspace east and west of Dorset Drive as Local Green Space. However, the Inspector has recommended their removal which puts them at risk of future development. Paras. 99-101 of the National Planning Policy Framework allows for the designation of Local Green Space, and the proposed designations clearly meet with the criteria. We, the undersigned, petition Staffordshire Moorlands District Council to robustly challenge the Inspector's recommendations and retain the greenspace off Dorset Drive as designated Local Green Space.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Maintain Dorset Drive East and West as Local Green Space as recommended in the Neighbourhood Plan

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

No

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

Dorset Drive East and West clearly meet the LGS designation criteria so should be retained as LGS. Deletion of the designation puts them at risk of future development.

Officer Response

Refer to Inspector's Post Hearing Advice – Main Modifications and Related Matters – paras. 32 & 33. (EL6.004) and subsequent Inspector's letter (EL6.008). On the basis of the Inspector's recommendations, the Council agreed main modifications to delete the Local Green Space (LGS) at

the Council Assembly meeting on 26th June 2019. The green space at Dorset Drive is still designated as open space which offers protection under Local Plan Policy C2 (see MM31).

Recommendation

No change.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

<p>Access to BD 068 and BD 087 - Road Safety Issues</p> <p>Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?</p> <p>The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have</p>
--

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

28/10/19

Dear Sir/Madam,

STAFFORDSHIRE MOORLANDS LOCAL PLAN - MAIN MODIFICATIONS CONSULTATION

Thank you for consulting Highways England on the Staffordshire Moorlands District Council (SMDC) Local Plan post-Examination Main Modifications.

Highways England is responsible for the operation and maintenance of the Strategic Road Network (SRN) in England. The network includes all major motorways and trunk roads. Highways England are therefore committed to supporting Government objectives on economic growth and sustainable transport, and recognises the need for closer integration of transport and land use planning as set out in the Department for Transport (DfT) Circular 02/2013 'The Strategic Road Network and the Delivery of Sustainable Development'. The SRN that runs through Staffordshire Moorlands District consists of the A50 trunk road between Blythe Bridge and Uttoxeter.

In our latest response in February 2019 we highlighted a lack of detailed analysis made of potential trip generation of the revised housing and its potential traffic impact on the Strategic Road Network (SRN), and prioritisation of more detailed traffic assessment of the A50/A521 junction in relation to the Blythe Vale development. Furthermore, we recommended that the individual site promoters should undertake detailed transport analysis and assessment of their sites, either at this plan making stage or as part of future planning applications. We also noted that Highways England would wish to be involved in the scoping of these assessments.

Regarding the main modifications set out, we have noted that the intended plan period end year of 2031 has been increased to 2033, and the plan period start year of 2016 has been taken back to 2014. It is noted that the net housing requirement, has been reduced from 3,859 to 3,802 dwellings. Also, the intended employment allocation under Policy SS4 has been increased from 27ha by 2031 to 32ha by 2033. These revisions will need to be taken into account in the forthcoming transport analysis.

Policy DSR1 relating to the 48.5ha mixed-use allocation of land at Blythe Vale will be considered independently of the general employment land requirements for the District set out in Policy E2. Proposed amendments to the delivery of Policy DSR1 include the provision of a comprehensive masterplan with indicative phasing programme. The phased delivery will need to be reflected in the forthcoming transport analysis.

We welcome the stated requirement for the drafting of a Transport Assessment in support of the Blythe Vale development, and welcome engagement with the site promoter at the earliest opportunity to consider matters related to the site's impact on the A50.

In summary, the main modifications do not alter the essence of our previous comments. Rather, the detail of the main modifications will need to be reflected in the forthcoming transport analysis.

Please do not hesitate to contact me if you require any more information or clarification.

Yours sincerely,

David Pyner
Asset Manager

Dear Sir,

I would like you to consider my comments regarding your recommendation to remove the designation of Local Green Space namely the land referred to as the West (29) and East (30) side of the Gully to the rear of Ox Pasture, Cheddleton.

I believe that these pieces of ground are demonstratively special to myself, my family and the community of Cheddleton.

I have lived in Ox Pasture, Cheddleton all 63 years of my life and the fields have been a big part of my life from as long as I can remember and continue to be so. These fields have seen my family through four generations from my parents in 1953 to my grandchildren now.

As a child my earliest memories are going with my mother to the village schools and visiting her friends via the Southern footpath which runs alongside the field to the west and onto the gully.

My years as a child was spent walking this route either to school, meet friends and playing games such as hide and seek and man hunt along the paths and in the fields and sledging in the snow on the east side, as did my own children and presently my grandchildren.

During my life and the time spent around these footpaths and fields I have seen the countryside mature with hedgerows of native trees and shrubs full of many different wild birds, wildflowers and grasses in the meadows and the natural habitat for wildlife which have settled and become home to many different species. This small unspoiled natural area is the home for many insects including numerous bees' nests in the wall bordering the fields which can be seen throughout the summer months. This year alone there was four nests along the path of different species of bees.

With the exception to the fields being mown twice a year it is a safe and secure environment to all wildlife for breeding and maintaining life.

I walk to school and back twice a day with my 6 year old granddaughter, we both enjoy every minute of the journey whatever the weather, along the footpaths adjacent to the meadows and she will talk about nature and how she can smell it in the air, she can identify flowers, trees by their leaves, plants and berries that are poisonous and the seasons from the frost on the grass to the wildflowers growing in the fields. This I feel, just reinforces the learning in school from a drawing and text in a book to life experience something which is so very special, important and quite rare for a journey for a young child on their way to school. The children from the school have been involved over recent weeks putting together their views on the possibility of losing this green space having been to look at how this could impact on the village and the countryside. This is a village school and I strongly believe that we should protect and preserve this area of land for our future generations of children who can identify with the village history, learn from what they can see, hear, smell and touch and be proud that they can walk safely and healthily to school in their village, free from dangers of traffic and pollution and not see it turn into an urban school journey.

Aswell as walking to school I regularly walk this route at least three times a day with my dog as do members of my family. This walk is again safe and a pleasure, it is relaxing and easy. It is time spent meeting other walkers who stop for a chat, some of who have no family and so enjoy this opportunity. It is a well walked route for many local people, children and visitors. The Southern footpath is now awaiting submission on the Definitive Map following a Direction Decision from the Planning Inspectorate. This well used wooded footpath is also part of our village heritage.

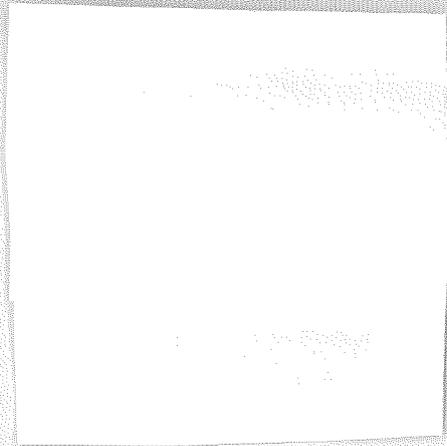

We often meet visitors to the village, walkers and rambling groups on the journey and they will always stop to talk about how they admire the views across the meadows from the Southern footpath and gully of the outreaching moorlands, the village church and the old buildings in the village and enjoy the peace and tranquillity of their walk. This is something that as a resident of the village makes me feel very proud.

The village of Cheddleton has been over developed over the decades outwards from around the old part of the village fortunately although the village has increased in size it has allowed this part of the village with the church, historic buildings and the meadows to the east and west of the gully to remain unchanged and retain its character and its beauty.

These fields are an important part of the village, they are a sanctuary for wild life and border the conservation area and the heart of our village and to risk losing them to development in the future would a disaster to our village, I would therefore like to ask that you give the fields in our old village the protection they need to remain untouched and not allow the small part of what is left of it be destroyed.

Yours sincerely,

Cath Hill.

Biddulph Modified Local Plan – Road Safety Issues

Dear Sir,

The cost of road widening, footpaths, street lighting etc to accommodate possible housing development on sites BD062, BD068 and BD087 would be astronomical. The amount of work involved would have a catastrophic effect on the surrounding area.

Some vital questions need to be answered here. Who would actually pay for this work? Has Staffordshire County Council stated it will fund the new road from Marsh Green Road to the sites? Why is all this upheaval so necessary for the sake of just a small number of houses on these sites?

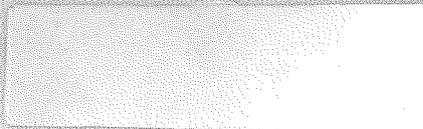

Major road safety issues are involved. The ensuing traffic congestion just doesn't bear thinking about. It would create a nightmare scenario for existing residents in surrounding properties, pedestrians, and drivers passing through the area.

The access road and bridge over the river to BD068 and BD087 has been identified as Flood Risk Level 2/3. It is the only access road. So what happens if there is a flash flood? In order to build an adequate road to service the potential sites, a support wall will have to be built along the river bank. This idea is preposterous. The ground is actually marsh land, hence the road name, Marsh Green Road.

The road improvements would involve compulsory purchase of land and would need to be completed before any development took place.

It is my opinion that the SMDC needs to conduct an enquiry with all relevant bodies in order to compile a comprehensive report on the above issues and many other problems involved in the Modified Local Plan.

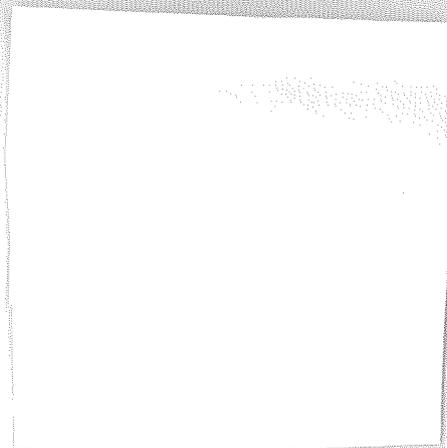

Yours faithfully,

A rectangular white box used to redact the signature of Michael Hilton.

Biddulph Modified Local Plan – Missing Information

Dear Sir,

I write to outline my deep concern about vital information missing from the SMDC's planning team report to a meeting in June this year.

It is clear the Modified Local Plan has been put forward with information that is potentially several years out of date. It is also obvious that all other sites in the Biddulph area were not considered before BD062, B068 and B087 were reintroduced into the plan.

Four years ago, the Environmental Agency told the authority that all other potential development areas should be considered before looking at the above sites. The above named sites were originally excluded during the first consultation rounds in 2016.

Biddulph Town Council voted to exclude the three sites from the Local Plan in 2015.

In the same year, a Green Belt report instigated by the SMDC stated that the sites should only be considered under "exceptional circumstances". A pertinent question here. Why has the Green Belt report been ignored in relation to the future development of Biddulph?

As part of the Modified Local Plan schedule, the planning team has only earmarked 12 sites from the original housing plan of 2014 when there were originally 27 possible sites. Back then, BD062, BD068 and BD087 were excluded.

The sites were mysteriously reintroduced in May this year after the Local Plan was thrown out by the Planning Inspector. It was ruled that another site BDNEW should be taken out of the Local Plan because it was Green Belt land. The three sites, BD062, BD068 and BD 087, are ALL Green Belt land.

In my opinion, the Modified Local Plan in relation to the three sites should be rejected outright and returned to the SMDC for further consideration.

Yours faithfully

Michael Hilton

Biddulph Modified Local Plan – General Objections

Dear Sir,

I write to express my total opposition to specific issues relating to the above plan, namely potential housing development on sites BD062, 068 and 087.

In outlining the first of several concerns, I would say there has been an abject lack of progress with the Local Plan by the SMDC.

Back in June this year, the authority voted to amend the Local Plan to reintroduce the three sites in the vicinity of Biddulph Water Treatment Works. It was claimed by the authority's planning team that United Utilities raised no objection to this change of direction.

Conveniently, the planning officers did not mention that both United Utilities and the Environmental Agency had requested that all other options plus 27 other potential sites be considered for development before looking at BD062, 068 and 087.

The Environmental Agency has stated in the past that SMDC should steer clear of areas with a high flood risk (the named sites are flood risk areas and we have photographic evidence to support this). and also ensure that any new development is safe and reduces flood risk to other areas of land.

Furthermore, the Environmental Agency decided that where new housing increases flood risk, such plans should not be permitted. As a property owner affected by the potential new development, I feel strongly

that the organisation should conduct a site inspection with the aim of producing a full and detailed report on this ludicrous situation.

The Government has also reiterated their rule that flood plains should not be considered for housing where other sites are available.

There is something seriously amiss with this whole issue. Why have these three sites been reintroduced in to the Local Plan when there are plainly other sites more viable for development? A full inquiry by a higher authority is clearly needed.

In summing up, I would say that under no circumstances should the aforementioned sites be included in the Modified Local Plan.

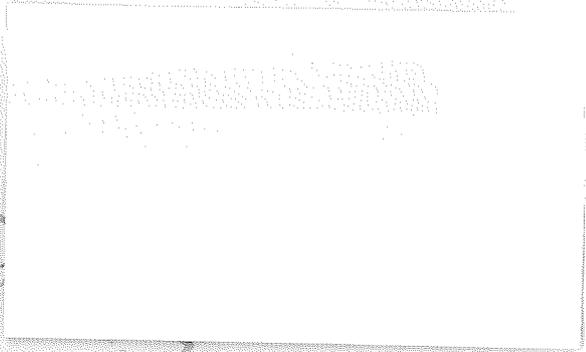

I also wish to inform you that I tend to address further concerns about the same issue in future correspondence with your department and the SMDC.

Yours faithfully

Michael Hilton

Document Ref: MM/12

Biddulph Modified Local Plan – Public Health Issues

Dear Sir,

Potential housing sites should not be close to water treatment works. That is the opinion of United Utilities re SMDC considering possible areas of land suitable for development.

This ruling has clearly not been considered in the authority's decision to include BD062, 068 and 087 in the Modified Local Plan.

In fact, there have been numerous complaints about odour and leakage of sewage from the water treatment works into the nearby brook. United Utilities officials have agreed there is a problem. We, as residents, have witnessed several occasions when raw sewage floats along the brook towards Congleton and obviously we suffer the subsequent smells. Yet the site owner has provided a survey to the council stating there isn't an issue! Who is correct?

As the proposed development for BD062 and BD068 is within 10M of the water treatment boundary, there could obviously be a risk of an infectious disease breaking out. It needs to be made quite clear that United Utilities and the Environmental Agency should decide on a minimum distance from the waterworks boundary line for any potential housing plan. Such a move could well restrict the number of dwellings on these sites and therefore render the scheme unviable.

United Utilities could also face possible lawsuits in the future from the owners of any newly-built properties.

A full and frank report on the viability of these sites needs to take place before any firm decision is made about potential development.

Yours faithfully,

Michael Hilton

Biddulph Modified Local Plan – SMDC Motives

Dear Sir,

The modified plan has met with dozens of objections from worried residents in relation to the inclusion of sites BD062, BD068 and BD087, previously omitted from the blueprint.

It's my considered opinion that SMDC is pushing ahead with the plan with indecent speed. Why? Just what are the motives behind this ludicrous scheme? To my mind, there has been inadequate preparation for the proposals to go ahead.

The modifications to the plan have been made very late in the day. Is this in order to thwart residents' opposition? Adding safeguarded land to the plan without proper investigation, particularly when the land in question involves public safety issues, plus a lack of public consultation by the council, could easily lead to the authority facing legal action and hefty financial claims.

The above sites are ranked as prime building land. No other potential sites have that rank. Sixteen of the original sites identified in 2015 were not even considered. Why?

The previously safeguarded sites are on a flood plain, so potential home owners would not get a mortgage or property insurance.

The correct process of conducting full site investigations, gathering reports from organisations involved, consulting the public etc has not been followed. Why?

The SMDC has had eight years to get the local plan right. The modified plan has taken just three months from June this year.

There has been a hurried consultation period between September 18 and October 31 with hardly anyone being informed. Why? However, the site owners have been kept up to date with ongoing developments.

The whole situation stinks. The modified plan with these three sites would be entirely detrimental to the town of Biddulph and indeed its residents.

Yours faithfully,

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference MM / 12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Positively prepared	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Justified	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Effective	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Consistent with national policy	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the Duty to co-operate	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

AS RESIDENTS IN CONGLETON ROAD WE HAVE ALREADY
OUTLINED OUR MAJOR CONCERNS + OPPOSITION RE: BDO87,
BDO68 & BDO62 GREEN BELT LAND PROPOSALS.
WE WOULD ALSO LIKE ADDITIONAL FACTS TO BE TAKEN
INTO CONSIDERATION NAMELY - BDO87 HAS NEVER
HAD BUILDINGS ON IT, CONTRARY TO THE LAND
OWNER'S CLAIMS.

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

1. In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

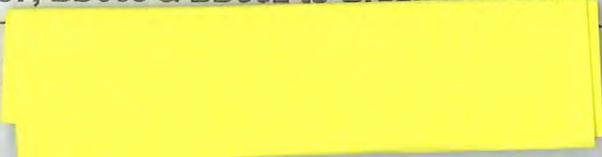

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How can you help?

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the [Local Plan website](#) and in the [Statement of Representations Procedure Document](#) on the SMDC website.

If you would prefer to make a representation by yourself please email forward.plans@staffsmoorlands.gov.uk or by post to Freepost RRLJ-XCTC-JBZK, Forward Plans, Staffordshire Moorlands District Council, Regeneration Services, Moorlands House, Stockwell Street, Leek, ST13 6HQ. **Please make sure you include your name and address.**

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment

The two areas of green space numbered 29, 30, the centre of Cheddleton are a quiet peaceful oasis between two extremely busy roads. The quiet which passes through them, is a safe but narrow thoroughfare, which enable the children & villagers to get to school, walk their dogs, attend church + the Black Lion etc. I know this area + those fields, + would hate to see them spoiled by housing it's an area, which would not be out of place in the wilds of Scotland, with the high hedges, fields left alone for the wildlife, which we are being told to encourage. Cheddleton does not want any more housing estates, we have enough.

FAO
Local Plans Team Leader

31 October 2019

Dear Sir, Madam,

Re: Staffordshire Moorlands Main Modifications Consultation

Many thanks for consulting Historic England on this Main Modifications consultation. We have raised particular comments in the table below:

Historic England comments on the Staffordshire Moorlands Main Modifications consultation

Main Modification Number	Historic England comments in response to the proposed amendments
MM12	<p>We have some concerns about safeguarding three sites for potential development in Gillow Heath, within the Local Plan, at this time. Whilst we recognise that the text states that they will require a Local Plan Review in order to be released officially and considered an allocation, we are unclear as to why they have been included at this time. Additionally, what assessment has been undertaken to consider whether the principle of development in these areas is likely to be acceptable? It is possible that prospective developers will consider their inclusion in the Plan as safeguarded land, as land that has the potential to be suitable for the use they have been safeguarded for, when we are not clear that this has been established. We would be grateful to see heritage impact assessment reports for these sites and comment on these or would recommend that they are included as potential allocations in a Local Plan Review and not as safeguarded sites at this time.</p> <p>Further paragraph 6 relates to planning permission being required for the 'permanent' development of this land which is a misleading statement.</p>
MM27	We have no concerns regarding the amendments proposed and are supportive

Historic England, 8th Floor, The Axis, 10 Holliday Street, Birmingham B1 1TG

Telephone 0121 625 6870 HistoricEngland.org.uk

Please note that Historic England operates an access to information policy.

Correspondence or information which you send us may therefore become publicly available.

	<p>of the positive statements regarding heritage at risk.</p> <p>Policy DC2 – clause 6 relates to buildings at risk only and we would be supportive of a positive approach for heritage at risk generally which could include other heritage assets such as Registered Parks and Gardens or Scheduled Monuments etc.</p>
MM34	<p>We would welcome a sentence that includes reference to heritage policies in this list, alongside other environmental considerations such as biodiversity and flooding and in line with other statutory agency considerations.</p>
MM35 – MM50	<p>These comments relate to all site specific policies where there is reference to heritage mitigation and the Council’s Landscape, Local Green Space and Heritage Impact Study. We recognise that linking to an external evidence base to highlight appropriate mitigation measures may not be considered appropriate in this context, as highlighted by the proposed main modifications from the Planning Inspector. However, there are site specific policies within this list that still do relate to these studies above, which may be an error or there may be a particular reason why. We are concerned that by not linking to the external evidence base study that some appropriate mitigation measures may now not be referenced and that only some mitigation measures are now specifically cited.</p> <p>We would recommend that if this reference is no longer to be contained that there is a considered analysis of the heritage impact study for these sites and any required mitigation measures are now included as policy text within the Plan.</p> <p>Additionally, there is a lack of detail on what might constitute a ‘mitigation of heritage impact’ and we would be concerned that the level of detail accompanying planning applications will not be appropriate. We would recommend the insertion of a paragraph that states that planning applications should be accompanied by a statement of significance (or similar) that assesses the significance of any heritage assets potentially affected by proposed development, including their setting and an impact assessment of the level of harm as a result of the proposed development, which should include avoidance, mitigation or enhancement measures, in proportionate detail to the asset’s significance and by an appropriate qualified professional where relevant or some similar wording that sets out detail of what would be expected and a link to the Council’s heritage impact study generally so that prospective developers are aware of its existence.</p>
MM54	<p>The policy text states that there will be the removal of village boundaries for small villages. This is to allow windfall sites to be considered in the Plan period.</p>

Historic England, 8th Floor, The Axis, 10 Holliday Street, Birmingham B1 1TG
Telephone 0121 625 6870 HistoricEngland.org.uk

Please note that Historic England operates an access to information policy.

Correspondence or information which you send us may therefore become publicly available.

	We would recommend including a clause to ensure that all local plan policies are applied and that heritage policies are considered when dealing with any windfall sites, that may previously have been outside of settlement boundaries but that now may be considered potentially acceptable.
MM56	There are a number of local green space designations that are being removed from the local plan. Are these now going to be considered as part of the settlement and considered as 'white land' suitable for potential windfall sites? Again see comments relating to MM54 if so.
Appendix 2 Monitoring Indicators Table	Policy DC2 The Historic Environment indicator only relates to buildings at risk and not the wider heritage at risk agenda. We have made suggested amendments in MM27 and this complements these earlier comments. It may be useful to refer to Historic England's Heritage at Risk register and could usefully also refer to Conservation Areas and data held by the Council. This would allow a fuller consideration of the health of the historic environment in the Council area.

We hope you have found these comments useful in preparing a positive strategy for the historic environment in your Local Plan. If you have any questions on the content of this response, please contact me.

Kind regards

Kezia Taylerson

Lack of due process control
 On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.
 Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

<p>Access to BD 068 and BD 087 - Road Safety Issues</p> <p>Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?</p> <p>The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have</p>
--

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice> .

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference MM49

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	✓	<input type="checkbox"/>
Sound - Positively prepared	✓	<input type="checkbox"/>
Sound - Justified	✓	<input type="checkbox"/>
Sound - Effective	✓	<input type="checkbox"/>
Sound - Consistent with national policy	✓	<input type="checkbox"/>
Complies with the Duty to co-operate	✓	<input type="checkbox"/>

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Homes England supports the proposed changes to Policy DSR4 and its supporting text set out in MM49, as well as the associated amendments to the Development Boundary adjacent to the sites, shown on Werrington Map A4.11, (i.e., MM64).

The proposed additional supporting text helpfully sets out the exceptional circumstances that exist to justify the release of the sites from the Green Belt and the relatively small impact that development of the site would have on the purposes of the Green Belt.

The minor amendments to the Development Boundary (and extension of the proposed housing allocations) will ensure that satisfactory highway access to both sites can be achieved and will help to ensure the future delivery of the sites, thereby assisting the LPA in maintaining a 5 year housing land supply.

Note that references to the sizes of the sites in paragraphs 9.119 and 9.123 should also be changed, to reflect the proposed wording of Policy DSR4.

(Continue on a separate sheet / expand box if necessary)

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

N.A.

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required)
- Publication of the Inspector’s Final Report
- Adoption of the Local Plan.

Subject: Local SMDC Plan MM12 Safeguarding of fields in Gillow Heath

Follow Up Flag: Follow up
Flag Status: Flagged

Categories: Yellow Category

Dear Sirs

"Please find below my comments on the Main Modifications to the SMDC Local Plan, MM12. Safeguarding of fields in Gillow Heath.

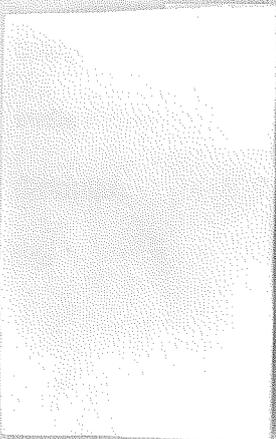

I notice that you omitted part of your evidence base when you made decisions about these sites on 26th June 2019 at the Council Assembly. You omitted the ecological evidence base and also incorrectly stated that these fields are urban / industrial land, which is incorrect.

The decision to safeguard fields in Gillow Heath needs reconsidering both in light of your errors and in light of the evidence contained within the emerging Biddulph Neighbourhood Plan (REG14 closing 4th November 2019).

The SMDC Main Modifications are not Sound and do not Comply with the Duty to Cooperate.

Please acknowledge my comment."

Mr G Hood

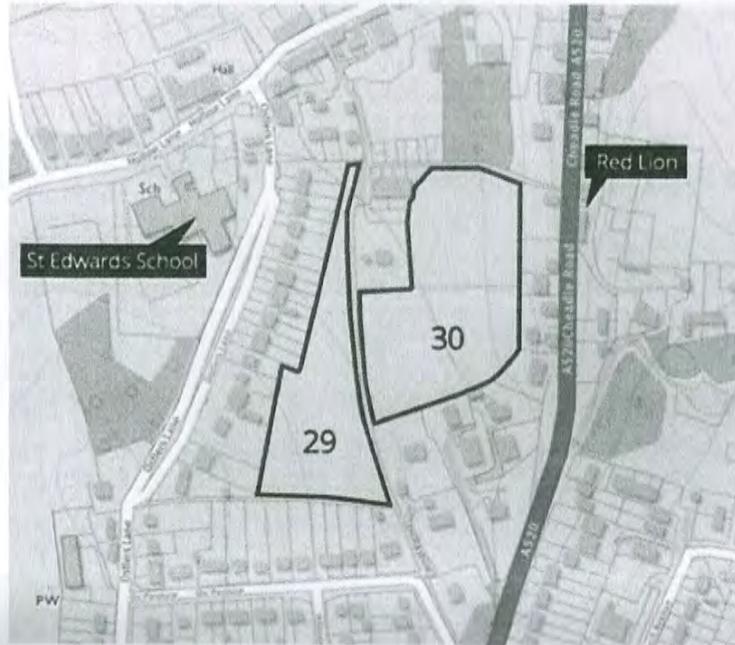

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How can you help?

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

If you would prefer to make a representation by yourself please email forward.plans@staffs Moorlands.gov.uk please make sure you include your name and address.

Name: JOHN HOUSLEY

Empty form box for address and contact details.

The important bit... 11/9/2019

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

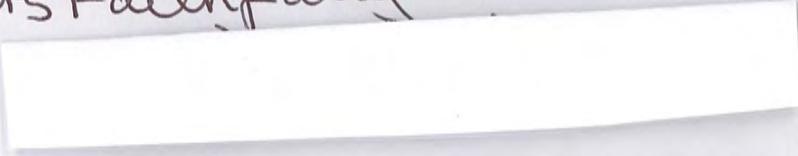

Comment Dear Sir or Madam, As a resident of Cheddleton for 42 years I would like to know how come all of a sudden these 2 fields have attracted the attention of a government Inspector, is it because someone has had planning permission turned down twice and removing the LGS will make it easier to get the plans passed. I will be watching the developments very closely. At this moment in time we are currently taking and collecting our grandchildren to and from school, we use the gully which is the local name for the footpath between the 2 fields which we used to take our own children to school some 40 years ago. It is the safest most tranquil walk carbon monoxide free with far reaching views of the surrounding countryside. When we are walking to school the grandchildren are always look at things and asking what they are in between the gaps in the hedges another safe way of learning about our beautiful countryside these open fields are a credit to

Please post your completed form to: Freepost RRLJ-XCTC-JBZK, Forward Plans, Staffordshire Moorlands District Council, Regeneration Services, Moorlands House, Stockwell Street, Leek, ST13 6HQ

P.T.O.

Cheddleton. The importance of these 2 fields is paramount to the area especially the diverse wildlife, and visitors to the area. to and from local attractions, I believe to lose its LFS would be catastrophic for cheddleton and future generations and we will fight this proposal all the way. I hope your decision will not be financially motivated.

yours Faithfully

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:

29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

Jennifer Hulme

The loss of these fields will be detrimental to the environment and the character of our lovely village. Remove these fields and where will the school children go for nature classes. The numerous species of flora and fauna will be lost for ever. How will the next generation know about these.

The paths between the two sites are used on a daily basis by young and old. It is even a route used by the local "walking for health" group. This amenity will be lost resulting in greater pressure on the NHS.

The fields are a buffer between the historic centre with the Village church and the newer housing estates and offers residents and visitors panoramic views of the country side. These could be lost forever to future generations.

LSG designation would protect the sites from harm and help the council meet its obligations re heritage assets and protected species. 2019-10-21

Comment:

Trevor Hulme

The fields are important to our village as they provide a habitat for a large variety of flora and fauna some of which are in the 'protected' category. The fields provide a learning ground for future generations.

Numerous walking groups use the public footpaths to enjoy the panoramic views, improve their health and well being not to mention using it as an access route to the historic village centre where they can visit the church, community centre, pub and tea rooms.

LGS designation would protect the area from harm and save it for future generations to enjoy. 2019-10-21

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Dear Sir/Madam,

I, as a resident and a home owner [REDACTED] would like to register my disapproval of the development of the greenbelt land bordering Victoria Row, Tunstall Road and Mill Hayes Farm. This land is a valuable site for wildlife as well as serving as a natural boundary between Staffordshire Moorlands and Stoke-on-Trent districts. There have been many observations of various species of wildlife including bats which reside in trees on the edge of this land. All species of bats in the UK are protected, as well as their breeding and resting places. There are also Song Thrushes which have regularly been seen. These birds are on the 'red' list and are protected under the Wildlife and Countryside act 1981. These acts are passed for a reason, not to be ignored for the sake of 'development'. Among other birds observed on this land are Lesser Spotted Woodpeckers which are also on the red list. The trees themselves are also very established and are essential to the wildlife should also be preserved. If this land were to be developed, apart from the damage caused to flora and fauna, the properties in Victoria Row would literally be surrounded by industry on all sides. There are much more suitable areas of land which would have far less impact and with better access than this site.

The nearest junction to the site entrance is well known for being an accident blackspot. The density of traffic passing through the A527 where Brown Lees Road and Victoria Row join it make this stretch of road to be constantly busy. There is a Gatso camera in place very close to this junction and these are installed in notoriously accident prone locations. Any further development in this area will only increase the risk of more accidents due to the accessibility to the site and dramatic increase in the number of vehicles at this location.

Please accept this email as my strong objection on all the above grounds and more to any form of development to the land adjacent to Victoria Row, Tunstall Road and Mill Hayes Farm Knypersley.

Yours faithfully,
Julie Jackson

[pl.com](#)>

Dear Sir/Madam,

I would like to register my objection to any development of the green belt land adjacent to Victoria Row, Tunstall Road and Mill Hayes Farm in Knypersley, Stoke-on-Trent.

I have been a resident and property owner at

It is a well known fact that this area is rife with various wildlife, some of which are protected under the Wildlife and Countryside act 1981. There have been regular and recent sittings of foxes playing in the field bordering Victoria Row. Other recent sightings include Greater Spotted Woodpeckers and the more rare and protected Lesser Spotted Woodpeckers including juvenile birds which highlights that they are breeding in this vicinity. Song Thrushes have also been seen recently, another protected species on the red list of protected species. As well as these there are many bats which are seen regularly in and around the trees in Victoria Row and also flying in and out of the Mill Hayes Farm buildings. These are also a protected species. Along with these, there are many other birds seen daily including various breeds of tits, sparrows, thrushes and blackbirds. There has also been an albino starling observed and recorded on film on this land. Great Crested Newts have also been seen on the site. This is their natural environment and any development will have a devastating effect on their wellbeing.

Another reason why this land is not suitable for development is due to the effect on an already very busy road and junction on the A527 where Brown Lees Road and Victoria Row join it. This is a recognised accident black spot which already has a Gatso camera in place due to this. Any access into more development at this site will have a significant effect and heighten the risk of accidents even further. Any access into this land will be creating a risk and there are other sites which would be more suitable including expanding Victoria Business Park into Stoke-on-Trent and Newcastle-under-Lyme. In fact, Newcastle-under-Lyme council were willing to pursue this. If this site were to be used there would be no need for an additional site entrance as there is good access to this site already off Tunstall Road and Brown Lees Road.

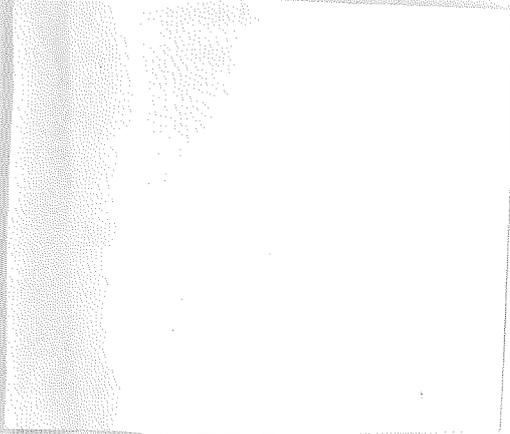

Another point I would like to make is regarding the misleading information which has been given out previously relating to another development close by. Prior to the building of

industrial units on Victoria Business Park, we were told that the units on that site would only be single storey units. The reality is that these are now massive units and nothing like the original plans. we are sure that if the current plans for industrial units on this site get passed then the same will happen outside our front windows.

We feel that the wool has been pulled over our eyes so to speak from the beginning regarding the plans to develop this site. Any development on this land will have the most effect on the residents of Victoria Row. When the plan was initially put forward there was a meeting at Knypersley Cricket Club regarding the proposals. The council issued a letter which should have been sent to every household within a certain radius of the land to invite them to the meeting and to inspect the plan. **NO-ONE IN VICTORIA ROW RECEIVED ONE OF THESE LETTERS!** The very people who would be mostly affected due to the proximity to their properties by the development were not invited. This is very underhanded and I request that this fact is recorded on file.

I would like this email to be accepted as my formal and strong objection on all the above grounds to any form of development on the green belt land bordering Victoria Row, Tunstall Road, Mill Hayes Road and Mill Hayes Farm.

Regards,
Michael Jackson,

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

<p>Access to BD 068 and BD 087 - Road Safety Issues</p> <p>Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?</p> <p>The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have</p>
--

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Staffordshire Moorlands Local Plan Examination

MAIN MODIFICATIONS CONSULTATION - SEPTEMBER 2019

Representations Form 5

Part A – Personal details and notifications

	Personal details
Title	MR
First name	JOHN
Last name	JAMES.
Address line 1	[Redacted]
Address line 2	
Address line 3	
Post code	
Telephone number	
Email address	

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

Brenda Jennings

In 1972, my husband Euan and I fell in love with Cheddleton and decided to buy our house in Hollow Lane because of the sense of history, of the old village still intact, acting as the hub and anchor for all the new building that was taking place.

With some losses this is still true.

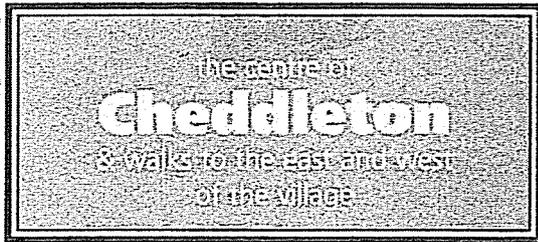

From my bedroom window I could see an old gnarled pear tree with lovely spring blossom, leaning over a damp depression in the ground. This led on to a small squarish meadow. The view caught my imagination, as though I was looking back in time. I recently was sent an old map which clearly showed this as the village pond and the village green. I didn't know its importance at the time but it still upset me to see that old tree being uprooted and the ancient meadow churned up by diggers. The new houses bordering Cheddleton Fields now stand on this ground. The houses also removed the long view of the church from the gully, which is a great shame. I could see what time it was as I returned from a trip to the shop.

I would hate the thought of losing any more of this fragile heritage

Cheddleton fields are the vital remains which hold the rural identity of the village and mark its essential difference. The views from the gully, over the land, set it in the landscape and explain its place in the Churnet Valley.

I know that I am just one of many people who hold Cheddleton dear to their hearts. It would be a great sadness to me to see it carelessly reduced to yet another anonymous collection of housing on the outskirts of Leek.

I am sending one of my husband's walking guides to the area from 1997, which explains in his words and drawings how he cared about the qualities of this special place we chose to make our home, and his invitation to share and help others discover it also.

St Edward's Church

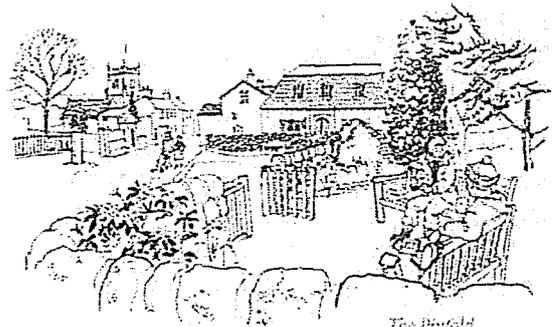

This guide starts in the original centre of Cheddleton.

Whilst the village has expanded since the end of the Second World War, with the Fletchers estate of the 50's, the Johnson estate of the 60's and the recent development near the bottom of Basford Bridge Lane, the centre is still much as it was at the beginning of the century.

The Old School

At the western end of Cheddleton there is the **Old School Craft Centre and Tea Rooms**, with a small car park to the rear and this has been chosen as the starting point for these walks. As its title suggests, this was the original village school, founded in c.1855 and continuing as part of Cheddleton First School until the middle 1980's.

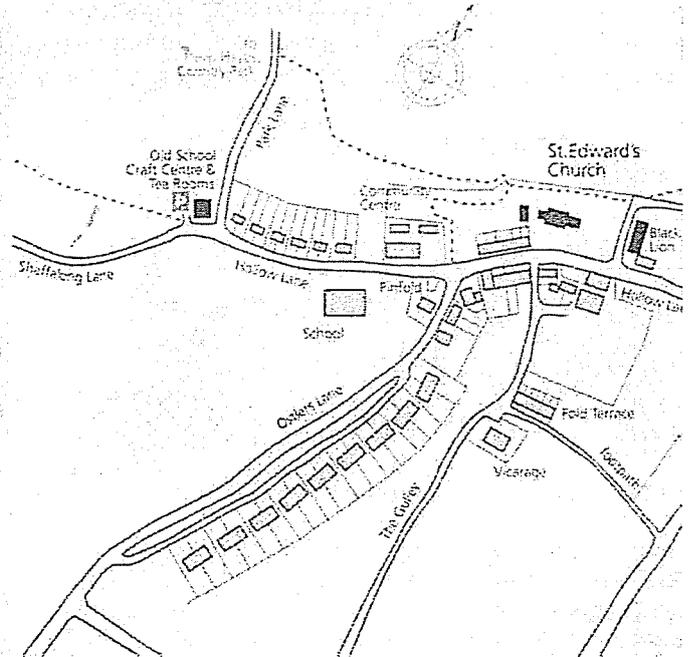

The Pinfold

Walk back down **Hollow Lane** towards the centre of the village and on your right you pass the new school built after the war and extended in 1986 as a middle school to cater for children aged 9 to 13, whilst on the left is the Community Centre and Youth Club, formerly the first school for the 5 to 9 age group.

Just before the junction with **Ostlers Lane** is the **Pinfold** or village pound, restored to mark the Silver Jubilee as a quiet resting place with seats. Its original purpose was to hold stray animals and to provide an overnight resting place for cattle being driven to market.

Ostlers Lane and Hollow Lane formed part of the main road from Leek to Stafford until 1763, when orders were made for new the Leek to Stone Turnpike to be built, which is now Cheddle Road, the A520.

On the opposite side of this Junction is **Chapel House**, the Methodist Chapel until 1973, when it was replaced by St Andrew's Church, 300 metres up Ostlers Lane on the right hand side. Next to Chapel House is a terrace of three houses, the first, **Fynney House** No.29 dating from at least 1765 was originally a detached house, and at some time in its history was a pub, The Fountain. Next door, **Church View** was built in 1778 filling the gap between Fynney House and **Phillip Lymer's** butchers shop.

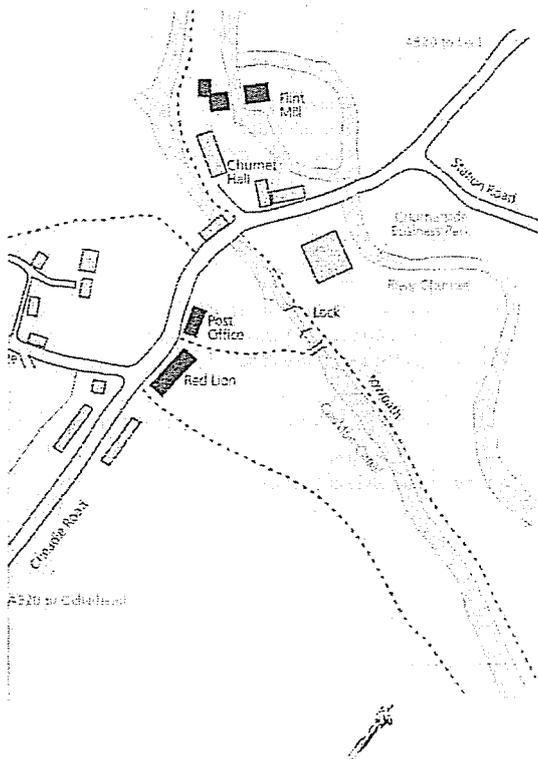

The **Church of St Edward the Confessor** is the focal point of the village, dating from about 1214, and extensively restored in Elizabethan times, the date 1574 can be seen on the tower battlements. Further restoration was undertaken in 1863-64 under the direction of Sir Giles Gilbert Scott. Full details of the Church may be found in *Cheddleton North Staffordshire, A village history* compiled by members of the Cheddleton Historical and Archaeology Society, edited by Robert Milner, published in 1983 (reprinted 1995).

The Church from the green lane

The footpath through the Churchyard, gives an excellent view up the valley to Longsdon Church, and across to St Edwards Hospital. Just behind the Church, a flight of steps lead down to a green lane giving private access to fields, and a footpath to Park Lane.

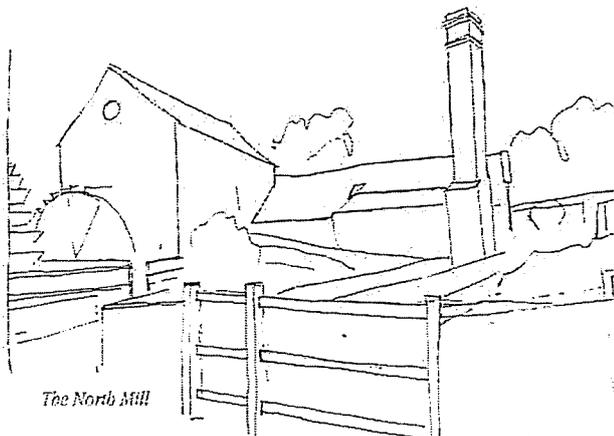

At the end of the Churchyard opposite the village stocks is the **Black Lion**, reputed to be the oldest pub in Cheddleton.

The Black Lion Inn

Back in Hollow Lane, opposite the Black Lion, is a house built into the rocks converted from smaller houses, appropriately named by its previous owner **The Curates Egg**. Continuing down the road passing a house on the left which also was a yet another pub in earlier times, we arrive at the main road.

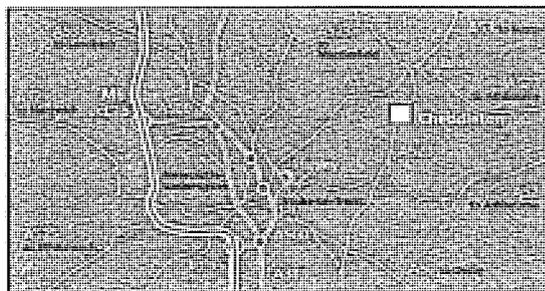

Turn left and after 50 metres to the canal, turn left again following the towpath, past **Churnet Hall** formerly the village social centre where dances were held shortly after the war, now occupied by Easyfix Emblems, to the **Flint Mill**.

The North Mill

The Cheddleton Flint Mill Industrial Heritage Trust was formed in 1967 to preserve and restore the two watermills as an industrial museum and to provide educational information concerning the historical development of pottery raw materials. Flint that had been burnt and ground, has been an important material for the pottery industry since the 1720's, and at Cheddleton, by the canal, are the remains of the kiln used for calcining the flint, the grinding pans and the narrow boat 'Vienna', typical of the type used to transport the product of the flint mill to *the Potteries*.

The Flint Mill is open on Saturday and Sunday afternoons throughout the year, admission is free, but donations are very welcome to enable the Trust to achieve its objectives.

Cheddleton footpath guide No.1

The start of the walk

1 The walk starts just outside the **Crafts Centre and Tea Rooms** at a squeeze stile and fingerpost marked **Cars Edge**. Go across the field to another stile on the entrance drive to **Hanfields**, a rather nice early eighteenth century farmhouse on your right. Having crossed this driveway over a second stile, the footpath crosses a large field towards a stile at the far side, which is clearly visible by the uprights projecting above the wall.

2 This stile is marked with a small yellow arrow **Deep Hayes Walk**. A short steep rise takes you over the brow of the slope onto a large field, aim for the corner with a row of trees on your right hand side and a small clump of trees to the left, where there is a signpost marking where two footpaths cross.

3 At the signpost turn left and follow the hedge and ditch to where they turn right and then bear diagonally to the stile in the middle of a paddock fence. Cross this small field to the signpost and stile on the driveway to **Little Shaffalong farm**. Turn left along the driveway and turn right into **Shaffalong Lane** opposite **Big Shaffalong Farm**, then right past the farm garden to a fingerpost marked **Brund Lane**, pointing left across a large field.

*If you were to carry on down the lane you would see **Shaffalong Cottage** on your right, and beyond this in an area of private woodland, is the site of the **Shaffalong Colliery**, closed before the first World War.*

4 Go through the stile to your left signed **Brund Lane** and keeping the hedge and ditch on your left continue along the edge of the field. The ditch ceases at a field entry and then the hedge becomes a wire fence with occasional bushes, and at an isolated oak tree, the fence turns back to the left. Looking ahead you see what appears to be an electricity sub-station, make for this and

go past keeping it to your right to the field entrance gateway where there is a fingerpost pointing back to **Shaffalong Lane**.

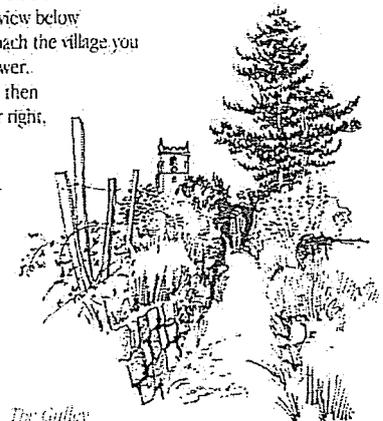

5 Turn left into **Brund Lane** and after about 150 metres you will see on the right hand side, an enamelled signpost saying turn right to **Rownall** which we will ignore, and turn left to **Ostlers Lane**, which we follow. Leave **Brund Lane** over a stile with a yellow arrow and a notice requesting that all dogs be kept on a lead, (there are usually sheep in this small L shaped field). Leave the field by the stile and keep to the right hand edge of the next field. This field tapers towards the far end and at first appears to be a cul-de-sac, but at the far corner, hard up against a hollybush at the top of a little bank, there is a stile with a yellow arrow indicating a sharp left turn after crossing. The next stile can be seen by an oak tree, leading into the next field where you can see a stile to the left of three hawthorn bushes.

6 This stile is marked with a yellow arrow pointing diagonally to a well used path across the field. Be careful when crossing this very high stile on top of a wall. This leads you to yet another electricity sub-station, and to the left of this there is a short fenced path with the sub-station on the right and a collection of strange fowl on the left.

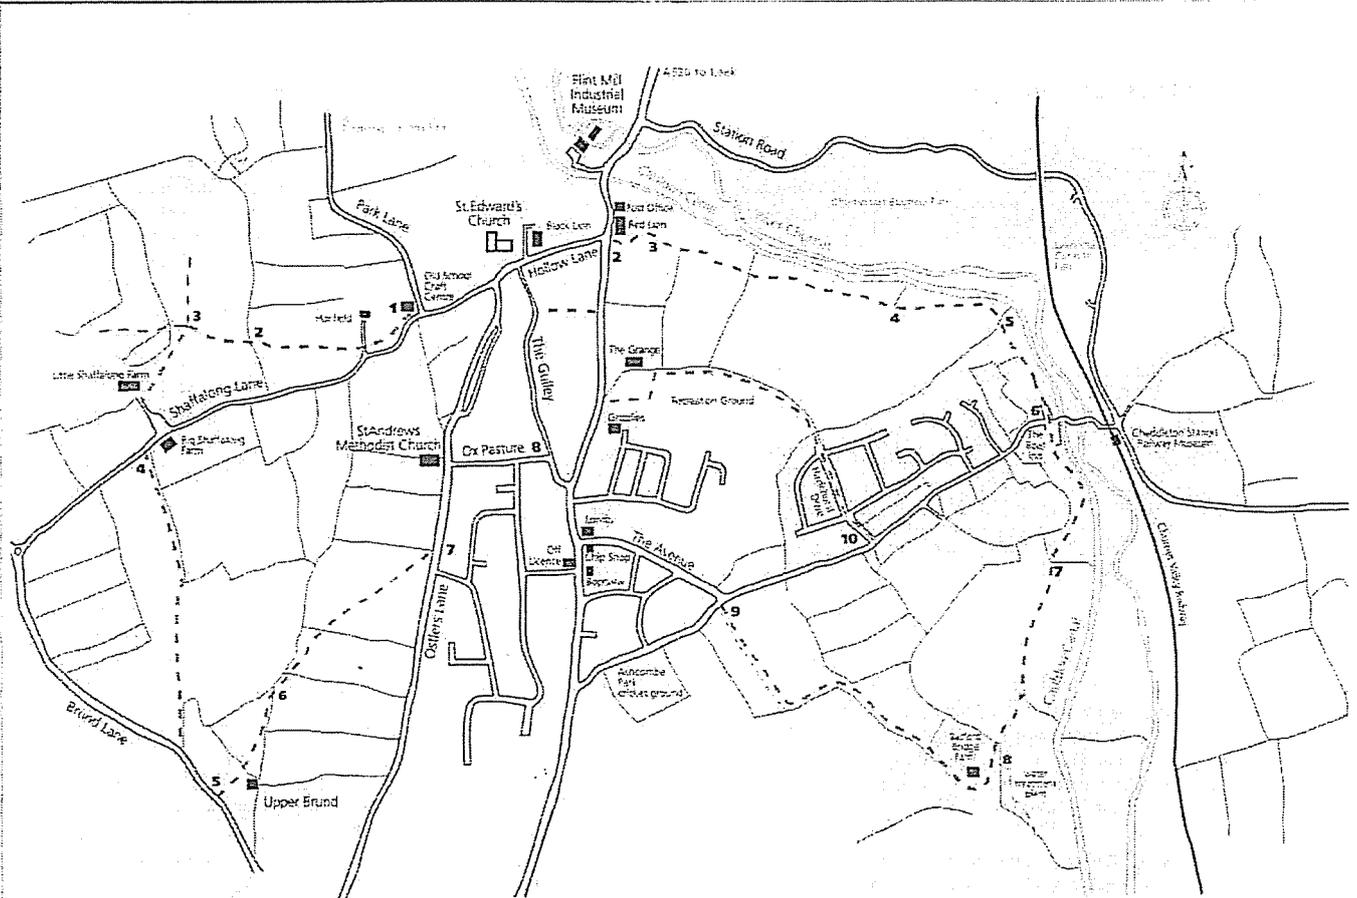

7 This brings you to **Ostlers Lane**, turn left and continue down until you come to **Ox Pasture**, a turning on your right opposite **St Andrews Methodist Church**. Turn right into **Ox Pasture** and continue to the bottom of the hill where the road bears sharply to the right.

8 Here you can turn left into **The Gully** (or Gullet), a footpath which will take you back to the centre of the village. It starts off as a narrow path with neatly trimmed holly hedges on either side, but soon on the left, where it opens out, there is a footpath which could lead you back to **Ostlers Lane**, but carry on down with the long tapering field on your left. You then come to an open field on your right hand side giving a marvellous view across to **Morrige** on the horizon, with **Grange Farm** at the far side of the main road which is hidden from view below the field. As you approach the village you can see the **Church tower**.

Pass the **Vicarage**, then **Fold Terrace** on your right, and arrive back in **Hollow Lane** between **Philip Lymer's butcher shop**. Turn left up back up **Hollow Lane** past the **Community Centre**, the **School** and back to the **Craft Centre**.

The Gully

east of the village
about 1/2 mile

- 1** Turn left out of the Crafts Centre car park and follow Hollow Lane past the Community Centre, Church and the Black Lion to its junction with the main Leek to Cheddle road. Bear right, cross over the zebra crossing.
- 2** Take the footpath immediately to the Right of the **Red Lion** car park, this goes down a narrow field to a stile marked with a yellow arrow and after this, a quick scramble up the bank opposite, you enter a long meadow which falls down to the canal on your left giving views to the hills above Leek with the industrial estate that has replaced Britain's Paper Mill in the foreground.

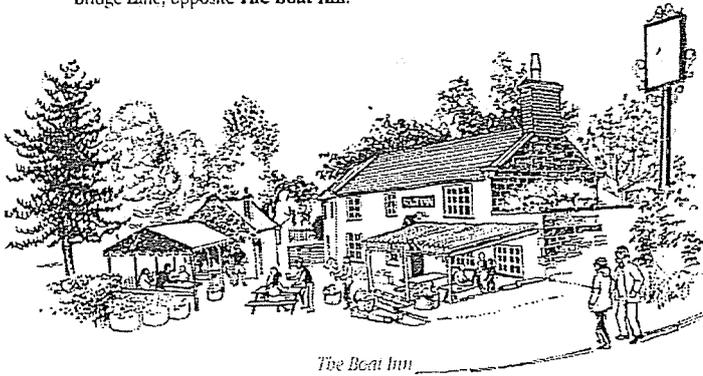

The Red Lion

3 The path runs parallel to the canal with an irregular hedge to your left. Part way along the field there is a stile with a nonexistent fence, and just beyond this there is a length of raised pipework going across a small valley, this is part of the water supply/drainage system from St. Edward's Hospital. Beyond an area of scrubland on the right hand side enclosed by a barbed wire fence, you can see work in progress on an extension of the newest housing development in Cheddleton which may eventually fill this side of the valley.

4 We come to an old stone squeezer stile marked with a yellow arrow, and the path bears left down towards the canal, and is well defined through an area of scrubland with recently planted saplings. Just below the housing development there is an isolated wooden stile without a fence.

5 The path then climbs slightly up above the canal, past a large holly bush and then steeply down to the canal. It then climbs up through the trees to follow the tall conifer hedge and the boundary fence of the new housing, through a clearing with garages (one of which possibly belongs to a Port Vale supporter) and brings you along the front of a terrace of houses to Basford Bridge Lane, opposite **The Boat Inn**.

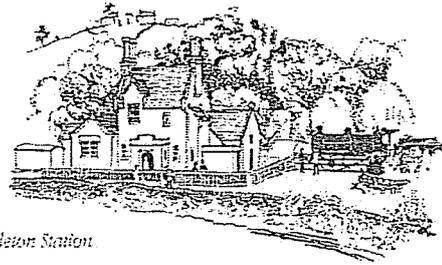

The Boat Inn

6 Here you have the choice of

- a Turning right for the shortened version of the walk *paragraph 10*
- b Turning left and crossing the canal and the River Churnet, to visit the Railway Museum, headquarters of the **Churnet Valley Railway**, and on a summer weekend enjoy a nostalgic ride behind a steam locomotive.
- c Stopping for refreshment.

or Continuing the walk by crossing in front of the pub through the pub yard negotiating beer crates to a stile on the left of an iron gate. The path continues through a clearing with the canal and river on your left and a view of the collection of railway carriages awaiting restoration beyond. The path rises slightly to a galvanised iron gate with a stile to the left then curves gently away from the canal rising towards three trees between which is a metal gate. The view to the left beyond the canal now reveals a field with a complex convoluted network of dirt tracks, sometimes noisily occupied by young motorcyclists.

Cheddleton Station

7 The gate is marked with an arrow showing that the path bears to the left following the bank and with the hedge on your left, giving a switch-back walk past two gateways, an inverted derelict dumper truck, finally curving to the right to the field entrance. The gatepost is marked with an arrow and brings us out to a new concrete road which goes down left to the water treatment plant and springs round right towards Basford Bridge Farm. Turn right towards the farm and just before the silage clamp there is a fingerpost on the right. This shows a path leaving to the left to Woodlands and Wetley Rocks, the subject of a future guide. Follow this for a few yards, and then turn right and with a short scramble return to the concrete road.

8 Follow the concrete road through the farm yard where it bears right and up past farmland on the right and the grounds of Ashcombe Park and then Ashcombe Park Cricket Club on the left, to Basford Bridge Lane.

9 Cross straight across the road into The Avenue, and through this privately maintained early twentieth century housing development to Cheddle Road. Turn right down the hill, across the zebra crossing and then left into Ox Pasture. Where the road bears sharp left after 30 metres, continue straight ahead into the Gully and return to the village following the route described in the west walk, at point **8**.

10 At the Boat Inn turn up the hill and carry on up Basford Bridge Lane and turn right into Hazlehurst Drive, and at the T junction with Rennie Crescent at the top, follow the footpath between No 41 and No 43. Follow the path around the edge of the playing fields with the hedge to your right in front of the Grange Pond and Farm. This brings you to steps down to the main road.

11 You can now turn left to Ox Pasture and regain the original route, or turn right and go downhill to a sloping path signposted to your left which will also rejoin the original route at Fold Terrace.

Circular Tour

These two walks can be combined into a longer pleasant day's journey by following either route but omitting the section from Ox Pasture down The Gully, and walking the full length of Ox Pasture between Ostlers Lane and the Leek to Cheddle Road.

From: [Laura Jones](#)
To: [Forward Plans](#)
Subject: Ox pasture east and west sites 29/30
Date: 30 October 2019 13:46:21

Dear Inspector,

I would like to put forward my views for retaining the local green space on the emerging local plan for sites 29/30 in cheddleton which are ox Pasture east and west.

My self and my young family life in Cheddleton village. We have enjoyed walking the gully for many years. My children have enjoyed the tranquil footpaths, commenting on the views and talking about which birds and wildlife we can see. Often in our quiet oasis the children imagine fairy's and come up with stories centred around our adventure through the gully. We collect fircones, and leaves to create our own habitats at home. These open sites create a sense of well-being and fuel young imaginations away from main roads and buildings. All this is on our doorstep, just a small but welcome break between the houses in the village. Should we not be protecting this historic footpath for our children's children to enjoy the same magical walks? As well as the gully there is also a footpath on the south side of the Ox Pasture west site. Here we can see magnificent views of the heart of our village the grade II* listed church, the roaches and the Peak District. The gully and footpath are used by most people who reside and visit the village, they take walkers right to the centre of the village. To the church, pub, community centre and are used by a lot of parents and carers on the school run, twice a day. This little haven is enjoyed not just by a few but by many, please help us to protect our Village and our right to open spaces for us and our future.

Many thanks for your time,

Laura Jones, Frankie Jones (8) Florence Jones (5) and Violet Jones (19months) just to add Violet loves to run off and explore on her own, the gully is her out of the pram safe run time.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ 61 page 232. Deletion of Local Green Space designations 29 and 30 (Ox Pasture east & west).

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant		✓
Sound - Positively prepared		✓
Sound - Justified		✓
Sound - Effective		✓
Sound - Consistent with national policy		✓
Complies with the Duty to co-operate		✓

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

I would like to take this opportunity to express the importance of sites 29 and 30 (Ox Pasture East and West) and how special they are to me, my young children and the local community.

We hope the Inspector will observe the overwhelming support for the protection of these sites and decide that the Local Green Space (LGS) designation should remain on these 2 sites. The local community has clearly demonstrated that these sites are special meeting

the requirement of being '*demonstrably special*'.

Removing LGS from sites 29 and 30 would inevitably result in aggressive development proposals when a local plan for housing is sustainable and is therefore unnecessary. These fields could be lost forever becoming just another noisy through road and concrete obstruction to the scenic views of the Heritage core, the hills of the Peak District ruining the setting of the Cheddleton Conservation Area and Heritage assets (Grade II* St Edwards Church).

These two sites are the closest piece of open space available to the public to enjoy outside of the Conservation Area of Cheddleton via the public footpath (gully) and southern footpath. They act as a village green where community members use the footpaths as alternative routes away from busy and dangerous roads.

Both sites adjoin the Conservation Area boundary and offer the last opportunity to enjoy peace and tranquillity one would expect from a small semi-rural village in the Staffordshire Moorlands where many open spaces are being lost.

Residents were not consulted on these LGS designations or the Inspector's post hearing advice until late in the Local Plan examination process (mid Feb 2019). Since then the community has conducted market research (appendix 1), held a march in protest (appendix 2) over the proposed amendments and hundreds of people have expressed their objections via a petition or written representations.

There has been a lot of creative expression to demonstrate how special these sites are via the local primary school, local radio station and personal video interviews with local residents. The inspector now has evidence that any development on both sites would cause 'less than substantial harm' to the heritage and conservation setting, elevating their appeal to a designation of LGS thanks to the recent Conservation panel meeting.

The criteria for LGS is defined in the NPPF at paragraphs 99 says "*the designation of land as Local Green Space through local and neighbourhood plans allows communities to identify and protect green areas of particular importance to them.*"

We feel that as a community we have identified these pieces of land as special and demonstrated how important they are. It seemed the consultation process was flawed and a lack of consultation resulted in the community being unable to demonstrate the fundamental criteria can be achieved. However we have now got a slim chance to do this.

At paragraph 100 is states "*Local Green Space designation should only be used where the green space is:*

- a) *in reasonably close proximity to the community it serves;*

As mentioned above these sites are at the center of the village joining the old and new residential areas via the historic footpath and the 'less than substantial harm' development would cause. It continues...

- b) *demonstrably special to a local community and holds a particular local significance for example"*

Example	Demonstrated by
<i>because of its beauty</i>	The site has an abundance of wildlife and offers extensive view in and across the heritage setting of Cheddleton and out of the Peak District. SMDC Planning Committee Chairman Cllr Ellis in his closing statement at the hearing of planning application 2018/0700

	<p>on Ox Pasture West said:</p> <p><i>"We saw many people using the footpaths and it is very clear that they are a popular walk way. From the footpath to the south of the site there are open views out of the site which would be adversely affected [by development] The view you see from the footpath give you that historic view in to the Cheddleton Conservation Area. The benefit of that footpath as your walking within the village on Green Field land with protected trees with protected hedgerows with views of the historic church popping up with the old stone buildings and everything else. That is the setting of the core history of Cheddleton."</i></p>
<i>historic significance</i>	The two sites' proximity to the historic core of Cheddleton and the conservation area confirms its significance. This is signified by the historic footpath and hedgerows dating back centuries that run between the two sites.
<i>recreational value</i>	<p>Although access is limited on the sites recreational value is created by experiencing the views from the southern footpath towards the church and from the gulley towards the Peak District which aids personal wellbeing and mental health where there are very few opportunities to experience anything similar so close to the old village Heritage core.</p> <p>St Edwards Primary School in the center of the village asked the children through classroom activities about how special the fields are with and overwhelming support. Many children and families enjoy passing the open spaces on their journey to school twice a day contributing to their health and experience of rural community.</p>
<i>tranquillity or richness of its wildlife</i>	<p>There is an abundance of wildlife in the fields as detailed in an ecology report.</p> <p>https://www.cheddletonresidents.org/documents/Ox-Pasture-Cheddleton-Elite%20Ecology-PEA-Report-March-2019.pdf</p>
<i>local in character</i>	The character of the land compliments the historic center of the village due to the wider setting. To lose one would inflict on the other. The NPPF holds a strong importance in the preservation of heritage assets and their setting in accordance to Chapter (Conserving and enhancing the natural environment). A recent planning application on Ox Pasture west was refused because of its importance to the setting of the heritage and conservation area.
<i>and is not an extensive tract of land</i>	At approximately 0.8 hectares (west) and 1.3 hectares (east) these are not extensive tract of land

The criteria above is clearly met however point (b) of para.100 which states sites need to be 'demonstrably special to a local community and holds a particular local significance' is written in a way that is unquantifiable and can only be concluded by matter of opinion.

We have attempted to quantify this with research data (Appendix 1), over 800 petition signatures, 500 written objections to planning applications and extensive press coverage (Appendix 2) and collectively demonstrated this through other creative means – please see <https://www.youtube.com/watch?v=QZVqIXsd-zE> (Appendix 3).

Development on either site has been described to be 'less than substantial harm' by the Conservation Panel which gives great weight to their setting in relation the Conservation Area.

This evidence is supported in by the refusal of a planning application SMD/2019/0143 on Ox Pasture West stating the following

(<http://publicaccess.staffsmoorlands.gov.uk/portal/servlets/AttachmentShowServlet?ImageName=227483>):

Section 66(1) of the Planning (Listed Buildings and Conservation Areas) Act 1990 requires that special regard shall be had to the desirability of preserving a listed building or its setting or any features of special architectural or historic interest that it possesses. In relation to the setting of the Grade II Listed Building of the Church of St Edward the Confessor, it is considered that there would be 'less than substantial' harm to its setting by virtue of the development of an open and undeveloped area of land and the associated view of the Church which contributes towards its setting*

On the basis of one site visit the Inspectors Post Hearing Advice concluded these sites were not *demonstrably special* – all other criteria in p.100 has been met. However the Localism Act 2011 was ignored and the community could not provide evidence making the definition of 'demonstrably special' meaningless without the ability to demonstrate.

Now that the community has had the opportunity to demonstrate, the criteria has been met with a considerable degree of certainty, it would now be up to the decision makers to qualify the definition of the term '*demonstrably special*'.

If the decision is that the community has NOT showed the sites to be demonstrably special it would be imperative to give clear definitions of what activities and data could have been provided to conclude otherwise. This way other communities could learn and achieve the LGS designation with known targets.

I hope the Inspector agrees that the local community who benefit from these sites have proven they are demonstrably special and reinstates the Local Green Space designation they deserve.

Yours sincerely,

Paul Jones

Appendix 1

Cheddleton Local Green Space Survey

A survey to determine how the land in figure 1.0 and in particular the land adjacent to Ox Pasture is demonstrably special to the local community in Cheddleton.

Q1 - Out of 5 (5 being highest), how important is it to have open green spaces close to the centre of the village?

1	2	3	4	5	Responses
1.09%	0.55%	2.73%	3.28%	92.35%	183
2 responses	1 response	5 responses	6 responses	169 responses	

Q2 - Do you consider these areas special to the local community and of particular local significance?

Strongly disagree	Disagree	Don't know	Agree	Strongly Agree	Responses
2.17%	1.63%	1.09%	12.5%	82.61%	184
4	3	2	23	152	

Q3 - These areas of land provide peace and tranquillity to the village.

Strongly disagree	Disagree	Don't know	Agree	Strongly Agree	Responses
1.10%	1.66%	1.10%	10.5%	85.64%	184
2	3	2	19	155	

Q4 - If these areas of land were to be developed on it will have a negative impact on the historic centre of the village?

Strongly disagree	Disagree	Don't know	Agree	Strongly Agree	Responses
1.63%	2.72%	2.72%	9.24%	83.70%	184
3	5	5	17	154	

Q5 - Out of 5 (5 being highest), how important to you is the richness of wildlife in these areas?

1	2	3	4	5	Responses
0%	1.10%	1.65%	8.24%	89.01%	182
0	2	3	15	162	

Q6 - Do you feel that having open green spaces in the village improves your personal well-being, such as mental health and

physical health?

Strongly disagree	Disagree	Don't know	Agree	Strongly Agree	Responses
1.62%	1.08%	1.08%	10.81%	85.41%	185
3	2	2	20	154	

Q7 - Out of 10 (10 being highest), please score the beauty of the area stretching from the historic village centre to Ox Pasture as you walk down the gully.

1	2	3	4	5	6	7	8	9	10	Responses
1.09 (%)	0.54 (%)	0.54 (%)	1.09 (%)	0.54 (%)	2.17 (%)	2.72 (%)	11.96 (%)	16.85 (%)	62.5 (%)	184
2	1	1	2	1	4	5	22	31	115	

Q8 - Out of 10 (10 being highest), please score the beauty of the view stretching over historic village centre as you walk down the footpath behind Ox Pasture.

1	2	3	4	5	6	7	8	9	10	Responses
1.10 (%)	0.55 (%)	1.10 (%)	0.55 (%)	0.55 (%)	1.65 (%)	1.65 (%)	9.89 (%)	17.58 (%)	65.38 (%)	182
2	1	2	1	1	3	3	18	32	119	

Q9 - Out of 10 (10 being highest), as a green area rate how the open rural land either side of the gully has special significance to you?

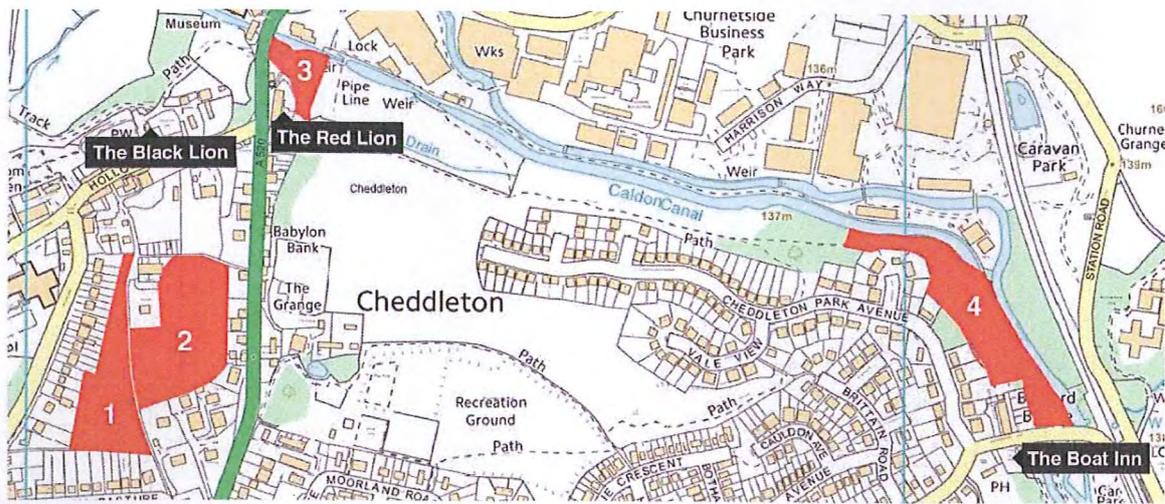

1	2	3	4	5	6	7	8	9	10	Responses
3.24 (%)	0 (%)	0.54 (%)	0.54 (%)	0.54 (%)	4.32 (%)	2.16 (%)	10.81 (%)	10.81 (%)	67.03 (%)	179
6	0	1	1	1	8	4	20	20	124	

Conducted 2nd March to 5th March 2019

Respondents were recruited to participate via closed social media groups limited to people who live in and have previously lived or regularly visit Cheddleton.

Survey designed by Go Sho Communications Ltd (www.go-sho.com) – Market Research Software Specialists using the Survey Monkey platform (www.surveymonkey.com)

Figure 1.0

Appendix 2

Cheddleton Local Green Space March

A peaceful demonstration by community members in Cheddleton protesting against the proposed removal of LGS designations and the development behind 10 Ox Pasture.

This march was to show how the field behind Ox Pasture is 'demonstrably special' to our local community and also highlight the danger of the access point.

This was reported with favourable social media comments in the Leek Post & Times and the Sentinel.

Over 50 villager turned out to the march on 2nd March 2019.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

YES

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required) ✓
- Publication of the Inspector's Final Report ✓
- Adoption of the Local Plan. ✓

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Staffordshire Moorlands Local Plan - Modified

Dear Sir,

I have been in contact with the Environmental Agency concerning the proposed Safeguarded Site BD 087. There are a number of issues with this site as it is the only Flood plain identified in the SMDC modified local plan.

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested by the Environmental Team in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 068 & BD 087. A further letter was sent to the SMDC on 13th June 2016 stating "*BD 087 will need to be assessed before being taken further. A SFRA Level 2 assessment will be required*" - in checking with the Environmental Agency on 2nd September 2019 this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site.

Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the SMDC Modified Local Plan the SMDC Planning Team has only identified 12 sites from the original housing plan in 2014; there were originally a total of 27 sites identified in this plan.

There are a number of unique concerns with BD087 that would need up front actions by the SMDC Planning Team before this site could be considered for Safeguarding, or it may seem that the SMDC was putting this site forward knowing that it would potentially fail at any future consultation process.

1. BD 087 is a flood plain as implied by Marsh Green. This is the only flood plain in the Biddulph area being considered and contains Flood Risk Level 1, 2 & 3; it also has the additional problem of Surface water run-off. More than 50% of the land on this site is on a Flood Risk Zone with both fluvial & pluvial flood issues affect this site. This is identified in the Environmental Agency Flood Plan.

In a letter dated 22nd September 2017 from the Agent of the Site Owner to the SMDC Planning Team stated - that proposed housing would be located on Flood Risk Zone 1. The Site Owner also has stated that all surface water will be directed into the brook.

In 2015 - The Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using this site. The Environmental Agency went on to state – *Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

BD087 is classified as a natural Flood Plain, current Government policy states that all other sites should be considered first (This would mean the whole of the Staffordshire Moorlands could be reconsidered).

Please Note -This is the most Northerly Site in the Biddulph area and the only site after the Water Treatment works - The Environmental Agency has major concerns on flooding in the Congleton area, the river running through this site is a major contributor to these concerns.

2. Public Safety Issue - The land proposed for the access road & bridge onto this site is only 1.5M above the normal river height. This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto this enclosed site. What happens in a flash flood – will there need to be an Emergency Evacuations Plan in place, have the Emergency Services been involved with the pre-selection of this site?
3. The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated In order to build a 6M wide (4M + 2M) single access road and bridge onto the site a supporting wall will have to be built alongside the River, this will make the water flow faster – this may very well cause floods downstream. The access road is on the narrow side of the river bank approximately 10M wide. I believe that an investigation would be required before this site was approved or Safeguarded in order to demonstrate it is actually possible.
4. The site - south to north has a 13M height drop, the site is also below the water treatment works the only direct route for surface water would be directly into the river thus increasing both the speed and levels of the flood waters. The river flows from South to North. Nearly 60% of the land with be lost to housing and roads, how will this amount of water be slowed down so as not to increase the flow rate of the river which currently floods the houses to the north of this site?
5. As this site is on a Flood plain any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance?
6. I strongly object to the very late modification to the SMDC Local Plan.
The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack public consultation could in the end prove very expensive to the local council.

I find that the SMDC Local Plan to be logically unsound and legally questionable and subject to challenge in the courts at a later date. If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site then they are pulling the wool over people's eyes. Short cutting the selection process is not acceptable. Why has this site been deemed Level 1 Building land given it was excluded in 2016 as unsuitable?

I would ask you to dismiss the Safeguarding of BD087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report) in order to ensure that BD 087 can be put forward in the future for planning consideration.

Kindest regards,

Paul Kasperowicz

Date 22nd September 2019

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

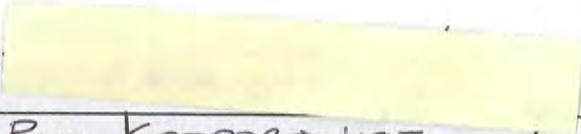

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

Staffordshire Moorlands Local Plan

Dear Sir,

I attended the Staffordshire Moorlands District Council (SMDC) Meeting held on Wednesday 26th June. The topic of the meeting was to consider SMDC Local Plan Modifications and implications for the Neighbourhood Plans.

This Local Plan modification was in response to the Planning Officers rejection of the original Biddulph housing Site Plan. This plan had been worked on for over three years and had the backing of the Biddulph Town Council & Biddulph Neighbourhood Planning team, but had an objection, raised, on a small area of Green belt land - BDNEW (2017).

Please note at least 80% of all new housing in the Biddulph area will be built on Green Belt.

The SMDC Planning team stated at the meeting that they used findings from 2014, 2015 and 2016 to justify their development / conclusion on a modified Local Plan summated to this meeting. This excluded up to-date information from 2017, 2018 or 2019. Little or no information for the Biddulph Neighbourhood Plan was used. The Biddulph Neighbourhood Plan is in its final stages of completion.

The SMDC Planning Team read from a report which they had created without local consultation. This identified a number of options which included increasing the housing density on the two proposed sites – this made sense, then the report went on to identify 4 Safeguarding options on three new Green Belt Sites (again without consultation) thus replacing 1 Green belt site BDNEW with 3 New Green belt sites. I understand that part of your objection was to the overall use of Green Belt Land.

These sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016.

The SMDC Planning Team had identified 12 sites from the original housing site plan in 2014; there were originally a total of 27 sites identified in the 2014 plan. What happened to the other sites? The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded in the first consultation phase due to :-

1. BD 037 is a flood plain as implied by Marsh Green. This is the only flood plain in the Biddulph area and consisting of flood level ratings 1, 2 & 3, it also has the additional problem of Surface water run-off -This is identified in the Environmental Agency Flood Planning of this Site. The Environmental Agency and United Utilities requested that the SMD Planning team consider all other options and 27 sites before using this site. The Environmental Agency went on to state – *Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In a letter to the SMDC dated 13 June 2016 the Environmental Agency stated that a Level 2 SFRA Flood Risk assessment would be required before BD 068 AND BD 087 could be taken forward for consideration. As of 2nd September 2019 this required action by the SMDC has not been completed. Could you please request a copy of the SFRA Level 2 assessment for sites BD 068 & BD 087 as part of your consultation process?

The Maximum rise of the river on this site is 2.6M (video evidence can be supplied). More than 50% of the land on this site is Flood Level 1, 2 or 3. Due to this site being 15M below the water treatment works. The site owner has stated in previous letters to the SMDC that the surface water from two sites (BD 068 & BD 087) would go directly into the river - thus increasing both the speed and levels of the flood waters.

The Environmental Agency has specifically stated that this river cannot be cultivated. The land proposed for the access road & bridge onto this site is only 1.5M above the normal river height. This land has been identified as Level 3 Flood Risk.

Please Note – BD087 is classified as a Flood Plain, current Government policy states that all other sites should be considered first (This would mean in the whole of the Staffordshire Moorlands could be reconsidered). As this site is on a Flood plain any housing or infrastructure to support the housing on this site would not be capable of being insured. The site owner has stated in previous letters to the SMDC that any housing would be built on a Level 1 Flood Risk area. Thus no Building insurance would be available to the proposed houses, there would be no mortgage availability.

Please Note -This is the most Northerly Site in Biddulph area and the only site after the Water Treatment works - The Environmental Agency has major concerns on flooding in the Congleton area, the river running through this site is a major contributor to these concerns.

2. Difficult to access - Marsh Green road is a single track road narrowest width is 2.5M maximum is 4M with 4 - 90 degree bends – impossible for large trucks to manoeuvre. Access to both BD 087 & 068 is on this road. This road has been described by Staffordshire Highways as the worst road in Staffordshire (it has no public footpath). The Junction to A527 is dangerous at best this may will require traffic controls?
Please note - It was reported at the SMDC meeting on 26th that a new road would be built? Who will pay for this and the potential remodelling of the junction onto the A527? Will this involve compulsory purchase of land?
3. BD 087 was considered by Biddulph Town Planning in 2005 for the site of the new Cemetery, due to concerns about access and the possibility of Coffins rising up due to ground water pressure this was rejected out of hand. So far this site has been rejected twice. BD 087 is 10M below the neighbouring housing on three sides (West, South and East) all of the surface water travels onto this site in combination with the river flooding the site becomes water logged with the water table above ground height (this has been photographed).
4. Site viability BD 087 – The plans suggested by the developer show 20 houses, but there is an Electrical sub-station on the North East corner of the field – on twin Telegraph poles about 6M off the ground which requires access (normally 4 off road vehicles including a hoist.) This will reduce the site housing by one. Five more houses are planned on Level 2 Flood Risk Area. This could reduce the site to just 14 or 15 houses – Is this site viable?
I find it surprising that out of the 27 other sites identified in 2014 Biddulph Plan that there is not a more suitable site for 15 houses.

5. The Green Belt Report 2015 (Parcel N7) commissioned by the SMDC – states that this land has a significant contribution in preventing neighbouring towns (Congleton & Biddulph) merging into one another. The report clearly states that this land which contains BD 087 has a significant contribution in Biddulph's Green Belt and that any development would produce an over extended linear pattern with limited relationship to Biddulph Town. BD087 is approximately 1.5 Miles from the town centre, 3 Miles from the High School. Please note that the report goes on to say that only in Exceptional circumstances should BD 062, 068 & 087 be considered – What are the Exceptional circumstances?

I strongly object to the very late modification to the Local Plan by the SMDC.

The addition of Safeguarded land without consultation, replacing one area of Green Belt with three areas of Green Belt land is close to crazy. The failure of the SMD Planning Team to investigate all other 26 sites and options, the spectre of property developers using the system to exclude BDNEW for their own benefit and to get BD 062, 068 & 087 Safeguarded is, in my opinion, not acceptable.

One of the reasons BDNEW was selected and supported by the Biddulph Town Council – It is the closest combined site to the Town Centre, School & the Medical clinic. This makes this site the most environmentally friendly, due to Biddulph's limited parking, people could walk into the town centre, and this site supports the town centre regeneration plan. Children could walk to school (not bussed as BD087) and the site is supported by the existing major infrastructure of the town.

To the North and West of Biddulph boundaries (within 5 miles of the boundary line, 7 miles from BD 062, 068 & 087) Congleton /East Cheshire are building around 10,000 new homes, yet the SMDC say that Biddulph needs 965 new homes, something is very wrong. This would mean an influx into this area of around 22 to 25,000 people over the next ten years!

I find that the SMDC Local Plan to be logically unsound and legally questionable and subject to challenge in the courts at a later date.

The SMDC Local Plan should clearly show how it supports not only the Staffordshire Moorlands but also the development of the West Midlands. The parochial view demonstrated in the SMDC Local Plan does nothing for the Staffordshire Moorlands nor the West Midlands. The only major road system passing through the Staffordshire Moorlands is the A50 Stoke-on-Trent to Derby – which if correctly developed could create an East to West Midlands industrial corridor.

I would ask you to find against the entire SMDC Local Plan and allow market forces and private enterprise to decide where housing and industrial units should be built in the Staffordshire Moorlands – as currently demonstrated by the East Cheshire Council.

Kindest regards,

Paul Kasperowicz

Staffordshire Moorlands Local Plan - Modification

Dear Sir,

Please note at least 80% of all new housing in the Biddulph area will be built on Green Belt.

The SMDC Planning team stated at a meeting held on 26th June 2019 that they used findings from 2014, 2015 and 2016 to justify their development / conclusion on a modified Local Plan summated to the Planning Inspector. This excluded up to-date information from 2017, 2018 or 2019.

The sites BD 068 & 087 were originally excluded during the first round of consultation in 2016 due to a number of issues foremost were flooding and access to each of these enclosed sites. In the site plans summated by the Property Owner Agent on 22nd September 2017, the access roads are shown to be via Marsh Green Road – a single road farm track. I have been in contact with the Police concerning this proposal, off the record, they state it must be a joke due to how dangerous this road can be. I have outlined the concerns below -

1. Difficult to access - Marsh Green road is a single track road narrowest width is 2.5M maximum is 4M with 4 - 90 degree bends – impossible for large trucks to manoeuvre. Access to both BD 087 & 068 is on this road. This road has been described by Staffordshire Highways as the worst road in Staffordshire (it has no public footpath). The hidden Junction to A527 is dangerous at best of times; this may well require traffic controls? Please Note - Staffordshire County Council does not want traffic controls installed on this junction. Please note - It was reported at the SMDC meeting on 26th that a new road would be built? Who will pay for this and the potential remodelling of the junction onto the A527? Will this involve compulsory purchase of land? Will this road be built before the sites are approved? No answers were given!
2. Marsh Green Road runs East to West from the sites. The site access roads runs North to South staggered either side of the existing bridge over Biddulph Brook; the bridge is at a 30% angle to the road, making it a single track Bridge. The property Owner states in his letter to the SMDC that both the road and bridge will need modification – Who pays!
3. Marsh Green Road to the west is impossible for heavy good vehicles - from the access road to BD 087 the road is 2.5M wide with two S bends and a single track bridge. From the A527 to the sites the road is 4M wide (no foot path), the Junction is hidden in a dip (it is very difficult to see oncoming traffic) this road will have to be widened (via the purchase of private land) to 6M + 2M footpath for the volume of traffic both site will produce. Will the modification to the road and bridge be approved by the County Council before these sites are selected for Safeguarding, without the County Council approval all of this a waste of time!

Please note - It was reported at the SMDC meeting on 26th that a new road would be built? Who will pay for this and the potential remodelling of the junction onto the A527? Will this involve compulsory purchase of land? Will this road be built before the sites are approved? Have the Staffordshire County Council been informed about this new road requirement and do they have the money to fund a new road project to a private building site? Could you please investigate during your consultation process?

I find it surprising that out of the 27 other sites identified in 2014 for Biddulph that there is not a more suitable site for 100 houses. With good access roads and pavements for children to walk on.

The SMDC Planning Team had identified 12 sites from the original housing site plan in 2014; there were originally a total of 27 sites identified in the 2014 plan. What happened to the other sites? The only three sites chosen as Level 1 are BD 062, 068, 087.

I object to the very late modification to the SMDC Local Plan for Biddulph. The addition of Safeguarded land without proper public consultation or notification, replacing one area of Green Belt with three areas of Green Belt land is not acceptable. The failure of the SMD Planning Team to investigate all other 27 sites and options is very disappointing especially when the SMDC has identified a site on the Marsh Green Road and rated that site Level 4 due to Access Issues! Same Road, Same People.

I find that the SMDC Local Plan to be logically unsound and legally questionable and subject to challenge in the courts at a later date.

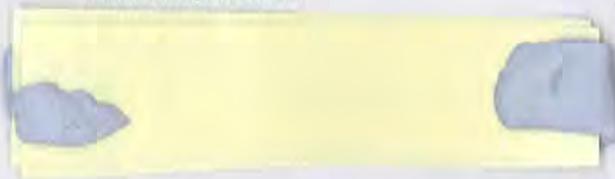

I would ask you to find against the entire SMDC Local Plan and allow market forces and private enterprise to decide where housing and industrial units should be built in the Staffordshire Moorlands

Kindest regards,

Paul Kasperowicz

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Dear Sir/Madam,

Response to the main modification consultation, Sept. 2019; MM12

Issue 1: Sewage Works

BD062 and BD068 are both immediately adjacent to a sewage works. Residents who live on Essex Drive, York Close and Long Valley Road suffer from ad-hoc issues of odour and noise and have registered complaints to United Utilities and SMDC, especially since they learned of plans to build homes even closer. Photographic and video evidence exists of repeated raw sewage flooding into the brook at the end of Essex Drive (13/09/2016), where pressure builds up inside the junction chamber and the lid blows off, especially following heavy rain. This happened again in August and October 2019. This junction forms the point where pipes from the east and west sides of the valley come together. The raw sewage contaminates part of BD062 (proposed eastern side access) and sites downstream, including BD068 and BD087. This field needs to be kept as a natural buffer. Adding more houses and thus increasing surface run-off from built up areas will only make this situation worse.

Issue2: Bio-diversity

Key points:

The SMDC Phase 1 Ecological Survey evidence base is being ignored.

The Assessment for Local Wildlife Sites by Ecus (2017) was incorrectly carried out.

The ranking exercise which was used to inform SMDC Council Members and guide decision making at the SMDC Council Assembly on 26th June 2019 was missing the ecological part of the SMDC evidence base. The methodology is unsound.

Removing the Gillow Heath fields from the green belt and designating them as safeguarded sites for future development (especially BD062) is in direct conflict with the emerging Biddulph Neighbourhood plan, which has a more recent and detailed evidence base, which has designated BD062 as local green space. This had already passed through two public local consultations, which SMDC was well aware of.

Sites need to be considered on an individual basis. Ranking and considering sites as a group leads to misleading conclusions, which is evidenced in the report given to SMDC council members on 26th June 2019. Examples where this is misleading include suggesting that all sites are within 800 m of the town centre when they clearly are not at Gillow Heath. The Ranking method is unsound. The proposed eastern site access of Essex Drive is in a flood plain and should remain as semi-natural habitat and its role in natural flood management enhanced.

Issue 3: Community access

The local community have had unfettered access to this site since the estate was built. For over 40 years, there has been total open access and the land has been used by local residents for events and dog walking. As recently as 7th July 2019 and repeatedly since. This land has been designated Local Green space by the emerging Biddulph Neighbourhood Plan (currently undergoing REG 14 consultation) as it was found to meet the criteria required.

Issue4: Access Roads.

Neither the distributor road (Mow Lane) nor the feeder roads (York Close and Essex Drive) meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy. The roads are too narrow and the road bend radii too small. There are two pinch points over bridges on Mow Lane to the east and west of the access to BD062, and a new sewage pump on Mow Lane all of which reduce the feeder road to a single carriage way in at least 3 locations. There is no alternative access to BD062. Planning permission has been refused on highways grounds in the past and the situation has only got worse with the creation of the third pinch point on Mow Lane. The actual

distributor road width (Mow Lane) falls below the minimum required of distributor roads by the Residential design Guide. which is 6.7m wide Mow Lane is 4.25m.

Issue 5: Fooding

BD062 (Land at end of York Close/Essex Drive) suffers from a high amount of surface flood water flooding. It is classed as wet meadow and plays an important role in slowing down rainwater flowing into Biddulph Brook(natural flood management) This field drains part of Biddulph valley way as evidenced by the Enviroment Agency flood maps.

Yours Faihfully.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. 2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. 3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

Tabitha Lawrie

They provide a valuable area of tranquillity in the heart of the village. There are no roads adjacent to either site, but there are well used public footpaths to the south of site 29 and running north / south between the sites. Users of these footpaths appreciate the tranquillity and visual relief that the sites provide, away from nearby traffic noise and pollution. The path between the sites is used by young and old on a daily basis, being the main safe pedestrian walkway from the newer housing estates in the south of the village to the school, church, community centre, tearoom / craft centre, and pub.

The open nature of the sites enables uninterrupted access to exceptional and cherished public views of the historic centre of the village and beyond the settlement to the Peak District, showing the village in its rural context. Locals and visitors alike particularly appreciate the beauty of the panoramic views from the southern footpath. Recreational walking groups that visit the village specifically include the paths around the fields in their walks, and value the visual amenity that the fields offer.

They contribute to the special character of the village by providing a significant green buffer separating the historic centre from the more recent housing estates to the south and east. Consequently, the community and successive authorities have protected these sites from encroaching urbanisation throughout eight decades of extensive expansion of the village. 2019-10-14

Dear sir / madam

I think it would be a real shame to lose our green space as I really enjoy walking my dog along the gully and admiring the beautiful views which would be lost if buildings were there.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be built along the river bank. The access road onto BD 087 is on the narrow side of the river bank approximately 10M wide. I believe that an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land. I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

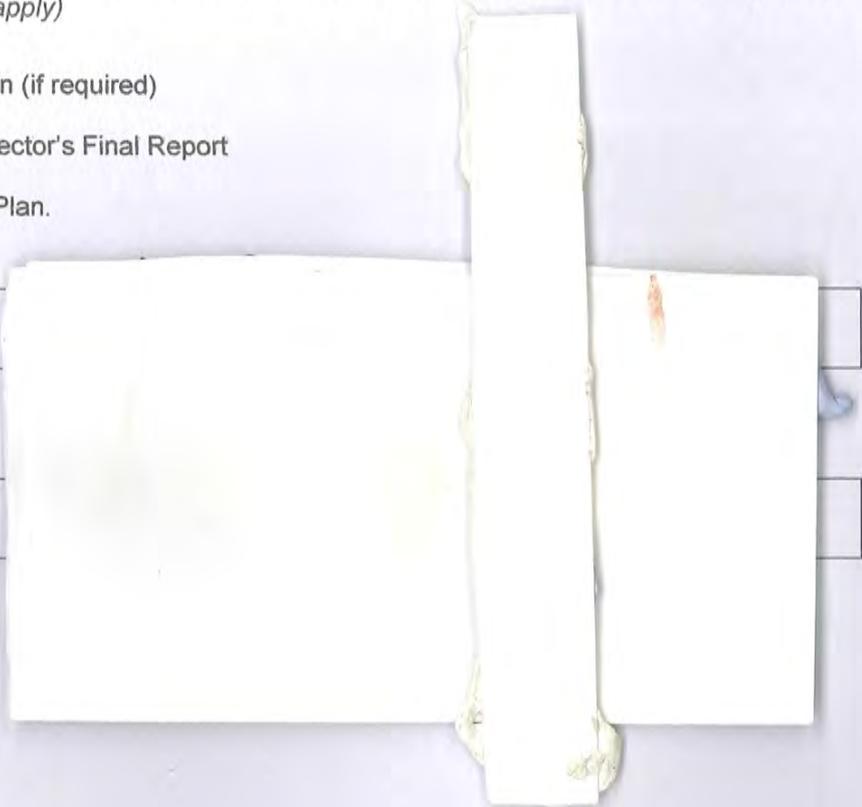

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (please select all that apply)

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

Staffordshire Moorlands Local Plan Examination

MAIN MODIFICATIONS CONSULTATION - SEPTEMBER 2019

Representations Form 5

Guidance Notes

Please ensure that you have read the accompanying 'Statement of Representations Procedure' before completing this form.

The Local Plan Main Modifications Schedule and related documents, including; the Sustainability Appraisal of Main Modifications, Biddulph options assessment, Sustainability Appraisal of Alternative Development Options for Biddulph, Housing Implementation Strategy, Equalities Impact Assessment, Tunstall Road Masterplan Executive Summary and Wharf Road Masterplan Executive Summary can be viewed on the District Council's Main Modifications consultation webpage, Council offices and local libraries.

Website: <http://www.staffsmoorlands.gov.uk/localplan>

Council offices:

- | | |

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Buy in is key to developing any plan – there is no buy into this plan by any of the people in Biddulph – this cannot be dressed up. No due process has been followed. To push this modified local plan through at break neck speed can only lead to an expensive legal outcome. SMDC has had 8 years to get this local plan right, this Modified Local Plan has taken 3 months from 26th June, no public face to face consultation, and a hurried last minute consultation period with almost no one informed. Only the Site Owners have been kept up to date. Why!

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

<p>Access to BD 068 and BD 087 - Road Safety Issues</p> <p>Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?</p> <p>The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have</p>
--

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

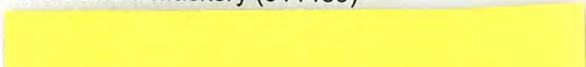

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM49

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

- Legally compliant . Yes
- Sound - Positively prepared . Yes
- Sound - Justified . Yes
- Sound - Effective . Yes
- Sound - Consistent with national policy . Yes
- Complies with the Duty to co-operate . Yes

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Considers the plan is sound, legally compliant and complies with the duty to co-operate.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

No

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

Considers the plan is sound, legally compliant and complies with the duty to co-operate.

Officer Response

Support noted.

Recommendation

No change.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

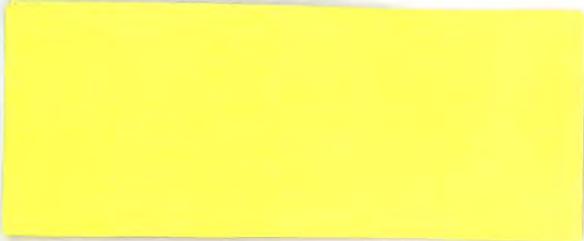

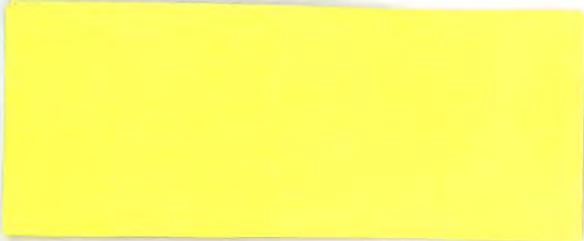

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.
MM/document reference

MM12 and MM21

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Lc (please select relevant box/s):

Legally compliant

Sound - Positively prepared . No
Sound - Justified . No
Sound - Effective . No
Sound - Consistent with national policy . No
Complies with the Duty to co-operate . No

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to cooperate as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan with the duty to co-operate, please also use this box to set out your comments.

Inclusion of Sites at Gillow Heath This is my response to the local plan main modifications consultation. The plan is Effective, Consistent with national policy) and it does not comply with the Duty to Cooperate. My comments refer to the Parish. The SMDC Phase 1 Ecological Survey evidence base is being ignored: The ranking exercise which was used by Council Members and guide decision making at the SMDC Council Assembly on 26th June 2019 omitted the SMDC evidence base altogether. The methodology that led to the identification of 'Safeguarded' fields in Gillow Heath is not sound because the evidence base used was not sound. The SMDC report 'Appendix 1 Biddulph Options Planning Analysis and Maps' June 2019 omitted the ecological assessments as part of their ranking exercise at all. The sources used for the exercise are listed on pg.4 and the ecological assessments are missing. This is then reflected in the assessment tables in Appendix C and Appendix D and used to inform the Agricultural Land Classification is also wrong: All three Gillow Heath fields are stated as being 'urban / industrial' according to Natural England data. A quick check on Magic Map (<https://magic.defra.gov.uk/MagicMap.aspx>) reveals that the sites are classed as Grassland/arable on the Dudley Stamp land use classification scheme and this is obviously visible to anyone who has visited these sites. The methodology that led to the identification of 'Safeguarded' fields in Gillow Heath is not sound because the evidence base used was not sound. Appraisal Report: The original Sustainability Appraisal Report which accompanied the Local Plan (version Feb 2018) did include an overall assessment (+ / - form of ranking) and did include the ecological evidence base (including sites within the green belt). BD062 York / Essex Drive was 'deemed to have ecological value' and a negative effect on the environment if it was developed (<https://www.staffsmoorlands.gov.uk/article/2861/Sustainability-Appraisal>). This evidence was not taken into account and, therefore, was not taken into account as part of the decision making process on 26th June 2019. The methodology used for the identification of 'Safeguarded' fields in Gillow Heath is not sound because the evidence base used was not sound. Section 36 Environment and Rural Communities Act 2006 places a duty on all public authorities in England and Wales to have regard to the environment in the exercise of their functions, to the purpose of conserving biodiversity. A key purpose of this duty is to embed consideration of biodiversity in all part of policy and decision making throughout the public sector as clarified in the guidance on the Natural Environment in this duty. By omitting the ecological evidence base from decision making, SMDC are also failing in their ability to deliver the Local Plan vision (Feb 2018 submission version) which states: "net gains and improvements to biodiversity will be made". Moorlands (pg34 <https://www.staffsmoorlands.gov.uk/localplan>). It is difficult to see how this will be delivered if evidence for site allocations for both development and future development (Safeguarding) are not amended to take biodiversity into account. Assessments: The assessment for Local Wildlife Sites by Ecus (2017) was incorrectly carried out. According to their methodology it was a desk-based exercise only. The methodology applied is not sound. Development Densities: Development densities are being lowered to take known biodiversity into account throughout any of this local plan process. The evidence base is referred to in the Local Plan and not on a site-by-site basis. The decision to increase housing densities on Wharf Road (MM21) does not take the findings of the Phase 1 Ecological Surveys into account, nor is this considered in the decision to 'Safeguard' for future development site E. SMDC is failing in its Duty to cooperate: MM12: Removing the Gillow Heath Fields from the Green Belt and designating them as 'safeguarded sites' (MM12) for future development (especially BD062) is in direct conflict with the emerging Biddulph Neighbourhood Plan (consultation closing 4th November 2019) which has a more recent and detailed evidence base. This field has been designated as Greenspace following two rounds of local public consultation during 2019 due to existing biodiversity value and use for over 40 years for recreational amenity purposes. SMDC is failing in its Duty to cooperate: MM12 (in particular BD062) is in direct conflict with SMDC's own vision for Biddulph in the Local Plan 2018 Submission version which states: "The local community will help to shape the future of Biddulph with a Neighbourhood Plan" (pg36 <https://www.staffsmoorlands.gov.uk/localplan>). The SMDC Local Plan (Feb 2018 submission version) clearly recognises that Neighbourhood Plans may be used to "identify sites for development or protection". Removing the Gillow Heath Fields from the Green Belt and designating them as 'safeguarded sites' MM12 for future development (especially BD062 and BD087) is in direct conflict with Spatial Aims, Spatial Objectives and Policies of the new SMDC Local Plan (February 2018). I will now detail each of the aforementioned issues in turn: 1. The 2014 Phase 1 Ecological Survey evidence base is being ignored. The plan is not sound. SMDC stated (2016): "The Council has recently completed a Phase 1 Ecological Survey of the sites assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process" (https://www.staffsmoorlands.gov.uk/media/3375/Council-Assembly--Preferred-Options-Sites--Boundaries-Consultation-2016/pdf/33.2_Appendix_1_-_Towns.pdf) There is no evidence within the Local Plan (for development sites and for safeguarded sites in the Biddulph area) that SMDC have taken the detailed ecological evidence into account. There is no evidence that any reduction in density proposed on these sites has been agreed to reflect the current situation. No strategic effort has been applied to the local plan to ensure net gain for biodiversity and the environment. The guidance (<https://www.gov.uk/guidance/natural-environment#biodiversity-geodiversity-and-ecosystems>). The information from the Phase 1 Ecological Surveys was totally absent from the discussion within the Planning Officer's recommendation to Members on 26th June 2019 (Reports Pack 260620 19 1830 Council Assembly) which removed fields from Green Belt in Gillow Heath. Only evidence from the Phase 1 Ecological Survey, Landscape Sensitivity, Heritage impact and Agricultural classification was included alongside other ecological criteria (Options Assessment Tables list pg.30). This totally disregards any value that semi-natural habitats provide for biodiversity and natural flood management purposes. Omitting this vital evidence base illustrates that SMDC have not embedded consideration of biodiversity as an integral part of policy and decision making (<https://www.gov.uk/guidance/natural-environment#biodiversity-geodiversity-and-ecosystems>).

and have failed in their duty under the Natural Environment and Rural Communities Act 2006. With regard to the 'S Gillow Heath, The Council Assembly report (26th June 2019 Public Reports Pack 260620 19 1830) makes it very clear for future development purposes as the NPPF is clearly quoted within the SMDC report: "where necessary, identify in 'safeguarded land' between the urban area and the Green Belt, in order to meet longer-term development needs for the plan period (NPPF para.85 2012);" (Options Assessment Tables list pg.32). Due to this, the same level of consideration to 'safeguarded' land as to any land being considered for development allocation within the current local plan period is considered on an individual basis. Ranking and considering sites as a group is a major flaw of the process involved in the Council Assembly on 26th June 2019. Examples include suggesting that all sites are within 800m of the town centre, are not, that flooding may affect all sites or that the sewage works will affect all sites. This clearly is not the case and decision makers should see the issues which affect land on a site by site basis. Sites of particular concern based on SMDC ecological Site BD062: land off York Close / Essex Drive. The SMDC Local Plan Phase 1 Habitat Survey concluded "...the site is suitable for potential development..."¹ and that the site is "...very well connected to other biodiverse habitats through hedgerow woodland and running water which accentuates the value of the site." Site FID122: (<https://www.staffsmoorlands.gov.uk/article/1368/Ecological-studies>). The site is a wet meadow/grassland and plays a key role in flood management in a key position at the bottom of the valley. It lies within the species rich farmland zone (Stafford Biodiversity Opportunities Map) and has been mapped as part of a major Wildlife Corridor by SMDC as part of the Local Plan. It has also been mapped as a wildlife corridor by external consultants providing the evidence base for the Biddulph Neighbourhood Plan (<https://biddulph.co.uk/neighbourhood-plan/>). Its strength is not only in its rich flora and fauna, but in its position connecting the Biddulph Valley Way to the stream network. It is the only semi-natural site which provides this function in the valley by the A527. Mature trees and hedgerows need protection and built into the design for the site.

2. Local Wildlife Site incorrectly carried out. The methodology is not sound. The sites were assessed by Ecus in 2017 using a combination of Phase 1 Habitat survey results (September and October 2014) and desk-based data search results according to the methodology. In order to consider a site suitable for designation as a Local Wildlife Site, a desk-based exercise is not adequate. A field visit at the appropriate time of year for the habitat(s) involved. For meadow/grassland habitats September / October is too late for meadow plants to be visible and multiple seasonal surveys may be required. The data Ecus have used originates from October 2014 habitat surveys. The data is 5 years old and, for meadow/grassland habitats, gathered at the wrong time of site visits have taken place, so any other data sources will also be out of date. The method Ecus have used to determine a suitable candidate for LWS designation has not been fit for purpose. No sites have been brought forward to the Local Plan for consideration. The recently updated National Guidance on the Natural Environment (MHCLG, July 2019), which is implementing policy to protect and enhance the natural environment, including local requirements states: "National guidance to identify and map these sites, and to include policies that not only secure their protection from harm or loss but also their connection to wider ecological networks." Paragraph: 013 Reference ID: 8-013-20190721 (<https://www.gov.uk/guidance/natural-environment#biodiversity-geodiversity-and-ecosystems>)

3. Habitat mapping within the Local Plan is based on a major lack of data with regards to ecological information in the Biddulph Parish, and data indicates that less than 10% of the natural landscape had been appropriately mapped in 2017 which indicates a severe lack of information on the value of the natural landscape within the Biddulph parish. This puts habitats at a distinct disadvantage in the Biddulph Parish compared to elsewhere in the District where more of the land has been appropriately surveyed and ecological networks are being established. The emerging Biddulph Neighbourhood Plan has worked with external consultants to start to rectify this, providing a map and information to which the SMDC local plan should be referring - available on the town council website: (<https://biddulph.co.uk/neighbourhood-plan/>). This includes a Nature Recovery Network map, Wildlife Corridor map and a Map for the Biddulph Neighbourhood Area. National Guidance on the Natural Environment, states "Planning authorities and other planning bodies can work collaboratively with other partners, including Local Nature Partnerships, to develop and deliver policies to protecting and improving the natural environment based on local priorities and evidence." (<https://www.gov.uk/guidance/natural-environment#biodiversity-geodiversity-and-ecosystems>) This is the approach the emerging Neighbourhood Plan is taking, but SMDC are not paying any heed to the information contained within this emerging Local Plan (Regulation 14 consultation closes on 4th November 2019). SMDC are failing in their Duty to Cooperate. (<https://biddulph.co.uk/neighbourhood-plan/>).

4. Conflict with the emerging Biddulph Parish Neighbourhood Plan. The Local Plan, (REG14 consultation closes 4th November 2019), has been created in general conformity with the local plan. However, the recent decision by SMDC to remove fields from the greenbelt into a 'safeguarded' category for some areas of Local Greenspace has caused conflict. The Neighbourhood Plan has built on the evidence base used in the local plan and the maps created by the SMDC Green Infrastructure Strategy (Map 7.5 – Ecological corridors in and around the Biddulph Parish (https://www.staffsmoorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10_SMDC_Green_Infrastructure_Strategy.pdf). These are described as 'Strategic Corridors' in the SMDC Local Plan submission version 2018 Section 8.114 (<https://www.staffsmoorlands.gov.uk/article/774/The-Local-Plan-2016-2031>). The Neighbourhood Plan employed evidence to build on these corridors firstly by mapping the habitats, and secondly by mapping the ecological corridors in more detail across the Parish (<https://biddulph.co.uk/neighbourhood-plan/>). These maps clearly indicate a number of strategic ecological corridors, including a key semi-natural site (BD062) where these corridors converge, providing the only safe site for biodiversity between the land corridor of the Biddulph Valley Way and the river corridor of the Biddulph Brook without crossing the

connecting to the ancient woodland and other biodiverse sites around the fringes of the Parish. BD062 provides a key area for adaptation due to the effects of climate change in the future. This is supported by Policy C3: SMDC Local Plan Submission (2018) (https://www.staffs Moorlands.gov.uk/article/774/The-Local-Plan-2016-2031) and Guidance on the Natural Environment (https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/424247/natural-environment-guidance-2016.pdf) evidence in identifying and mapping local ecological networks can include: areas identified by national or local plans for habitat enhancement or restoration, including those necessary to help biodiversity adapt to climate change or to help with the habitat shifts and species migrations arising from climate change" The mapping clearly places BD062 within the Green Belt habitat, in addition the whole of BD062 and part of BD068 are classed as having Medium Distinctiveness (requires a detailed assessment). The fields are situated within the Valley Wetlands Zone, play a key role in natural flood management, controlling levels of surface water and river flooding (see EA surface and river water flooding maps based on ST86SF postcode information.service.gov.uk/long-term-flood-risk/). The details of the emerging Biddulph Neighbourhood Plan were discussed as part of the screening process at the time the decision to 'safeguard' fields in Gillow Heath was taken by the SMDC Council (June 2019). The omission of, not only the findings of the Phase 1 Ecological surveys but, also this more recent and detailed information as part of the decision making at the SMDC Council Assembly on 26th June is not satisfactory and illustrates a failure in their Duty to Cooperate with Biddulph Town Council and in their Duty under the Natural Environment and Food Act 2006. The land needs to remain in the Green Belt, especially BD062 and BD087. 5. Conflict with SMDC Local Plan Submission (2018) the fields at Gillow Heath (and especially BD062 and BD087) should remain in the Green Belt. This is supported by the vision for both the District and for Biddulph, and the Spatial Aims, Spatial Objectives and Policies stated within the SMDC Local Plan submission version 2018. Removing these fields from the Green Belt to be classified as 'Safeguarded' sites is in direct conflict with statements made in the emerging SMDC local plan (2018 submission version) as illustrated below: The vision for the District in the Local Plan Submission version (2018) clearly states: "...net gains and improvements to biodiversity will be made and the District will develop in a way that acknowledges their historic and natural heritage, their unique setting and their green infrastructure. In particular the vision for Biddulph clearly states (pg.36): "The local community will help guide the development of Biddulph Neighbourhood Plan" and "Green infrastructure and open space will protect and enhance the environment" (pg.36). The SMDC Local Plan Submission states that Neighbourhood Plans may be used to "identify sites for development or protection" (submission version 2018. Section 8.109). Spatial Aims (SA4) and Objectives (SO2, SO8, SO9) are clearly stated (pg.40-41): To see Staffordshire Moorlands as a place to live, work and visit by: SA4: Maintaining a quality environment and special places SO2. To create a District which minimises its impact on the environment, helps to mitigate and adapt to the adverse effects of climate change and to protect natural resources. SO8. To promote local distinctiveness by means of good design and the conservation, protection and enhancement of environmental and cultural assets throughout the District. SO9. To conserve and improve the character and distinctive appearance of its landscape, heritage, biodiversity and geological resources. (pg.40 -41) The appropriate Policy (DC3) with regard to wet meadows/grasslands to flood is identified (pg.129-130); Policy DC 3: Landscape and settlement setting Supporting the implementation of natural flood management measures that will contribute towards delivering a reduction in local area flood risk and impacts of climate change and other multiple benefits (pg.129-130); The importance of Green Infrastructure alongside the need for a strategic approach (pg.137-138) Policy C 3: Green Infrastructure The Council will, through working with local communities, organisations, landowners and developers, develop an integrated network of high quality and managed green infrastructure that will: b) Link existing and potential sites of nature conservation value and historic landscape features and habitats, increase biodiversity, and increase tree cover where it is appropriate to the landscape; d) Mitigate the negative impacts of climate change and maximise potential climate change benefits including effective flood risk and waterways management; Section 8.109 This policy is supported by a 'Green Infrastructure Strategy' which will seek to create functional and interconnected green spaces, identify opportunities to provide additional green routes, consider how land can help to alleviate flood risk by providing storage areas at times of flooding, consider opportunities to adapt to climate change and importantly manage how new development should be designed and how it can contribute to the wider green infrastructure network. Section 8.110 will seek to produce net gains and enhance biodiversity having regard to the objectives and priorities for the various types of habitats within the Staffordshire Moorlands in the Staffordshire Biodiversity Action Plan. (this includes grassland and heathland within the species rich farmland zone) The importance of the Natural Environment is stated in Policy NE1 (pg.139-140) NE 1 Biodiversity and geological resources (pg.140-141) The biodiversity and geological resources of the District will be conserved and enhanced by positive management and strict control of development (and having regard to relevant policies): NE1.4. Expecting all development where possible seeks to deliver a net gain in biodiversity proportionate to the scale of the development. NE1.7. Protecting and enhancing habitats and species of principal importance for the conservation of the District in legislation, and recognising and implementing appropriate measures, including landscape-scale conservation management, of the fact that the distribution of habitats and species will be affected by climate change. NE1.9. Ensuring the provision of green infrastructure networks in line with Policy C3. Additional issues: Proximity to sewage works: BD062 and BD087 are adjacent to a sewage works. Residents who live on Essex Drive, York Close and Long Valley Road already suffer from odour and noise and have registered complaints to United Utilities and SMDC, especially since they learned of plans to build a sewer closer and were formed by council officials of the reporting process. Photographic and video evidence exists of repeated flooding into the brook at the end of Essex Drive (13/9/2016 and here as recently as 25/26th October 2019 (https://www.youtube.com/channel/UCL7dE1nO-J5Hsc5NZIF5cw) where pressure builds up inside the junction box especially following heavy rain. This also happened in August 2016, August 2019 and October 2019 - that we know of. This junction forms the point where pipes from the east and west sides of the valley come to

contaminates part of BD062 (proposed eastern site access) and sites downstream, including BD068 and BD087. T site by United Utilities occurred on Thursday 31 October 2019 . It is an ongoing and dangerous issue which will cor residential areas and BD062. People should not live any closer than the current housing provision and the field need buffer. Local residents should be listened to in this matter instead of repeatedly being ignored. Building adjacent to create even more of a statutory nuisance (noise, odour, sewage flooding) and an unhealthy neighbourhood. We do of developers who have interests in these fields that issues of odour and noise can be overcome through design as Council Planning Officers on 26th June 2019 in the meeting which led to these fields being put forward for 'Safegua (<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368 &Ver=4>) (ie. making a buildi change the situation outside or inside the home when windows and doors are open). Adding more houses and incr from built up areas will only make this situation worse. In addition to this, climate change increases the likelihood of rainfall events in this area which will compound this issue. Community access: The local community have had unfet for over 40 years - there has been total open access and the land has been used by local residents for events and w as 7th July 2019 (and repeatedly since) local residents organised a work party to clear the overgrown footpaths wh have been doing this for over 40 years. This land has been designated as Local Greenspace by the emerging Biddul (currently undergoing Regulation 14 consultation) as it was found to meet the criteria required (<https://biddulph.co.uk> Access roads: BD062: Neither the distributor road (Mow Lane) nor the feeder roads (Essex Drive and York Close) n standards for the Staffordshire County Council Residential Design Guide Policy. The roads are too narrow and the r small. There are two pinch points over bridges on Mow Lane to the east and west of the access to BD062, and a ne Mow Lane all of which reduce the feeder road to a single carriageway in at least 3 locations. There is no alternative Planning permission has been refused on highways grounds in the past and the situation has only got worse with ti pinch-point on Mow Lane. The actual distributor road width (Mow Lane) falls below the minimum required of distributor Design Guide. Within the Guide it is clarified that minimum acceptable local distributor roads width must be 6.7m; M therefore not meeting the minimum requirements (Residential Design Guide. Supplementary Planning Guidance or Residential Areas Staffordshire County and District Councils 2000). BD068 and BD087: The sites are accessible by which does not comply with county highway standards. Staffordshire County Council Highways have indicated to th existing road is unsatisfactory and required them to create a new access point to the site with a bridge across the Bi BD062 (land at end of York Close / Essex Drive) suffers from a high amount of surface water flooding. It is classed : (evidenced by certain marsh flora) and plays an important role in slowing down rainwater flowing into the Biddulph management). This field drains part of the Biddulph Valley way as evidenced by the Environment Agency flood map (<https://flood-warning-information.service.gov.uk/long-term-flood-risk/map>). The proposed eastern site access of Esse The field should remain as semi-natural habitat and its' role in natural flood management enhanced. Both BD087 a from fluvial flooding, often contaminated from the issue of raw sewage flooding at the end of Essex Drive. Please n Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation r taken of any potential surface water issues. The Government has stated that Flood Plains should be avoided when c Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other are through downstream need to have their input. In order for the local plan to be sound, BD062 needs to be retained v biodiversity protected and enhanced and the field allowed to flood (MM12) along with BD068 and BD087.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to state how the modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested modification in question (if applicable). Please be as precise as possible.

In order for the local plan to be sound, BD062 needs to be retained within the Greenbelt, the biodiversity protected field allowed to flood (MM12) along with BD068 and BD087.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the suggested modification, as there will not normally be a subsequent opportunity to make further representations beyond the current representation during the examination. After the current consultation on modifications, further submissions will be only at the discretion of the Inspector based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem it necessary.

Yes

Version 0.3

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM12, MM21, MM39

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant	.	No
Sound - Positively prepared	.	No
Sound - Justified	.	No
Sound - Effective	.	No
Sound - Consistent with national policy	.	No
Complies with the Duty to co-operate	.	No

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Wharf Road Site Issues with the Consultation Process: The three options for the Wharf Road Site Masterplan have been prepared without consultation with the public or Biddulph's elected Town Councillors. Staffordshire Moorlands District Council officials have then taken it upon themselves to select their preferred option for developing the Wharf Road site without any public consultation. They have stated in paperwork dated 25 September for the "Service Delivery Overview & Scrutiny Panel" that "due to the Local Plan examination process we were unable to carry out the public consultation and event". This position is unacceptable for a site which will contain 588 houses over a 25 hectare, that adjoins Biddulph's Town Centre. The Wharf Road Masterplan the public is asked to comment on does not accurately reflect the revised housing densities at the Wharf Road Site, following the Staffordshire Moorlands District Council meeting held 26 June 2019. There was three months between the meeting and the consultation process commencing, therefore consultation process should have included up to date documentation. Sports Provision: The sports provision for the Wharf Road Masterplan is significantly less than the existing provision and this decision has been reached without consultation with the public or representatives from the school. Site Access: Site access as indicated in the plan is to be via Wharf Road, however, this is already inadequate for the existing users of this access, with limited scope to improve the width of the road. Therefore, the road that was constructed as part of the Biddulph inner relief road for access to retail provision, should be used for accessing any houses that are to be constructed on the site. Issues with Ownership: It is also quite clear that the fragmented ownership of this site (14 owners) will lead to delays in its development, therefore, it is essential that Staffordshire Moorlands District Council revisits this Masterplan to ensure a plan is developed that meets the needs of Biddulph's residents. With priority given to retail near the town centre to support the centre's regeneration. Provision of Retail Space: The inclusion of a retail offering at the southern end of the site is contrary to SMDC Local Plan policy TCR1, the policy is on page 118 and comes within MM24. Policy TCR1 states in section two that: "Support positive measures and proposals which enhance and regenerate the shopping and town centre environment and promote their tourism potential". The inclusion of a retail offering outside of the town centre is contrary to this policy, placing the retail offering at the southern end of the site achieves the exact opposite. Policy TCR1 contains within section 4 the following wording "Ensuring new development is well related to pedestrian shopping routes". Inclusion therefore of a supermarket at Knypersley rather than adjoining Biddulph's Town Centre, will result in the site Masterplan been contrary to the Local Plan and development of the town centre. Policy TCR1 contains within section 6 the following wording "Setting out design principles to improve and enhance the distinctive heritage of the town centres including high quality public spaces as well as minimising the risk of crime and considering the needs of disabled people". Therefore, placing a retail offering on the Meadows school site is inappropriate. The decision must be reconsidered with a site nearer to the town centre selected, as appears in options one and two for the site which would not put to public consultation. SMDC Local Plan Policy TCR3 which covers "Retailing and other Town Centre uses outside Town Centres" is clear that developments that are not in the town centre should where possible "Preference will be given to town centre and then edge of centre sites." This policy therefore reinforces my view that the retail offering on the Meadows school site is inappropriate. MM25 for policy TCR3 be amended so that all sites as part of the Local Plan should be compliant with the policy. MM39 for Policy DSB1 on page 158: The amendments to policy SS6 with the principal outcome of "Enable the sustainable development of Biddulph and enhance its role as a principal service centre and market town", "protect and enhance the special character and heritage of Biddulph" and "support of the delivery of complementary regeneration an infrastructure projects", is deeply concerning. The amendments include the removal of the term "starter homes" and the inclusion of sites at Gillow Heath as "safeguarded land", do not represent the future needs of the town. Conclusion: The preferred site option for the Masterplan should only have been selected following a public consultation and the reference to Biddulph's Neighbourhood Plan. A public consultation must now take place.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Conclusion: The preferred site option for the Masterplan should only have been selected following a public consultation and the reference to Biddulph's Neighbourhood Plan. A public consultation must now take place.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

- The three options for the Wharf Road Site Masterplan have been prepared without consultation with the public or Biddulph's elected Town Councillors. - The sports provision for the Wharf Road Masterplan is significantly less than the existing provision. - Proposed access in masterplan is inadequate. - Number of landowners will lead to delays in its development. - Retail should be nearer to town centre. - A public consultation must now take place.

Officer Response

The principle of development on this site has been accepted. The main modifications consultation simply addresses detailed amendments to the policy. It refers to the increased number of houses which can be accommodated on the site as a result of masterplan work and states that layout details (e.g. position of retail, sports pitches, access) will be determined as part of the masterplan. Consequently the Local Plan allocation does not cover the detailed layout of the site. The masterplan is a separate document from the Local Plan. In any case before the site could be developed it would need planning permission and residents plus the Town Council would then have the opportunity to raise any concerns they have about the detailed layout of the scheme which could differ from the masterplan.

Recommendation

No change.

MM/document reference

MM12, MM39, MM41

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant	.	No
Sound - Positively prepared	.	No
Sound - Justified	.	No
Sound - Effective	.	No
Sound - Consistent with national policy	.	No
Complies with the Duty to co-operate	.	No

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Tunstall Road Site Master Plan Consultation: The public consultation event held on Tuesday 5th February 2019 at Knypersley cricket club was in my view inadequate and does not comply with the Duty to Cooperate. The public were not adequately informed prior to the consultation event taking place. The residents of Victorian Row which overlooks/adjoins the site have publicly stated that they were not informed in advance of the consultation event taking place and have stated that they did not receive leaflets in the leaflet drop before the consultation event. Some residents were only informed on the day of the event by a local councillor knocking on their doors. The consultation event at Knypersley cricket club consisted of three pre-printed banners showing three options for the site and they spokesperson representing Staffordshire Moorlands District Council. The three site options had been prepared without any input from local residents, the wider community or from Biddulph Town Councillors. The proposals included improvements to Victoria Row to provide site access, however, this is privately owned land as the road has never been adopted by Staffordshire County Council. Therefore, options including this were never viable and further site layout alternatives should have been considered and offered for public consultation. After complaints by residents, Staffordshire Moorlands District Council assured them that a further public consultation event would be held for the development of the site. This consultation has not taken place despite repeated requests by Biddulph's Town Councillors to Staffordshire Moorlands District Council. One of the options presented at the consultation has now been taken forward and developed into the Tunstall Road Site Master Plan, without any of public responses from the consultation event been published or further public input.

Accuracy of Documentation Used for Consultation: The Tunstall Road Masterplan documents used as part of the main modification's consultation running through September to October 2019, uses documents and maps that were prepared before the council meeting on 26th June 2019 where it was decided that housing densities would be increased. Therefore, the public are asked to consult on a suggested Masterplan that does not accurately represent the plans of Staffordshire Moorlands District Council.

Site Layout: The Master Plan proposed for the site at Tunstall Road has a mixture of housing and large industrial units. It would seem logical and fair that these industrial units were placed in such a way as to minimise their impact on the existing local residents on Victoria Row. However, the preferred site option actually places these units directly outside the front doors of the properties on Victoria Row which in my view is unacceptable. The plan does suggest some effort to screen the industrial units from the residents of Victoria Row, however, it is unfeasible that such screening would alleviate the impact of the industrial units on Victoria Row or the proposed additional housing. Some of these concerns should have been addressed by Policy DSB3, however, "provision of a landscape and plan" has been removed as one of the modifications. In addition to the visual impact for local residents, we expect that such units will be operational at all hours of the day and have a detrimental impact on the resident's quality of life due to ongoing operations and associated noise. As a Biddulph Town Councillor, if this site is to be developed, I would urge that consideration is given to where the industrial units are placed and that it be preferable that the housing included within the development is placed near the existing housing on Victoria Row rather than at the edges of the site.

Site Access: The Tunstall Road Site Masterplan proposes that access to all the housing within the scheme is via Mill Hays Road, this is already a heavily congested country lane that is used as a commuter shortcut in mornings and evenings. The addition of traffic from 105 to 120 further houses, depending on the final housing densities for the site would create further issues at the junction of Mill Hays Road / A527 / Childerplay Road which is already been identified as a critical road junction for Biddulph as part of the development of Biddulph's Neighbourhood Plan. Any housing development on the site must require improvements to Mill Hays Road as a precondition of the development.

Site Conditions: A serious concern is the failure to investigate the mining legacy of the Tunstall Road Site before proposing the site as the employment provision for the future needs of Biddulph. There are a number of historic mine workings on the site and mine shafts from the Victoria Colliery. These historic mining operations may seriously impact on or actually prevent the development of the site.

Environmental Impact: Since the site was identified as part of a Local Plan only one wildlife and habitat survey has been conducted. In September / October 2014 Lockwood Hall Associates conducted a survey on behalf of Staffordshire Moorlands District Council. This survey was primarily a desk-based exercise, with a further walkover survey conducted,

this appears to offer little detailed exploration of the site. Therefore, is inappropriate to finalise the Masterplan for the site without conducting further ecological studies on the site. This issue is further exacerbated by the fact that Biddulph's emerging Neighbourhood Plan makes use of a much more up to date evidence base that was prepared with the cooperation of Staffordshire Wildlife Trust. Conclusion: The development of this site is not consistent with the Biddulph Neighbourhood Plan, despite Staffordshire Moorlands District Council officials having been briefed on the Neighbourhood Plans content in February 2019, it would appear that Staffordshire Moorlands District Council are failing in their Duty to Cooperate.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Conclusion: The development of this site is not consistent with the Biddulph Neighbourhood Plan, despite Staffordshire Moorlands District Council officials having been briefed on the Neighbourhood Plans content in February 2019, it would appear that Staffordshire Moorlands District Council are failing in their Duty to Cooperate.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

- Inadequate public consultation. - Object to inclusion of improvements to Victoria Row in the document as it is privately owned. - Site layout not acceptable for local residents - visual impact, noise. - Impact on local highway network. - Failure to investigate mining legacy. - More work on ecology needed.

Officer Response

The principle of development on this site has been accepted. The main modifications consultation simply addresses detailed amendments to the policy. It refers to the increased number of houses which can be accommodated on the site as a result of masterplan work and states that layout details (e.g.

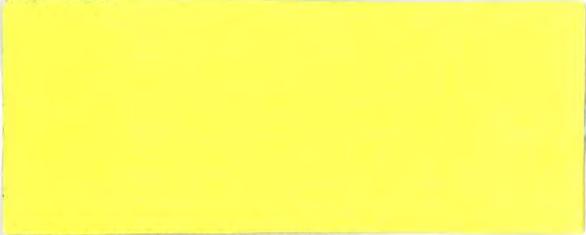

position of access, housing and employment uses) will be determined as part of the masterplan taking into account amenity impacts in relation to neighbouring land uses. Consequently the Local Plan allocation does not cover the detailed layout of the site. The masterplan is a separate document which was consulted upon separately from the Local Plan. In any case before the site could be developed it would need planning permission and residents plus Biddulph Town Council would then have the opportunity to raise any concerns they have about the detailed layout of the scheme which could differ from the masterplan. Mining legacy on the site has been investigated and does not deem the site undevelopable.

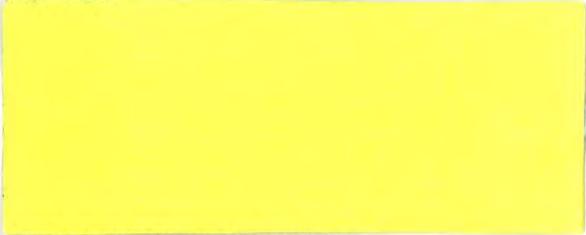

Recommendation

No change.

Legally compliant	.	No
Sound - Positively prepared	.	No
Sound - Justified	.	No
Sound - Effective	.	No
Sound - Consistent with national policy	.	No
Complies with the Duty to co-operate	.	No

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Haydon Park Local Green Spaces - Dorset Drive (West) and Dorset Drive (East) The Local Green Space sites at Haydon Park, which are referred to as Dorset Drive (West) and Dorset Drive (East), should both be designated as important Local Green Spaces and not be categorised as "Amenity Open Space", as per the latest modifications to the Local Plan. Biddulph's Neighbourhood Plan: These areas of land have already been identified by Biddulph's Neighbourhood Plan as important Local Green Spaces. They were both identified as important Green Spaces for the towns Neighbourhood Plan by local residents at public consultation events held at Biddulph Town Hall. The Biddulph Neighbourhood Plan is currently going through the Regulation 14 consultation process (Monday 23 September 2019 to Monday 4 November 2019) and contains policy NE3. Policy NE3 drafted as part of the Neighbourhood Plan, is as follows: "Local Green Spaces must remain as open space and their community value must be maintained or enhanced. Development proposals adjacent to or affecting Local Green Spaces will be supported only where there is no significant adverse impact on the community value or open character of the space." Criteria for designation within the Neighbourhood Plan are as follows: Paragraph 90 of the National Planning Policy framework 2018 states: "The designation of land as Local Green Space through the Local and Neighbourhood Plans allows communities to identify and protect green areas of particular importance to them". The criteria for designating Local Green Space in Neighbourhood Plans is set out in Paragraph 100 of the NPPF (February 2019): a) in reasonably close proximity to the community it serves; b) demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife; and c) local in character and is not an extensive tract of land'. Public Benefit: The two areas of land at Dorset Drive have benefited the local community since the houses were constructed in the 1970s, they provided public benefit as recreation and amenity areas, and are important wildlife corridors for Biddulph. Biddulph Valley Way: We consider it essential that the Dorset Drive (West) is protected as it also fronts the Biddulph Valley Way which is an important wildlife corridor through Biddulph Valley and also a National Cycle Route 55. As per the SMDC Local Plan Policy DSB1 section 9.45: "This site borders the Biddulph Strategic Corridor, comprising the Biddulph Valley Way. The GIS aims to protect and improve the Biddulph Valley Way as an established greenway through the settlement, to increase its use and enjoyment by people for health and recreation and to enhance its function as a wildlife corridor. Development of this area should positively contribute to this aim including the provision of pedestrian and cycling linkages from the site to the BVW and investigation of opportunities to reduce habitat fragmentation and increase connectivity by helping to create and improve wildlife corridors extending into the surrounding countryside". Flooding Issues: In late July 2019 there was a severe weather event in Biddulph, as a result four houses at the junction of Dorset Drive and Station Road were flooded and rendered uninhabitable. There have been a number of flooding events in this area in recent years and along with national concerns regarding climate change we anticipate such events will become more common in future. The issue is that the site at Dorset Drive (East) has the Biddulph Brook running through it, which is a main tributary to the Mersey basin, this area needs to be kept undeveloped as a public Green Space to alleviate flooding risks for the town. Environment Agency: Further to this, on Tuesday 15 October 2019 I attended a site visit with fellow Biddulph Town Councillors and representatives from the Environment Agency at the Dorset Drive (East) site. Please note that this stretch of the Biddulph Brook comes under the management of the Environment Agency as part of the Mersey Basin. The site visit was part of planning for flood prevention works on the Dorset Drive (East) site, which includes the construction of leaky dams to reduce the flow of water down the Biddulph Brook at times of heavy flooding. As such the site at Dorset Drive (East) can never be developed as it was underwater in July 2019 and in future will be underwater again if the planned leaky dams are constructed on the site. Staffordshire Moorlands District Council have been fully aware of these proposals since August 2019. Under no circumstances should the sites at Dorset Drive be developed in any way. Modifications to policy DC4 on page 131 of the Local Plan with Biddulph maps under MM56 and MM73 page 284/5, which covers local greenspace designations with policies and maps listed in appendix 10 are therefore inappropriate. Conclusion: The local plan MUST include Dorset Drive (West) and Dorset Drive (East) as Local Green Spaces. Additionally, within MM73 the list of Local Green Spaces for Biddulph should also be extended to include the following

locations: Mill Hays Sports Ground Church Road Playing Fields / Recreation Ground Biddulph Moor
Recreation Ground Biddulph Bowling Club Biddulph Grange Country Park Knypersley Pool Country
Park

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Conclusion: The local plan MUST include Dorset Drive (West) and Dorset Drive (East) as Local Green Spaces. Additionally, within MM73 the list of Local Green Spaces for Biddulph should also be extended to include the following locations: Mill Hays Sports Ground Church Road Playing Fields / Recreation Ground Biddulph Moor Recreation Ground Biddulph Bowling Club Biddulph Grange Country Park Knypersley Pool Country Park

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

Object to deletion of Dorset Drive East and West as LGS. Concerned that this will put them under the threat of development and impact on flooding problems in the town. Other areas proposed for designation as LGS in the Neighbourhood Plan have not been included in the Local Plan.

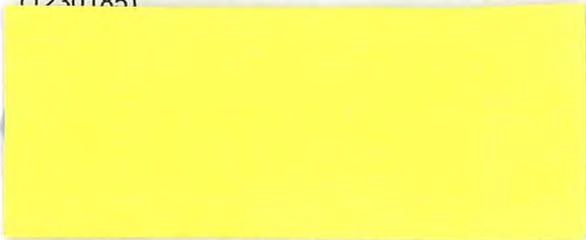

Officer Response

Refer to Inspector's Post Hearing Advice – Main Modifications and Related Matters – paras. 32 & 33. (EL6.004) and subsequent Inspector's letter (EL6.008). On the basis of the Inspector's recommendations the Council agreed main modifications to delete the Dorset Drive East and West Local Green Space (LGS) at the Council Assembly meeting on 26th June 2019. The green space at Dorset Drive is still designated as open space which offers protection under Local Plan Policy C2 (see MM31).

Recommendation

No change.

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM73

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant

Sound - Positively prepared

Sound - Justified No

Sound - Effective No

Sound - Consistent with national policy

Complies with the Duty to co-operate

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Dorset Drive East and Dorset Drive West are important Local Green Spaces and should be listed as such in the Staffordshire Moorlands District Council Local Plan. Paras. 99-101 of the National Planning Policy Framework allows for the designation of Local Green Spaces, and the proposed designations clearly meet with the criteria. Therefore, they should not be removed from the Local Plan.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Maintain Dorset Drive East and Dorset Drive West as Local Green Spaces as recommended in the Neighbourhood Plan

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

Object to deletion of Dorset Drive East and West as LGS.

Officer Response

See officer response to MMC107.

Recommendation

No change.

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant

Sound - Positively prepared	.	No
Sound - Justified	.	No
Sound - Effective	.	No
Sound - Consistent with national policy	.	No
Complies with the Duty to co-operate	.	No

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Please find below my comments on the Main Modifications to the SMDC Local Plan, MM12. Safeguarding of fields in Gillow Heath. I notice that SMDC omitted part of your evidence base when you made decisions about these sites on 26th June 2019 at the Council Assembly. SMDC omitted the ecological evidence base and also incorrectly stated that these fields are urban / industrial land, which is incorrect. The decision to safeguard fields in Gillow Heath needs reconsidering both in light of your errors and in light of the evidence contained within the emerging Biddulph Neighbourhood Plan (Regulation 14 closing date 4th November 2019). The SMDC Main Modifications are not Sound and do not Comply with the Duty to Cooperate.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Sites BD062, BD068 and BD087, should remain as Green Belt land.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

Recommendation

See MMC256.

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How can you help?

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the [Local Plan website](#) and in the [Statement of Representations Procedure Document](#) on the SMDC website.

If you would prefer to make a representation by yourself please email forward.plans@staffs Moorlands.gov.uk or by post to Freepost RRLJ-XCTC-JBZK, Forward Plans, Staffordshire Moorlands District Council, Regeneration Services, Moorlands House, Stockwell Street, Leek, ST13 6HQ. **Please make sure you include your name and address.**

For more information visit www.cheddletonresidents.org

Mary Mellor

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment

I would like the Ox Pastures fields West and East referenced 29 and 30 to be protected with LGS designation and for this beautiful part of Cheddleton village to be preserved for future generations.

As an older and very deaf resident of Cheddleton I particularly value the safety of being able to walk along the path known as The Gully. It allows me to exercise with my dog independently and the flat path with no traffic to worry about makes this possible. The views are outstanding and I love seeing all the little birds popping in and out of the hedgerow. This walk is invaluable to me for the health benefits and an essential route for me to access village amenities. The fields are in effect the same as green belt helping to retain the character and setting of the historic village centre.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be built along the river bank. The access road onto BD 087 is on the narrow side of the river bank approximately 10M wide. I believe that an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land. I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (please select all that apply)

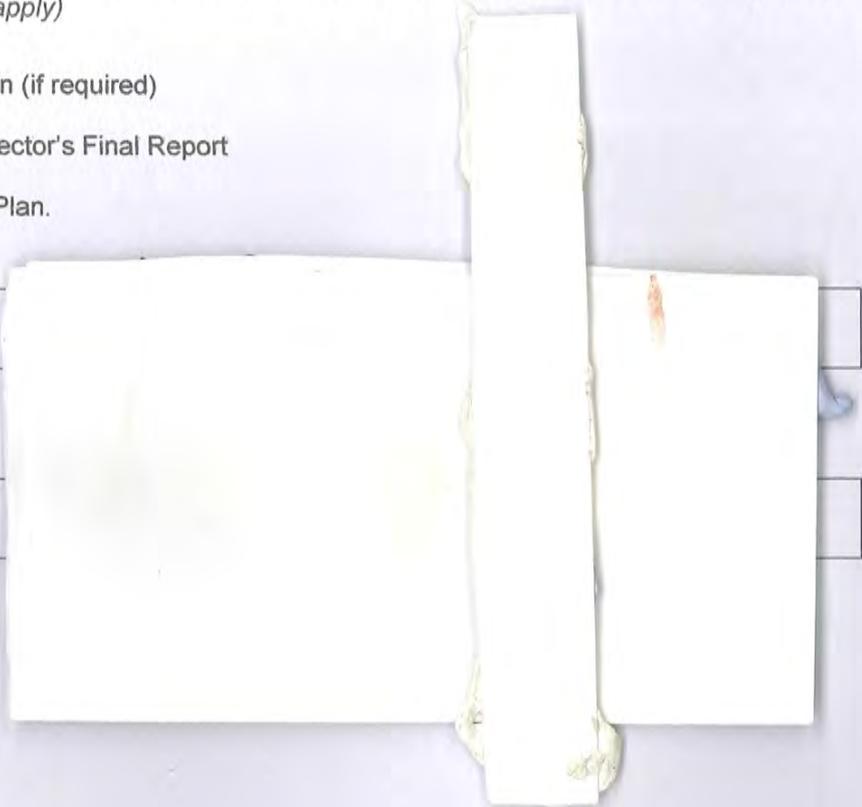

Further hearing session (if required)

Publication of the Inspector's Final Report

Adoption of the Local Plan.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Buy in is key to developing any plan – there is no buy into this plan by any of the people in Biddulph – this cannot be dressed up. No due process has been followed. To push this modified local plan through at break neck speed can only lead to an expensive legal outcome. SMDC has had 8 years to get this local plan right, this Modified Local Plan has taken 3 months from 26th June, no public face to face consultation, and a hurried last minute consultation period with almost no one informed. Only the Site Owners have been kept up to date. Why!

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

Tunstall Road Masterplan Executive Summary

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

- | | | |
|--|---|-----|
| Legally compliant | . | Yes |
| Sound - Positively prepared | . | No |
| Sound - Justified | . | No |
| Sound - Effective | . | No |
| Sound - Consistent with national policy | . | No |
| Complies with the Duty to co-operate | . | No |

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Within the executive summary it is claimed that prior to an information event at Knypersley Sports Club about the proposals, leaflets announcing this were distributed within 1 mile. It is, however, my understanding that Victoria Row residents did not receive these leaflets. Some were made aware of the event by friends who lived nearby. Others were not aware of it at all. I find this extremely concerning and contrary to the Council's Statement of Community Involvement. Victoria Row residents would be the ones most severely affected by the proposed development and therefore it is imperative to get a clear perspective of their views if policy is to be adhered to. It is disappointing to find that in each proposed option in the Masterplan, Victoria Row is hemmed in by industrial units and housing on all sides. It is a setting of great local character, which years ago benefited from surrounding open green space. How sad that little by little this has been removed- but the proposed new development will surely destroy any of its remaining beauty, not to mention the habitat of local wildlife, such as bats which live in the trees surrounding the site and are protected species. Can I please refer to MM41 page 164 Policy DSB3, where it states that 'it is important that the development of this site achieves sufficient levels of amenity for new and existing housing'. As far as I can see from the Masterplan options, Victoria Row residents have not been given any consideration. Whilst they can currently enjoy open green views to the south, none of the proposed options allow for any views, whilst the proposed new housing will be able to enjoy green views on at least one side. In fact, each option proposes to build a number of industrial units immediately in front of Victoria Row residents' windows. I feel very strongly that this would severely affect the quality of life of these residents and is thus contrary to the Sustainability Objective 'To improve the quality of life where people live'. Looking at all options of the Masterplan, it seems likely that both the back and front roads of Victoria Row would be used for pedestrians to access the proposed new housing beyond it. I suggest that, given the unusual set-up of Victoria Row in that garages and gardens are set apart from the main properties across the back road, this has the potential to make the area more vulnerable to crime and again is contrary to the Sustainability Objective 'To minimise opportunities of crime and reduce the fear of crime'. The Executive Summary of the Masterplan stipulates that a meeting of landowners needs to take place to confirm their willingness to work with the council. I fail to understand how a proposal can be considered to be sound and positively prepared if this has not already been carried out. In addition, viability concerns for the industrial units in particular are raised and I therefore feel the plan is neither justified, nor effective. It raises the question- 'Is it really worth it?' Moving on to the bigger picture and how the proposed Masterplan would affect Biddulph as a whole. The housing quota for Option 3 of the site itself is 105, whilst further housing is planned in other sites. I cannot imagine how the doctors surgery, which is already struggling with its demand is going to cope with the extra influx of population. It is very difficult to get appointments at the present time. Unless there is some planning for this, this is contrary to the Sustainability objective 'To improve health and reduce health inequalities'. Finally, may I just say that I have found the methods stipulated to make comments for this consultation far from inclusive. Filling in a form such as this may discourage some from making their views known and it should be possible to submit opinions without this.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

I feel the information meeting held at Knypersley Sports Club should be repeated with the inclusion of all Victoria Row residents to ensure the Plan is justified and consistent with national policy. I feel Victoria Row residents are being treated appallingly with the proposal of a mixed site which surrounds their homes. I strongly object to this, especially the industrial unit element. I therefore feel that the extent of this should be reviewed, especially in light of the viability issues, in order for the Plan to be sound and justified. Alternatives, such as the expansion of the already existing Victoria Business Park should

be explored further. Issues, such as the increased vulnerability for crime the proposed development may create, need to be taken into account in order to make the Plan positively prepared. In addition, planning and consideration for healthcare access for a larger population needs to be addressed in order to make the Plan positively prepared and effective.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

Object to inadequate consultation, masterplan layout, impact on wildlife / beauty of area, lack of residential amenity for residents of Victoria Row, lack of infrastructure (e.g. doctors surgeries), viability, number of landowners involved, difficult for some people to respond to consultation due to form - consider that alternatives should be explored.

Officer Response

Refer to officer response to MMC105.

Recommendation

No change.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

[REDACTED]

From: Carole Moors
Sent: Wednesday, October 30, 2019 6:47 PM
To: Forward Plans
Subject: Changing the status of the land at Mill Hayes Farm (Formerly: Childerplay farm) from green Belt to land available for development for industrial use

Follow Up Flag: Follow up
Flag Status: Flagged

The site is an area of importance ecologically_ home to many and varied species of plants and animals. The access to the site would be from the A527. This road is already busy at all times. Would have a serious affect upon the value of the property in the surrounding area.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice> .

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference 23

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	x
Sound - Positively prepared	<input type="checkbox"/>	x
Sound - Justified	<input type="checkbox"/>	x
Sound - Effective	<input type="checkbox"/>	x
Sound - Consistent with national policy	<input type="checkbox"/>	x
Complies with the Duty to co-operate	x	<input type="checkbox"/>

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

The modification seeks to show that of the 6 require Traveller pitches, 3 have been secured by the grant of planning permission at a site at Checkley. This is incorrect. The site at Checkley is a single family pitch with just 3 touring caravans and one amenity building. A traveller pitch is normally a site with one caravan for living in (often a static van) and at least one touring caravan and an amenity building. The site at Checkley does not constitute a 3-pitch site. It is a single pitch. Thus the unmet need for pitches is 5, not 3.

(Continue on a separate sheet / expand box if necessary)

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Acknowledge that there remains a shortfall of 5 pitches which needs to be met by “windfall” provision

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

Staffordshire Moorlands Local Plan Examination

MAIN MODIFICATIONS CONSULTATION - SEPTEMBER 2019

Representations Form

Guidance Notes

Please ensure that you have read the accompanying 'Statement of Representations Procedure' before completing this form.

The Local Plan Main Modifications Schedule and related documents, including; the Sustainability Appraisal of Main Modifications, Biddulph options assessment, Sustainability Appraisal of Alternative Development Options for Biddulph, Housing Implementation Strategy, Equalities Impact Assessment, Tunstall Road Masterplan Executive Summary and Wharf Road Masterplan Executive Summary can be viewed on the District Council's Main Modifications consultation webpage, Council offices and local libraries.

Website: <http://www.staffsmoorlands.gov.uk/localplan>

Council offices:

- Leek** Moorlands House, Stockwell Street, Leek, Staffordshire, ST13 6HQ (8.45am - 5.15pm Monday - Thursday and 8.45am - 4.45pm on Friday)
- Cheadle** Councils Connect, 15a-17 High Street, Cheadle, Staffordshire, ST10 1AA (9.00am - 12.30pm & 1.00pm - 5.00pm on Monday, Wednesday and Friday)
- Biddulph** Town Hall, High Street, Biddulph, Staffordshire, ST8 6AR (9.00am - 5.00pm Monday - Friday)

Please return this form by **5pm on 31 October 2019** to the email or postal address given below or by completing the online questionnaire at : <http://www.staffsmoorlands.gov.uk/localplan>

Email: forward.plans@staffsmoorlands.gov.uk

Post: Freepost RRLJ-XCTC-JBZK, Forward Plans, Staffordshire Moorlands District Council, Regeneration Services, Moorlands House, Stockwell Street, Leek, ST13 6HQ

Part A – Personal details and notifications

	Personal details	Agent's details (if applicable)
Title	Mrs	
First name	Jane	
Last name	Neumann	
Job title (if applicable)		
Organisation (if applicable)		
Address line 1		
Address line 2		
Address line 3		
Address line 4		
Post code		
Telephone number		
Email address		

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice> .

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference MM41- Removal Of Green Belt

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	✓	<input type="checkbox"/>
Sound - Positively prepared	✓	<input type="checkbox"/>
Sound - Justified	✓	<input type="checkbox"/>
Sound - Effective	✓	<input type="checkbox"/>
Sound - Consistent with national policy	✓	<input type="checkbox"/>
Complies with the Duty to co-operate	✓	<input type="checkbox"/>

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

(Continue on a separate sheet / expand box if necessary)

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Page 63 Policy for Biddulph Area Strategy Policy SS6

Strengthening and promoting links between the town and countryside in particular with the Biddulph Valley Way, Biddulph Grange Garden and the Country Parks this should also include housing for people to address Biddulph's and national government long term housing needs

Page 164 MM41- Removal Of Green Belt

The Council's Core Strategy acknowledges that some Green Belt release is necessary to enable sufficient growth requirement in Biddulph. The Submission Version Local Plan seeks to deliver Biddulph's housing and employment requirement whilst ensuring that Green Belt release is kept to a minimum and the best sites used.

Whilst this is important; as a mother of 2 daughters wishing to buy homes, the release of green belt in the NORTH area of Biddulph would be of a huge advantage as it already butts up to existing housing, and enables more houses in Biddulph to be built closer to the main line Manchester to London train station of Congleton. Already having sustainable transport modes in place, this also has convenient access from Biddulph Valley Way and an existing commutable service No 94 bus which takes 12 minutes from north Biddulph area. This would help to achieve climate targets in the long run with little impact on Biddulph.

For further growth in Biddulph accessing Biddulph Valley Way to the north of Biddulph in this area, would be a healthy way to improve and gain easy access to the wider commercial area, and also to the recreational facilities of Biddulph Grange Gardens and adjacent country park for the health and wellbeing of the public which is widely encouraged, therefore being accessible to amenities e.g. within 500 meters of bus stop and within 1 km of public park.

The area north of Biddulph has better facilities and services, it is a more sustainable location which would help towards the housing needs and should be included in the local plan. It provides the most convenient access to public transport such as buses and Congleton train station to access the cities of Manchester and London reducing commuting time rather than the south of Biddulph. There is also good access to Biddulph's urban drainage systems which are also located in the north of Biddulph and convenient educational facilities of Woodhouse Academy. This would help to achieve sustainable climate targets .

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

Date:

30th October 2019

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

From: David Nixon
Sent: 31 October 2019 08:09
To: Forward Plans
Subject: Representation on Main Modifications

Made by David Nixon. C Nixon & Partners

We consider the Plan still to be unsound and would also comment on some of the Main Modifications:-

We are very conscious of the likelihood that the council will be unable to achieve housing delivery sufficient to ensure a future 5 year housing land supply. We also note that the amount of employment land is to be increased from 27 hectares to 32 hectares. This will make further demands for new housing. There are also significant demographic trends which will lead to a very substantial increase in the numbers of older people within the population.

These particular changes in population structure including the special needs of an ageing population, and the need for affordable housing, are recognised in Policy H1 .

MM 49 recognises that the required housing delivery will be difficult without Green Belt release. However, the only commitment to review this is for Biddulph which is arguably the least representative of all the settlements due to its close relationship with the Newcastle/ Stoke on Trent conurbation. Development here is therefore less likely to address the new housing requirement across the whole area particularly for special needs.

This modification should therefore be expanded to include consideration of other settlements, particularly the larger villages whose role in the provision of affordable housing is highlighted in H2 8.59.

There should also be a specific link to DC 3

where the support for sympathetic and enhancing development is largely meaningless without a willingness to review settlement edges which all too often in the Plan are defined on a two dimensional basis which is unrelated to topography and the setting.

Without such modification, opportunities such as our own proposal on the northern edge of Forsbrook with its unique mix of housing of all types, new recreational space, enhanced biodiversity and a permanent settlement edge will not be encouraged.

We therefore ask the Inspector to consider these adjustments to the Plan and suggest that inclusion of our own site within the development strategy would be significant step to increasing the soundness of the Plan.

David Nixon. 30 October 2019

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

Elizabeth Nokes

Personally speaking I moved to my house in particular because of the two fields in question.

The green open spaces that sustain wildlife and provide some peace and stillness away from so many roads and cars. I chose to live here with open aspects to the East toward Coombes Valley and Morridge which is a peaceful view everyone on the public footpath between the field enjoys.

It feels so cruel that this could all be taken away to make a few people very rich to the detriment forever of the wildlife and general public. Please designate this a green open space and let the Developer do the community some good and develop a brownfield site. 2019-10-27

Hello

I write to oppose such developments as those at Victoria Row for the same reasons as described in the petition here.

<https://petition.parliament.uk/petitions/267197>

This is also in line with my objections to include Berryhill Fields (AKA Area 292) into the local plan for housing needs.

Short term aspirations of growth are miniscule and questionable in comparison to the loss of habitat and valued Green Space.

Best Regards
Steve Parker

Consultation scheduled for Spring 2020

Public consultation on the Draft Joint Local Plan has been slightly delayed until next spring and is being scheduled for a discussion at Stoke-on-Trent City Council and Newcastle-under-Lyme Borough Council cabinet meetings in February 2020.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please find below my comments on the Main Modifications to the SMDC Local Plan, MM12. Safeguarding of fields in Biddulph and Gillow Heath.

I notice that you omitted part of your evidence base when you made decisions about these sites on 26th June 2019 at the Council Assembly. You omitted the ecological evidence base and also incorrectly stated that these fields are urban / industrial land, which is incorrect.

The decision to safeguard fields in Biddulph and Gillow Heath needs reconsidering both in light of your errors and in light of the evidence contained within the emerging Biddulph Neighbourhood Plan (REG14 closing 4th November 2019).

The SMDC Main Modifications are not Sound and do not Comply with the Duty to Cooperate.

Thanks
Eloise

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph
 Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Dear Sir/Madam

**Staffordshire Moorlands District Council Local Plan
Main Modifications Consultation**

Thank you for providing Persimmon Homes (North West) Ltd [the Company] the opportunity to submit representations to Staffordshire Moorlands District Council's [the Council's] Local Plan Main Modifications consultation.

The submission of this representation follows the Company's attendance and participation in the Local Plan Examination in Public [EIP].

This representation is made to those proposed main modifications to the Submission Local Plan only and does not seek to make more general comments concerning the Local Plan. Should opportunity arise to make further comments on the Local Plan, the Company would be happy to provide any further comments to the Council.

Main Modification Comments

MM9 – para. 7.33 The Company supports MM9, which seeks to include a slippage allowance to existing commitments, this being factored into the Council's housing trajectory.

It is considered unlikely that all sites within the trajectory will be built at the rates envisaged and the Company considers that together with the Council's persistent failure to achieve its housing requirement, a slippage rate in excess of 10% is justified.

MM20 – para 108 – Policy H1 Housing and supporting text – The Company is generally supportive of Policy H1 (2) which encourages self-build homes in accordance with paragraph 61 of the National Planning Policy Framework, however is concerned that the Policy is ambiguous in not defining how many plots the Council will seek for self/custom build across the Plan period.

It is not considered that the Council have set out what demand for self-build homes has been identified within the Borough nor given full regard to the impacts on

scheme viability of providing such units or how these homes will integrate into a wider residential development

It is assumed extremely unlikely that those wishing to self-build will seek opportunities within a general market housing estate and will instead self-build on smaller and more modest plots, which will comprise exclusively of self or custom build houses.

Further, whilst the Company supports the Council's commitment to monitor the delivery of residential windfall sites and affordable housing to ensure that it is meeting expected levels, the Local Plan is not clear how it will seek to remedy any delivery issues that are identified.

MM21 – The Council will be aware that the Company has submitted a hybrid planning Policy H2 application seeking full planning consent for 125 homes and outline planning consent for up to 135 homes (total 260 homes) (SMD/2018/0180) on land referred as the Housing Allocations Cheadle North Strategic Development Area (CH001 and CH132).

It is considered that the approximate capacity within Policy H2 be reflected to support realistic delivery assumptions and housing trajectory.

MM42 – The Company is generally supportive of MM42 and Policy DSC1 however Policy DSC1 recommends the policy be updated to reflect the up to date situation surrounding the current planning application.
and supporting text

As addressed above, following revisions to the proposed Illustrative Masterplan to reflect comments from statutory consultees it is considered that the capacity of the Site is 260 homes. It is considered that the policy should be revised to 'at least 260 homes' to reflect this change whilst ensuring an element of flexibility for future planning applications.

It is considered that the second bullet point concerning the provision of land and access to the School Site be revised to '*Provision of land and appropriate access for a new County Primary School. Provision of the School Site will be secured via s106 agreement and timescale for its delivery agreed with the Education Authority.*'

Through the determination of the planning application, it has been advised that the Council are now longer seeking an area of 2ha to accommodate a new County Primary School and school/community playing pitches, and are instead seeking an area of 1ha to accommodate a new County Primary School with associated school playing fields – this should be reflected within Policy DSC1.

Further, the Company consider that the requirement for 'provision of two separate access points' is overly prescriptive and not supported by information contained within the Local Plan evidence base. Such matters are considered more appropriate for consideration as part of the planning application process and we would recommend a revision to this main modification to '*Provision of a suitable point(s) of access, supported by a detailed Transport Assessment.*'

Notwithstanding those comments made above to proposed Main Modifications, Paragraph 182 of the National Planning Policy Framework 2012 [the Framework] sets out that Plans are 'sound' if they are positively prepared, justified, effective and consistent with national policy.

Whilst not participating in the hearing sessions concerning housing need; the Company would raise that the Housing Trajectory contained within the Housing Implementation Strategy (July 2019) demonstrates that it is not expected there will be sufficient housing completions in the Borough across the Plan period to meet the housing requirement of 6,080 homes – showing an 271 homes under supply; the projected completions already factoring in a windfall allowance on both small and large sites throughout the Plan period. The projected completions throughout the plan period also assuming that all large sites with planning permission and Local Plan allocations will deliver their full projected capacity and fails to incorporate the 10% slippage allowance to the housing requirement or commitments as referred in MM9.

The Housing Implementation Strategy refers at Chapter 11 that existing housing commitments from unimplemented approvals will contribute significantly towards housing delivery, an accompanying table providing a list of sites with consent with a total capacity of circa 290 units; however, this again does not account for the 10% lapse rate defined within MM9.

On this basis, it is considered that the Local Plan is not positively prepared nor consistent with national policy, insofar as it does not *'seek to meet objectively assessed development requirements'*.

We trust that full consideration will be given to the comments made within this representation, prior to the adoption of the Local Plan.

Should any clarification or further information be required, please do not hesitate to contact me.

Yours faithfully

Sean McBride

Subject: Main Modifications Consultation

Comment on MM36, Page 153, Policy DSL2, Land at the Mount

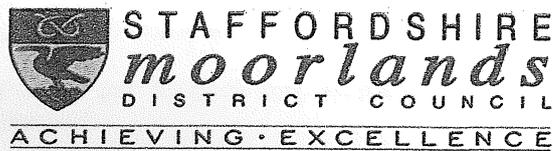

The inspector recommended *'Recognition of the recreational value of the Mount to the community and reflect this in master planning proposals through the sensitive treatment of Mount Road and Kniveden Lane, appropriately located green infrastructure, recognition of key views and connectivity to public rights of way.'*

To me the only way to provide more green infrastructure and recognise the importance of the key views is to reduce the number of houses being crammed into the sites by 10 perhaps 20%.

So instead of modifying the HIS document the planners have chosen to still continue with the draft document dated November 2018 showing a total of 345 dwellings instead of reducing the numbers to take account of the Inspectors comments.

It is very poor that you can ignore the Inspector's comments and just insert a paragraph that has no substance.

Regards
John Pigott

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffs Moorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph
 Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

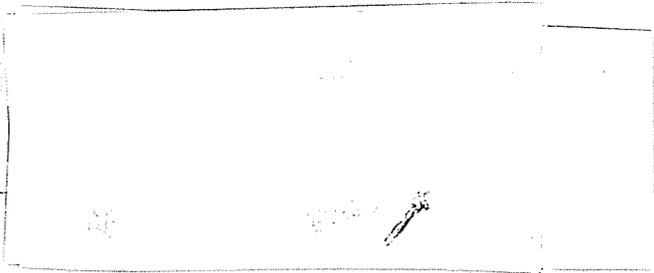

Comment:

Geoff Preston

The village desperately needs open spaces, lungs where people can breath clean air, and enjoy tranquillity and spaces where young and old can play and rest in safety.

Islands of open space are precious and need to be kept public lest we condemn our citizens to live in a featureless sprawl of housing. Expansion should be on brownfields sites. Some older property should be redeveloped to conform to new environmental standards.

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.
