Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

From: JILL PROFFITT
To: Forward Plans
Subject: SMDC main modifications 61&73
Date: 31 October 2019 14:28:13

Staffordshire Moorlands District Council CONSULTATION:

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West

Dear Sir,

Thank you for taking time to read my letter.

PLEASE PROTECT OUR GREEN AND PLEASANT LAND.....PLEASE DESIGNATE THE FIELDS from Ox Pasture East and West as LOCAL GREEN SPACE

I have lived in Cheddleton for over 40 years. Me and my family care and want to protect our local green spaces for current and future generations. The two fields either side of the gully have helped to form part of the character of Cheddleton and its historic areas. Let it continue to be a little piece of heaven offering a healthy environment and breathtaking views for wildlife and people from near and far.

Historically, currently and for the future....LOCAL GREEN SPACE -

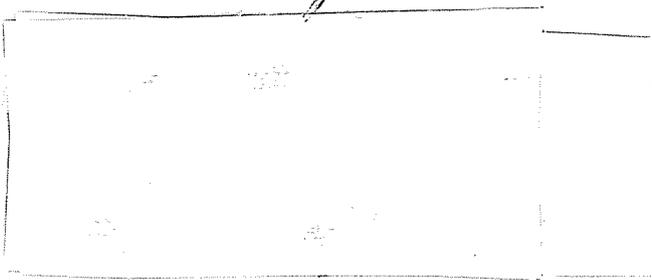

- Promotes mental and physical health
- Aids community wellbeing
- Provides a habitat for wildlife, enhances opportunities for wildlife habitats and wildlife corridors
- Decreases air pollution
- Improves air quality
- Decreases harmful noise
- Offers peace and tranquility

WHY WOULD ANYONE WISH TO REMOVE THE ABOVE FROM OUR LIVES?

I ask you againPLEASE PROTECT OUR GREEN AND PLEASANT LAND

Yours faithfully

Mrs. Jill Proffitt

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Dear Sir/Madam,

Response to the main modification consultation, Sept. 2019; MM56:

Issue 1: Sewage Works

BD062 and BD068 are both immediately adjacent to a sewage works. Residents who live on Essex Drive, York Close and Long Valley Road suffer from ad-hoc issues of odour and noise and have registered complaints to United Utilities and SMDC, especially since they learned of plans to build homes even closer. Photographic and video evidence exists of repeated raw sewage flooding into the brook at the end of Essex Drive (13/09/2016), where pressure builds up inside the junction chamber and the lid blows off, especially following heavy rain. This happened again in August and October 2019. This junction forms the point where pipes from the east and west sides of the valley come together. The raw sewage contaminates part of BD062 (proposed eastern side access) and sites downstream, including BD068 and BD087. This field needs to be kept as a natural buffer. Adding more houses and thus increasing surface run-off from built up areas will only make this situation worse.

Issue2: Bio-diversity

Key points:

The SMDC Phase 1 Ecological Survey evidence base is being ignored.

The Assessment for Local Wildlife Sites by Ecus (2017) was incorrectly carried out.

The ranking exercise which was used to inform SMDC Council Members and guide decision making at the SMDC Council Assembly on 26th June 2019 was missing the ecological part of the SMDC evidence base. The methodology is unsound.

Removing the Gillow Heath fields from the green belt and designating them as safeguarded sites for future development (especially BD062) is in direct conflict with the emerging Biddulph Neighbourhood plan, which has a more recent and detailed evidence base, which has designated BD062 as local green space. This had already passed through two public local consultations, which SMDC was well aware of.

Sites need to be considered on an individual basis. Ranking and considering sites as a group leads to misleading conclusions, which is evidenced in the report given to SMDC council members on 26th June 2019. Examples where this is misleading include suggesting that all sites are within 800 m of the town centre when they clearly are not at Gillow Heath. The Ranking method is unsound. The proposed eastern site access of Essex Drive is in a flood plain and should remain as semi-natural habitat and its role in natural flood management enhanced.

Issue 3: Community access

The local community have had unfettered access to this site since the estate was built. For over 40 years, there has been total open access and the land has been used by local residents for events and dog walking. As recently as 7th July 2019 and repeatedly since. This land has been designated Local Green space by the emerging Biddulph Neighbourhood Plan (currently undergoing REG 14 consultation) as it was found to meet the criteria required.

Issue4: Access Roads.

Neither the distributor road (Mow Lane) nor the feeder roads (York Close and Essex Drive) meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy. The roads are too narrow and the road bend radii too small. There are two pinch points over bridges on Mow Lane to the east and west of the access to BD062, and a new sewage pump on Mow Lane all of which reduce the feeder road to a single carriage way in at least 3 locations. There is no alternative access to BD062. Planning permission has been refused on highways grounds in the past and the situation has only got worse with the creation of the third pinch point on Mow Lane. The actual distributor road width (Mow Lane) falls below the minimum required of distributor roads by the Residential Design Guide, which is 6.7m wide. Mow Lane is 4.25m.

Issue 5: Flooding

BD062 (Land at end of York Close/Essex Drive) suffers from a high amount of surface flood water flooding. It is classed as wet meadow and plays an important role in slowing down rainwater flowing into Biddulph Brook(natural flood management) This field drains part of Biddulph valley way as evidenced by the Enviroment Agency flood maps.

Yours Faihfully.

K&B Rowland

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

Councillor Lisa Salt

The two fields are of significant meaning and value to the village and its community for a variety of reasons. At a time when environment and carbon emissions are a major issue it seems counter productive not to protect these areas.

As a village with limited infrastructure this area provides a tranquil and safe environment of natural beauty that I access on a daily basis. This area is particularly beneficial to my health and wellbeing due to the uplifting ambiance created by the views towards the church and surrounding countryside.

Public Health England have stated that "healthy places make people feel comfortable and at ease, increasing social interaction and reducing anti-social behaviour, isolation and stress" thereby affirming the necessity to protect these areas. 2019-10-31

Biddulph Modified Local Plan – Road Safety Issues

Dear Sir,

The cost of road widening, footpaths, street lighting etc to accommodate possible housing development on sites BD062, BD068 and BD087 would be astronomical. The amount of work involved would have a catastrophic effect on the surrounding area.

Some vital questions need to be answered here. Who would actually pay for this work? Has Staffordshire County Council stated it will fund the new road from Marsh Green Road to the sites? Why is all this upheaval so necessary for the sake of just a small number of houses on these sites?

Major road safety issues are involved. The ensuing traffic congestion just doesn't bear thinking about. It would create a nightmare scenario for existing residents in surrounding properties, pedestrians, and drivers passing through the area.

The access road and bridge over the river to BD068 and BD087 has been identified as Flood Risk Level 2/3. It is the only access road. So what happens if there is a flash flood? In order to build an adequate road to service the potential sites, a support wall will have to be built along the river bank. This idea is preposterous. The ground is actually marsh land, hence the road name, Marsh Green Road.

The road improvements would involve compulsory purchase of land and would need to be completed before any development took place.

It is my opinion that the SMDC needs to conduct an enquiry with all relevant bodies in order to compile a comprehensive report on the above issues and many other problems involved in the Modified Local Plan.

Yours faithfully,

[Redacted signature box]

Biddulph Modified Local Plan – Missing Information

Dear Sir,

I write to outline my deep concern about vital information missing from the SMDC's planning team report to a meeting in June this year.

It is clear the Modified Local Plan has been put forward with information that is potentially several years out of date. It is also obvious that all other sites in the Biddulph area were not considered before BD062, B068 and B087 were reintroduced into the plan.

Four years ago, the Environmental Agency told the authority that all other potential development areas should be considered before looking at the above sites. The above named sites were originally excluded during the first consultation rounds in 2016.

Biddulph Town Council voted to exclude the three sites from the Local Plan in 2015.

In the same year, a Green Belt report instigated by the SMDC stated that the sites should only be considered under "exceptional circumstances". A pertinent question here. Why has the Green Belt report been ignored in relation to the future development of Biddulph?

As part of the Modified Local Plan schedule, the planning team has only earmarked 12 sites from the original housing plan of 2014 when there were originally 27 possible sites. Back then, BD062, BD068 and BD087 were excluded.

The sites were mysteriously reintroduced in May this year after the Local Plan was thrown out by the Planning Inspector. It was ruled that another site BDNEW should be taken out of the Local Plan because it was Green Belt land. The three sites, BD062, BD068 and BD 087, are ALL Green Belt land.

In my opinion, the Modified Local Plan in relation to the three sites should be rejected outright and returned to the SMDC for further consideration.

Yours faithfully,

REC'D 17 OCT 2019

October 9, 2019

Biddulph Modified Local Plan – General Objections

Dear Sir,

I write to express my total opposition to specific issues relating to the above plan, namely potential housing development on sites BD062, 068 and 087.

In outlining the first of several concerns, I would say there has been an abject lack of progress with the Local Plan by the SMDC.

Back in June this year, the authority voted to amend the Local Plan to reintroduce the three sites in the vicinity of Biddulph Water Treatment Works. It was claimed by the authority's planning team that United Utilities raised no objection to this change of direction.

Conveniently, the planning officers did not mention that both United Utilities and the Environmental Agency had requested that all other options plus 27 other potential sites be considered for development before looking at BD062, 068 and 087.

The Environmental Agency has stated in the past that SMDC should steer clear of areas with a high flood risk (the named sites are flood risk areas and we have photographic evidence to support this). and also ensure that any new development is safe and reduces flood risk to other areas of land.

Furthermore, the Environmental Agency decided that where new housing increases flood risk, such plans should not be permitted. As a property owner affected by the potential new development, I feel strongly

that the organisation should conduct a site inspection with the aim of producing a full and detailed report on this ludicrous situation.

The Government has also reiterated their rule that flood plains should not be considered for housing where other sites are available.

There is something seriously amiss with this whole issue. Why have these three sites been reintroduced in to the Local Plan when there are plainly other sites more viable for development? A full inquiry by a higher authority is clearly needed.

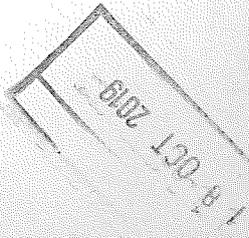

In summing up, I would say that under no circumstances should the aforementioned sites be included in the Modified Local Plan.

I also wish to inform you that I tend to address further concerns about the same issue in future correspondence with your department and the SMDC.

Yours faithfully

DAVID SANDERSON

October 9, 2019

Biddulph Modified Local Plan – Public Health Issues

Dear Sir,

Potential housing sites should not be close to water treatment works. That is the opinion of United Utilities re SMDC considering possible areas of land suitable for development.

This ruling has clearly not been considered in the authority's decision to include BD062, 068 and 087 in the Modified Local Plan.

In fact, there have been numerous complaints about odour and leakage of sewage from the water treatment works into the nearby brook. United Utilities officials have agreed there is a problem. We, as residents, have witnessed several occasions when raw sewage floats along the brook towards Congleton and obviously we suffer the subsequent smells. Yet the site owner has provided a survey to the council stating there isn't an issue! Who is correct?

As the proposed development for BD062 and BD068 is within 10M of the water treatment boundary, there could obviously be a risk of an infectious disease breaking out. It needs to be made quite clear that United Utilities and the Environmental Agency should decide on a minimum distance from the waterworks boundary line for any potential housing plan. Such a move could well restrict the number of dwellings on these sites and therefore render the scheme unviable.

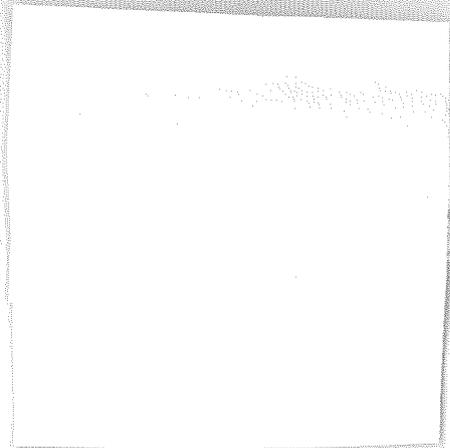

United Utilities could also face possible lawsuits in the future from the owners of any newly-built properties.

A full and frank report on the viability of these sites needs to take place before any firm decision is made about potential development.

Yours faithfully,

DAVID SANDERSON

Biddulph Modified Local Plan – SMDC Motives

Dear Sir,

The modified plan has met with dozens of objections from worried residents in relation to the inclusion of sites BD062, BD068 and BD087, previously omitted from the blueprint.

It's my considered opinion that SMDC is pushing ahead with the plan with indecent speed. Why? Just what are the motives behind this ludicrous scheme? To my mind, there has been inadequate preparation for the proposals to go ahead.

The modifications to the plan have been made very late in the day. Is this in order to thwart residents' opposition? Adding safeguarded land to the plan without proper investigation, particularly when the land in question involves public safety issues, plus a lack of public consultation by the council, could easily lead to the authority facing legal action and hefty financial claims.

The above sites are ranked as prime building land. No other potential sites have that rank. Sixteen of the original sites identified in 2015 were not even considered. Why?

The previously safeguarded sites are on a flood plain, so potential home owners would not get a mortgage or property insurance.

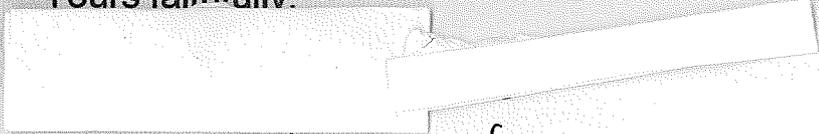

The correct process of conducting full site investigations, gathering reports from organisations involved, consulting the public etc has not been followed. Why?

The SMDC has had eight years to get the local plan right. The modified plan has taken just three months from June this year.

There has been a hurried consultation period between September 18 and October 31 with hardly anyone being informed. Why? However, the site owners have been kept up to date with ongoing developments.

The whole situation stinks. The modified plan with these three sites would be entirely detrimental to the town of Biddulph and indeed its residents.

Yours faithfully.

DAVID SANDERSON

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

CONCERNING BDO87

I HAVE LIVED IN BIDDUNPH FROM BEING BORN IN CONGLETON WAR MEMORIAL HOSPITAL AND NOW A RESIDENT OF CONGLETON ROAD BIDDUNPH.

THERE HAS NEVER BEEN BUILDINGS ON THIS LAND. CONTRARY TO THE LAND OWNERS CLAIMS. I HOPE THIS KNOWLEDGE IS TAKEN INTO CONSIDERATION.

I AM NOW 65 YEARS OF AGE AND MY MOTHER AND UNCLE BEING 90 AND 95 YEARS OF AGE.

I'VE ALSO ASKED THEM THE QUESTION OF BUILDINGS ON THIS LAND TO WHICH THEY BOTH SAID NO

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

Mr Arne Swithenbank
Principal Planning Officer

LOGGED

Dear Sir,

Re – objections to BD087 Biddulph Plan

As joint owners of  we write to object in the strongest possible terms to plans for 20 new build properties on land east of Biddulph Brook, north of Marsh Green Road.

This site, designated for many years as Green Belt land, is wholly unsuitable for such a development on numerous grounds.

1. Flood risk - The land in question is a flood plain (the only one in the Biddulph area), with an added problem of surface water running off it at given times. As the name Marsh Green suggests, it is marsh land and is prone to serious flooding during wet weather. We have photographic evidence of this. Historically, the area was considered for the site of a new town cemetery some 14 years ago by Biddulph Town Planning Committee, but was rejected outright because of serious concerns about access and the possibility of coffins floating to the surface through ground water pressure. Clearly there is a severe flood risk. So how can it then be considered for possible housing development? How would the residents of properties built on the fringe of the flood plain acquire mortgages/buildings/contents insurance?
2. Properties built in the valley would be overlooked by existing homes on Congleton Road and adjoining roads.
3. Access – BD087, plus related BD062 and BD068 plans, would require a tremendous amount of infrastructure work to facilitate any new development. The cost of road widening, footpaths, street lighting etc would be astronomical. Some pertinent questions need to be answered here. Who would pay for this work? Why is all this upheaval so vital for the sake of just 20 new houses and the two related developments, all of which were originally excluded from the first consultation stage? WHY have planners changed their minds on this particular issue? These are questions that need to be answered, given that there are far more suitable potential development areas around Biddulph.
4. Traffic chaos – The ensuing traffic congestion just doesn't bear thinking about if this scheme goes ahead. It would create a nightmare scenario for existing residents in surrounding properties, pedestrians, and drivers passing through the area.

5. Our property, along with two adjoining properties, has sewage water piped into a septic tank at the bottom of No 267. Access is needed to maintain pipe work at the northern end of the site. How would this be achieved given the proposed development?

6. As there have been numerous complaints about nasty smells from the adjoining Biddulph Water Treatment Works over many years, have the health and safety aspects of such proposals been taken into consideration? We can categorically state that there have been many occasions when raw sewage actually floats along the brook towards Congleton and we residents suffer the resulting repulsive smell.

7. Wildlife – The ancient valley is an area of outstanding beauty. Any development would destroy the natural habitat of myriad wild flowers as well as geese, ducks, frogs, heron, kingfishers, kites, rabbits and bats – the latter, according to current legislation, is a protected species. The valley would be decimated if properties were built there.

We would also point out that there has been no local consultation on this issue.

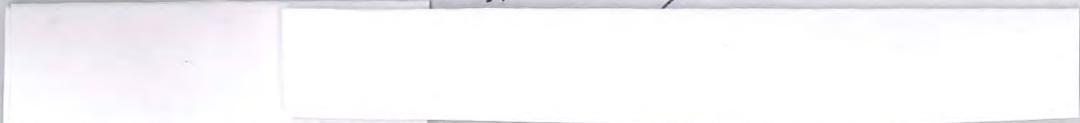

In general terms, the site could not support affordable housing, so any homes built here would be in the upper price bracket, which would make a mockery of the nationwide need for affordable homes.

In conclusion, we feel it would be sheer lunacy and totally illogical for BD087 and the related schemes to be given the go ahead in the future. Such a move would be an ecological disaster for our beautiful valley. It would create a nightmare of added congestion and change the face of Biddulph forever.

Given the importance of the area, residents will be enlisting the help and support of wildlife and conservation organisations in opposing this ludicrous scheme. We, along with many other people, intend to fight on until such time a sensible decision is made to reject the proposals outright.

Thank you for taking time to consider this letter of objection. We would ask you to forward a written response when it is appropriate.

Yours faithfully,

A large rectangular area of the document has been redacted with a white box, obscuring the names of the signatories.

Michael Hilton & David Sanderson

Mark Dakeyne – Planning Inspector

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffs Moorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice> .

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference MM8, MM9, MM12 (see attached representation letter)

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	<input type="checkbox"/>
Sound - Positively prepared	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Justified	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Effective	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Consistent with national policy	<input type="checkbox"/>	<input type="checkbox"/>
Complies with the Duty to co-operate	<input type="checkbox"/>	<input type="checkbox"/>

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

SEE ATTACHED REPRESENTATION

(Continue on a separate sheet / expand box if necessary)

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

SEE ATTACHED REPRESENTATION

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

For the attention of the Local Plan Inspector

Our Ref: ALP/SDL/SMLP/Bidd/MM's

29 October 2019

Dear Sirs

Proposed Main Modifications to the Staffordshire Moorlands Local Plan

Introduction

Seabridge Developments has consistently made the case for the allocation of site BD062 (Land off York Close, Biddulph) for housing. The client attended the Core Strategy Examination and we supported the Council in early iterations of the Plan, which proposed to allocate the site. We also objected strongly to the Submitted version of the Plan, which sought to ignore its merits in favour of a different strategy that involved the proposed allocation of land to the west of the Biddulph Valley Way (BDNEW) and we appeared at the Examination to express our concerns.

We welcomed the Inspector's Post-Hearings Advice to the Council which confirms that there is a case for exceptional circumstances existing to justify the alteration of Green Belt boundaries around Biddulph. We strongly endorse the Inspector's view that BDNEW represents an unsound proposal and should be deleted and that the Council should review its evidence base (for instance Table 5.1 of SD22.4) to consider alternative sites that could be removed from the Green Belt for allocation and/or safeguarding to meet longer term development needs in Biddulph. (Issue 5 - paragraphs 10-13)

The Council's Approach in Response to the Inspector's Post-Hearings Advice

It would appear that the Council has once again acknowledged that land at Gillow Heath makes a relatively weak contribution towards fulfilling the purposes of the Green Belt, which is a view also expressed by the Inspector who considered the Core Strategy. More particularly, it proposes to remove Sites BD062, BD068 and BD087 from the Green Belt. **We strongly endorse the Council's proposed main modifications in this respect and we fully endorse the assessment summarised at Appendix C (Biddulph Option 2 Assessment Table) of the Biddulph Options Planning Analysis (Document E), which states:**

"Rank 1: Limited overall impact on Green Belt purposes (site only makes a contribution to one of the green belt purposes and a limited contribution to the rest). Whilst United Utilities would prefer that development took place elsewhere, they don't make a formal objection and constraints exist on other alternative sites. Consequently, on planning balance, the limited overall impact on the Green Belt and lack of other constraints gives this site a high ranking."

Whilst some local objection to the proposed deletion of the site from the Green Belt can be anticipated (not least from residents in York Close), as the evidence base confirms, the land does not perform strongly in terms of Green Belt purposes. Furthermore, to counter any suggestion that the land is unsuitable for development, we wish to re-affirm that it is in Flood Zone 1 (not liable to flood) and it holds no significant ecological value that would merit special protection, as evidenced by the several ecology assessments that have been undertaken and supplied to the Council in recent years. Other than for a single footpath that runs alongside the western boundary of the site adjacent to the Biddulph Valley Way (BVW) and a short informal path in the south-east corner, linking York Close and the BVW (which can be incorporated into any future development), there is no lawful public access over the land.

The main area of disagreement our Client has with the Council's revised approach is that we consider that BD062 should be allocated for housing in this Plan as opposed to being safeguarded to meet future development needs. It is this issue that compels our client to object strongly to the proposed Main Modifications.

Concerns about the Proposed Modifications

Our client is of the strongly held view that the Plan (as proposed to be modified) should be positively planning for the future and in this respect, it is unsound for the following reasons:

1. The Council is only proposing to meet housing needs for years 1-10 of the Plan and not years 11 -15. Whilst such minimalistic approach is not contrary to the NPPF, it does place greater importance on the timely delivery of new homes in the initial stages of the Plan and for that reason, there is a need for more certainty about the anticipated supply and delivery associated with those allocations (particularly in Biddulph) that the Plan so heavily relies upon.
2. It is worthy of note that at paragraph 7.26 of a report to the Council Assembly on 26 June 2019 (presumably a document which the has provided to the Inspector), it is proudly asserted that: "*The revised document establishes that even with the removal of site BDNEW from the housing supply and revised delivery assumptions, there is a supply of **5.16 years** of housing and a sufficient supply for 10 years*" (emphasis added). This is a very fragile housing land supply position for a new, supposedly forward looking Plan and it could easily be undermined if sites are not delivered and quickly and to the anticipated densities.
3. The Council is advocating the 'Liverpool method' (to spread the housing shortfall up to the period 2033) rather than the 'Sedgefield method' (meeting the shortfall over the first part of the Plan period). It is plainly evident that the Council has a very poor record of housing delivery and whilst it has prepared a housing delivery plan, we remain concerned that the Council is over-estimating the amount of new housing that will be delivered by the proposed housing allocations for Biddulph, especially DSB1 – Wharf Road, which has long been mooted, or proposed for development. Wharf Road represents a very complicated site in multiple ownerships and afflicted by numerous significant constraints, which we have previously highlighted in our objections to the Submission Plan, including significant ground conditions and contamination issues associated with its legacy of former coal mining (including 15 known mine entries), as well as topographical, ecological, flood risk, environmental and technical constraints.
4. The Council is being over-optimistic on the timescales for delivery of the strategic housing allocations for Biddulph, especially Wharf Road, which experience suggests will inevitably result in a longer than anticipated 'lead-in' period before any new homes are capable of occupation and built-out that is likely to extend well past the first 10 years of the plan period.

5. Furthermore, the housing strategy for Biddulph does not allow sufficient flexibility to address a situation where the delivery of new homes does not match the Council's over-optimistic and unrealistic expectations of housing capacity and delivery. This could be remedied by the allocation of additional land capable of being delivered in the shorter-term.
6. The Plan does not properly provide sufficient small/medium-sized sites that are capable of being developed by small/medium sized house-builders in accordance with Government guidance.
7. In order to boost significantly the supply of housing as required by the NPPF, or at the very least, provide greater certainty for the delivery in Biddulph over the shorter term, **the Plan should allocate for housing, land at Gillow Heath (including Site BD062)**, which comprise a compilation of relatively modest sites in single ownerships that are capable of being delivered early in the Plan period, in order to address the concerns raised at 1-6, above.
8. If, as a result of the allocation of the three sites at Gillow Heath, it is deemed necessary to identify additional safeguarded land to meet long term development needs beyond the Plan period, there may be scope to consider those sites ranked 2 and if necessary, 3 in the Biddulph Options Planning Analysis – Document E.
9. If the above concerns are not accepted, the Plan should provide an explicit mechanism for the early release of additional housing sites, including the use of safeguarded land, in circumstances where housing delivery falls below the required trajectory and/or the Council is unable to demonstrate the minimum 5 year supply of deliverable housing land, as required by the NPPF.
10. In the meantime, the Plan should make it clear that Neighbourhood Plans should not apply restrictive policies (e.g. Local Green Space designations etc.) that would run counter to the purpose of safeguarding land to meet future development needs.

Representations on Specific Proposed Main Modifications (MM)

More specifically, our client wishes to submit the following representations in respect of specific Main Modifications (MM's):

MM	Page No.	Policy/Para	Seabridge Representation
MM8	49	7.28	We strongly support the assertion that exceptional circumstances exist for the release of Green Belt.
MM8	50	Policy SS3	The policy should state more explicitly what approach will be adopted in the event that the Council is unable to demonstrate a minimum 5 year housing supply. For instance, will it commit to an early partial review of the Plan to identify additional housing land allocations that can be delivered without delay? Alternatively, will support applications on safeguarded land to enable early delivery to assist the supply position?
MM9	52	Table 7.2	We note the revised net housing requirement for Biddulph of 962 dwellings
MM9	54	Policy SS4	We note the revised net housing requirement for Biddulph of <u>962 dwellings</u> . It is also noted that Table 7.7 only identifies potential provision <u>734 dwellings</u> (which is reduced from 890 units), including allocations totalling 604 dwellings (which is reduced from 730 units). This results in a deficit of 228 dwellings against the net requirement for the plan period, which is an inadequate and avoidable response to the housing shortfall in Biddulph. We suggest that the allocations should be increased by the identification of the sites at Gillow Heath – BD062 (35 units), BD068 (70 units) and BD087 (15 units), which according to the Council's Assessment of Possible Site Allocations, together have an estimated capacity of 120 units.
MM12	62	New para between 7.50 and 7.51	We consider the Plan makes inadequate housing provision for Biddulph, even for the first 10 years of the Plan and places an over-reliance on the delivery of most of Biddulph's requirement on just a couple of large strategic sites, at least one of which (Wharf Road) is significantly constrained and will not deliver the necessary new homes in a timely manner. Whilst we support the release of land at Gillow Heath from the Green Belt, we are therefore compelled to object to paragraph 6 of the Biddulph Area Strategy, which instead, should allocate sites BD062; BD068 and BD087.

			<p>In any event, since the Plan is not proposing to fully meet the needs of Biddulph (924 dwellings) within the Plan period, the text "<i>The intention is that it is set aside to meet future needs (rather than needs within the plan period like an allocation)</i>" is confusing and should be amended to read "the first 10 years of the plan period".</p> <p>We consider that the text: "<i>which proposes the development so there is no guarantee that it will become an allocation. The land may not be needed in certain circumstances, for example - if the housing requirement for the District and/or spatial strategy changes in the future - but it provides a buffer to ensure that Green Belt boundaries around Biddulph have a degree of permanence</i>" is unhelpful and unnecessary and should be deleted.</p>
MM12	63	Policy SS6	<p>We consider the Plan makes inadequate housing provision for Biddulph, even for the first 10 years of the Plan and places an over-reliance on the delivery of most of Biddulph's requirement on a couple of large strategic sites, at least one of which (Wharf Road) is significantly constrained and will not deliver the necessary new homes in a timely manner. Whilst we support the release of land at Gillow Heath from the Green Belt, we are therefore compelled to object to paragraph 6 of the Biddulph Area Strategy, which instead, should allocate sites BD062; BD068 and BD087.</p>

Conclusions

In summary, this Plan does not identify sufficient land to meet the needs of Biddulph over the entire Plan period up to 2033. It only seeks to make provision for the first 10 years, which we suggest is an unacceptable approach for the Council to take, given that it has an acknowledged shortfall, which it proposes to spread over the whole plan period adopting the 'Liverpool method', as opposed to the 'Sedgefield method', which focuses on the first 5 years.

This inadequate response to the NPPF's requirement to boost significantly the supply of new homes (paragraph 59) is exacerbated by the Council's proposals to concentrate the majority of the housing provision in two strategic sites, one of which (Wharf Road) has a history of non-delivery, not least because of a range of significant constraints ranging from multiple ownerships; topographical challenges; significant geo-environmental issues; flooding and ecological issues and infrastructure constraints, etc.

We have no objection to the allocation of the site, but we consider that it will not deliver the anticipated number of dwellings within the first 10 years of the Plan and so we strongly believe that additional allocations should be made.

The Core Strategy Inspector highlighted the opportunity to release land from the Green Belt at Gillow Heath and the Council has also previously acknowledged the merits of Sites BD062, BD068 and BD087.

We appreciate that allocation of land results in objections, but this is no reason for the Council to avoid the allocation of additional land now, rather than propose its 'safeguarding' to meet a potential future need, that actually exists now and which is not being properly planned for.

We therefore support the release of land at Gillow Heath from the Green Belt, but in the interests of proper and positive plan-making, we urge allocation of the proposed safeguarded land at this time.

Yours sincerely,

Andy Williams

A J Williams Dip TP, MRTPI
Director

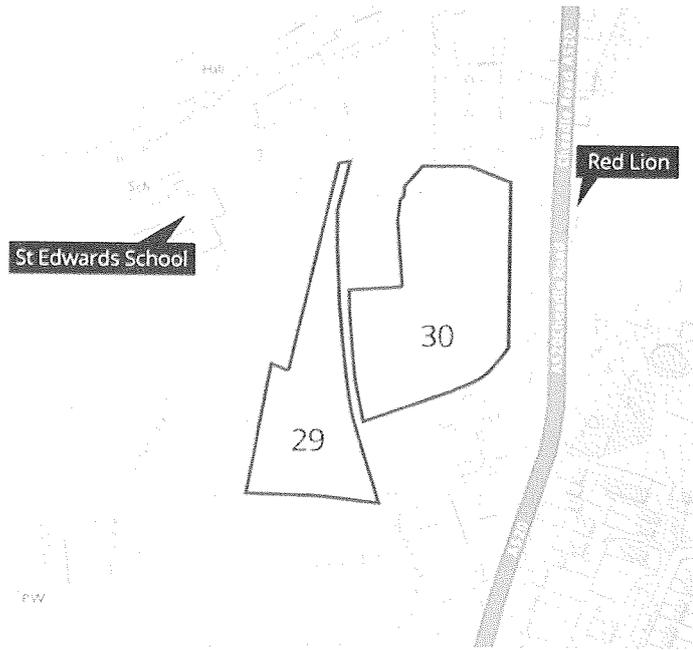

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How can you help?

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

If you would prefer to make a representation by yourself please email forward.plans@staffs Moorlands.gov.uk or by post to
Freepost RRLJ-XCTC-JBZK, Forward Plans, Staffordshire Moorlands District Council, Regeneration Services, Moorlands House, Stockwell Street, Leek, ST13 6HQ. **Please make sure you include your name and address.**

For more information visit www.cheddletonresidents.org

MR. D & MRS. P. SHALLCROSS

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment

Please see attached letter.

14/10/19.

To whom it may concern,

It would be in the interest, of all who use the gully and the path, which goes from the gully, up to Ostler Lane, behind Ox Pasture

It is peaceful, safe and no traffic, therefore no pollution.

To hear the church bells, and see the roaches in the distance, and all the different sorts of wild life.

Its important to keep our Green Spaces for future generations.

PdD. Sheelness

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

Helen Sherratt

I would like to add my voice in urging you to grant LGS designation to Cheddleton fields 29 and 30.

To a casual observer the land looks like any other fields, but to those of us who reside in Cheddleton they are special as they have always been agricultural meadows which have remained unspoilt by harsh agricultural practices and chemicals.

The land is important to both residents and wildlife alike. To the many people who use both footpaths the fields represent a special area of rural tranquillity in the heart of the village, with open views across to our ancient church, the Roaches, Moorlands hills and Peak District beyond, giving a true feeling of the historic setting of the village. To the abundant wildlife that lives on and around the fields they act as an important wildlife corridor and feeding ground.

Villagers enjoy the extent of the wildlife supported by the fields including numerous bats which at dusk fly low overhead circling the trees and hedgerow feeding over the fields. Development would drastically reduce their food supply endangering the bats. We have seen badgers at dusk on the fields and crossing the gully and owls can be heard and sometimes seen in the moonlight feeding off mice in the fields. During the day Buzzards and Kestrels regularly hunt these fields and occasionally a sparrow hawk and peregrine falcons visit. Crows can often be seen guarding their territory by ganging up on the buzzards in flight and ushering them away. We have wood pigeons, collared doves, magpies, jays, the occasional woodpecker, numerous house and field sparrows, blue tits, bull finches, gold finches and robins etc. butterflies, bumble bees. There are grey squirrels, sometimes rabbits – though they tend to get eaten by the buzzards and foxes which cross the fields each day. We have also seen grass snakes and hedgehogs and there are great crested newts.

Whilst not granted special status the wildlife and the habitat it lives in are very special, because of the location within the village, being seen heard and enjoyed more than out in the open countryside. Development would irrevocably

destroy much of the ecosystem within this important wildlife corridor and hedgerows would be at much greater risk of being removed over time by purchasers of individual dwellings.

The State of Nature 2019 Report compiled by the National Biodiversity Network, published in October 2019, presents an overview of how wildlife in the UK currently is faring....

The report highlights that the biggest decline in wildlife since vigorous monitoring began in 1970 has occurred over the last 10 years.

- Populations of farmland birds have halved on average since 1970 and there are similar declines in other taxonomic groups.
- The average amount of mammals has fallen by 26%.
- Butterflies are down by 17% and moths by 25%.
- 41% of UK species have declined in numbers and 133 species have been lost from our shores.
- 15% of species are under threat from extinction.
- 2% have already been lost for good.

The UK Government's own assessment indicates that, although progress has been made, the UK will not meet most of the global 2020 targets it committed to through the Convention on Biological Diversity.

The National Trust, the RSPB and Staffordshire Wildlife are all calling for the protection of wildlife corridors to give our native species a chance of survival by preserving habitats.

Please support the residents of Cheddleton to help us protect these special areas of land.

2019-10-23

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ 61 page 232. Deletion of Local Green Space designations 29 and 30 (Ox Pasture east & west).

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant		✓
Sound - Positively prepared		✓
Sound - Justified		✓
Sound - Effective		✓
Sound - Consistent with national policy		✓
Complies with the Duty to co-operate		✓

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

I consider the main modification MM61 concerning the removal of the Local Green Space (LGS) status proposed for land at Ox Pasture west (ref. 29) and land at Ox Pasture east (ref. 30) makes the Local Plan unsound, non compliant with the duty to co-operate, is possibly illegal and increases the risk of judicial review.

The NPPF stipulates that plans should be shaped by early, proportionate and effective engagement between plan-makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees.

The Local Planning Authority failed to engage local residents in consultations from the start, leaving the proposed LGS status vulnerable to challenge for development on the grounds of not being “demonstrably special to a local community”. Whilst commissioning a thorough report in the form of the Landscape, Local Green Space and Heritage Impact Study (August 2016) prepared by Wardell Armstrong, which supported the LGS designations, again the local community was not consulted and I consider the national stakeholders chosen for consultation would not have local insight to assess what is special to our local community. As a result the report only recognised “High tranquillity and visual amenity value, some ecological and recreational value” which is all correct, but understated; for example the fields provide a wildlife corridor, where the wildlife supported is diverse and being within the village is accessible to everyone to enjoy. It does not pick up on the importance to the community of the ancient gully footpath, the heritage views e.g. the southern footpath to Ox Pasture west offers the only remaining public views to the southern aspect of the church tower across open fields, or the valuable role these meadows, which once adjoined the long lost medieval Village Green, play in preserving the rural character and setting of the village by separating the old village from newer parts. Their function is just like and just as important as Greenbelt land, even more so, because the fields are located within the larger village and are experienced by many people on a daily basis. Together they form the only open space within the village on the western side of the A520.

The specialness of Ox Pasture west was most definitely recognised by the Planning Committee members who in August rejected a planning application ref. SMD/2019/0143 for residential development, though officers strongly encouraged them to limit their grounds for refusal. Lichfield Diocese who own Ox Pasture east have also respected the special nature of the land by maintaining their hedgerow to the gully at a low level, like both sides used to be, for all to enjoy the meadows and far reaching rural views. In their representation on the Local Plan Preferred Options, in September 2017 their consultants recognised the site to be sensitive and the importance of retaining views, proposing to retain open land adjoining the gully as public open space, suggesting only limited development at a lower level closer to the A520; though I don't accept that any development would be appropriate as this would result in the loss of meadow land and detract from this special rural setting.

In his December 2019 Post Hearing Advice the Inspector on the basis of one site visit and without the benefit of of any evidence being presented from community consultation, because there wasn't any such consultation, concluded both fields were not demonstrably special and recommended the removal of LGS designation, at the same time requesting reviews of all other

LGS proposals. I consider the Local Planning Authorities lack of public consultation and the Planning Inspector's recommendations to remove Local Green Space designations without first requiring consultation with our local community, conflict with the spirit of the Localism Act 2011 and reforms to make the Planning system more democratic and more effective by involving the public giving them greater influence. Furthermore, community representations then hurriedly made without being invited, were passed on to the Inspector without Local Planning Authority comment. Clearly an understanding had been reached to capitulate to this recommendation and community opinions were considered irrelevant and ignored, a decision having been made. Both in my opinion have acted in a dictatorial and undemocratic manner.

I consider the introduction of the LGS designation into the NPPF enabling protection for land that is demonstrably special (all other criteria having been indisputably met) coupled with the spirit of consultation and empowerment behind the Localism Act creates a duty of care from a Local Planning Authority and Planning Inspector to protect the rights of the Local Community and an obligation for proper and meaningful consultation, which both have failed to provide at an early enough stage.

I am also wary that the decisions to recommend and accept removal of the LGS designation could have been unduly influenced by a desire to add to potential windfall developments to help achieve the desired 30 dpa plus, in rural areas. If such help is really necessary, then I have no doubt much more appropriate alternatives that better fit NPPF requirements could have been found, rather than go for an easy fix to secure the new Local Plan at the expense of a local community.

On the basis that a considerable proportion of people who live in Cheddleton and other parts of the Staffordshire Moorlands work in Stoke-on-Trent, so would potential new residents. Accordingly, I consider to achieve compliance with the duty to co-operate, much more consultation should have been undertaken with Stoke-on-Trent City Council. Their Five Year Housing Land Statement 2018 shows that the City Council, has outperformed requirements for housing provision year after year, for many years and has an abundance of potential development sites, many of which are brownfield. Working better with the City of Stoke-on-Trent could have led to more housing being provided closer to where people work and a higher proportion of development on brownfield sites, leading to more sustainable environmentally beneficial development and better protection of Greenbelt and potential LGS land from windfall development, including Ox Pasture east and west.

Whilst everyone using the footpaths experience and enjoy the health benefits of exercising; the tranquillity away from busy fume filled roads; the diverse wildlife; village character and heritage and stunning views etc. the detrimental impact of losing the meadows are disproportionate, with the young and old/ disabled villagers suffering most. Young people on their way to or from school enjoy the freedom of the safety of being away from roads, meeting, running and playing with friends along the way and learning from experiencing

and asking questions about the flora and fauna. The primary school would no longer have any beneficial use of the footpaths for nature walks if the fields were to be developed. Old people or disabled people may not be able to walk to other open areas, which are either up or down hill or involve crossing busy roads, or they may not feel safe exercising elsewhere. I myself for example am asthmatic and enjoy the clearer air away from the traffic polluted main road and narrow sunken lanes. On this basis I consider the recommendation and decision to remove the LGS designations represent a breach of the Equalities Act 2010 and are unlawful.

(Continue on a separate sheet / expand box if necessary)

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Reinstatement of Ox Pasture east and west (ref. 29 & 30) as designated Local Green Space in the Staffordshire Moorlands Local Plan.

Should alternative land need to be identified for potential windfall development, then relevant planning permissions granted since the Inspector's recommendation should be considered, for example, I am aware of at least one area of proposed LGS where sadly for that community outline permission for residential development has been granted. Failing this, alternative sites should be found and consultation undertaken with Stoke-on-Trent City Council with a view to any potential shortfall being allocated in the joint Stoke-on-Trent and Newcastle-Under-Lyme Local Plan, which is at an earlier stage of preparation. Such consultations should have been undertaken in any event in my opinion, as a considerable amount of brownfield sites are available and housing could be provided closer to an important source of employment to reduce environmental impact and better comply with NPPF requirements.

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required) ✓
- Publication of the Inspector's Final Report ✓
- Adoption of the Local Plan. ✓

Comment:

Rachel Sherratt

As a past resident of 20 years plus, born and bred in Cheddleton and a regular visitor, I appreciate the meadow land references 29 and 30 is very special being an important part of the green buffer separating the old village to the north from larger newer developments to the south, supporting the conservation area, heritage, character and setting of the old village and conservation area, which still retains its own identity.

I enjoyed walking to school and brownies along the gully from our family home at 53 Rennie Crescent. It is the safest and the most pleasant route thanks to the open fields on both sides, the wildlife they support and countryside views. It's sunken nature and dry stone walls generate a sense of significance and importance, as you retrace the tracks many generations have walked before. This would all be lost without the open fields on either side.

As a young child I saw many animals here for the first time, such as bats, badgers, a hedgehog, kestrels hunting and many other birds, including hearing an owl. The extent of the wildlife supported by the meadows is immense and is extra special, as it is located within the village, being seen heard and enjoyed more than out in the open countryside.

These are just a few reasons why, to local residents these fields are special and just as important, if not more important than greenbelt land. 2019-10-17

Comment:

Robbie Sherratt

Cheddleton expanded in pockets around the A520, which in effect was the eighteenth century village bypass, being constructed around the historic village centre in 1762 as part of the Bullock Smithy (Hazel Grove) to Sandon Turnpike. Surrounding countryside and open spaces give each pocket the feel of a smaller village, with the historic village centre retaining its own identity, making the character of Cheddleton quite unique and special to local residents.

These fields references 29 and 30 form an important rural buffer separating the old village centre/ conservation area with its medieval church and historic buildings to the North from newer development to the South and are hugely important in preserving the historic landscape and setting and character of the old village. They are especially enjoyed by the many people using the public footpaths, in terms of near and far reaching heritage and scenic views, long standing hedgerows, extensive wildlife and the tranquillity and safety of not having traffic to contend with, as the village lanes are narrow and don't have pavements. Many people exercise through walking these paths, encouraged by and benefiting from the open rural atmosphere.

The Church of St Edward the Confessor dates back to the thirteenth and fourteenth centuries, with the tower and porch being completed in the late sixteenth century, but the two oldest houses fronting the church on Hollow Lane were not built until the eighteenth and nineteenth centuries. South of the church was the village green and pond stretching to the preserved village pond, located on the western side of Ostlers Lane at its junction with Hollow Lane. The heart of the village was the church and development on its eastern side around The Hall House, which dates back to the fifteenth century and is thought to have been built on the site of the medieval manor house. The church tower was no doubt constructed to enhance the importance of the church to be viewed from all surrounding directions from fields, tracks/ lanes and paths alike. With the Church stretching lengthways along Hollow Lane (then the main road) views from the south across the village green and the approach from the gully, which linked the village green to Bottom Hall (the Elizabethan predecessor of Ashcombe Park) and the footpath veering eastward to The Grange, are historically very important. Whilst the public footpath on the southern boundary of field 29 is relatively young in age, it

gives the only vantage points from the south where the church tower can still be viewed as was intended, across open fields within the setting of the moorland hills and thus has huge positive significance to the church as a heritage asset and its setting. I am aware, Robert Milner a renowned local historian has suggested field 29 neatly takes the place of the lost ancient village green, a view no doubt that many would share.

Whilst ribbon development on Ostlers Lane already appears to link older to newer developments, it is hidden from the sunken public highway, being accessed off a mostly unmade private driveway and is largely obscured by hedgerow from the gully, the historic public footpath that separates fields 29 and 30, unless people purposefully look across. Development on these fields would however, be visible and detract from the rural character and setting of the old village and conservation area. Furthermore they form the only open space within the western side of the village and not everyone is able to or feel safe walking to the recreation ground or canal with steep inclines involved.

Any benefit to national or local economies of windfall development here are minute and vastly outweighed by the huge significance of these fields to local residents and a Local Green Space designation would be most appropriate to protect them for future generations.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

30th October 2019

Dear sir,

PROPOSED MAIN MODIFICATIONS to the STAFFORDSHIRE Moorlands Local Plan

Mr Robert James Simcock and his representative Nina Pindham, Planning Barrister (No5 Chambers, Fountain Court, Steelhouse Lane, Birmingham B46DR gave formal evidence within the permitted representations concerning my sites BD068 an BD087, Marsh Green Road, Biddulph for residential Housing (we are content that all the evidence will be held on file by the Inspector in any event.

We attended all the pre-development meetings and the Core Strategy Hearings and supported the Councils proposals for the Plan. We have observed and confirm the inspectors hearings advice to the Council regarding both my sites.

I have requested that the Planning Barristers submit further and better particulars in the coming days as an attachment to this document. Further we wish to be notified of the following:

- 1/ Further Hearing session (if required)
- 2/ Publication of the Inspectors Final Report
- 3/ Adoption of the Local Plan.

Please accept this document as the statement to be included within due process of the
STAFFORDSHIRE MOORLANDS LOCAL PLAN

Mr ROBERT JAMES SIMCOCK

Version 0.3

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM12

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant	.	No
Sound - Positively prepared	.	No
Sound - Justified	.	No
Sound - Effective	.	No
Sound - Consistent with national policy	.	No
Complies with the Duty to co-operate	.	No

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

As a relative new owner in the district (since December 2017) I have not been involved in previous consultations regarding the formulation of the Local Plan. I am, however, disappointed that these modifications have taken place without direct communication with property owners directly impacted by the proposals. I only found out about this consultation process by chance. The insertion of the paragraph between 7.50 & 7.51 implies that Green Belt land with a shared border to my property has been removed from Green Belt and designated as safeguarded land for potential future development. My concerns are as follows: 1. All Brownfield sites should be exhausted before any Green Belt land is considered to fulfil future development needs. 2. Two of the three sites at Gillow Heath (BD 068 & 087) are on a recognised flood plain with a natural watercourse bordering them which is susceptible to flooding as was demonstrated during the recent heavy rainfall of 25th & 26th October. With climate change this can only worsen and would be exacerbated by the development of this land causing future problems for both new & existing property owners. I understand that some property owners in the area are already unable to insure their properties against flood risk. 3. The existing infrastructure is inadequate for increased use with only a single road access which in places is single track. 4. The proposed sites sit outside the Biddulph Town Boundary and as such do not have the services needed to support low cost housing and housing for an ageing population, without substantial further investment.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Reinstatement of Green Belt status to BD 062, 068 & 087 and therefore removal of the paragraph from the Local Plan. As these sites are intended to be safeguarded beyond the Local Plan i.e. 2033 then removing them from Green Belt is somewhat contradictory to the stated policy of protecting the permanence of Green Belt boundaries.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

Object to loss of Green Belt due to: 1. All Brownfield sites should be exhausted before any Green Belt land is considered to fulfil future development needs. 2. Two of the three sites at Gillow Heath (BD 068 & 087) are on a recognised flood plain with a natural watercourse bordering them which is susceptible to flooding as was demonstrated during the recent heavy rainfall of 25th & 26th October. With climate change this can only worsen and would be exacerbated by the development of this land causing future problems for both new & existing property owners. I understand that some property owners in the area are already unable to insure their properties against flood risk. 3. The existing infrastructure is inadequate for increased use with only a single road access which in places is single track. 4. The proposed sites sit outside the Biddulph Town Boundary and as such do not have the services needed to support low cost housing and housing for an ageing population, without substantial further investment.

Officer Response

Proportional evidence has been gathered for each site. In contrast to site allocations which need to be delivered within the plan period, a more long-term view of constraints for safeguarded land can be taken. Also, the same level of detailed information as would be needed for an allocation is not necessarily required when land is safeguarded as the position would be reviewed in the next plan and would include assessment of up to date evidence at that time before an allocation was made. In their response to this consultation, the Environment Agency say that if the sites come forward for development at a later stage they would require a Level 2 Strategic Flood Risk Assessment because they are within close proximity of the floodplain and this may affect capacity and layout. However, they state that this would not be required for the land to be safeguarded.

Recommendation

To further emphasise that ecology, flooding and other relevant issues will be considered as part of any site allocation, it is suggested that if the Inspector considers it appropriate, an amendment to Policy SS6 could be made. For example, addition of wording such as "Any future development of the sites would require consideration of matters such as ecological surveys, layout, residential amenity and flood plain boundaries".

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM15

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant	.	No
Sound - Positively prepared	.	No
Sound - Justified	.	No
Sound - Effective	.	No
Sound - Consistent with national policy	.	No
Complies with the Duty to co-operate	.	No

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Policy SD5 Flood Risk does not appear to have been applied when future safeguarding land has been identified at sites BD 068 & 087 as these sites are already on a known and recognised flood plain with a natural watercourse running adjacent to them.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Reinstate Green Belt status to sites BD 068 & 087 and remove them from safeguarded status as being unsuitable for future development.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

Policy SD5 Flood Risk does not appear to have been applied when future safeguarding land has been identified at sites BD 068 & 087 as these sites are already on a known and recognised flood plain with a natural watercourse running adjacent to them.

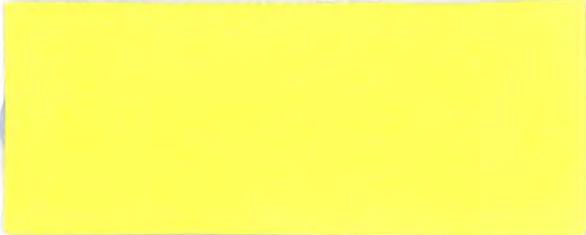

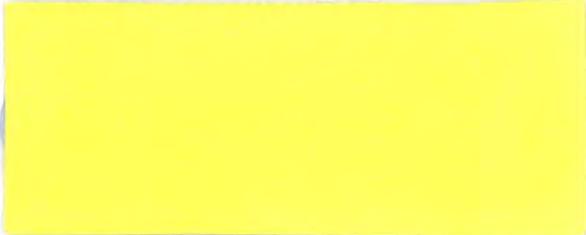

Officer Response

None of the sites are within Flood Zones 2 or 3 - they are adjacent. In their response to this consultation, the Environment Agency say that if the sites come forward for development at a later stage they would require a Level 2 Strategic Flood Risk Assessment because they are within close proximity of the floodplain and this may affect capacity and layout. However, they state that this would not be required for the land to be safeguarded.

Recommendation

To further emphasise that ecology, flooding and other relevant issues will be considered as part of any site allocation, it is suggested that if the Inspector considers it appropriate, an amendment to Policy SS6 could be made. For example, addition of wording such as "Any future development of the sites would require consideration of matters such as ecological surveys, layout, residential amenity and flood plain boundaries".

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM12

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant	.	No
Sound - Positively prepared	.	No
Sound - Justified	.	No
Sound - Effective	.	No
Sound - Consistent with national policy	.	No
Complies with the Duty to co-operate	.	No

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

With reference to the paragraph inserted between 7.50 & 7.51 I wish to make the following comments:
1. All Brownfield sites should be exhausted before consideration is given to the use of Green Belt land
2. Sites BD 068 & 087 are on a known flood plain, susceptible to flooding as was witnessed during the weekend of 25th & 26th October 2019. The sites have been previously assessed and dismissed as unsuitable for development and therefore why has the suitability level been changed from Level 2/3 to Level 1 with no change to the sites having been made?
3. The current infrastructure cannot sustain any increased usage.
4. The stated housing strategy is for increased provision of low cost housing and housing for an ageing population. The location of these sites outside the Town Council boundary would not be suitable for the required housing due to lack of services in the vicinity..

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Reinstatement of Green Belt status to sites BD 062, 068 & 087. Removal of the paragraph from the Local Plan.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

By Email (forward.plans@staffsmoorlands.gov.uk)

Dear Sir/ Madam

MAIN MODIFICATIONS TO THE STAFFORDSHIRE MOORLANDS LOCAL PLAN SUBMISSION VERSION (FEBRUARY 2018) – LAND AT THE MOUNT, LEEK

CBRE Limited has been instructed by Ollerton Estates LLP to submit representations to the proposed Modifications to the Staffordshire Moorlands Local Plan (September 2019) in respect of its landholding at the Mount, Leek (ref. LE128 (a & b)) ('the Site') which forms part of Draft Allocation DSL2 'Land at the Mount, Leek'.

This response relates specifically to Main Modification ref. MM36. It builds on previous representations made to Staffordshire Moorlands District Council (SMDC) in respect of the emerging Local Plan and reflects contributions made during the Examination Hearing Sessions held in October 2018.

Ollerton Estate broadly supports the suggested changes and considers that the Local Plan meets the tests of soundness set out in the National Planning Policy Framework (NPPF). Detailed commentary on the proposed wording of the modifications is provided below.

Main Modification MM36 - 'Policy DSL2 Land at the Mount, Leek'

Modification MM36 proposes amendments to draft Policy DSL2 to reflect matters discussed during the Examination Hearing Session. Of specific interest to Ollerton Estates LLP is the inclusion of a requirement for a comprehensive masterplan to be prepared, including an indicative phasing programme. A key element of this masterplan relates to recreational value. The draft policy now states that proposals should include:

- *"recognition of the recreational value of the Mount to the community and reflect this in masterplanning proposals through the sensitive treatment of Mount Road and Kniveden Lane, appropriately located green infrastructure, recognition of key views and connectivity to public rights of way"*

Whilst Ollerton Estates LLP has no concerns in respect of the overall soundness of the policy or the need to provide a masterplan, indeed an Illustrative Plan has already been prepared, clarification is sought in respect of some of the policy wording proposed. Mount Road is an adopted highway with a speed limit of 60mph which forms the principal means of vehicular access to the Mount. At the Examination the argument was made that Mount Road is of recreational value to the community. Whilst it is acknowledged that local residents utilise the Road to access the area it is important to note that it remains an adopted highway and does not have a formal Local Green Space designation. As such, it is requested that the policy wording be updated to reflect this position, referring instead to the "informal recreational value" of the Mount. This would also have the effect on ensuring consistency with the justification text.

Accompanying the proposed Main Modifications is justification text at Paragraph 9.11 which provides additional clarification on policy DSL2. In terms of recreational value, it states:

"Proposals should recognise the informal recreational value of the Mount by pedestrians, cyclists etc and consider scope for measures which allow for its continued use such as sympathetic highways engineering solutions where appropriate. Developers are also encouraged to have regard to Active Design principles as set out in Sport England October 2015 guidance."

It is considered that the text as drafted intimates that the development of the Mount, in line policy guidelines, would restrict pedestrians and cyclists using the area, which is not the case. On this basis, it is suggested that the paragraph be amended to read (in red):

"Proposals should recognise the informal recreational value of the Mount by pedestrians and cyclists. ~~etc and consider scope for measures which allow for its continued use such as sympathetic highways engineering solutions where appropriate.~~ Appropriate highways engineering solutions should be considered in delivering the allocation, as deemed necessary by the County Highways Authority. Developers are also encouraged to have regard to Active Design principles as set out in Sport England October 2015 guidance."

The other proposed amendments to the policy relating to the need for a noise assessment in relation to adjacent wind turbine; landscape mitigation measures and potential highways improvements are all acknowledged and considered acceptable.

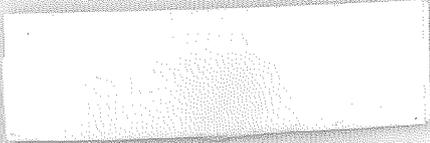

Soundness of the Local Plan

Ollerton Estates LLP strongly supports the allocation of Land at the Mount under policy DSL2 which will deliver much needed new housing in Leek. The Local Plan, including the proposed Main Modifications, is considered to meet the tests of soundness set out in paragraph 182 of the NPPF namely that is positively prepared, justified, effective and consistent with national policy. This representation only seeks minor amendments to specific policy wording/ supporting text.

I trust these representations are in order and will be taken into consideration by SMDC. I would be grateful if you could notify me when the recommendations of the Inspector have been published and the Local Plan adopted.

Should you have any queries or wish to discuss then please do not hesitate to contact me.

Yours faithfully

**Chris Sinton – Associate Director
CBRE LIMITED**

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Sewage works

BD062 and BD068 are both immediately adjacent to a sewage works. Residents who live on Essex Drive, York Close and Long Valley Road already suffer from ad-hoc issues of odour and noise and have registered complaints to United Utilities and SMDC, especially since they learned of plans to build houses even closer. Photographic and video evidence exists of repeated raw sewage flooding into the brook at the end of Essex Drive (13/9/2016) where pressure builds up inside the junction box and the lid blows off, especially following heavy rain. This happened again in August 2019. This junction forms the point where pipes from the east and west sides of the valley come together. The raw sewage contaminates part of BD062 (proposed eastern site access) and sites downstream, including BD068 and BD087.

It is an ongoing and dangerous issue which will continue to affect current residential areas and BD062. People should not live any closer than the current housing provision and the

field needs to be kept as a natural buffer. Local residents should be listened to in this matter instead of repeatedly being ignored. Building adjacent to the sewage works will create even more of a statutory nuisance (noise, odour, sewage flooding) and an unhealthy neighbourhood.

We do not believe the opinion of developers who have interests in these fields that issues of odour and noise can be overcome through design as reported by SMDC Council Planning Officers on 26th June 2019 in the meeting which led to these fields being put forward for 'Safeguarding'.

(<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>) (ie. making a building air-tight does not change the situation outside or inside the home when windows and doors are open). Adding more houses and increasing surface runoff from built up areas will only make this situation worse. In addition to this, climate change increases the likelihood of increased extreme rainfall events in this area which will compound this issue.

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

BIODIVERSITY

Key points are:

- The SMDC Phase 1 Ecological Survey evidence base is being ignored.
- The assessment for Local Wildlife Sites by Ecus (2017) was incorrectly carried out.
- The ranking exercise which was used to inform SMDC Council Members and guide decision making At the SMDC Council Assembly on 26th June 2019 was missing the ecological part of the SMDC evidence base. The methodology employed is unsound.
- Removing the Gillow Heath Fields from the green belt and designating them as 'safeguarded sites' for future development (especially BD062) is in direct conflict with the emerging Biddulph Neighbourhood Plan which has a more recent and detailed evidence base which has designated BD062 as Local Greenspace. This had already passed through two local public consultations, which SMDC was well aware of.

Details for the above points:

Biodiversity - The SMDC Local Plan Phase 1 Habitat Survey (Site BD062 / FID122, 2014) concluded " *...the site is not recommended for potential development...*" [1] and that the site is " *...very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site*" (<https://www.staffsmoorlands.gov.uk/article/1368/Ecological-studies>).

The site is a wet meadow/grassland and plays a key role in natural flood management in a key position at the bottom of the valley. It lies within the species rich farmland zone (Staffordshire Moorlands Biodiversity Opportunities Map) and has been mapped as part of a major Wildlife Corridor by SMDC Map7.5 pg.77

(https://www.staffsmoorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10_SMDC_Green_Infrastructure_Strategy_May_2018.pdf)

The emerging Biddulph Neighbourhood Plan commissioned external consultants to provide additional detail and evidence for wildlife corridors and potential Local Wildlife Sites across the Biddulph Parish. The mapping for BD062 indicates semi-natural grassland habitat and found to be sited in an important location bringing together two key wildlife corridors - that of the Biddulph Brook and the Biddulph Valley Way (<https://biddulph.co.uk/neighbourhood-plan/>).

The entire ecological evidence base was missed out of the assessment and ranking exercise carried out by SMDC and reported to Council Members on 26th June 2019 which led to the designation of these fields as 'Safeguarded'. The sources used for the exercise are listed and ecological assessments are missing

(<https://democracy.staffsmoorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>). This omission is then reflected in the assessment tables in Appendix C and Appendix D and the conclusions drawn (which are unclear and not sound).

This is despite the fact that this information was contained within the previous Sustainability Appraisal Report which accompanied the local plan submission version (Feb 2018) where it was reported that BD062 was 'deemed to have ecological value.'

Only evidence regarding the Green belt review, Landscape Sensitivity, Heritage impact and Agricultural classification was included alongside other economic and development criteria (Options Assessment Tables list pg.30

<https://democracy.staffsmoorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>). The land classification used in this SMDC report on 26th June 2019 is also wrong for all 3 sites in Gillow Heath. They were reported to be urban/industrial land when in fact they are classed as agricultural grassland on the Dudley Stamp Land Use Classification system (Magic Map (<https://magic.defra.gov.uk/MagicMap.aspx>) and a quick search on google earth reveals that they are indeed semi-natural habitat (BD062) or agricultural grassland (BD068 / BD087).

Ignoring the ecology in this decision making process totally disregards any value that semi-natural habitats provide for biodiversity and for natural flood management. This contradicts Section 40 of the *Natural Environment and Rural Communities Act 2006*, which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity.

Sites also need to be considered on an individual basis. Ranking and considering sites as a group leads to misleading conclusions, which is evidenced in the report given to SMDC Council Members on 26th June 2019. Examples where this is misleading include suggesting that all sites are within 800m of the town centre when they clearly are not at Gillow Heath. The ranking method is unsound.

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access road
 Marsh Green Road does not meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy. The road is too narrow & there is a pinch point over the bridge on Marsh Green Road before the access to BD067. Marsh Green Road is too narrow along its total length & has no footpath for most of its length. Road Widening will require the compulsive purchase of gardens near its junction with Congleton Road
 Marsh Green Road falls below the minimum required of distributor roads by the Residential Design Guide. Within the Guide it is clarified that minimum acceptable local distributor roads width must be 6.7m; Marsh Green Road is 3.25m wide, therefore not meeting the minimum requirements (Residential Design Guide. Supplementary Planning Guidance on Design Quality in Residential Areas Staffordshire County and District Councils 2000).

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues
 A neighbour was creating a soak away for rainwater run-off in his garden, at a site only 2.5 metres from BD068 he discovered that beneath a thin layer of heavy clay, there is a deep deposit of very soft running sand. Photographic evidence is attached. The presence of running sand is confirmed by the British Geological Survey who made the following statement:-

“Some rocks can contain loosely-backed sandy layers that can become fluidised by water flowing through them. Such sand can ‘run’, removing supported overlying buildings and causing potential damage.

Running sand hazards can occur where excavations in the sand go below the water table

Where springs occur at the base of sand outcrops, around leaking drains or mains water supply pipes or in entire sand bodies if vibrated (liquefaction).

A property affected by running sand may experience the following problems:

Access paths and roads may be broken & disrupted.

Service connections to water, gas & electricity supplies may break

Structural damage to foundations & to the fabric of the building if uneven sinking occurs under the foundations"

Construction on this site Could allow the sand to run causing subsidence & damage to existing properties in Portland Drive, for which consequential damage SMDC may be partly liable. All of these factors would mean that any housing or infrastructure to support the housing on this site, BD068, would not be capable of being insured. Thus with no building insurance available to the proposed houses, there would be no mortgage available. Who would be responsible for the public liability insurance on this site

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph
 Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How can you help?

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the [Local Plan website](#) and in the [Statement of Representations Procedure Document](#) on the SMDC website.

If you would prefer to make a representation by yourself please email forward.plans@staffsmoorlands.gov.uk or by post to Freepost RRLJ-XCTC-JBZK, Forward Plans, Staffordshire Moorlands District Council, Regeneration Services, Moorlands House, Stockwell Street, Leek, ST13 6HQ. **Please make sure you include your name and address.**

For more information visit www.cheddletonresidents.org

PAULINE SPOONER

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment *once this valuable, beautiful visual open space is gone, it will be gone forever. Replaced by a housing estate which would be tragic. We, as a community have enjoyed the space & the views of the beautiful church for generations and it should be preserved for future generations. If we were to lose it the school children, walkers & villagers will no longer be able to walk the gully in serenity, tranquility & more importantly safety. There are beautiful wild flowers to enjoy and a wealth of wild life. We cannot and should not have to lose such a beautiful spot. It means so much to all of us and its loss would be tragic. Cheddleton would become one large village with no tranquil, beautiful division.*

Staffordshire Moorlands Local Plan Examination

MAIN MODIFICATIONS CONSULTATION - SEPTEMBER 2019

Representations Form

Guidance Notes

Please ensure that you have read the accompanying 'Statement of Representations Procedure' before completing this form.

The Local Plan Main Modifications Schedule and related documents, including; the Sustainability Appraisal of Main Modifications, Biddulph options assessment, Sustainability Appraisal of Alternative Development Options for Biddulph, Housing Implementation Strategy, Equalities Impact Assessment, Tunstall Road Masterplan Executive Summary and Wharf Road Masterplan Executive Summary can be viewed on the District Council's Main Modifications consultation webpage, Council offices and local libraries.

Website: <http://www.staffsmoorlands.gov.uk/localplan>

Council offices:

- Leek** Moorlands House, Stockwell Street, Leek, Staffordshire, ST13 6HQ (8.45am - 5.15pm Monday - Thursday and 8.45am - 4.45pm on Friday)
- Cheadle** Councils Connect, 15a-17 High Street, Cheadle, Staffordshire, ST10 1AA (9.00am - 12.30pm & 1.00pm - 5.00pm on Monday, Wednesday and Friday)
- Biddulph** Town Hall, High Street, Biddulph, Staffordshire, ST8 6AR (9.00am - 5.00pm Monday – Friday)

Please return this form by **5pm on 31 October 2019** to the email or postal address given below or by completing the online questionnaire at : <http://www.staffsmoorlands.gov.uk/localplan>

Email: forward.plans@staffsmoorlands.gov.uk

Post: Freepost RRLJ-XCTC-JBZK, Forward Plans, Staffordshire Moorlands District Council, Regeneration Services, Moorlands House, Stockwell Street, Leek, ST13 6HQ

Part A – Personal details and notifications

	Personal details	Agent's details (if applicable)
Title	Mr	
First name	Rajvir	
Last name	Bahey	
Job title (if applicable)	Planning Manager	
Organisation (if applicable)	Sport England	
Address line 1	Sport England	
Address line 2	Sports Park, 3 Oakwood Drive	
Address line 3	Loughborough	
Address line 4		
Post code	LE11 3QF	
Telephone number	07879488344	
Email address	Planning.south@sportengland.org	

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice> .

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM31
------------------------	------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant		
Sound - Positively prepared		
Sound - Justified		
Sound - Effective		X
Sound - Consistent with national policy		X
Complies with the Duty to co-operate		

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Sport England supports the insertion of a new paragraph related to measures to securing replacement playing field provision, which is consistent with National Planning Policy Framework paragraph 97 and Sport England's Playing Fields Policy Exception E4

<https://www.sportengland.org/media/12940/final-playing-fields-policy-and-guidance-document.pdf>.

However, the addition of new paragraph 8.105 is not supported as it is not consistent with the policy related to the protection of open space, recreational land and buildings including playing fields and amenity open space from development, as set out within Policy C2 and NPPF paragraph 97. The approach is also not consistent with Sport England Playing Fields Policy and Guidance.

The provision for an off site financial contribution in circumstance where replacement playing field is not reasonable practicable is not one of the exceptions contained within Policy C2 and NPPF paragraph 97 (and Sport England's Playing Fields Policy and Guidance). It is also unclear as to the circumstances when it is deemed "not practicable" to make like for like replacement playing field provision. Therefore inconsistencies could arise as to when replacement provision is provided or not thus the policy is not deemed to be effective in ensure the protection of playing field land.

It should be noted that the Playing Pitch Strategy provides an identification of pitch markings on a playing field at a point in time. A playing pitch could be marked out on a larger playing field area capable of accommodating alternative pitch markings to meet curricular and community use demand. Therefore the supporting text of Policy C2 should not solely focus on the potential loss a playing pitch but on the impact on the playing field as a whole.

(Continue on a separate sheet / expand box if necessary)

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Sport England considers that the additional explanation text as set out below should be deleted as it is not consistent with Policy C2 and NPPF paragraph 97. The removal of the wording would also ensure the effective and consistent approach to the protection of playing field land.

NEW Where part of a playing pitch is lost from school expansion, it may be the case that the requirement for replacement provision will be greater than the equivalent land lost and equal to that of the whole playing pitch that has been impacted by the development. This is to say that the loss of part of a playing pitch may render the whole pitch area as having being “lost” to its playing purpose and a requirement for equal replacement of that pitch may be required under the advice of the 2017 Playing Pitch Strategy. These potential losses will be considered in the round so that they can be dealt with on a strategic basis as part of the Council’s District-wide Action Plan.

NEW/8.105 Where like for like replacement of school playing field or playing pitches as a result of development is not practicable, financial contributions may be sought for alternative sport and recreation provision.

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary x

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process *(please select all that apply)*

Further hearing session (if required)	x
Publication of the Inspector's Final Report	x
Adoption of the Local Plan.	x

Dear Sir/Madam

Please see below my reasons for objecting to the current modifications to the local plan. They mainly relate to the field BD062 and green space surrounding the sewage works in Gillow Heath.

ISSUE 1.Sewage works

BD062 and BD068 are both immediately adjacent to a sewage works. Residents who live on Essex Drive, York Close and Long Valley Road already suffer from ad-hoc issues of odour and noise and have registered complaints to United Utilities and SMDC, especially since they learned of plans to build houses even closer. Photographic and video evidence exists of repeated raw sewage flooding into the brook at the end of Essex Drive (13/9/2016) where pressure builds up inside the junction box and the lid blows off, especially following heavy rain. This happened again in August 2019. This junction forms the point where pipes from the east and west sides of the valley come together. The raw sewage contaminates part of BD062 (proposed eastern site access) and sites downstream, including BD068 and BD087.

It is an ongoing and dangerous issue which will continue to affect current residential areas and BD062. People should not live any closer than the current housing provision and the field needs to be kept as a natural buffer. Local residents should be listened to in this matter instead of repeatedly being ignored. Building adjacent to the sewage works will create even more of a statutory nuisance (noise, odour, sewage flooding) and an unhealthy neighbourhood.

We do not believe the opinion of developers who have interests in these fields that issues of odour and noise can be overcome through design as reported by SMDC Council Planning Officers on 26th June 2019 in the meeting which led to these fields being put forward for 'Safeguarding' (<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CId=284&MIId=1368&Ver=4>) (ie. making a building air-tight does not change the situation outside or inside the home when windows and doors are open). Adding more houses and increasing surface run-off from built up areas will only make this situation worse. In addition to this, climate change increases the likelihood of increased extreme rainfall events in this area which will compound this issue.

20191026 081719

Raw sewage overflowing at the drain junction box on BD062 (eastern access point off Essex Drive) on 25 and 26th ...

ISSUE 2. BIODIVERSITY

Key points are:

- The SMDC Phase 1 Ecological Survey evidence base is being ignored.
- The assessment for Local Wildlife Sites by Ecus (2017) was incorrectly carried out.
- The ranking exercise which was used to inform SMDC Council Members and guide decision making At the SMDC Council Assembly on 26th June 2019 was missing the ecological part of the SMDC evidence base. The methodology employed is unsound.
- Removing the Gillow Heath Fields from the green belt and designating them as 'safeguarded sites' for future development (especially BD062) is in direct conflict with the emerging Biddulph Neighbourhood Plan which has a more recent and detailed evidence base which has designated BD062 as Local Greenspace. This had already passed through two local public consultations, which SMDC was well aware of.

Details for the above points:

Biodiversity - The SMDC Local Plan Phase 1 Habitat Survey (Site BD062 / FID122, 2014) concluded "...the site is not recommended for potential development..."^[1]and that the site is "...very well connected to other biodiverse habitats through hedgerows, scrub, broad-leaved woodland and running water which accentuates the value of the site" <https://www.staffsmoorlands.gov.uk/article/1368/Ecological-studies>).

The site is a wet meadow/grassland and plays a key role in natural flood management in a key position at the bottom of the valley. It lies within the species rich farmland zone (Staffordshire Moorlands Biodiversity Opportunities Map) and has been mapped as part of a major Wildlife Corridor by SMDC Map7.5 pg.77 (<https://www.staffsmoorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10>

[SMDC Green Infrastructure Strategy May 2018.pdf](#))

The emerging Biddulph Neighbourhood Plan commissioned external consultants to provide additional detail and evidence for wildlife corridors and potential Local Wildlife Sites across the Biddulph Parish. The mapping for BD062 indicates semi-natural grassland habitat and found to be sited in an important location bringing together two key wildlife corridors – that of the Biddulph Brook and the Biddulph Valley Way (<https://biddulph.co.uk/neighbourhood-plan/>).

The entire ecological evidence base was missed out of the assessment and ranking exercise carried out by SMDC and reported to Council Members on 26th June 2019 which led to the designation of these fields as 'Safeguarded'. The sources used for the exercise are listed and ecological assessments are missing (<https://democracy.staffsmoorlands.gov.uk/ieListDocuments.aspx?CId=284&MIId=1368&Ver=4>). This omission is then reflected in the assessment tables in Appendix C and Appendix D and the conclusions drawn (which are unclear and not sound).

This is despite the fact that this information was contained within the previous Sustainability Appraisal Report which accompanied the local plan submission version (Feb 2018) where it was reported that BD062 was 'deemed to have ecological value.'

Only evidence regarding the Green belt review, Landscape Sensitivity, Heritage impact and Agricultural classification was included alongside other economic and development criteria (Options Assessment Tables list pg.30 <https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CId=284&MIId=1368&Ver=4>). The land classification used in this SMDC report on 26th June 2019 is also wrong for all 3 sites in Gillow Heath. They were reported to be urban/industrial land when in fact they are classed as agricultural grassland on the Dudley Stamp Land Use Classification system (Magic Map (<https://magic.defra.gov.uk/MagicMap.aspx>) and a quick search on google earth reveals that they are indeed semi-natural habitat (BD062) or agricultural grassland (BD068 / BD087).

Ignoring the ecology in this decision making process totally disregards any value that semi-natural habitats provide for biodiversity and for natural flood management.

This contradicts Section 40 of the *Natural Environment and Rural Communities Act 2006*, which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity.

Sites also need to be considered on an individual basis. Ranking and considering sites as a group leads to misleading conclusions, which is evidenced in the report given to SMDC Council Members on 26th June 2019. Examples where this is misleading include suggesting that all sites are within 800m of the town centre when they clearly are not at Gillow Heath. The ranking method is unsound.

ISSUE 3: Community access

The local community have had unfettered access to this site since the estate was built. For over 40 years, there has been total open access and the land has been used by local residents for events and walking dogs. As recently as 7th July 2019 (and repeatedly since) local residents organised a work party to clear the overgrown footpaths which cross this site and have been doing this for over 40 years. This land has been designated as Local Greenspace by the emerging Biddulph Neighbourhood Plan (currently undergoing REG14 consultation) as it was found to meet the criteria required (<https://biddulph.co.uk/neighbourhood-plan/>).

The field was regularly used for fancy dress parades and community "get togethers" including; bonfire night, Royal weddings.

ISSUE 4 - Access roads

Neither the *distributor road* (Mow Lane) nor the *feeder roads* (Essex Drive and York Close) meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane to the east and west of the access to BD062, and a new sewage pump on Mow Lane all of which reduce the feeder road to a single carriageway in at least 3 locations. There is no alternative access to BD062.

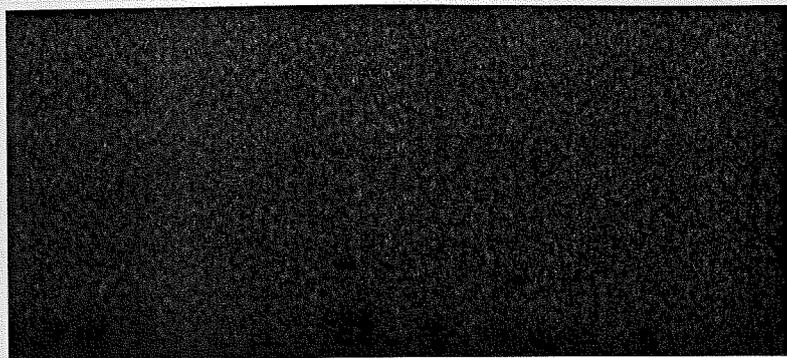

The two junctions (Mow Lane & Marsh Green Road) from the A527, which potentially provide access to the sites are highlighted as critical junctions, where there is particular concern over traffic safety and congestion.

Developing here will add pressure to these junctions, as well as increasing traffic volume on mow lane.

Planning permission has been refused on highways grounds in the past and the situation has only got worse with the creation of the third pinch-point on Mow Lane. **The actual distributor road width (Mow Lane) falls below the minimum required of distributor roads by the Residential Design Guide.** Within the Guide it is

clarified that minimum acceptable local distributor roads width must be 6.7m; Mow Lane is 4.25m wide, therefore not meeting the minimum requirements (Residential Design Guide. Supplementary Planning Guidance on Design Quality in Residential Areas Staffordshire County and District Councils 2000).

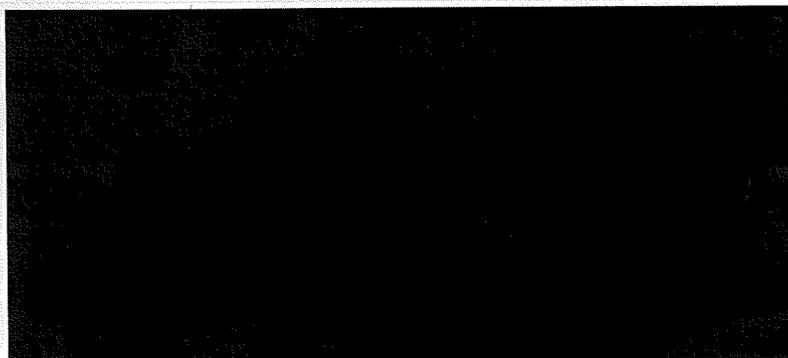

Google Maps

Google Maps

Find local businesses, view maps and get driving directions in Google Maps.

ISSUE 5 - Flooding

BD062 (land at end of York Close / Essex Drive) suffers from a high amount of surface water flooding. It is classed as a wet meadow (evidenced by certain marsh flora) and plays an important role in slowing down rainwater flowing into the Biddulph Brook (natural flood management). This field drains part of the Biddulph

Valley way as evidenced by the Environment Agency flood maps (<https://flood-warning-information.service.gov.uk/long-term-flood-risk/map>). The proposed eastern site access of Essex Drive is in a floodplain. The field should remain as semi-natural habitat and its' role in natural flood management enhanced.

Subject: Plans for Tunstall Road site

Follow Up Flag: Follow up
Flag Status: Flagged

To whom it may concern,

I am writing to voice my opinion on the plans to build on the Tunstall road site. Myself and my family purchased number [REDACTED] 2017. The reason we purchased this property was because of it's location.

We are appealed at the plans to build both industrial and residential properties around us. We would be completely surrounded by developments mainly industrial, We have a petrol station on one side and industrial on the other already. These plans would incase us with industrial at the front as well.

At no point we're we consulted regarding these plans. I was in formed by a friend who lives in Farnham of the planned consultation at the Knypersley Cricket Club. He received a flyer notifying him of this. Why were the residents of Victoria Row not given a flyer?

All I have spoken to including myself have not received any notices.

I find Staffordshire Moorlands District Councils willingness to simply take land out of green belt to build on a absolute disgrace. This coupled with the lack of information given is a disgraceful display in my opinion.

Finally as you will gather from this email we are strongly apposed to these plans.

Regards

Mr John Sproston and Family.

Re Page 63, Policy SS6 - Biddulph Area Strategy

6. Include areas of 'Safeguarded Land' - BD062, BD068 & BD087

Sound - justified - **NO** - there are errors - parts of the evidence were missed out when decisions on the main modifications were taken

Sound - Effective - **NO** - no, safeguarding here will not work well due to reasons stated below about sewage, wildlife, access etc

Sound - consistent with national policy - **NO** - failing in duty to have regard to biodiversity

Complies with Duty to Co-operate - **NO** - not consulting appropriately with Biddulph Town Council or paying heed to the more recent evidence base of the emerging Biddulph Neighbourhood Plan

Concern 1 - Sewage Works - Health Concerns

BD062 and BD068 are both immediately adjacent to a sewage works. Residents already suffer from ad-hoc issues of odour and noise and have registered complaints to United Utilities and SMDC, especially since they learned of plans to build houses even closer. Photographic and video evidence exists of repeated raw sewage flooding the brook at the end of Essex Drive (13/9/16) where pressure builds up inside the junction box and the lid blows off, especially in heavy rain. This happened again in August 2019. This junction forms the point where pipes from the east and west sides of the valley come together. The raw sewage contaminates part of BD062 (proposed eastern site access) and sites downstream, including BD068 and BD087.

It is an ongoing and dangerous issue which will continue to affect current residential areas and BD062. People should not live any closer than the current housing provision and the field needs to be kept as a natural buffer.

We do not believe the opinion of developers who have interests in these fields that issues of odour and noise can be overcome through design as reported by SMDV Council Planning Officers on 26th June 2019 which led to these fields being put forward for 'Safeguarding' (<https://democracy.staffsmoorlands.gov.uk/ieListDocuments.aspx?CIId=284&MIId=1368&Ver=4>) (i.e. making a building air-tight does not change the situation outside or inside the home when windows are doors are open). Adding more houses and increasing surface run off from built up areas will only make this situation worse. In addition to this, climate change increases the likelihood of increased extreme rainfall events in this area which will compound this issue.

In a letter sent on the 27th May 2016 United Utilities stated *"The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"*

Concern 2 - Biodiversity

Key points are:

-The SMDC Phase 1 Ecological Survey evidence base is being ignored.

- The assessment for Local Wildlife Sites by Ecus (2017) was incorrectly carried out.
- The ranking exercise which was used to inform SMDC Council Members and guide decision making At the SMDC Council Assembly on 26th June 2019 was missing the ecological part of the SMDC evidence base. The methodology employed is unsound.
- Removing the Gillow Heath Fields from the green belt and designating them as 'safeguarded sites' for future development (especially BD062) is in direct conflict with the emerging Biddulph Neighbourhood Plan which has a more recent and detailed evidence base which has designated BD062 as Local Greenspace. This had already passed through two local public consultations, which SMDC was well aware of.

Details for the above points:

Biodiversity - The SMDC Local Plan Phase 1 Habitat Survey (Site BD062 / FID122, 2014) concluded *"...the site is not recommended for potential development..."* [1] and that the site is *"...very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site"*

<https://www.staffsmoorlands.gov.uk/article/1368/Ecological-studies>).

The site is a wet meadow/grassland and plays a key role in natural flood management in a key position at the bottom of the valley. It lies within the species rich farmland zone (Staffordshire Moorlands Biodiversity Opportunities Map) and has been mapped as part of a major Wildlife Corridor by SMDC Map7.5 pg.77

<https://www.staffsmoorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10>

[SMDC Green Infrastructure Strategy May 2018.pdf](https://www.staffsmoorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10))

The emerging Biddulph Neighbourhood Plan commissioned external consultants to provide additional detail and evidence for wildlife corridors and potential Local Wildlife Sites across the Biddulph Parish. The mapping for BD062 indicates semi-natural grassland habitat and found to be sited in an important location bringing together two key wildlife corridors - that of the Biddulph Brook and the Biddulph Valley Way (<https://biddulph.co.uk/neighbourhood-plan/>).

The entire ecological evidence base was missed out of the assessment and ranking exercise carried out by SMDC and

reported to Council Members on 26th June 2019 which led to the designation of these fields as 'Safeguarded'. The sources used for the exercise are listed and ecological assessments are missing

(<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CID=284&MId=1368&Ver=4>). This omission is then reflected in the assessment tables in Appendix C and Appendix D and the conclusions drawn (which are unclear and not sound)

This is despite the fact that this information was contained within the previous Sustainability Appraisal Report which accompanied the local plan submission version (Feb 2018) where it was reported that BD062 was '*deemed to have ecological value.*'

Only evidence regarding the Green belt review, Landscape Sensitivity, Heritage impact and Agricultural classification was included alongside other economic and development criteria (Options Assessment Tables list pg.30

<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CID=284&MId=1368&Ver=4>). The land classification used in this SMDC report on 26th June 2019 is also wrong for all 3 sites in Gillow Heath. They were reported to be urban/industrial land when in fact they are classed as agricultural grassland on the Dudley Stamp Land Use Classification system (Magic Map (<https://magic.defra.gov.uk/MagicMap.aspx>) and a quick search on google earth reveals that they are indeed semi-natural habitat (BD062) or agricultural grassland (BD068 / BD087).

Ignoring the ecology in this decision making process totally disregards any value that semi-natural habitats provide for biodiversity and for natural flood management.

This contradicts Section 40 of the Natural Environment and Rural Communities Act 2006, which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity.

Sites also need to be considered on an individual basis. Ranking and considering sites as a group leads to misleading conclusions, which is evidenced in the report given to SMDC Council Members on 26th June 2019. Examples where this is misleading include suggesting that all sites are within 800m of the town centre when they clearly are not at Gillow Heath. The ranking method is unsound.

ISSUE 3: Community access

The local community have had unfettered access to this site since the estate was built. For over 40 years, there has been total open access and the land has been used by local residents for events and walking dogs. As recently as 7th July 2019 (and repeatedly since) local residents organised a work party to clear the overgrown footpaths which cross this site and have been doing this for over 40 years. This land has been designated as Local Greenspace by the emerging Biddulph Neighbourhood Plan (currently undergoing REG14 consultation)

as it was found to meet the criteria required (<https://biddulph.co.uk/neighbourhood-plan/>).

ISSUE 4 - Access roads

Neither the *distributor road* (Mow Lane) nor the *feeder roads* (Essex Drive and York Close) meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane to the east and west of the access to BD062, and a new sewage pump on Mow Lane all of which reduce the feeder road to a single carriageway in at least 3 locations. There is no alternative access to BD062.

Planning permission has been refused on highways grounds in the past and the situation has only got worse with the creation of the third pinch-point on Mow Lane. **The actual distributor road width (Mow Lane) falls below the minimum required of distributor roads by the Residential Design Guide.** Within the Guide it is clarified that minimum acceptable local distributor roads width must be 6.7m; Mow Lane is 4.25m wide, therefore not meeting the minimum requirements (Residential Design Guide. Supplementary Planning Guidance on Design Quality in Residential Areas Staffordshire County and District Councils 2000).

Access to BD068 & BD087 - Road Safety issues.

Public safety issue - The land proposed for the access road for BD068 & BD087 and the bridge on to BD087 is only 1.5m above normal river height and we know that in the latest flash flood, water reached 2.6m. This land has been identified as Flood Risk 2/3. It is the only access road and bridge on to BD068 and BD087 both enclosed sites. What happens in a flash flood? Will there need to be an Emergency Evacuation Plan in place? Have the emergency services been involved in the pre selection of these sites?

The maximum rise of the river during a flash flood is 2.6m (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6m wide (4m + 2m) single access road and bridge on to these sites, a support wall will have to be built along the river bank. The access road on to BD087 is on the narrow side of the river bank approx 10m wide. Has an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible, given the ground condition is marsh land?

Surely BD068 & BD087 should be dismissed as sites from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested parties (not just the site owner) and provided all the necessary information, including a SFRA Level 2 Flood Risk Assessment, Public Safety Risk Report, Soil sample reports and a SCC Transport report? This should provide the necessary information to ensure that BD068 & BD087 could even be put forward for future planning permission?

ISSUE 5 - Flooding

BD062 (land at end of York Close / Essex Drive) suffers from a high amount of surface water flooding. It is classed as a wet meadow (evidenced by certain marsh flora) and plays an important role in slowing down rainwater flowing into the Biddulph Brook (natural flood management). This field drains part of the Biddulph Valley way as evidenced by the Environment Agency flood maps (<https://flood-warning-information.service.gov.uk/long-term-flood-risk/map>). The proposed eastern site access of Essex Drive is in a floodplain. The field should remain as semi-natural habitat and its' role in natural flood management enhanced.

Concern 6 - Out of date information used to develop the Modified Plan

On June 26th 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had no objections to these sites, however, no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified plan reintroduced sites BD062, BD068 & BD087.

Past information supplied to the SMDC by the Environmental Agency stated *"When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted."*

It was also stated at this meeting that they used findings from 2014, 2015 & 2026 to justify their developmet/conclusion to support the modified local plan. This excluded information from 2017, 2018 & 2019 - why?

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood Risk Analysis for BD087, however, when checking with the Environmental Agency (2nd September 2019), this has not been completed. There is only a SFRA Level 1 on record?

In a letter dated 26th August 2015 the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before these sites. BD062, BD068 & BD087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only identified 12 sites of the original housing plan in 2014 of which there was 27. The 3 sites chosen as level 1, BD062, BD068 & BD087, were all considered at great length and excluded.

- The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector - Reason for rejection - a site called BDNEW was to be removed from the Local Plan as it was Green Belt land. All 3 of the above sites are all on Green Belt land.
- In the 2015 Green Belt report commissioned by the SMDC stated that all 3 sites should only be considered under Exceptional circumstances but the same report stated that land to the south of Akesmoor Lane on which BDNEW is situated should be considered for consideration for future development. Why has this report not been used as a factual base for the development of Biddulph?
- Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up to date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potentially 3-5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Kind Regards

Sansom, Claire

Re Page 63, Policy SS6 - Biddulph Area Strategy

6. Include areas of 'Safeguarded Land' - BD062, BD068 & BD087

Sound - justified - **NO** - there are errors - parts of the evidence were missed out when decisions on the main modifications were taken

Sound - Effective - **NO** - no, safeguarding here will not work well due to reasons stated below about sewage, wildlife, access etc

Sound - consistent with national policy - **NO** - failing in duty to have regard to biodiversity

Complies with Duty to Co-operate - **NO** - not consulting appropriately with Biddulph Town Council or paying heed to the more recent evidence base of the emerging Biddulph Neighbourhood Plan

Concern 1 - Sewage Works - Health Concerns

BD062 and BD068 are both immediately adjacent to a sewage works. Residents already suffer from ad-hoc issues of odour and noise and have registered complaints to United Utilities and SMDC, especially since they learned of plans to build houses even closer. Photographic and video evidence exists of repeated raw sewage flooding the brook at the end of Essex Drive (13/9/16) where pressure builds up inside the junction box and the lid blows off, especially in heavy rain. This happened again in August 2019. This junction forms the point where pipes from the east and west sides of the valley come together. The raw sewage contaminates part of BD062 (proposed eastern site access) and sites downstream, including BD068 and BD087.

It is an ongoing and dangerous issue which will continue to affect current residential areas and BD062. People should not live any closer than the current housing provision and the field needs to be kept as a natural buffer.

We do not believe the opinion of developers who have interests in these fields that issues of odour and noise can be overcome through design as reported by SMDV Council Planning Officers on 26th June 2019 which led to these fields being put forward for 'Safeguarding'
(<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CIId=284&MIId=1368&Ver=4>)(i.e. making a building air-tight does not change the situation outside or inside the home when windows are doors are open). Adding more houses and increasing surface run off from built up areas will only make this situation worse. In addition to this, climate change increases the likelihood of increased extreme rainfall events in this area which will compound this issue.

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

Concern 2 - Biodiversity

Key points are:

- The SMDC Phase 1 Ecological Survey evidence base is being ignored.
- The assessment for Local Wildlife Sites by Ecus (2017) was incorrectly carried out.
- The ranking exercise which was used to inform SMDC Council Members and guide decision making At the SMDC Council Assembly on 26th June 2019 was missing the ecological part of the SMDC evidence base. The methodology employed is unsound.
- Removing the Gillow Heath Fields from the green belt and designating them as 'safeguarded sites' for future development (especially BD062) is in direct conflict with the emerging Biddulph Neighbourhood Plan which has a more recent and detailed evidence base which has designated BD062 as Local Greenspace. This had already passed through two local public consultations, which SMDC was well aware of.

Details for the above points:

Biodiversity - The SMDC Local Plan Phase 1 Habitat Survey (Site BD062 / FID122, 2014) concluded "...the site is not recommended for potential development..."^[1]and that the site is "...very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site"
<https://www.staffs Moorlands.gov.uk/article/1368/Ecological-studies>).

The site is a wet meadow/grassland and plays a key role in natural flood management in a key position at the bottom of the valley. It lies within the species rich farmland zone (Staffordshire Moorlands Biodiversity Opportunities Map) and has been mapped as part of a major Wildlife Corridor by SMDC Map7.5 pg.77

([https://www.staffs Moorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10 SMDC Green Infrastructure Strategy May 2018.pdf](https://www.staffs Moorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10_SMDC_Green_Infrastructure_Strategy_May_2018.pdf))

The emerging Biddulph Neighbourhood Plan commissioned external consultants to provide additional detail and evidence for wildlife corridors and potential Local Wildlife Sites across the Biddulph Parish. The mapping for BD062 indicates semi-natural grassland habitat and found to be sited in an important location bringing together two key wildlife corridors - that of the Biddulph Brook and the Biddulph Valley Way (<https://biddulph.co.uk/neighbourhood-plan/>).

The entire ecological evidence base was missed out of the assessment and ranking exercise carried out by SMDC and reported to Council Members on 26th June 2019 which led to the designation of these fields as 'Safeguarded'. The sources used for the exercise are listed and ecological assessments are missing (<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CIId=284&MId=1368&Ver=4>). This omission is then reflected in the assessment tables in Appendix C and Appendix D and the conclusions drawn (which are unclear and not sound)

This is despite the fact that this information was contained within the previous Sustainability Appraisal Report which accompanied the local plan submission version (Feb 2018) where it was reported that BD062 was 'deemed to have ecological value.'

Only evidence regarding the Green belt review, Landscape Sensitivity, Heritage impact and Agricultural classification was included alongside other economic and development criteria (Options Assessment Tables list pg.30

<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CID=284&MI d=1368&Ver=4>). The land classification used in this SMDC report on 26th June 2019 is also wrong for all 3 sites in Gillow Heath. They were reported to be urban/industrial land when in fact they are classed as agricultural grassland on the Dudley Stamp Land Use Classification system (Magic Map (<https://magic.defra.gov.uk/MagicMap.aspx>)) and a quick search on google earth reveals that they are indeed semi-natural habitat (BD062) or agricultural grassland (BD068 / BD087).

Ignoring the ecology in this decision making process totally disregards any value that semi-natural habitats provide for biodiversity and for natural flood management.

This contradicts Section 40 of the *Natural Environment and Rural Communities Act 2006*, which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity.

Sites also need to be considered on an individual basis. Ranking and considering sites as a group leads to misleading conclusions, which is evidenced in the report given to SMDC Council Members on 26th June 2019. Examples where this is misleading include suggesting that all sites are within 800m of the town centre when they clearly are not at Gillow Heath. The ranking method is unsound.

ISSUE 3: Community access

The local community have had unfettered access to this site since the estate was built. For over 40 years, there has been total open access and the land has been used by local residents for events and walking dogs. As recently as 7th July 2019 (and repeatedly since) local residents organised a work party to clear the overgrown footpaths which cross this site and have been doing this for over 40 years. This land has been designated as Local Greenspace by the emerging Biddulph Neighbourhood Plan (currently undergoing REG14 consultation) as it was found to meet the criteria required

(<https://biddulph.co.uk/neighbourhood-plan/>).

ISSUE 4 - Access roads

Neither the *distributor road* (Mow Lane) nor the *feeder roads* (Essex Drive and York Close) meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane to the east and west of the access to BD062, and a new sewage pump on Mow Lane all of which reduce the feeder road to a single carriageway in at least 3 locations. There is no alternative access to BD062.

Planning permission has been refused on highways grounds in the past and the situation has only got worse with the creation of the third pinch-point on Mow Lane. **The actual distributor road width (Mow Lane) falls below the minimum required of distributor roads by the Residential Design Guide.** Within the Guide it is clarified that minimum acceptable local distributor roads width must be 6.7m; Mow Lane is 4.25m wide, therefore not meeting the minimum requirements (Residential Design Guide. Supplementary Planning Guidance on Design Quality in Residential Areas Staffordshire County and District Councils 2000).

Access to BD068 & BD087 - Road Safety issues.

Public safety issue - The land proposed for the access road for BD068 & BD087 and the bridge on to BD087 is only 1.5m above normal river height and we know that in the latest flash flood, water reached 2.6m. This land has been identified as Flood Risk 2/3. It is the only access road an bridge on to BD068 and BD087 both enclosed sites. What happens in a flash flood? Will there need to be an Emergency Evacuation Plan in place? Have the emergency services been involved in the pre selection of these sites?

The maximum rise of the river during a flash flood is 2.6m (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6m wide (4m + 2m) single access road and bridge on to these sites, a support wall will have to be built along the river bank. The access road on to BD087 is on the narrow side of the river bank approx 10m wide. Has an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible, given the ground condition is marsh land?

Surely BD068 & BD087 should be dismissed as sites from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested parties (not just the site owner) and provided all the necessary information, including a SFRA Level 2 Flood Risk Assessment, Public Safety Risk Report, Soil sample reports and a SCC Transport report? This should provide the necessary information to ensure that BD068 & BD087 could even be put forward for future planning permission?

ISSUE 5 - Flooding

BD062 (land at end of York Close / Essex Drive) suffers from a high amount of surface water flooding. It is classed as a wet meadow (evidenced by certain marsh flora) and plays an important role in slowing down rainwater flowing into the Biddulph Brook (natural flood management). This field drains part of the Biddulph Valley way as evidenced by the Environment Agency flood maps (<https://flood-warning-information.service.gov.uk/long-term-flood-risk/map>). The proposed eastern site access of Essex Drive is in a floodplain. The field should remain as semi-natural habitat and its' role in natural flood management enhanced.

Concern 6 - Out of date information used to develop the Modified Plan

On June 26th 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had no objections to

these sites, however, no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified plan reintroduced sites BD062, BD068 & BD087.

Past information supplied to the SMDC by the Environmental Agency stated *"When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted."*

It was also stated at this meeting that they used findings from 2014, 2015 & 2026 to justify their developmet/conclusion to support the modified local plan. This excluded information from 2017, 2018 & 2019 - why?

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood Risk Analysis for BD087, however, when checking with the Environmental Agency (2nd September 2019), this has not been completed. There is only a SFRA Level 1 on record?

In a letter dated 26th August 2015 the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before these sites. BD062, BD068 & BD087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only identified 12 sites of the original housing plan in 2014 of which there was 27. The 3 sites chosen as level 1, BD062, BD068 & BD087, were all considered at great length and excluded.

- The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector - Reason for rejection - a site called BDNEW was to be removed from the Local Plan as it was Green Belt land. All 3 of the above sites are all on Green Belt land.

- In the 2015 Green Belt report commissioned by the SMDC stated that all 3 sites should only be considered under Exceptional circumstances but the same report stated that land to the south of Akesmoor Lane on which BDNEW is situated should be considered for consideration for future development. Why has this report not been used as a factual base for the development of Biddulph?

- Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up to date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potentially 3-5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Bidduloh

area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Kind Regards

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

FAO Forward Plans
Planning Policy
Staffordshire Moorlands District Council
Moorlands House
Leek
ST13 6HQ

31 October 2019

Delivered by email

Dear Sir / Madam,

**STAFFORDSHIRE MOORLANDS LOCAL PLAN (SUBMISSION VERSION) – MAIN MODIFICATIONS
CONSULTATION**

Turley is instructed by St Modwen Homes to submit the following consultation response to the Main Modifications, which form part of the Staffordshire Moorlands draft Local Plan (Submission Version).

St Modwen Homes own land allocated for mixed use development under Policy DSR1: Blythe Vale, of the submission draft Local Plan. This allocation includes approximately 300 dwellings and 48.5 hectares of employment land adjacent to Blythe Bridge. St Modwen Homes support the allocation of Blythe Vale, which forms a vital contribution to the housing and employment land requirement in Staffordshire Moorlands over the emerging Local Plan period (2014-2033).

With reference to the Schedule of Main Modifications (September 2019) we set out the following comments on behalf of St Modwen Homes, demonstrating their continued support towards the draft Local Plan and providing a few points of confirmation and clarity.

Main Modifications

In relation to Policy DSR1 (Blythe Vale), the Main Modifications (MM46) seek for development at Blythe Vale to comply with a comprehensive masterplan and indicative phasing programme in addition to other relevant Local Plan Policies, which should include further details concerning landscape impacts, green infrastructure and cycle and walking routes. St Modwen Homes support the need to provide sufficient information to accompany major planning applications, including at Blythe Vale as already sought under Policy DSR1.

Housing

The Main Modifications highlight a high shortfall in past housing completions in the District (788 homes at March 2019), hence a 20% buffer is applied along with the 'Liverpool method' to reflect this persistent

9 Colmore Row
Birmingham
B3 2BJ

T 0121 233 0902 turley.co.uk

under delivery and spread the housing shortfall to the year 2033 (MM8). This goes on to state that the overall 6,080 dwelling requirement over the revised Plan period of 2014-2033 should not be viewed as an absolute maximum (Policy SS3: Future Provision and Distribution of Development).

St Modwen Homes are committed to delivering dwellings at Blythe Vale early on in the Plan period (by 2024/2025), as confirmed through the Housing Implementation Strategy consultation of February 2019. This would make a significant contribution towards addressing both the shortfall to date and the identified need for the Plan period, and it is important that the policy framework set in the Plan provides an appropriate framework to support this delivery.

Housing Densities

The Main Modifications (MM20) state under 'Policy H1: New Housing Development' that higher housing densities will be generally appropriate in accessible locations. This would include locations such as at Blythe Vale. Appropriate development densities are also supported by the National Planning Policy Framework ("NPPF")(2019), which seeks for planning policies and decisions to support development which makes efficient use of land (Paragraphs 122 and 123). The Main Modifications go on to specify under 'Policy H2: Housing Allocations' that the provision of 300 dwellings is the "*indicative capacity*" for Blythe Vale as a whole (MM21), and that 182 dwellings are the remainder of this indicative capacity following the approval of 118 dwellings at Phase 1 of Blythe Vale (App Ref. SMD/2017/0512).

St Modwen Homes support the Main Modifications in considering appropriate housing density increases in accessible locations such as Blythe Vale. Consequently, appropriate housing density increases are sought at Blythe Vale, beyond the remaining 182 dwellings allocated, whilst at the same time ensuring that the quality of the propose scheme is not adversely affected. A planning application to increase housing density at Blythe Vale from the approved 118 dwellings to a revised figure of 146 dwellings received a resolution to grant in April 2019 (App Ref. SMD/2018/0790). St Modwen Homes intend to continue this approach of increased housing densities across Blythe Vale as the remaining phases are brought forward. This will support the District's housing supply position and alleviate its historic housing shortfall in an accessible location, as sought through the Main Modifications to Policies SS3, H1 and H2.

Affordable Housing

The Local Plan and Site Allocations Viability Study (2018) identifies Blythe Bridge and Forsbrook (Zone 1) as the lowest value zone in the District in relation to average house price sales (Table 5.7). To add to this, new dwellings in Blythe Bridge and Forsbrook are subject to the highest adopted education contributions in the District, set at £5,679.19 per dwelling (Table 6.5). The Study concludes that "*education contributions at the levels proposed in Zone 1 (ie Blythe Bridge) have a significant impact on viability*", deeming the viability of Blythe Vale to be marginal if any affordable housing provision is sought (Paragraphs 7.21 and 8.11).

The NPPF also requires that for planning policies and decisions to support development by taking into account local market conditions and viability where efficient use of land is proposed (Paragraph 122).

Informed by this, the Main Modifications confirm Blythe Bridge and Forsbrook (Zone 1) to be the lowest value area in the District, within which Blythe Vale is located (MM22). The Main Modifications to 'Policy H3: Affordable Housing' go on to reiterate that the 33% affordable housing provision target is likely to be unviable at Blythe Vale, exacerbated further where developer contributions are sought to other areas (e.g. education). The Main Modifications therefore confirm that the Council will consider lower levels of affordable housing provision, where justified by further up-to-date viability evidence.

St Modwen Homes support these findings and the associated Main Modifications. Development at Blythe Vale is already committed to provide developer contributions, including those relating to

education. Consequently, St Modwen Homes consider the level of affordable housing provision at Blythe Vale to be a matter that will require testing as the development progresses to ensure overall deliverability. Clearly any obligations that are sought will further adversely impact this and ultimately render the scheme unviable and thereby affect its delivery.

Conclusion

On behalf of St Modwen Homes, Turley submit the above response to the Staffordshire Moorlands Main Modifications consultation, with particular focus on Blythe Vale; a mixed use allocation including approximately 300 dwellings adjacent to Blythe Bridge (Policy DSR1). St Modwen Homes own land allocated within Blythe Vale, which forms a vital contribution to the housing and employment land requirement in Staffordshire Moorlands over the emerging Local Plan period (2014-2033).

St Modwen Homes firstly support the Main Modifications in seeking higher housing densities in accessible locations such as Blythe Vale, which will assist the District's housing supply position and alleviate its historic housing shortfall.

St Modwen Homes also support the findings of the Local Plan and Site Allocations Viability Study and associated Main Modifications, which identify Blythe Bridge and Forsbrook (Zone 1) as the lowest value area in the District, within which Blythe Vale is located. The Main Modifications consider the 33% affordable housing provision target to be unviable at Blythe Vale, exacerbated further where developer contributions are sought. This therefore requires careful consideration of the overall level of obligations that are sought from St Modwen Homes as part of any future planning applications to ensure that the scheme is delivered and the housing required to meet an identified need is provided.

St Modwen Homes therefore support the Main Modifications to the draft Local Plan, and are committed to the future delivery of residential development at Blythe Vale, which comprises a vital contribution to the housing land requirement in Staffordshire Moorlands over the emerging Local Plan period (2014-2033).

We trust that these comments will be duly considered as part of the emerging Local Plan process. Should you require any further information, or wish to discuss any aspect of this representation in greater detail, then please do not hesitate to contact me.

Yours sincerely

Peter Hayward

Assistant Planner

peter.hayward@turley.co.uk

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control
 On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.
 Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be built along the river bank. The access road onto BD 087 is on the narrow side of the river bank approximately 10M wide. I believe that an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land. I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

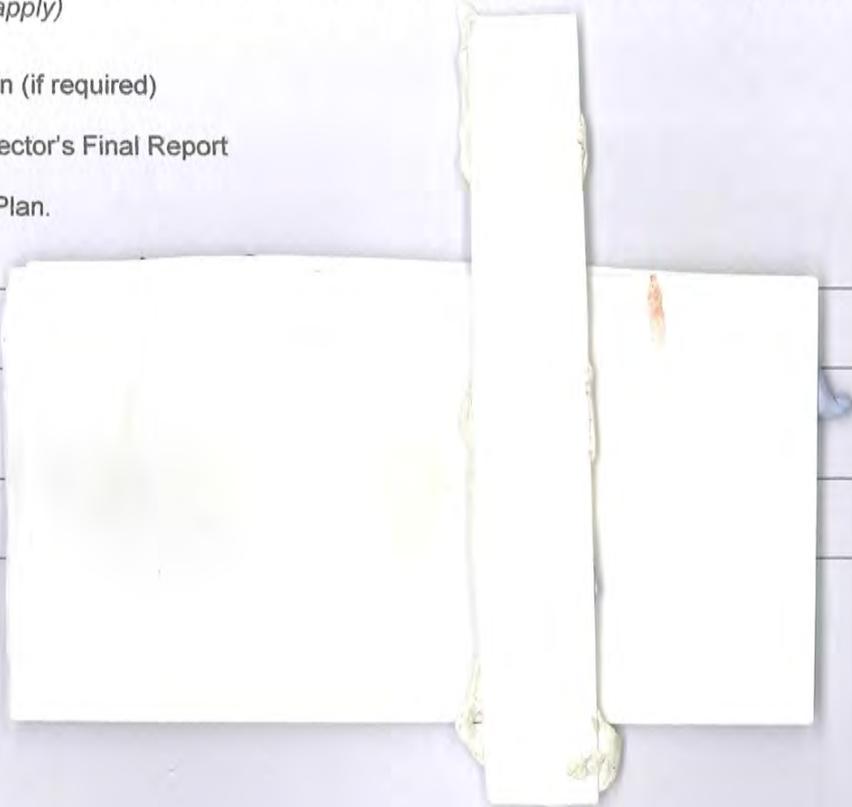

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (please select all that apply)

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Buy in is key to developing any plan – there is no buy into this plan by any of the people in Biddulph – this cannot be dressed up. No due process has been followed. To push this modified local plan through at break neck speed can only lead to an expensive legal outcome. SMDC has had 8 years to get this local plan right, this Modified Local Plan has taken 3 months from 26th June, no public face to face consultation, and a hurried last minute consultation period with almost no one informed. Only the Site Owners have been kept up to date. Why!

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be built along the river bank. The access road onto BD 087 is on the narrow side of

the river bank approximately 10M wide. I believe that an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land. I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Notifications and

Representations must be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Buy in is key to developing any plan – there is no buy into this plan by any of the people in Biddulph – this cannot be dressed up. No due process has been followed. To push this modified local plan through at break neck speed can only lead to an expensive legal outcome. SMDC has had 8 years to get this local plan right, this Modified Local Plan has taken 3 months from 26th June, no public face to face consultation, and a hurried last minute consultation period with almost no one informed. Only the Site Owners have been kept up to date. Why!

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Buy in is key to developing any plan – there is no buy into this plan by any of the people in Biddulph – this cannot be dressed up. No due process has been followed. To push this modified local plan through at break neck speed can only lead to an expensive legal outcome. SMDC has had 8 years to get this local plan right, this Modified Local Plan has taken 3 months from 26th June, no public face to face consultation, and a hurried last minute consultation period with almost no one informed. Only the Site Owners have been kept up to date. Why!

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B - Representation

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

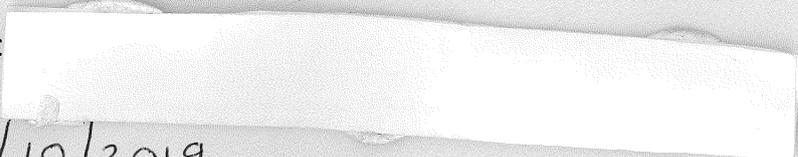

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated "The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works"

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

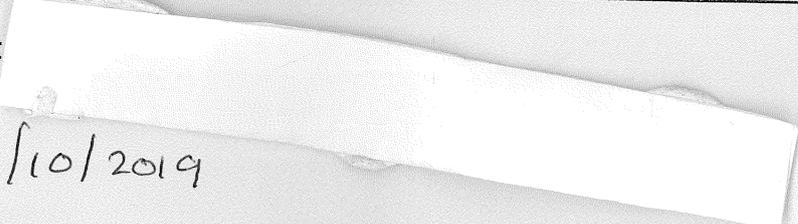

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

<p>No Buy in by the people of Biddulph Short cutting of the Modification selection process is not acceptable.</p> <p>Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?</p> <p>I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.</p>

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. 3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment

PLEASE SEE ATTACHED LETTER.

To whom it may concern

I have lived in the village since 2003 and have found the area of land behind my house - 33 Ostler Lane - and the Gully to be an area of tranquility which should be preserved as the heart and lungs of the village, and is vital to the wellbeing of the residents.

Subject: SMDC Local Plan Main Modifications MM12

Follow Up Flag: Follow up
Flag Status: Flagged

Categories: Yellow Category

Please find below my comments on the Main Modifications to the SMDC Local Plan, MM12. Safeguarding of fields in Gillow Heath.

I notice that you omitted part of your evidence base when you made decisions about these sites on 26th June 2019 at the Council Assembly. You omitted the ecological evidence base and also incorrectly stated that these fields are urban / industrial land, which is incorrect.

The decision to safeguard fields in Gillow Heath needs reconsidering both in light of your errors and in light of the evidence contained within the emerging Biddulph Neighbourhood Plan (REG14 closing 4th November 2019).

The SMDC Main Modifications are not Sound and do not Comply with the Duty to Cooperate.

Yours sincerely,
Mrs Angie Turner

(in case my earlier submission was not clear enough in it's response in the second part of your form, please add this to my earlier response).

Please acknowledge receipt of this response.

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice> .

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference

MM12 and MM21

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	<input type="checkbox"/>
Sound - Positively prepared	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Justified	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Effective	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Sound - Consistent with national policy	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Complies with the Duty to co-operate	<input type="checkbox"/>	<input checked="" type="checkbox"/>

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

This is my response to the local plan main modifications consultation. The plan is not Sound (Justified, Effective, Consistent with national policy) and it does not comply with the Duty to Cooperate. My comments refer to sites within Biddulph Parish.

- **The SMDC Phase 1 Ecological Survey evidence base is being ignored.**

The ranking exercise which was used to inform SMDC Council Members and guide decision making at the SMDC Council Assembly on 26th June 2019 **omitted the SMDC ecological evidence base altogether**. The methodology that led to the identification of 'Safeguarded' fields in Gillow Heath is not sound because the evidence base used was not sound.

<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CId=284&MI d=1368&Ver=4>). The SMDC report '*Appendix 1 Biddulph Options Planning Analysis and Maps*' June 2019 did not consider ecological assessments as part of their ranking exercise at all. The sources used for the exercise are listed on pg.4-5 and **ecological assessments are missing**. This is then reflected in the assessment tables in Appendix C and Appendix D and used to inform decision making.

- **The Agricultural Land Classification is also totally wrong.** All three Gillow Heath fields are stated as being 'urban / industrial land', apparently according to Natural England data

<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CId=284&MI d=1368&Ver=4>). A quick check on Magic Map

<https://magic.defra.gov.uk/MagicMap.aspx>) reveals that all three fields are classed as Grassland/arable on the Dudley Stamp land use classification scheme and this is obviously visible to anyone who has actually visited these sites. The methodology that led to the identification of 'Safeguarded' fields in Gillow Heath is not sound because the evidence base used was not sound.

Common Spotted and Southern Marsh orchid populations on BD062. Photos taken by local resident in 2019. Obviously not urban / industrial land.

- **The original Sustainability Appraisal Report** which accompanied the local plan submission (version Feb 2018) did include an overall assessment (+ / - form of ranking) and did include the ecological evidence base (Section 15.2.3 - sites within the green belt). BD062 York / Essex Drive was '*deemed to have ecological value*' and a negative effect on biodiversity on the site if it was developed (<https://www.staffsmoorlands.gov.uk/article/2861/Sustainability-Appraisal>). This evidence was not carried forward and, therefore was not taken into account as part of the decision making process on 26th June 2019. (<https://democracy.staffsmoorlands.gov.uk/ieListDocuments.aspx?CId=284&MIId=1368&Ver=4>). The methodology that led to the identification of 'Safeguarded' fields in Gillow Heath is not sound because the evidence base used was not sound.
- **Section 40 of the Natural Environment and Rural Communities Act 2006** places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity

(<http://www.legislation.gov.uk/ukpga/2006/16/section/40>). A key purpose of this duty is to embed consideration of biodiversity as an integral part of policy and decision making throughout the public sector as clarified in the guidance on the Natural Environment (<https://www.gov.uk/guidance/natural-environment#biodiversity-geodiversity-and-ecosystems>). **SMDC have failed in this duty.**

- By **omitting the ecological evidence base from decision making**, SMDC are also failing in their ability to deliver their **own Local Plan vision** (Feb 2018 submission version) which states: "*net gains and improvements to biodiversity will be made*" across the Staffordshire Moorlands (pg34 <https://www.staffsmoorlands.gov.uk/localplan>). It is difficult to see how this will be delivered if evidence is being ignored and site allocations for both development and future development (Safeguarding) are not amended to take biodiversity into account.
- The **assessment for Local Wildlife Sites** by Ecus (2017) was **incorrectly carried out**. According to their reported methodology, it was a desk-based exercise only. The methodology applied is not sound (<https://www.staffsmoorlands.gov.uk/media/2397/Extended-Phase-I-Habitat-Surveys--Local-Wildlife-Site-Assessments> [2017/pdf/Extended Phase 1 Habitat Surveys and Local Wildlife Site LWS Assessments.pdf](https://www.staffsmoorlands.gov.uk/media/2397/Extended-Phase-I-Habitat-Surveys--Local-Wildlife-Site-Assessments))
- **Development densities** have not been lowered to take known biodiversity into account throughout any of this local plan process. The evidence base is referred to inconsistently and not on a site-by-site basis. The decision to increase housing densities on Wharf Road (MM21) does not take the findings of the Phase 1 Ecological Surveys into account, nor is this considered in the decision to 'Safeguard' for future development site BD062 (MM12). (<https://democracy.staffsmoorlands.gov.uk/ieListDocuments.aspx?CId=284&MIId=1368&Ver=4>).
- **SMDC is failing in its Duty to cooperate: MM12: Removing the Gillow Heath**

Fields from the green belt and designating them as 'safeguarded sites' (MM12) for future development (especially BD062) is in **direct conflict with the emerging Biddulph Neighbourhood Plan** (REG14 Consultation closing 4th November 2019) which has a more recent and detailed evidence base. This field has been designated as a Local Greenspace following two rounds of local public consultation during 2019 due to existing biodiversity value and unfettered public access for 40 years.

- SMDC is failing in its Duty to cooperate: MM12 (in particular BD062) is in direct conflict with **SMDC's own vision for Biddulph in the Local Plan 2018** Submission version which states: "*The local community will help guide the development of Biddulph with a Neighbourhood Plan*" (pg36 <https://www.staffsmoorlands.gov.uk/localplan>). The SMDC Local Plan (Feb 2018 submission version) clearly recognises that Neighbourhood Plans may be used to "*identify sites for development or protection*" (Section 1.21 pg.10 <https://www.staffsmoorlands.gov.uk/localplan>).
- Removing the Gillow Heath Fields from the green belt and designating them as 'safeguarded sites' MM12 for future development (especially BD062) is in **direct conflict with Spatial Aims, Spatial Objectives and Policies of the new SMDC Local Plan Submission Version** (February 2018).

I will detail each of the aforementioned issues in turn;

1.The 2014 Phase 1 Ecological survey evidence is being ignored. The plan is not sound. (<https://www.staffsmoorlands.gov.uk/article/1368/Ecological-studies>).

SMDC stated (2016):

"The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process"

(<https://www.staffsmoorlands.gov.uk/media/3375/Council-Assembly--Preferred->

- There is no evidence within the final selection of sites (for development sites and for safeguarded sites in the Biddulph area) that SMDC have taken the detailed ecological evidence base into account. There is no evidence that any reduction in density proposed on these sites has been agreed to reflect the biodiversity known to be present. No strategic effort has been applied to the local plan to ensure net gain for biodiversity and the environment (<https://www.gov.uk/guidance/natural-environment#biodiversity-geodiversity-and-ecosystems>).
- The information from the Phase 1 Ecological surveys was totally absent from the discussion within the Planning Officer's recommendation to Members on 26th June 2019 (SMDC Public Reports Pack 260620 19 1830 Council Assembly) which removed fields from Green Belt in Gillow Heath.

(<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CId=284&Mid=1368&Ver=4>) Only evidence regarding the Green belt review, Landscape Sensitivity, Heritage impact and Agricultural classification was included alongside other economic and development criteria (Options Assessment Tables list pg.30). This totally disregards any value that semi-natural habitats provide for biodiversity and for natural flood management purposes. Omitting this vital evidence base illustrates that SMDC have not embedded consideration of biodiversity as an integral part of policy and decision making (<https://www.gov.uk/guidance/natural-environment#biodiversity-geodiversity-and-ecosystems>) and have failed in their duty under the Natural Environment and Rural Communities Act 2006.
- With regard to the 'Safeguarding' of land in Gillow Heath, The Council Assembly report (26th June 2019 Public Reports Pack 260620 19 1830) makes it very clear that this land is for future development purposes as the NPPF is clearly quoted within the SMDC report: "*where necessary, identify in their plans areas of 'safeguarded land' between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period* (NPPF para.85 2012);" (Options Assessment Tables list pg.32). Due to this, the same level of consideration needs to be given to 'safeguarded' land as to any land being considered for development allocation within the current local plan period.
- Sites need to be considered on an individual basis. Ranking and considering sites as a group is a major flaw of the process involved to reach conclusions at the Council

Assembly on 26th June 201. Examples include suggesting that all sites are within 800m of the town centre when they clearly are not, that flooding may affect all sites or that the sewage works will affect all sites. This clearly is not the case and does not allow decision makers to see the issues which affect land on a site by site basis.

Sites of particular concern based on SMDC ecological evidence base

(<https://www.staffsmoorlands.gov.uk/article/1368/Ecological-studies>).

- **Site BD062:** land off York Close / Essex Drive.

The SMDC Local Plan Phase 1 Habitat Survey concluded “...the site is **not recommended for potential development...**”¹ and that the site is “...very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site.” Site FID122:

(<https://www.staffsmoorlands.gov.uk/article/1368/Ecological-studies>).

The site is a wet meadow/grassland and plays a key role in natural flood management in a key position at the bottom of the valley. It lies within the species rich farmland zone (Staffordshire Moorlands Biodiversity Opportunities Map) and has been **mapped as part of a major Wildlife Corridor by SMDC** as part of the local plan process

([https://www.staffsmoorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10 SMDC Green Infrastructure Strategy May 2018.pdf](https://www.staffsmoorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10%20SMDC%20Green%20Infrastructure%20Strategy%20May%202018.pdf)).

BD062 has also been mapped as a wildlife corridor by external consultants providing the evidence base for the Biddulph Neighbourhood Plan

(<https://biddulph.co.uk/neighbourhood-plan/>). Its strength is not only in its rich flora and fauna, but in its position connecting the corridor of the Biddulph Valley Way to the stream network. It is the only semi-natural site which provides this function in the valley which is not interrupted by the A527.

- **BD071 & 71A / FID17 and BD076 / FID25&226:** Wharf road development site

1.38ha of this land was identified as having a strong habitat mosaic of **regional importance**.

In addition to this, mature trees and hedgerows need protection. There is no evidence

in any of the Mater-planning that this value has been taken into account.

- **BD117 / FID210:** land west of the bypass and opposite Victoria Business Park

Mañure trees and hedgerows need protection and built into the design for the site.

2. Local Wildlife Site (LWS) Assessment incorrectly carried out. The methodology is not sound.

- The sites were assessed by Ecus in 2017 using a combination of Lockwood Hall Phase 1 Habitat survey results (September and October 2014) and desk-based data search results according to their stated methodology ([https://www.staffsmoorlands.gov.uk/media/2397/Extended-Phase-I-Habitat-Surveys--Local-Wildlife-Site-Assessments-2017/pdf/Extended Phase 1 Habitat Surveys and Local Wildlife Site LWS Assessments.pdf](https://www.staffsmoorlands.gov.uk/media/2397/Extended-Phase-I-Habitat-Surveys--Local-Wildlife-Site-Assessments-2017/pdf/Extended_Phase_1_Habitat_Surveys_and_Local_Wildlife_Site_LWS_Assessments.pdf))
- In order to consider a site suitable for designation as a Local Wildlife Site, a desk-based exercise is not adequate. A site visit is required at the appropriate time of year for the habitat(s) involved. For meadow/grassland habitats September / October is too late in the season for meadow plants to be visible and multiple seasonal surveys may be required.
- The data Ecus have used originates from the September / October 2014 habitat surveys. The data is 5 years old and, for meadow/grassland habitats, gathered at the wrong time of year. No further site visits have taken place, so any other data sources will also be out of date. The method Ecus have used to determine whether a site is a suitable candidate for LWS designation has not been fit for purpose.
- No sites have been brought forward to the Local Wildlife Partnership for consideration.
- The recently updated **National Guidance on the Natural Environment (MHCLG, July 2019)**, which explains key issues in implementing policy to protect and enhance the natural environment, including local requirements states: *“National planning policy expects plans to identify and map these sites, and to include policies that not only secure their protection from harm or loss but also help to enhance them and their connection to wider ecological networks.”* Paragraph: 013 Reference ID: 8-013-20190721

<https://www.gov.uk/guidance/natural-environment#biodiversity-geodiversity-and-ecosystems>)

3. Habitat mapping within the Biddulph area is lacking, SMDC local plan decisions are being made on an old evidence base and SMDC are failing in their duty to co-operate.

- The SMDC Local Plan is based on a major lack of data with regards to ecological information in the Biddulph Parish, and data which is out of date – less than 10% of the natural landscape had been appropriately mapped in 2017 which indicates a severe lack of investment regarding the value of the natural landscape within the Biddulph parish. This put habitats at a distinct disadvantage in the Biddulph Parish when compared to elsewhere in the District where more of the land has been appropriately surveyed and ecological networks are better understood.
- The emerging Biddulph Neighbourhood Plan has worked with external consultants to start to rectify this, providing a more up to date source of information to which the SMDC local plan should be referring - available on the town council website: <https://biddulph.co.uk/neighbourhood-plan/>). This includes a Nature Recovery Network map, Wildlife Corridor map and Habitat Distinctiveness Map for the Biddulph Neighbourhood Area.
- National Guidance on the Natural Environment, states *“Planning authorities and neighbourhood planning bodies can work collaboratively with other partners, including Local Nature Partnerships, to develop and deliver a strategic approach to protecting and improving the natural environment based on local priorities and evidence.”* <https://www.gov.uk/guidance/natural-environment#biodiversity-geodiversity-and-ecosystems>)

This is the approach that the Biddulph Neighbourhood Plan is taking, but SMDC are not paying any heed to the information contained within this emerging Neighbourhood plan (REG14 consultation closes on 4th November 2019). **SMDC are failing in their Duty to Cooperate.** (<https://biddulph.co.uk/neighbourhood-plan/>).

4. Conflict with the emerging Biddulph Parish Neighbourhood Plan

(<https://biddulph.co.uk/neighbourhood-plan/>).

- The emerging Biddulph Neighbourhood Plan, (REG14 consultation closes 4th November 2019), has been created in general conformity with the emerging SMDC local plan. However, the recent decision by SMDC to remove fields from the greenbelt into a 'safeguarded' category, and the removal of some areas of Local Greenspace has caused conflict (<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?Cid=284&Mid=1368&Ver=4>).
- The Neighbourhood Plan has built on the evidence base used for the SMDC local plan and the maps created by the SMDC Green Infrastructure Strategy (Map 7.5 – Ecological corridors in and around Biddulph pg.77. [https://www.staffs Moorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10 SMDC Green Infrastructure Strategy May 2018.pdf](https://www.staffs Moorlands.gov.uk/media/3355/Green-Infrastructure-Strategy/pdf/22.10%20SMDC%20Green%20Infrastructure%20Strategy%20May%202018.pdf))
- These are described as 'Strategic Corridors' in the SMDC Local Plan submission version 2018 Section 8.114 (<https://www.staffs Moorlands.gov.uk/article/774/The-Local-Plan-2016-2031>).
- The Neighbourhood Plan employed external consultants to build on these corridors firstly by mapping the habitats, and secondly by mapping the ecological corridors in more detail within the Biddulph Parish (<https://biddulph.co.uk/neighbourhood-plan/>).
- These maps clearly indicate a number of strategic ecological corridors, both terrestrial and aquatic, and a key semi-natural site (BD062) where these corridors converge, providing the only safe site for biodiversity to move between the land corridor of the Biddulph Valley Way and the river corridor of the Biddulph Brook without crossing the busy A527, thereby connecting to the ancient woodland and other biodiverse sites around the fringes of the Parish.
- BD062 provides a key site to provide space for adaptation due to the effects of climate change in the future. This is supported by **Policy C3: SMDC Local Plan Submission Version 2018**. (<https://www.staffs Moorlands.gov.uk/article/774/The-Local-Plan-2016-2031>) and Guidance on the Natural Environment which states:

"Relevant evidence in identifying and mapping local ecological networks can

include:...areas identified by national or local partnerships with potential for habitat enhancement or restoration, including those necessary to help biodiversity adapt to climate change or which could assist with the habitat shifts and species migrations arising from climate change” (<https://www.gov.uk/guidance/natural-environment#biodiversity-geodiversity-and-ecosystems>)

- The mapping clearly places BD062 within the category of semi-natural habitat, in addition the whole of BD062 and part of BD068 are classed as having Medium Distinctiveness (requires appropriate LWS assessment).
- The fields are situated within the Valley Wetlands Zone, play a key role in natural flood management, and suffer from high levels of surface water and river flooding (see EA surface and river water flooding maps based on ST86SF postcode: <https://flood-warning.information.service.gov.uk/long-term-flood-risk/>).
- The details of the emerging Biddulph Neighbourhood Plan were deposited with SMDC as part of the screening process at the time the decision to ‘safeguard’ fields in Gillow Heath was taken by the SMDC Council Assembly (26th June 2019). The omission of, not only the findings of the Phase 1 Ecological surveys but, also this more recent and strategic ecological information as part of the decision making at the SMDC Council Assembly on 26th June is not satisfactory and illustrates that SMDC have failed in their Duty to Cooperate with Biddulph Town Council and in their Duty under the Natural Environment and Rural Communities Act, 2006.
- The land needs to remain in the Green Belt, especially BD062.

5. Conflict with SMDC Local Plan Submission Version (2018)

<https://www.staffsmoorlands.gov.uk/article/774/The-Local-Plan-2016-2031>

The fields at Gillow Heath (and especially BD062) should remain in the Green Belt.

This is supported by the overall vision for both the District and for Biddulph, and the Spatial Aims, Spatial Objectives and Policies stated within the SMDC Local Plan submission version 2018.

Removing these fields from the Green Belt to be classified as ‘Safeguarded’ sites is in direct conflict with the statements made in the emerging SMDC local plan (2018 submission

version) as illustrated below:

- **The vision for Staffordshire Moorlands in the Local Plan Submission version (2018) clearly states:**

"...net gains and improvements to biodiversity will be made" and "...settlements will develop in a way that acknowledges their historic and natural heritage, their unique setting and their green infrastructure" (pg.34).

- **In particular the vision for Biddulph clearly states (pg.36):**

"The local community will help guide the development of Biddulph with a Neighbourhood Plan" and "Green infrastructure and open space will protect and enhance the environment" (pg.36).

The SMDC Local Plan clearly recognises that Neighbourhood Plans may be used to *"identify sites for development or protection"* (submission version 2018. Section 1.21 pg.10).

- **The Spatial Aims (SA4) and Objectives (SO2, SO8, SO9) are clearly stated (pg.40-41):**

To see Staffordshire Moorlands become an exceptional place to live, work and visit by:

SA4: Maintaining a quality environment and special places

SO2. To create a District where development minimises its impact on the environment, helps to mitigate and adapt to the adverse effects of climate change and makes efficient use of resources.

SO8. To promote local distinctiveness by means of good design and the conservation, protection and enhancement of historic, environmental and cultural assets throughout the District.

SO9. To conserve and improve the character and distinctiveness of the countryside and its landscape, heritage, biodiversity and geological resources. (pg.40 -41)

- **The appropriate Policy (DC3) with regards to allowing these wet meadows/grasslands to flood is identified (pg.129-130):**

Policy DC 3: Landscape and settlement setting

Supporting identification and implementation of natural flood management measures that will contribute towards delivering a reduction in local and catchment-wide flood risk and impacts of climate change and other multiple benefits (pg.129-130);

- **The importance of Green Infrastructure is stated in Policy C3, alongside the need for a strategic approach (pg.137-138)**

Policy C 3: Green Infrastructure

The Council will, through partnership working with local communities, organisations, landowners and developers, develop an integrated network of high quality and multi-functional green infrastructure that will:

- b) Link existing and potential sites of nature conservation value and historic landscape features, create new wildlife habitats, increase biodiversity, and increase tree cover where it is appropriate to the landscape;*
- d) Mitigate the negative effects of climate change and maximise potential climate change benefits including effective flood risk and waterways management;*

Supporting statements:

Section 8.109 *This policy is supported by a 'Green Infrastructure Strategy' which will seek to create functional and physical connectivity between green spaces, identify opportunities to provide additional green routes, consider how land can help to alleviate flooding through providing storage areas at times of flooding, consider opportunities to adapt to climate change and importantly make recommendations for how new development should be designed and how it can contribute to the wider green infrastructure network.*

Section 8.112 *The Council will seek to produce net gains and enhance biodiversity having regard to the objectives and priorities for the various ecosystems identified within the Staffordshire*

Moorlands in the Staffordshire Biodiversity Action Plan. (this includes grassland and heathland habitats and sites within the species rich farmland zone)

- **The importance of the Natural Environment is stated in Policy NE1 (pg.139-141):**

Section 8.7 Policy NE 1 Biodiversity and geological resources (pg.140-141)

The biodiversity and geological resources of the District and neighbouring areas will be conserved and enhanced by positive management and strict control of development (and having regard to relevant ecological evidence) by:

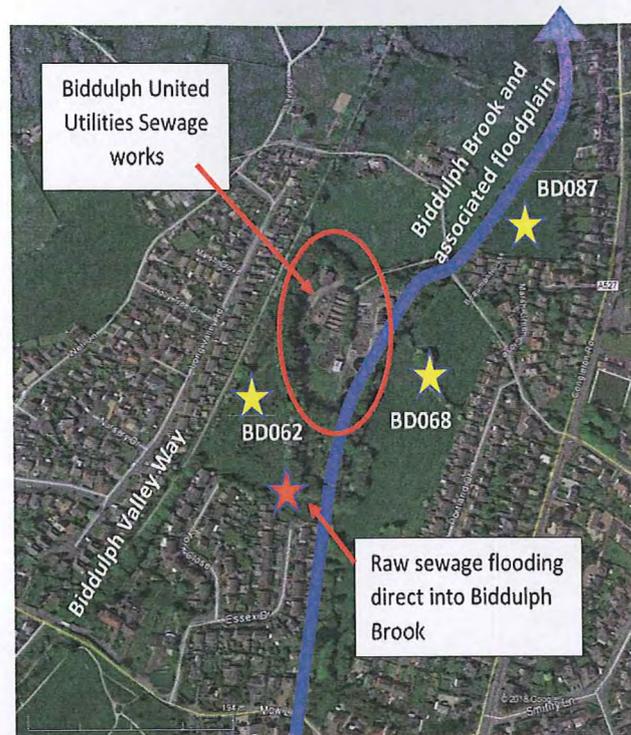

NE1.4. Expecting all development where possible seeks to deliver a net gain in biodiversity

proportionate to the size and scale of the development.

NE1.7. Protecting and enhancing habitats and species of principal importance for the conservation of biodiversity as identified in legislation, and recognising and implementing appropriate measures, including landscape-scale conservation management, to take account of the fact that the distribution of habitats and species will be affected by climate change.

NE1.9. Ensuring the provision and protection of green infrastructure networks in line with Policy C3.

Additional issues:

Proximity to sewage works:

BD062 and BD068 are both immediately adjacent to a sewage

works. Residents who live on Essex Drive, York Close and Long Valley Road already suffer from ad-hoc issues of odour and noise and have registered complaints to United Utilities and SMDC, especially since they learned of plans to build houses even closer. Photographic and video evidence exists of repeated raw sewage flooding into the brook at the end of Essex Drive (13/9/2016 and here as recently as 25/26th October 2019 <https://www.youtube.com/channel/UCL7dE1inO-J5Hsc5NZIF5cw>) where pressure builds up inside the junction box and the lid blows off, especially following heavy rain. This also happened in August 2019. This junction forms the point where pipes from the east and west sides of the valley come together. The raw sewage contaminates part of BD062 (proposed eastern site access) and sites downstream, including BD068 and BD087.

Raw sewage flowing out of the junction box at the end of Essex Drive BD062.
Photo taken by local resident 13/9/2016

The aftermath of the raw sewage flooding incident on land at the end of Essex Drive, proposed eastern access to BD062. Photos taken by local resident 14/9/2016

It is an ongoing and dangerous issue which will continue to affect current residential areas and BD062. **People should not live any closer** than the current housing provision and the field needs to be kept as a natural buffer. Local residents should be listened to in this matter instead of repeatedly being ignored. Building adjacent to the sewage works will create even more of a statutory nuisance (noise, odour, sewage flooding) and an unhealthy neighbourhood.

We do not believe the opinion of developers who have interests in these fields that issues of odour and noise can be overcome through design as reported by SMDC Council Planning Officers on 26th June 2019 in the meeting which led to these fields being put forward for 'Safeguarding'

<https://democracy.staffs Moorlands.gov.uk/ielListDocuments.aspx?CId=284&MIId=1368>

&Ver=4) (ie. making a building air-tight does not change the situation outside or inside the home when windows and doors are open). Adding more houses and increasing surface run-off from built up areas will only make this situation worse. In addition to this, climate change increases the likelihood of increased extreme rainfall events in this area which will compound this issue.

Community access:

The local community have had unfettered access to **BD062** for over 40 years - there has been total open access and the land has been used by local residents for events and walking dogs. As recently as 7th July 2019 (and repeatedly since) local residents organised a work party to clear the overgrown footpaths which cross this site and have been doing this for over 40 years. This land has been designated as Local Greenspace by the emerging Biddulph Neighbourhood Plan (currently undergoing REG14 consultation) as it was found to meet the criteria required (<https://biddulph.co.uk/neighbourhood-plan/>).

The result of a local residents' path clearing event on 7th July 2019 on BD062

Access roads:

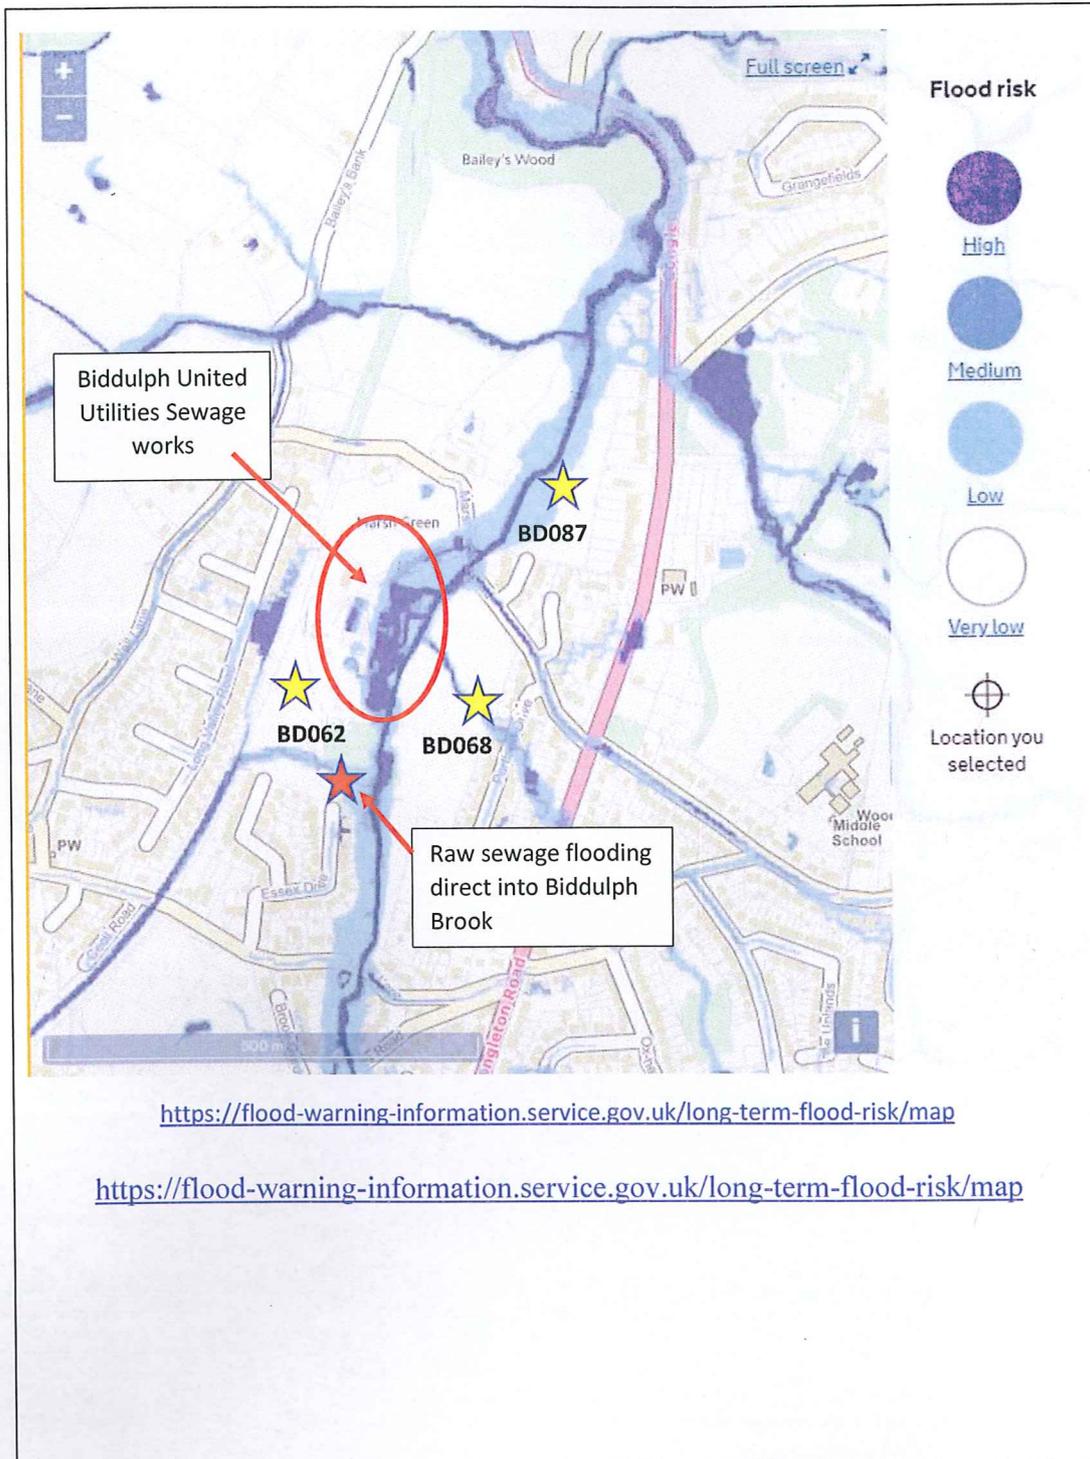

BD062: Neither the *distributor road* (Mow Lane) nor the *feeder roads* (Essex Drive and York Close) meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane to the east and west of the access to BD062, and a new sewage pump on Mow Lane all of which reduce the feeder road to a single carriageway in at least 3 locations. There is no alternative access to BD062.

Planning permission has been refused on highways grounds in the past and the situation has only got worse with the creation of the third pinch-point on Mow Lane. **The actual distributor road width (Mow Lane) falls below the minimum required of distributor roads by the Residential Design Guide.** Within the Guide it is clarified that minimum acceptable local distributor roads width must be 6.7m; Mow Lane is 4.25m wide, therefore not meeting the minimum requirements (Residential Design Guide. Supplementary Planning Guidance on Design Quality in Residential Areas Staffordshire County and District Councils 2000).

Flooding:

BD062 (land at end of York Close / Essex Drive) suffers from a high amount of surface water flooding. It is classed as a wet meadow (evidenced by certain marsh flora) and plays an important role in slowing down rainwater flowing into the Biddulph Brook (natural flood management). This field drains part of the Biddulph Valley way as evidenced by the Environment Agency flood maps (<https://flood-warning-information.service.gov.uk/long-term-flood-risk/map>). The proposed eastern site access of Essex Drive is in a floodplain. The field should remain as semi-natural habitat and its' role in natural flood management enhanced.

Both BD087 and BD068 both suffer from fluvial flooding, often contaminated from the issue of raw sewage flooding at the end of Essex Drive.

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

In order for the local plan to be sound, BD062 needs to be retained within the Greenbelt, the biodiversity protected and enhanced and the field allowed to flood (MM12) along with BD068 and BD072 and the Wharf Road Development needs to have regard to the biodiversity found within it (MM21).

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

Further hearing session (if required)

Publication of the Inspector's Final Report

Adoption of the Local Plan.

Version 0.4

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM12

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

- Legally compliant** . No
- Sound - Positively prepared** . No
- Sound - Justified** . No
- Sound - Effective** . No
- Sound - Consistent with national policy** . No
- Complies with the Duty to co-operate** . No

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Legally Compliant - not published in braille from the outset of the consultation, therefore inaccessible. Not clearly indicated what has been amended in an accessible for residents to respond clearly. Positively prepared - amendments against previous considerations and a result of developer challenges. Justified - adequate housing supply available away from the greenbelt, previously demonstrated by residents and Biddulph Town Council through emerging NDP. Effective - amendments include for field that is affected by proximity to sewage works as well as prone to flooding. Deliverability is poor and likely result in underoccupancy and therefore poor community cohesion. Consistent with national policy - removal of fields from the greenbelt does not demonstrate exceptional circumstances as adequate land supply previously demonstrated. Complies with duty to co-operate - does not achieve as amendments do to engage with emerging Biddulph BDP, which SMDC has been involved with and aware of details.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

ISSUE 1. Sewage works BD062 and BD068 are both immediately adjacent to a sewage works. Residents who live on Essex Drive, York Close and Long Valley Road already suffer from ad-hoc issues of odour and noise and have registered complaints to United Utilities and SMDC, especially since they learned of plans to build houses even closer. Photographic and video evidence exists of repeated raw sewage flooding into the brook at the end of Essex Drive (13/9/2016) where pressure builds up inside the junction box and the lid blows off, especially following heavy rain. This happened again in August 2019. This junction forms the point where pipes from the east and west sides of the valley come together. The raw sewage contaminates part of BD062 (proposed eastern site access) and sites downstream, including BD068 and BD087. It is an ongoing and dangerous issue which will continue to affect current residential areas and BD062. People should not live any closer than the current housing provision and the field needs to be kept as a natural buffer. Local residents should be listened to in this matter instead of repeatedly being ignored. Building adjacent to the sewage works will create even more of a statutory nuisance (noise, odour, sewage flooding) and an unhealthy neighbourhood. We do not believe the opinion of developers who have interests in these fields that issues of odour and noise can be overcome through design as reported by SMDC Council Planning Officers on 26th June 2019 in the meeting which led to these fields being put forward for 'Safeguarding' (<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>) (ie. making a building air-tight does not change the situation outside or inside the home when windows and doors are open). Adding more houses and increasing surface run-off from built up areas will only make this situation worse. In addition to this, climate change increases the likelihood of increased extreme rainfall events in this area which will compound this issue. Therefore these sites should be removed from Local Plan Strategy.

ISSUE 2. BIODIVERSITY Key points are: -The SMDC Phase 1 Ecological Survey evidence base is being ignored. · The assessment for Local Wildlife Sites by Ecus (2017) was incorrectly carried out. · The ranking exercise which was used to inform SMDC Council Members and guide decision making At the SMDC Council Assembly on 26th June 2019 was missing the ecological part of the SMDC evidence base. The methodology employed is unsound. · Removing the Gillow Heath Fields from the green belt and designating them as 'safeguarded sites' for future development (especially BD062) is in direct conflict with the emerging Biddulph Neighbourhood Plan which has a more recent and detailed evidence base which has designated BD062 as Local Greenspace. This had already passed through two local public consultations, which SMDC was well aware of. Details for the above points: Biodiversity - The SMDC Local Plan Phase 1 Habitat Survey (Site BD062 / FID122, 2014) concluded "...the site is not recommended for potential development..."[1] and that the site is "...very well connected to other biodiverse habitats through

hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site” (<https://www.staffs Moorlands.gov.uk/article/1368/Ecological-studies>). The site is a wet meadow/grassland and plays a key role in natural flood management in a key position at the bottom of the valley. It lies within the species rich farmland zone (Staffordshire Moorlands Biodiversity Opportunities Map) and has been mapped as part of a major Wildlife Corridor by SMDC Map7.5 pg.77 (https://www.staffs Moorlands.gov.uk/media/3355/Green-Infrastructure- Strategy/pdf/22.10_ SMDC_Green_Infrastructure_ Strategy_May_2018.pdf) The emerging Biddulph Neighbourhood Plan commissioned external consultants to provide additional detail and evidence for wildlife corridors and potential Local Wildlife Sites across the Biddulph Parish. The mapping for BD062 indicates semi-natural grassland habitat and found to be sited in an important location bringing together two key wildlife corridors – that of the Biddulph Brook and the Biddulph Valley Way (<https://biddulph.co.uk/neighbourhood-plan/>). The entire ecological evidence base was missed out of the assessment and ranking exercise carried out by SMDC and reported to Council Members on 26th June 2019 which led to the designation of these fields as ‘Safeguarded’. The sources used for the exercise are listed and ecological assessments are missing (<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>). This omission is then reflected in the assessment tables in Appendix C and Appendix D and the conclusions drawn (which are unclear and not sound). This is despite the fact that this information was contained within the previous Sustainability Appraisal Report which accompanied the local plan submission version (Feb 2018) where it was reported that BD062 was 'deemed to have ecological value.' Only evidence regarding the Green belt review, Landscape Sensitivity, Heritage impact and Agricultural classification was included alongside other economic and development criteria (Options Assessment Tables list pg.30 (<https://democracy.staffs Moorlands.gov.uk/ieListDocuments.aspx?CId=284&MId=1368&Ver=4>). The land classification used in this SMDC report on 26th June 2019 is also wrong for all 3 sites in Gillow Heath. They were reported to be urban/industrial land when in fact they are classed as agricultural grassland on the Dudley Stamp Land Use Classification system (Magic Map (<https://magic.defra.gov.uk/MagicMap.aspx>) and a quick search on google earth reveals that they are indeed semi-natural habitat (BD062) or agricultural grassland (BD068 / BD087). Ignoring the ecology in this decision making process totally disregards any value that semi-natural habitats provide for biodiversity and for natural flood management. This contradicts Section 40 of the Natural Environment and Rural Communities Act 2006, which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity. Sites also need to be considered on an individual basis. Ranking and considering sites as a group leads to misleading conclusions, which is evidenced in the report given to SMDC Council Members on 26th June 2019. Examples where this is misleading include suggesting that all sites are within 800m of the town centre when they clearly are not at Gillow Heath. The ranking method is unsound. SSUE 3: Community access The local community have had unfettered access to this site since the estate was built. For over 40 years, there has been total open access and the land has been used by local residents for events and walking dogs. As recently as 7th July 2019 (and repeatedly since) local residents organised a work party to clear the overgrown footpaths which cross this site and have been doing this for over 40 years. This land has been designated as Local Greenspace by the emerging Biddulph Neighbourhood Plan (currently undergoing REG14 consultation) as it was found to meet the criteria required (<https://biddulph.co.uk/neighbourhood-plan/>). ISSUE 4 - Access roads Neither the distributor road (Mow Lane) nor the feeder roads (Essex Drive and York Close) meet the minimum standards for the Staffordshire County Council Residential Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane to the east and west of the access to BD062, and a new sewage pump on Mow Lane all of which reduce the feeder road to a single carriageway in at least 3 locations. There is no alternative access to BD062. Planning permission has been refused on highways grounds in the past and the situation has only got worse with the creation of the third pinch-point on Mow Lane. The actual distributor road width (Mow Lane) falls below the minimum required of distributor roads by the Residential Design Guide. Within the Guide it is clarified that minimum acceptable local distributor roads width must be 6.7m; Mow Lane is 4.25m wide, therefore not meeting the minimum requirements (Residential Design Guide. Supplementary Planning Guidance on Design Quality in Residential Areas Staffordshire County and District Councils 2000). ISSUE 5 - Flooding BD062 (land at end of York Close / Essex Drive) suffers from a high amount of surface water flooding. It is classed as a wet meadow (evidenced by certain marsh flora) and plays an important role in slowing down rainwater flowing into the Biddulph Brook (natural flood management). This field drains part of the Biddulph Valley way as evidenced by the Environment Agency flood maps

(<https://flood-warning-information.service.gov.uk/long-term-flood-risk/map>). The proposed eastern site access of Essex Drive is in a floodplain. The field should remain as semi-natural habitat and its' role in natural flood management enhanced.

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Recommendation

See MMC256.

Objection to the deleting of the local green space designation of Dorset Drive East and West Community Area.

October 2019

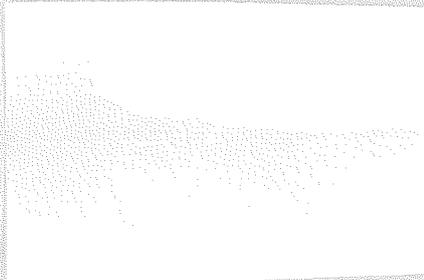

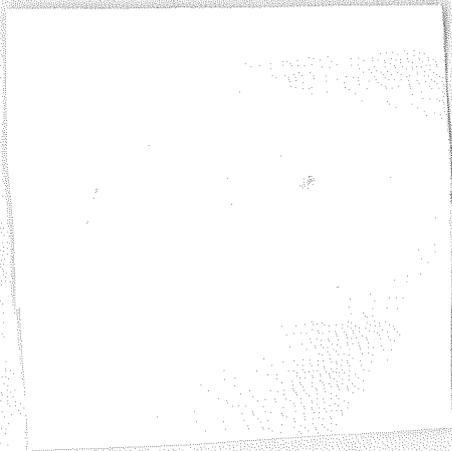

The green area on Thatcher Grove has for the past five decades been a safe area used and enjoyed by children from our road. Play whether just fun playing, ball games, cricket and football. The government tells us children need more exercise and fresh air so what's better than this. As families grow up others take over this pleasant facility which we hoped would always be there for this purpose.

Although we greatly appreciate the local council mows the grass, it's the local residents that keep tidy and litter pick our precious green area.

Please keep our green areas as green space designation.

Thank you.

Mr M Turnock and Mrs S Turnock.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

<p>Access to BD 068 and BD 087 - Road Safety Issues</p> <p>Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?</p> <p>The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have</p>
--

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part A – Personal details and notifications

	Personal details	Agent's details (if applicable)
Title		Mr
First name		John
Last name		Coxon
Job title (if applicable)		Director
Organisation (if applicable)	Wainhomes (North West) Ltd	Emery Planning
Address line 1		1-4 South Park Court
Address line 2		Hobson Street
Address line 3		Macclesfield
Address line 4		Cheshire
Post code		SK11 8BS
Telephone number		01625 442 785
Email address		support@emeryplanning.com

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice> .

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference - MM1

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Please see enclosed statement

(Continue on a separate sheet / expand box if necessary)

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please see enclosed statement

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Please see enclosed statement

(Continue on a separate sheet / expand box if necessary)

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please see enclosed statement

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference - MM48

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Please see enclosed statement

(Continue on a separate sheet / expand box if necessary)

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please see enclosed statement

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

13. Housing Implementation Strategy	12
14. Conclusions	12
15. Appendices	13

1. Introduction

- 1.1 Emery Planning Partnership is instructed by Wainhomes to respond to the current Main Modifications consultation in respect of the Staffordshire Moorlands Local Plan.
- 1.2 We have made detailed representations at each stage of the local plan process and examination. This representation deals solely with the proposed modification changes as set out in the Staffordshire Moorlands Local Plan – Schedule of Main Modifications September 2019 document. Unless expressly stated within these representations, our previous outstanding objections remain.
- 1.3 The Main Modifications do not address all our objections and we maintain our position that the plan is not sound. Further modifications are required to address these fundamental issues of soundness. In particular, we have outstanding concerns in respect of the conflicting and contradictory policies with specific regard to the settlement of Leekbrook, the approach to development in the smaller villages, the Council's failure to produce sufficient evidence in relation to housing land supply and the shortfall in housing provision over the plan period.
- 1.4 At the examination hearing sessions, we expressed concern in relation to consulting upon main modifications to the plan at the same time as a new housing land supply position statement from the Council. We maintain serious reservations over this approach, as we cannot see how the examination has progressed to main modifications (usually the final stage before the Inspector's report is published) without full and proper consideration of the new evidence. Our client has a fundamental right to a fair hearing. In our view the new position warrants full and proper consideration, particularly considering the significant soundness issues we have previously identified, and as such the hearings should be re-opened to interrogate the new evidence. It is clear from this evidence that there remains a housing land supply shortfall, and there is a need for further modifications to the plan.

2. Main Modification MM1

Para/Policy Number 1.1.

- 2.1 We welcome the extension of the plan period to 2033. However, due to the ongoing delays in the Local Plan process, even if the plan is adopted by the end of 2019 it will only cover a period of 13 years. The plan is therefore not consistent with the 15-year plan period requirement as set out in paragraph 22 of the 2019 Framework and paragraph 157 of the 2012 Framework.
- 2.2 One of the practical implications of extending the plan period, was the need to identify additional allocations for development. However, no additional allocations are proposed, and there is a shortfall in housing provision for the plan period of at least 271 dwellings (according to the Council's own trajectory). We comment upon the supply implications in our response to the Housing Trajectory and the Housing Implementations Strategy.

3. Main Modification MM6

Policy SS1a

- 3.1 Changes should only be made to make sound a plan that is otherwise unsound. In respect of this policy, it is not clear why the plan is unsound with the policy as currently drafted.

4. Main Modification MM8

Para/Page Number 7.22

- 4.1 We object to the inclusion of the wording "*provides an adequate timeframe*". It is not an adequate timeframe in the context of national planning policy. However, we recognize that a pragmatic judgement needed to be made in light of the Council's evidence base. Ultimately there was a lack of foresight on the Council's part in preparing the evidence base documents, as our representations made clear from an early stage that there were issues in relation to the proposed plan period.

Para/Page Number 7.24

- 4.2 We maintain our objection to the council adopting the 'Liverpool method' to spread the housing shortfall up to the year 2033. We believe the 'Sedgefield method' should be adopted

to readily contribute towards the historic shortfall in the delivery of housing and additional sites allocated. Notwithstanding our concern in relation to the latest iteration of the housing trajectory, it shows that the cumulative shortfall would be addressed by 2023/24. There is no reliance in this plan on sites with exceptional infrastructure requirements, such as new settlements, to meet the housing requirement. It is therefore not clear why it is necessary to proceed with the Liverpool method, other than to artificially show a 5 year housing land supply and restrict otherwise sustainable development from coming forward to address the shortfall within a quicker timeframe.

5. Main Modification MM9

Para/Page Number 7.33

- 5.1 We strongly believe that 10% slippage allowance is not sufficient given the failure to meet development requirements since the adoption of the Core Strategy. A substantially higher flexibility allowance should be provided within the new Local Plan, more in the region of at least 20%, as discussed within our previous representations. However, we acknowledge that this is an improvement over the lack of a slippage allowance in previous drafts of the plan.
- 5.2 We have concerns regarding the 10% slippage allowance insomuch as there does not appear to be any additional allocations or suggested locations for an increased number of units over the previous draft plan. When reviewing the anticipated figures, the trajectory indicates that the plan has a deficit of -271 dwellings, when, due to the 10% slippage allowance, the overall provision should see an surplus of 608 units.
- 5.3 Furthermore, it would be a misinterpretation of national planning policy to rely upon the 2012 NPPF Paragraph 47 or the 2019 NPPF paragraph 67(b), which requires the identification of specific sites for years 11-15 'where possible'. That means that if it is possible to identify specific sites, then they should be identified and allocated. In this case it is eminently possible as this is a whole Local Plan dealing with allocations of all scales, and there are no good environmental or policy reasons for not identifying sites in years 11-15. The Council is not relying upon (or has identified) broad locations. The Council has simply failed to identify a sufficient supply for the plan period. No justification has been provided as to why it has not been possible to identify further sites to meet the requirement in full.

- 5.4 Furthermore, in Staffordshire Moorlands, much of the district is designated as Green Belt and this plan is reviewing Green Belt boundaries. The Framework requires that Authorities must have regard to their Green Belt's intended permanence in the long term, so that they should be capable of enduring beyond the plan period. It is evident upon review that this plan does not take this requirement into consideration.
- 5.5 As discussed in our previous representations, additional housing land should be allocated within the plan, enabling additional residential units to be delivered.
- 5.6 We also maintain that the strategy for the rural areas needs to be fundamentally readjusted, with sufficient housing provided to meet the needs across the rural areas.
- 5.7 With regards to employment land supply, the employment figures in Table 7.8 have been increased, with an allocation of 7.12Ha to Leek. However, when reviewing the employment land provision for Leek, there only appears to be 6.39Ha of employment land allocated within the plan. Accordingly, an additional site should be allocated for circa 0.8ha.

6. Main Modification MM17

- 6.1 Our objection in relation to the deletion of land west of Basford Lane, Leekbrook, namely the failure of the plan to identify a replacement allocation, is covered in more detail in response to MM48 below.

7. Main Modification MM20

Page/Policy Number 108, Policy H1 and supporting text

- 7.1 We maintain our objection to only allowing limited infill development outside of smaller villages through the removal of their village boundaries. Furthermore, we object to the monitoring of the windfall site provision. This objection is on the basis that monitoring the provision does not sufficiently address the significant issue of non-delivery of windfall sites. It has already been established within this consultation response, that there is a shortfall in provision across the plan period (-271 units).

8. Main Modifications MM22

Page/Policy 114 Policy H3 and supporting text

- 8.1 The Council's own evidence on viability demonstrates that many the proposed allocations are not viable based on providing 33% affordable housing. The revised policy provides flexibility, but in practical terms this will cause significant uncertainty and delay, as a viability assessment will need to be undertaken for each application that comes forward. If the policy is adopted as drafted then the trajectory needs to properly take this into account, as per our previous representations on the matter. At present it does not.
- 8.2 Notwithstanding the above, we remain of the view that the spatial strategy and site allocations should have been fundamentally re-assessed, on the basis that an alternative strategy could deliver significantly more affordable housing. There is a significant and serious shortfall of affordable housing provision in the district, and it is unreasonable to simply press on with the same allocations when clear evidence has come to light (i.e. the Whole Plan Viability Assessment) that they will not deliver the requisite quantum of affordable housing.
- 8.3 With regards to part 3 of the policy, we specifically object to the proposed wording 'at the Council's discretion'. An applicant must be able to read the plan on face value and understand what is and is not acceptable. This phrase should be removed.

9. Main Modification MM39

Page 158 Policy DSB1 and supporting text

- 9.1 The proposed reduction in area of site DSB1, The Wharf Road Strategic Development site, will see a reduction in housing provision of 146 units. For reasons explained earlier within this response and in previous consultation responses, there should be an increase in the provision of units and identification sites to address the shortfall arising from this amendment.

10. Main Modification MM48

Page 181 Policy DSR3, Land west of Basford Lane, Leekbrook and supporting text

- 10.1 The proposed allocation of Land West of Basford Lane has now been deleted. However, no additional sites have been provided nor any potential replacement sites indicated. As we have set out in our response to MM9, the employment land figures for Leek (once corrected) highlight a shortfall of approximately 0.8ha. This shortfall needs to be addressed.
- 10.2 As per our previous representations, our client's site (Land off Wardle Gardens, Leekbrook) is an existing allocation for employment use, and was recently refused planning permission for residential use, as it was concluded that developing the site for residential use would jeopardise the preferred employment use from coming forward.

11. Main Modification MM54

Para/Policy Number 10.4

- 11.1 A modification is proposed in relation to reviewing the plan every 5 years, and it is stated that the need for a full or partial review will be considered when housing delivery has not met the housing requirements in the Local Plan or the Housing Delivery Test.
- 11.2 It should be noted that the housing trajectory has already been missed by a very significant margin in the first 2 years (see our comments to MM72 below). Numerous sites have not progressed as originally expected and continue to be pushed back in the trajectory, albeit the Council still maintains unrealistic assumptions in respect of the delivery of those sites. This is all in the context of the previous Local Plan which, in terms of housing delivery, failed. We remain firmly of the view that now is the time to properly ensure that the plan meets the housing needs of the area, rather than waiting for the inevitable review based on further failure to meet housing needs.

12. Main Modification MM72

Appendix 7 (Housing Trajectory)

12.1 The Main Modification states that it will include an “*amended housing trajectory to reflect updated housing figures 31/03/2019 and Housing Implementation Strategy consultation Jan 19*”.

12.2 A new Housing Implementation Strategy (dated July 2019) has been published for consultation alongside the main modifications. However, we have significant concerns in relation to the robustness of the trajectory included within it. There have been two consistent themes throughout the examination in relation to the Council's evidence on housing land supply:

- A fundamental lack of robust, up-to-date evidence to support the Council's trajectory; and,
- A failure to deliver upon previous trajectories and statements in relation to the performance and progress of sites.

12.3 This not the first, or even the second, trajectory which has been before the examination of this plan. The lack of realism in the trajectory is underlined by actual performance:

- The trajectory at Appendix 7 of the submission version anticipated that 313 dwellings would be completed in 2017/18, and 419 dwellings in 2018/19. However only 142 dwellings were completed in 2017/18 and 165 in 2018/19. Therefore, actual completions in the first 2 years have been 58% less than the trajectory in the submitted plan.
- The updated trajectory submitted by the Council during the examination (ref: EL7.003, dated January 2019) anticipated that 291 dwellings would be completed in 2018/19. Actual performance in that year was 43% less than the trajectory.

12.4 This evidence alone demonstrates that the Council's assumptions have consistently proved to be wrong and are not supported by robust evidence. If the Council cannot even predict housing delivery in the forthcoming year, then we cannot see how the Inspector can have any confidence in its ability to predict housing delivery over the course of the plan period. This is not at all surprising given the total absence of documentary evidence which underpins the Council's housing land supply position and the delivery of sites within the trajectory.

12.5 Paragraph 68-004 of the PPG “How can an authority demonstrate a 5 year supply of deliverable housing sites?” states the following in relation to plan-making:

“In plan-making, strategic policies should identify a 5 year housing land supply from the intended date of adoption of the plan.”

12.6 It should be noted that whilst this plan is being assessed under the interim arrangements set out in paragraph 214 of the 2019 Framework, the onus has always been on the Council to demonstrate that sites without planning permission (i.e. the draft allocations) are deliverable if they are to be included within the 5 year housing land supply.

12.7 Paragraph 68-007 of the PPG: “What constitutes a ‘deliverable site’ in the context of plan-making and decision-taking?” provides further information. It states:

“In order to demonstrate 5 years’ worth of deliverable housing sites, robust, up to date evidence needs to be available to support the preparation of strategic policies and planning decisions. Annex 2 of the National Planning Policy Framework defines a deliverable site. As well as sites which are considered to be deliverable in principle, this definition also sets out the sites which would require further evidence to be considered deliverable, namely those which:

- have outline planning permission for major development;*
- are allocated in a development plan;*
- have a grant of permission in principle; or*
- are identified on a brownfield register.*

Such evidence, to demonstrate deliverability, may include:

- current planning status – for example, on larger scale sites with outline or hybrid permission how much progress has been made towards approving reserved matters, or whether these link to a planning performance agreement that sets out the timescale for approval of reserved matters applications and discharge of conditions;*
- firm progress being made towards the submission of an application – for example, a written agreement between the local planning authority and the site developer(s) which confirms the developers’ delivery intentions and anticipated start and build-out rates;*
- firm progress with site assessment work; or*
- clear relevant information about site viability, ownership constraints or infrastructure provision, such as successful participation in bids for large-scale infrastructure funding or other similar projects.”*

12.8 The new HIS fails to produce any such evidence. We maintain the objections that we expressed in relation to housing land supply at previous stages of the examination, as it is apparent that delivery has been significantly lower than anticipated by the LPA, and numerous sites within the trajectory have not progressed as anticipated. Once again, the Council has amended the

start dates for numerous sites within the latest housing trajectory. Once again, no new evidence is provided to support the Council's position.

- 12.9 We provide a table at Appendix **EP1** which summarises the changing positions on the sites within the supply, and a comparison with the evidence provided to support the trajectory (i.e. Appenedix 1 of the HIS). The progress suggested by the Council on many sites has clearly failed to materialise, and yet no new evidence is provided to support the latest assumptions. We therefore maintain the position set out in our Matter 4 hearing statement in relation to which sites clearly do not meet the definition of deliverable and should not be included within the 5 year supply / first 5 years of the trajectory. As the base date is now 1 April 2019, the earliest that these sites could be considered to start delivering in the trajectory is 2024/25.

Wharf Road, Biddulph

- 12.10 We have commented on the delivery of a number of the allocated sites. There is nothing within the latest evidence to suggest that these fundamental issues have been resolved. However, in relation to the land at Wharf Road, Biddulph, the Council has recently published a committee report which fundamentally contradicts the Council's own position at the Local Plan. This is significant new evidence and must be considered in assessing the soundness of this plan. A copy of the committee report is appended at **EP2**, although we assume that the Council has already provided a copy to the Inspector given its clear relevance to the examination.
- 12.11 At the examination the Council claimed that all landowners were being engaged through the masterplan process. However, paragraph 8.12 of the committee report makes clear that the land ownership issues remain a significant and unresolved constraint, and a number of landowners have failed to engage:

"The most significant challenge to delivering the Wharf Road site relates to the large number of landowner's, 14 in total, or 12 excluding the land at BDNEW. The consultants recommend that, in order to secure a sensible layout and maximise development potential it will be necessary for co-operation between the various landowners. This is a challenge as different owners have different aspirations and levels of willingness to co-operate. There are some landowners who understand the need to work with others collectively to enable the development, whilst others who did not engage with the masterplan process and may assume that they can deliver their site in isolation. Whilst some landowners did not engage with the masterplan process, all landowners are supportive of the Local Plan land allocation." (our emphasis)

12.12 Paragraph 8.14 sets out the need for joint working and the need for a joint venture agreement or similar:

"The masterplan recognises that the main challenge to delivering the site is the large number of landowners. To successfully deliver the scheme the landowners will need to work together and agree to sell the land through a formal joint venture or by working with a third party developer and agreeing options to ensure the whole site is delivered, rather than pockets of isolated development."

12.13 Paragraph 8.17 sets out the recommendations of the Council's appointed consultants:

"Sanderson Weatherall suggested next steps are;

- 1. Ascertain / acquire ownership of the land that has not been registered*
- 2. Carry out feedback session with landowners to discuss the finding of the report*
- 3. Discuss potential sales value with landowners*
- 4. Carry out formal valuation of residential properties*
- 5. Carry out formal pre-application for the site to help de-risk the project*
- 6. Source development partner through competitive tender" (our emphasis)*

12.14 Not only does the report identify the need to ascertain / acquire ownership of unregistered land, the above steps are necessary before even an outline application is submitted. They are wholly incompatible with delivering the site within the timescales envisioned within the trajectory. Indeed, there is significant risk as to whether the site will be delivered at all during the plan period.

12.15 Paragraph 8.18 adds:

"Officers recommend that no further work is commissioned to consultants at the present moment in time. This maybe [sic] reviewed at a later date once the Local Plan is adopted and market demand for the site has been established. In the mean time [sic] officers will proactively work with landowners to understand and explain the findings of the masterplan and the implications this will have on development potential and expected land values."

12.16 Again, such an approach (ceasing work, a decision that "may be reviewed at a later date") is wholly incompatible with the housing trajectory. The prospect of agreement between landowners and an eventual planning application is clearly many years away.

12.17 The only reasonable conclusion is that the site will not start delivering for at least several years and must be pushed back significantly in the trajectory to reflect the above issues. There is also

a need for sufficient flexibility within the supply to deal with the very real prospect that the site may not deliver any units at all during the plan period.

12.18 It should be noted that simply removing this site from the first 5 years of the trajectory reduces the supply by 125 units. This amendment alone results in the deliverable supply reducing to less than 5 years.

Blythe Vale

12.19 The site is included for 15 units in 2019/20. However, at the time of writing pre-commencement conditions are yet to be discharged. A further planning application for a re-plan of phase 1 (LPA ref: SMD/2018/0790) also remains undetermined. It is not realistic to assume that 15 units will be completed in 2019/20. First completions should be pushed back to 2020/21. This would reduce the 5 year supply by 30 units.

12.20 The site has also been split up and is included twice within the trajectory, to reflect the planning permission. However, this results in overlap between phases 1 & 2, a position which increases the development rates in 2021/22 and 2022/23 to 45 dwellings per annum. This should be amended so that phase 2 follows on from phase 1. There is no evidence of a second developer. This would reduce the 5 year supply by a further 45 units.

12.21 Such is the fragility of the Council's 5 year supply position, the above amendments to the Blythe Vale site (i.e minus 75 units) would result in the deliverable supply reducing to less than 5 years.

Build rates / lead-in times

12.22 We maintain our objections as set out in our representations to the previous version HIS. The Council has no evidence to justify the assumptions in most categories at Appendix 2 of the HIS. Whilst a very small selection of cherry-picked examples is provided, the evidence is limited at best and it is not clear why the examples that we provided in our representations to the HIS have not been considered.

13. Housing Implementation Strategy

- 13.1 We have set out our comments in relation to the Housing Implementation Strategy, and in particular the revised housing trajectory, in our response to MM72. The revised trajectory is not robust and is not underpinned by anywhere near the level of evidence that national planning policy expects.
- 13.2 We also refer to our previous consultation response to the HIS in February 2019. The comments remain applicable to the latest HIS given that very little has changed in the document.
- 13.3 The only reasonable conclusion to be drawn from the evidence is that the Council cannot demonstrate:
- a 5 year housing land supply; and,
 - a sufficient housing land supply over the plan period.
- 13.4 The plan can proceed to adoption considering this position and the fundamental absence of evidence.

14. Conclusions

- 14.1 This consultation response has outlined the proposed modifications we object to and provided justification for our objections.
- 14.2 It should be noted that our outstanding objections, detailed in our previous consultation responses still stand as there are no proposed modifications that address our previous objections.
- 14.3 Our position that the plan is not sound, justified, effective, consistent with national planning policy (both current and archived) nor positively prepared remains unchanged.

15. Appendices

- EP1. Summary of changes to allocated sites within the housing trajectory
- EP2. Cabinet Committee Report, October 2019 (Wharf Road, Biddulph)

EP2

STAFFORDSHIRE MOORLANDS DISTRICT COUNCIL

Cabinet

8 October 2019

TITLE:	Wharf Road Strategic Development Site
PORTFOLIO HOLDER:	Councillor Ralphs - Leader
CONTACT OFFICER:	Sarah Porru- Head of Regeneration
WARDS INVOLVED:	Biddulph West

**Appendices Attached – Appendix 1 Executive Summary
Appendix 2 Landownership plan**

1. Reason for the Report

- 1.1 To inform Councillors of the Wharf Road masterplan, which has been prepared to assist with the delivery of the emerging Local Plan.

2. Recommendation

- 2.1 That the Cabinet note the findings of the masterplan, but at this time do not commission further work.

3. Executive Summary

- 3.1 As part of the Accelerated Housing Delivery Programme, Sanderson Weatherall were commissioned in September 2018 to complete a masterplan for the Wharf Road Strategic Development area identified in the emerging Local Plan (DSB1).

- 3.2 The basis for commissioning the masterplan was based on several objectives:

- 3.2.1 Assist delivery of the Local Plan
- 3.2.2 Bring together the landowners with a co-ordinated vision for the site
- 3.2.3 Devise a strategic vision for the site which can then be promoted to developers and investors.

- 3.3 As part of the masterplan process, a review of the housing market found limited interest from private sector developers. The research suggests that

this was due to Biddulph being a secondary location in comparison to larger towns such as Congleton and Tunstall which offer more amenities and job opportunities. Consequently, the consultants found the sales rates anticipated for new build at Wharf Road would be slightly lower given its rural location and poor public transport links. The consultants also identified it is possibility not a lack of demand, but also lack of development opportunities. No land has been allocated for new residential development since the 1998 Local Plan. The emerging Local Plan identifies suitable land for 3802 homes across the whole the Staffordshire Moorlands over the Local Plan period.

- 3.4 Three options were developed for the site, in line with the emerging Local Plan DSB1 policy. The options focused, not on what should be delivered in terms of residential dwellings or mix, but where on the site it should be located.
- 3.5 Options 1 & 2 focused the retail/ employment element of the scheme to the north of the site, whilst option 3 identified an area in the south of the site for this use.
- 3.6 The Council's preferred option 3 would potentially deliver approximately 471 residential units (including land to the east of Meadow Way) and an additional 145 residential dwellings with the land at BDNEW. Subsequently, following post hearing comments from the Local Plan Inspector in December 2018, the area of land known as BDNEW, which lies to the West of the Biddulph Valley Way has been deleted by the Council (in June 2019) as a Local Plan allocation. The Wharf Road Masterplan had already been commissioned and was nearing completion before the inspector sent his comments to the Council. The completed masterplan therefore recognises this change by providing two options, including and excluding BDNEW.

4. How this report links to Corporate Priorities

- 4.1 The Wharf Road Masterplan seeks to deliver housing growth anticipated in the Local Plan and will therefore have implications the following aims of the Corporate Plan:
 - Aim One - Help create a safer and healthier environment for our residents to live and work
 - Aim Three – To create a strong economy by supporting further regeneration of towns and villages
 - Aim Four - Protect and improve the environment.

5. Alternative Options

- 5.1 Option 1 (recommended) that the Cabinet note the Wharf Road Masterplan, recommendations and next steps. Officers suggest that the masterplan not be formally adopted as an Supplementary Planning Document (SPD) , to allow maximum flexibility in the delivery of the site.
- 5.2 There are no options as the report is for noting only.

6. Implications

- 6.1 Community Safety - (Crime and Disorder Act 1998)
No implications
- 6.2 Workforce
No implications
- 6.3 Equality and Diversity/Equality Impact Assessment
- 6.4 Financial Considerations
A budget of £29,425 was approved by Cabinet in April 2018. There are no further financial considerations going forward.
- 6.5 Legal
No legal implications
- 6.6 Sustainability
The masterplan was prepared according to wider sustainability considerations
- 6.7 Consultation
No public consultation event was held as part of the masterplan process due to the local plan examination process.
- 6.8 Risk Assessment
A risk assessment was carried out of part of the masterplan process

Accelerated Housing Delivery Programme (April 2018)

Contact details

Kate Hall
Regeneration Officer
kate.hall@highpeak.gov.uk

7. Detail

- 7.1 The Council is committed to accelerating housing delivery across the Staffordshire Moorlands area. The District has suffered from low levels of development for many years. Planning approvals are being granted on sites but some are not coming forward to the construction phase. In order to tackle this problem we listened to the issues raised by developers and developed a comprehensive delivery programme to tackle the problem. The Accelerated

Housing Delivery programme was approved by Cabinet in April 2018 and focuses around 2 core aims;

- Deliver community benefits in the form of increased income from council tax, business rates and New homes Bonus for reinvestment in the community.
- Drive forward delivery of the local plan and maintain 5 years land supply by proactive measures and Council led interventions where appropriate..

7.2 The emerging Local Plan identifies the land at Wharf Road, Biddulph as a Strategic Development site (local plan policy DSB1). The development of a masterplan is pivotal in developing the strategic vision for the Wharf Road area to assist with bringing the site forward for development. Therefore Sanderson Weatherall were commissioned back in September 2018 to prepare the plan.

Site details

7.3 The land at Wharf Road is a key mixed use development site. It is in a sustainable location close to the town centre and presents an opportunity to comprehensively plan for a range of uses to make a significant contribution to Biddulph's development needs.

7.4 Local Plan (Submission Version) Policy DSB1 stated the following:

The Wharf Road site is a 23.4 hectare site which is allocated for mixed use development of:

- Housing 20.4ha (approximately 588 dwellings)
- Employment 1ha
- Retail 0.5ha (food store of around 1000m² net sales floor)
- Retention of school playing field 1.5ha

7.5 Following post hearing comments from the Local Plan Inspector in December 2018, the area of land known as BDNEW, which lies to the West of the Biddulph Valley Way has been recommended for removal as a Local Plan allocation.

7.6 On 26th June 2019, the Council agreed a schedule of main modifications to the Local Plan (Submission Version) to address the Inspector's feedback. This includes the removal of site BDNEW and consequential amendments to the Policy DSB1. They included increased housing densities on the remainder of the Wharf Road allocation in light of the masterplan preferred option, a reduced site area (18.5ha) and revised housing yields (442 homes).

7.7 Consultation on main modifications will take place during September / October before the Inspector draws further conclusions.

7.8 The Wharf Road Masterplan had already been commissioned and was nearing completion before the inspector made this decision. The completed masterplan therefore recognises this change by providing two options,

including and excluding BDNEW.

7.9 The emerging local plan through policy SS6 seeks to enhance the role of Biddulph as a significant service centre and market town and support its regeneration through the following actions:

- Improve the local housing market and range of community facilities by increasing the range of house types available especially for first time buyers, families and older people.
- Create employment growth and increase diversity of employment opportunities
- Strengthen the role of Biddulph as a significant service and retailing centre

7.10 Wharf Road was identified as a priority site for delivery intervention due the large number of landowners, 14 in total (shown in Appendix 2). The landowners comprise a range of stakeholders including the District Council, County Council, James Bateman Junior High School, private investment companies and a range of individual owners with little or no development experience. In addition to the large number of landowners, the site is also heavily constrained and requires a harmonized approach to maximise the development potential of the site. It was felt that the development of a cohesive masterplan would ensure a sustainable vision for the site which will be promoted to suitable private sector investors/developers once the Local Plan is adopted.

7.11 Planning History

7.12 Land at the northern end of the site was allocated for retail, employment and non food retail as part of the Biddulph Area Action Plan (2007) whilst the principal of residential development was identified for the southern section of the site, (previously known as area 4) in the Core Strategy (2014).

7.13

Planning ref	Description	Decision
SMD/2009/0284	change of use of land, erection of garage, office building and parking for 10 coaches	Approve
SMD/2006/0647 SMD/2007/0024	& erection of non food retail units	Outline approval
SMD/2011/0332	erection of 8 retail units (approval of reserved matters)	refused
SMD/2011/0332 SMD/2012/0175	approval of reserved matters relating to 07/00170/ OUT_MJ	Refused & withdrawn
SMD/2006/1224 SMD/2007/0593	& residential development	Refused
SMD/2015/0684	Extra care development	Withdrawn

Masterplan process

- 8.0 The masterplan is split into 4 key areas, each of which will be covered in detail below:
- Market Demand
 - Options
 - Viability & deliverability
 - Recommendations and next steps

Market Demand

- 8.1 The consultants felt the housing market in Biddulph had stalled due to a number of factors, summarised below:
- Very limited major new build residential developments (Uplands Mill in 2012 being the most recent)
 - Identified lack of supply of executive new build detached properties within Biddulph.
 - Sales rates achievable for new build at Wharf Road are slightly less than comparables given its rural location.
 - Lack of public transport links as Biddulph relies solely on bus links.
 - Biddulph is a secondary town and in comparison to larger towns such as Congleton and Tunstall which offer more amenities and job opportunities.
 - Lack of evidence of demand for development opportunities could be due to the limited availability of suitable sites and given the predominant green belt status.
- 8.2 Even though the current housing market has stalled the consultants felt the site offered an excellent opportunity to deliver open market/ affordable housing and suggested the following mix of properties types.
- 1/2 bed apartments – Extra Care/ Sheltered
 - 2 bedroom terrace house- high density
 - 3 bedroom semi detached house – high density
 - 3/4 bedroom detached house- mid density
- 8.3 The predominant theme identified by the consultants was a perceived lack of demand for housing in the Biddulph area. As noted earlier the last major new build development commenced in 2012. It is important to note, that as the consultants identified, it is possibly not a lack of demand, but a lack of development opportunities which has stalled the housing market. This can be directly linked to the Local Plan process where no land has been allocated for new residential development since the 1998 Local Plan. The emerging Local Plan identifies suitable land for 3802 homes across the whole of the Staffordshire Moorlands area over the Local Plan period.

Options

- 8.4 Sanderson Weatherall developed 3 options for the site, shown in Appendix 1.

- 8.5 The 3 options focus on how different layouts would impact on deliverability of the site, rather than the amount and type of proposed development.
- 8.6 The options are summarised below, including the additional land east of Meadow Way:
- Option 1- 482 residential units (627 units including land at BDNEW)
Option 2 - 515 residential units (660 units including land at BDNEW)
Option 3 - 471 residential units (616 units including land at BDNEW)
- 8.7 Option 3 was identified as the Councils preferred option. Due to the Local Plan examination process we were unable to carryout a public consultation event. The decision to move forward with option 3 as the Councils preferred option was made by senior council officers in conjunction with Sanderson Weatherall after reviewing the advantages and disadvantages of each option.
- 8.8 The executive summary shown in appendix 1 highlights the benefits of each option in detail.
- 8.9 Officers felt that option 3 delivered greatest benefit and was the scheme most aligned with owner aspirations. The benefits identified were:
- Sports provision located closer to existing school building
 - Retail/ employment located close to housing, creating a village green surrounded by housing and retail
 - Access to the site in three locations
 - Higher density units to suit extra care / sheltered housing for elderly positioned closer to town centre facilities.

Viability and deliverability

- 8.10 Sanderson Weatherall completed a detailed viability assessment of the scheme which indicates that both scenarios i.e. with or without land at BDNEW are viable and produce positive land values in the region of £113,000 - £125,000 per acre.
- 8.11 The viability section of the masterplan is crucial as it demonstrates to landowners and potential developers that the site stacks up financially, and is worth investigating further. There has already been considerable interest from several discount supermarkets for the retail element of the site and discussions with the County Council are on going.
- 8.12 The most significant challenge to delivering the Wharf Road site relates to the large number of landowner's, 14 in total, or 12 excluding the land at BDNEW. The consultants recommend that, in order to secure a sensible layout and maximise development potential it will be necessary for co-operation between the various landowners. This is a challenge as different owners have different aspirations and levels of willingness to co-operate. There are some landowners who understand the need to work with others collectively to enable the development, whilst others who did not engage with the masterplan

process and may assume that they can deliver their site in isolation. Whilst some landowners did not engage with the masterplan process, all landowners are supportive of the Local Plan land allocation.

8.13 Given the size of the Wharf Road site, the consultants suggest the site be delivered in 3-4 phases. Of critical relevance to the phasing and delivery of the site is the ability to access the land and identify which parcels of land effectively control access to the site. With this in mind there are a number of packages which naturally flow from the landownership and anticipated levels of co-operation which are shown in detail in the executive summary in Appendix 1.

- Phase 1 – plots 1, 2, 6 and 9
- Phase 2 – plots 8 and 10
- Phase 3 – plots 3,4,5 and 7
- Phase 4 – plot 11 (land at BDNEW) (since completion of the masterplan, BDNEW land allocation has been removed from the emerging Local Plan)

Recommendations and Next Steps

8.14 The masterplan recognises that the main challenge to delivering the site is the large number of landowners. To successfully deliver the scheme the landowners will need to work together and agree to sell the land through a formal joint venture or by working with a third party developer and agreeing options to ensure the whole site is delivered, rather than pockets of isolated development.

8.15 While the masterplan provides a good indication of what the site can deliver and demonstrates the site is financially viable, the document will not be adopted as a Supplementary Planning Document (SPD).

8.16 Through the masterplan process, a vision and preferred option has been developed which we feel meets both the Councils and wider landowner aspirations most effectively. It is envisaged that masterplan will promote and stimulate interest in Wharf Road development opportunity. Ultimately it is for the open market, through developers and landowners to a lesser extent to decide how the site will come forward. The anticipated Local Plan provides detailed requirements through policy (DSB1 & SS6) but does allow some flexibility if required.

8.17 Sanderson Weatherall suggested next steps are;

1. Ascertain / acquire ownership of the land that has not been registered
2. Carry out feedback session with landowners to discuss the findings of the report
3. Discuss potential sales value with landowners
4. Carry out formal valuation of residential properties
5. Carry out formal pre-application for the site to help de-risk the project
6. Source development partner through competitive tender

- 8.18 Officers recommend that no further work is commissioned to consultants at the present moment in time. This may be reviewed at a later date once the Local Plan is adopted and market demand for the site has been established. In the mean time officers will proactively work with landowners to understand and explain the findings of the masterplan and the implications this will have on development potential and expected land values.
- 8.19 In order to facilitate and promote development of the site, on adoption of the Local Plan the Council will actively engage private sector developers and promote the site. The Council will also work closely with Homes England to investigate funding opportunities and will bid for funding as and when appropriate.

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

Stephen Wales

There is a need to have open spaces near peoples homes

There is also need to allow the countryside - its flora and fauna- to be part of village life in this the heart of the historic village

Constant infill of fields is destroying the feel of living close to countryside for residents, and traditional village living is fast turning into an urban sprawl

The visual amenity afforded to other established properties will be destroyed forever should this ill thought out scheme go ahead

Facilities in the village are almost non existent with no chemist ,doctors or NHS dentist (for adults), and the lack of parking is evident around those few businesses that survive

The village is clearly at capacity - being one of the largest villages in the UK - and increasing thru traffic through the already congested narrow Hollow lane or Ostlers Lane is both dangerous and unneighbourly

***I ask that the Local Green Space (LGS) is retained ***

Denial of this designation is contrary to the stated aims of the Localism Act to empower communities

This UK law this allows communities to shape the future of their surrounds

2019-10-27

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Comment:

Derek L Walker. B.Sc. Tech. Hons., AMCT., C.Eng., MIEE., JP.

The increased light pollution will render the equipment of local astronomers (of which there are many) to be inadequate. The heavens can only be a wonder to young people if they can be seen!

My parents and grand parents pointed out wild life to me in this area. I am doing so to my children, their children and my great grand children and they should be able to do so for their offspring.

The area is one of the few where I may wander in peace in my advanced years, limited as I am to short walks. 2019-10-31

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice>

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

<p>No Buy in by the people of Biddulph Short cutting of the Modification selection process is not acceptable.</p> <p>Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?</p> <p>I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.</p>

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Address line 4		Cheshire
Post code		SK11 8BS
Telephone number		01625 442 785
Email address		support@emeryplanning.com

Notifications and Consent

Representations must be attributable to named individuals or organisations. They will be available for public inspection and cannot be treated as confidential. The Council requires your personal details in order to process your examination representation and contact you about the Local Plan process. This includes publication of the recommendations of the Inspector appointed to carry out an examination and adoption of the Local Plan. Examination participants should familiarise themselves with the District Council's **Planning Policy privacy notice** at <https://www.staffsmoorlands.gov.uk/article/3876/Planning-and-Planning-Policy-privacy-notice> .

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference - MM1

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Please see enclosed statement

(Continue on a separate sheet / expand box if necessary)

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please see enclosed statement

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference - MM8

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Please see enclosed statement

(Continue on a separate sheet / expand box if necessary)

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Please see enclosed statement

(Continue on a separate sheet / expand box if necessary)

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- Further hearing session (if required)
- Publication of the Inspector's Final Report
- Adoption of the Local Plan.

Staffordshire Moorlands Local Plan, Main Modifications Consultation

Land between Rudyard Road & Hot Lane, Biddulph Moor

for Mr & Mrs Webb

Emery Planning project number: 17-204

Project : 17-204
Site address : Land between Rudyard
Road & Hot Lane,
Biddulph Moor
Client : Mr & Mrs Webb

Date : October 2019
Author : Aaron Marrs

Approved by : John Coxon

This report has been prepared for the client by Emery Planning with all reasonable skill, care and diligence.

No part of this document may be reproduced without the prior written approval of Emery Planning.

Emery Planning Partnership Limited
trading as Emery Planning.

Contents:

1. Introduction	1
2. Main Modification MM1	2
3. Main Modification MM6	2
4. Main Modification MM8	2
5. Main Modification MM9	3
6. Main Modification MM20	4
7. Main Modifications MM22	4
8. Main Modification MM39	5
9. Main Modification MM54	6
10. Main Modification MM72	6
11. Housing Implementation Strategy	11
12. Conclusions	11
13. Appendices	12

1. Introduction

- 1.1 Emery Planning Partnership is instructed by Mr & Mrs Webb to respond to the current Main Modifications consultation in respect of the Staffordshire Moorlands Local Plan.
- 1.2 We have made detailed representations at each stage of the local plan process and examination. This representation deals solely with the proposed modification changes as set out in the Staffordshire Moorlands Local Plan – Schedule of Main Modifications September 2019 document. Unless expressly stated within these representations, our previous outstanding objections remain.
- 1.3 The Main Modifications do not address all our objections and we maintain our position that the plan is not sound. Further modifications are required to address these fundamental issues of soundness. In particular, we have outstanding concerns in respect of the failure to distribute any development to Biddulph Moor (a larger village), the housing distribution including the distortion of the spatial strategy by the Blythe Vale site (which forms part of Stoke), the Council's failure to produce sufficient evidence in relation to housing land supply, and the shortfall in housing provision over the plan period.
- 1.4 At the examination hearing sessions, we expressed concern in relation to consulting upon main modifications to the plan at the same time as a new housing land supply position statement from the Council. We maintain serious reservations over this approach, as we cannot see how the examination has progressed to main modifications (usually the final stage before the Inspector's report is published) without full and proper consideration of the new evidence. Our client has a fundamental right to a fair hearing. In our view the new position warrants full and proper consideration, particularly considering the significant soundness issues we have previously identified, and as such the hearings should be re-opened to interrogate the new evidence. It is clear from this evidence that there remains a housing land supply shortfall, and there is a need for further modifications to the plan.

2. Main Modification MM1

Para/Policy Number 1.1.

- 2.1 We welcome the extension of the plan period to 2033. However, due to the ongoing delays in the Local Plan process, even if the plan is adopted by the end of 2019 it will only cover a period of 13 years. The plan is therefore not consistent with the 15-year plan period requirement as set out in paragraph 22 of the 2019 Framework and paragraph 157 of the 2012 Framework.
- 2.2 One of the practical implications of extending the plan period, was the need to identify additional allocations for development. However, no additional allocations are proposed, and there is a shortfall in housing provision for the plan period of at least 271 dwellings (according to the Council's own trajectory). We comment upon the supply implications in our response to the Housing Trajectory and the Housing Implementations Strategy.

3. Main Modification MM6

Policy SS1a

- 3.1 Changes should only be made to make sound a plan that is otherwise unsound. In respect of this policy, it is not clear why the plan is unsound with the policy as currently drafted.

4. Main Modification MM8

Para/Page Number 7.22

- 4.1 We object to the inclusion of the wording "*provides an adequate timeframe*". It is not an adequate timeframe in the context of national planning policy. However, we recognize that a pragmatic judgement needed to be made in light of the Council's evidence base. Ultimately there was a lack of foresight on the Council's part in preparing the evidence base documents, as our representations made clear from an early stage that there were issues in relation to the proposed plan period.

Para/Page Number 7.24

- 4.2 We maintain our objection to the council adopting the 'Liverpool method' to spread the housing shortfall up to the year 2033. We believe the 'Sedgefield method' should be adopted

to readily contribute towards the historic shortfall in the delivery of housing and additional sites allocated. Notwithstanding our concern in relation to the latest iteration of the housing trajectory, it shows that the cumulative shortfall would be addressed by 2023/24. There is no reliance in this plan on sites with exceptional infrastructure requirements, such as new settlements, to meet the housing requirement. It is therefore not clear why it is necessary to proceed with the Liverpool method, other than to artificially show a 5 year housing land supply and restrict otherwise sustainable development from coming forward to address the shortfall within a quicker timeframe.

5. Main Modification MM9

Para/Page Number 7.33

- 5.1 We strongly believe that 10% slippage allowance is not sufficient given the failure to meet development requirements since the adoption of the Core Strategy. A substantially higher flexibility allowance should be provided within the new Local Plan, more in the region of at least 20%, as discussed within our previous representations. However, we acknowledge that this is an improvement over the lack of a slippage allowance in previous drafts of the plan.
- 5.2 We have concerns regarding the 10% slippage allowance insomuch as there does not appear to be any additional allocations or suggested locations for an increased number of units over the previous draft plan. When reviewing the anticipated figures, the trajectory indicates that the plan has a deficit of -271 dwellings, when, due to the 10% slippage allowance, the overall provision should see an surplus of 608 units.
- 5.3 Furthermore, it would be a misinterpretation of national planning policy to rely upon the 2012 NPPF Paragraph 47 or the 2019 NPPF paragraph 67(b), which requires the identification of specific sites for years 11-15 'where possible'. That means that if it is possible to identify specific sites, then they should be identified and allocated. In this case it is eminently possible as this is a whole Local Plan dealing with allocations of all scales, and there are no good environmental or policy reasons for not identifying sites in years 11-15. The Council is not relying upon (or has identified) broad locations. The Council has simply failed to identify a sufficient supply for the plan period. No justification has been provided as to why it has not been possible to identify further sites to meet the requirement in full.

- 5.4 Furthermore, in Staffordshire Moorlands, much of the district is designated as Green Belt and this plan is reviewing Green Belt boundaries. The Framework requires that Authorities must have regard to their Green Belt's intended permanence in the long term, so that they should be capable of enduring beyond the plan period. It is evident upon review that this plan does not take this requirement into consideration.
- 5.5 As discussed in our previous representations, additional housing land should be allocated within the plan, enabling additional residential units to be delivered.
- 5.6 We also maintain that the strategy for the rural areas needs to be fundamentally readjusted, with sufficient housing provided to meet the needs across the rural areas.

6. Main Modification MM20

Page/Policy Number 108, Policy H1 and supporting text

- 6.1 We maintain our objection to only allowing limited infill development outside of smaller villages through the removal of their village boundaries. Furthermore, we object to the monitoring of the windfall site provision. This objection is on the basis that monitoring the provision does not sufficiently address the significant issue of non-delivery of windfall sites. It has already been established within this consultation response, that there is a shortfall in provision across the plan period (-271 units).

7. Main Modifications MM22

Page/Policy 114 Policy H3 and supporting text

- 7.1 The Council's own evidence on viability demonstrates that many the proposed allocations are not viable based on providing 33% affordable housing. The revised policy provides flexibility, but in practical terms this will cause significant uncertainty and delay, as a viability assessment will need to be undertaken for each application that comes forward. If the policy is adopted as drafted then the trajectory needs to properly take this into account, as per our previous representations on the matter. At present it does not.
- 7.2 Notwithstanding the above, we remain of the view that the spatial strategy and site allocations should have been fundamentally re-assessed, on the basis that an alternative strategy could

deliver significantly more affordable housing. There is a significant and serious shortfall of affordable housing provision in the district, and it is unreasonable to simply press on with the same allocations when clear evidence has come to light (i.e. the Whole Plan Viability Assessment) that they will not deliver the requisite quantum of affordable housing.

- 7.3 With regards to part 3 of the policy, we specifically object to the proposed wording 'at the Council's discretion'. An applicant must be able to read the plan on face value and understand what is and is not acceptable. This phrase should be removed.

8. Main Modification MM39

Page 158 Policy DSB1 and supporting text

- 8.1 The proposed reduction in area of site DSB1, The Wharf Road Strategic Development site, will see a reduction in housing provision of 146 units. For reasons explained earlier within this response and in previous consultation responses, there should be an increase in the provision of units and identification sites to address the shortfall arising from this amendment.
- 8.2 In addition, we have re-stated our concerns in relation to the delivery of this site in our response to MM72, emphasised by new evidence. The site will not come forward in full during the plan period. Indeed, it may not come forward at all.
- 8.3 No justification has been provided as to why other options have not been considered for addressing the shortfall. Specifically, there is suitable, deliverable land available in the closest large village of Biddulph Moor which could assist in meeting the shortfall. The allocation of our client's site would accord with the Council's evidence base in relation to Green Belt, landscape impact and delivery. Our client's site is not subject to any significant constraints.
- 8.4 We note that the Council has not considered amending the spatial strategy in spite of a host of constraints and issues being identified on the draft allocations, for example the viability assessment which clearly establishes that many of the draft allocations are not viable and/or will not deliver the policy requirement of affordable housing. This is a fundamental error as the Council is required to adopt the most appropriate strategy, when considered against the reasonable alternatives. The approach must be re-considered in view of the draft main modifications.

9. Main Modification MM54

Para/Policy Number 10.4

- 9.1 A modification is proposed in relation to reviewing the plan every 5 years, and it is stated that the need for a full or partial review will be considered when housing delivery has not met the housing requirements in the Local Plan or the Housing Delivery Test.
- 9.2 It should be noted that the housing trajectory has already been missed by a very significant margin in the first 2 years (see our comments to MM72 below). Numerous sites have not progressed as originally expected and continue to be pushed back in the trajectory, albeit the Council still maintains unrealistic assumptions in respect of the delivery of those sites. This is all in the context of the previous Local Plan which, in terms of housing delivery, failed. We remain firmly of the view that now is the time to properly ensure that the plan meets the housing needs of the area, rather than waiting for the inevitable review based on further failure to meet housing needs.

10. Main Modification MM72

Appendix 7 (Housing Trajectory)

- 10.1 The Main Modification states that it will include an “*amended housing trajectory to reflect updated housing figures 31/03/2019 and Housing Implementation Strategy consultation Jan 19*”.
- 10.2 A new Housing Implementation Strategy (dated July 2019) has been published for consultation alongside the main modifications. However, we have significant concerns in relation to the robustness of the trajectory included within it. There have been two consistent themes throughout the examination in relation to the Council's evidence on housing land supply:
- A fundamental lack of robust, up-to-date evidence to support the Council's trajectory; and,
 - A failure to deliver upon previous trajectories and statements in relation to the performance and progress of sites.

10.3 This not the first, or even the second, trajectory which has been before the examination of this plan. The lack of realism in the trajectory is underlined by actual performance:

- The trajectory at Appendix 7 of the submission version anticipated that 313 dwellings would be completed in 2017/18, and 419 dwellings in 2018/19. However only 142 dwellings were completed in 2017/18 and 165 in 2018/19. Therefore, actual completions in the first 2 years have been 58% less than the trajectory in the submitted plan.
- The updated trajectory submitted by the Council during the examination (ref: EL7.003, dated January 2019) anticipated that 291 dwellings would be completed in 2018/19. Actual performance in that year was 43% less than the trajectory.

10.4 This evidence alone demonstrates that the Council's assumptions have consistently proved to be wrong and are not supported by robust evidence. If the Council cannot even predict housing delivery in the forthcoming year, then we cannot see how the Inspector can have any confidence in its ability to predict housing delivery over the course of the plan period. This is not at all surprising given the total absence of documentary evidence which underpins the Council's housing land supply position and the delivery of sites within the trajectory.

10.5 Paragraph 68-004 of the PPG "How can an authority demonstrate a 5 year supply of deliverable housing sites?" states the following in relation to plan-making:

"In plan-making, strategic policies should identify a 5 year housing land supply from the intended date of adoption of the plan."

10.6 It should be noted that whilst this plan is being assessed under the interim arrangements set out in paragraph 214 of the 2019 Framework, the onus has always been on the Council to demonstrate that sites without planning permission (i.e. the draft allocations) are deliverable if they are to be included within the 5 year housing land supply.

10.7 Paragraph 68-007 of the PPG: "What constitutes a 'deliverable site' in the context of plan-making and decision-taking?" provides further information. It states:

"In order to demonstrate 5 years' worth of deliverable housing sites, robust, up to date evidence needs to be available to support the preparation of strategic policies and planning decisions. Annex 2 of the National Planning Policy Framework defines a deliverable site. As well as sites which are considered to be deliverable in principle, this definition also sets out the sites which would require further evidence to be considered deliverable, namely those which:

- *have outline planning permission for major development;*

- *are allocated in a development plan;*
- *have a grant of permission in principle; or*
- *are identified on a brownfield register.*

Such evidence, to demonstrate deliverability, may include:

- *current planning status – for example, on larger scale sites with outline or hybrid permission how much progress has been made towards approving reserved matters, or whether these link to a planning performance agreement that sets out the timescale for approval of reserved matters applications and discharge of conditions;*
- *firm progress being made towards the submission of an application – for example, a written agreement between the local planning authority and the site developer(s) which confirms the developers' delivery intentions and anticipated start and build-out rates;*
- *firm progress with site assessment work; or*
- *clear relevant information about site viability, ownership constraints or infrastructure provision, such as successful participation in bids for large-scale infrastructure funding or other similar projects."*

10.8 The new HIS fails to produce any such evidence. We maintain the objections that we expressed in relation to housing land supply at previous stages of the examination, as it is apparent that delivery has been significantly lower than anticipated by the LPA, and numerous sites within the trajectory have not progressed as anticipated. Once again, the Council has amended the start dates for numerous sites within the latest housing trajectory. Once again, no new evidence is provided to support the Council's position.

10.9 We provide a table at Appendix **EP1** which summarises the changing positions on the sites within the supply, and a comparison with the evidence provided to support the trajectory (i.e. Appenedix 1 of the HIS). The progress suggested by the Council on many sites has clearly failed to materialise, and yet no new evidence is provided to support the latest assumptions. We therefore maintain the position set out in our Matter 4 hearing statement in relation to which sites clearly do not meet the definition of deliverable and should not be included within the 5 year supply / first 5 years of the trajectory. As the base date is now 1 April 2019, the earliest that these sites could be considered to start delivering in the trajectory is 2024/25.

Wharf Road, Biddulph

10.10 We have commented on the delivery of a number of the allocated sites. There is nothing within the latest evidence to suggest that these fundamental issues have been resolved. However, in relation to the land at Wharf Road, Biddulph, the Council has recently published a committee

report which fundamentally contradicts the Council's own position at the Local Plan. This is significant new evidence and must be considered in assessing the soundness of this plan. A copy of the committee report is appended at **EP2**, although we assume that the Council has already provided a copy to the Inspector given its clear relevance to the examination.

10.11 At the examination the Council claimed that all landowners were being engaged through the masterplan process. However, paragraph 8.12 of the committee report makes clear that the land ownership issues remain a significant and unresolved constraint, and a number of landowners have failed to engage:

"The most significant challenge to delivering the Wharf Road site relates to the large number of landowner's, 14 in total, or 12 excluding the land at BDNEW. The consultants recommend that, in order to secure a sensible layout and maximise development potential it will be necessary for co-operation between the various landowners. This is a challenge as different owners have different aspirations and levels of willingness to co-operate. There are some landowners who understand the need to work with others collectively to enable the development, whilst others who did not engage with the masterplan process and may assume that they can deliver their site in isolation. Whilst some landowners did not engage with the masterplan process, all landowners are supportive of the Local Plan land allocation." (our emphasis)

10.12 Paragraph 8.14 sets out the need for joint working and the need for a joint venture agreement or similar:

"The masterplan recognises that the main challenge to delivering the site is the large number of landowners. To successfully deliver the scheme the landowners will need to work together and agree to sell the land through a formal joint venture or by working with a third party developer and agreeing options to ensure the whole site is delivered, rather than pockets of isolated development."

10.13 Paragraph 8.17 sets out the recommendations of the Council's appointed consultants:

"Sanderson Weatherall suggested next steps are;

- 1. Ascertain / acquire ownership of the land that has not been registered*
- 2. Carry out feedback session with landowners to discuss the finding of the report*
- 3. Discuss potential sales value with landowners*
- 4. Carry out formal valuation of residential properties*
- 5. Carry out formal pre-application for the site to help de-risk the project*
- 6. Source development partner through competitive tender" (our emphasis)*

10.14 Not only does the report identify the need to ascertain / acquire ownership of unregistered land, the above steps are necessary before even an outline application is submitted. They are wholly incompatible with delivering the site within the timescales envisioned within the trajectory. Indeed, there is significant risk as to whether the site will be delivered at all during the plan period.

10.15 Paragraph 8.18 adds:

“Officers recommend that no further work is commissioned to consultants at the present moment in time. This maybe [sic] reviewed at a later date once the Local Plan is adopted and market demand for the site has been established. In the mean time [sic] officers will proactively work with landowners to understand and explain the findings of the masterplan and the implications this will have on development potential and expected land values.”

10.16 Again, such an approach (ceasing work, a decision that “may be reviewed at a later date”) is wholly incompatible with the housing trajectory. The prospect of agreement between landowners and an eventual planning application is clearly many years away.

10.17 The only reasonable conclusion is that the site will not start delivering for at least several years and must be pushed back significantly in the trajectory to reflect the above issues. There is also a need for sufficient flexibility within the supply to deal with the very real prospect that the site may not deliver any units at all during the plan period.

10.18 It should be noted that simply removing this site from the first 5 years of the trajectory reduces the supply by 125 units. This amendment alone results in the deliverable supply reducing to less than 5 years.

Blythe Vale

10.19 The site is included for 15 units in 2019/20. However, at the time of writing pre-commencement conditions are yet to be discharged. A further planning application for a re-plan of phase 1 (LPA ref: SMD/2018/0790) also remains undetermined. It is not realistic to assume that 15 units will be completed in 2019/20. First completions should be pushed back to 2020/21. This would reduce the 5 year supply by 30 units.

10.20 The site has also been split up and is included twice within the trajectory, to reflect the planning permission. However, this results in overlap between phases 1 & 2, a position which increases

the development rates in 2021/22 and 2022/23 to 45 dwellings per annum. This should be amended so that phase 2 follows on from phase 1. There is no evidence of a second developer. This would reduce the 5 year supply by a further 45 units.

10.21 Such is the fragility of the Council's 5 year supply position, the above amendments to the Blythe Vale site (i.e minus 75 units) would result in the deliverable supply reducing to less than 5 years.

Build rates / lead-in times

10.22 We maintain our objections as set out in our representations to the previous version HIS. The Council has no evidence to justify the assumptions in most categories at Appendix 2 of the HIS. Whilst a very small selection of cherry-picked examples is provided, the evidence is limited at best and it is not clear why the examples that we provided in our representations to the HIS have not been considered.

11. Housing Implementation Strategy

11.1 We have set out our comments in relation to the Housing Implementation Strategy, and in particular the revised housing trajectory, in our response to MM72. The revised trajectory is not robust and is not underpinned by anywhere near the level of evidence that national planning policy expects.

11.2 We also refer to our previous consultation response to the HIS in February 2019. The comments remain applicable to the latest HIS given that very little has changed in the document.

11.3 The only reasonable conclusion to be drawn from the evidence is that the Council cannot demonstrate:

- a 5 year housing land supply; and,
- a sufficient housing land supply over the plan period.

11.4 The plan can proceed to adoption considering this position and the fundamental absence of evidence.

12. Conclusions

- 12.1 This consultation response has outlined the proposed modifications we object to and provided justification for our objections.
- 12.2 It should be noted that our outstanding objections, detailed in our previous consultation responses still stand as there are no proposed modifications that address our previous objections.
- 12.3 Our position that the plan is not sound, justified, effective, consistent with national planning policy (both current and archived) nor positively prepared remains unchanged.

13. Appendices

EP2

STAFFORDSHIRE MOORLANDS DISTRICT COUNCIL

Cabinet

8 October 2019

TITLE:	Wharf Road Strategic Development Site
PORTFOLIO HOLDER:	Councillor Ralphs - Leader
CONTACT OFFICER:	Sarah Porru- Head of Regeneration
WARDS INVOLVED:	Biddulph West

**Appendices Attached – Appendix 1 Executive Summary
Appendix 2 Landownership plan**

1. Reason for the Report

- 1.1 To inform Councillors of the Wharf Road masterplan, which has been prepared to assist with the delivery of the emerging Local Plan.

2. Recommendation

- 2.1 That the Cabinet note the findings of the masterplan, but at this time do not commission further work.

3. Executive Summary

- 3.1 As part of the Accelerated Housing Delivery Programme, Sanderson Weatherall were commissioned in September 2018 to complete a masterplan for the Wharf Road Strategic Development area identified in the emerging Local Plan (DSB1).

- 3.2 The basis for commissioning the masterplan was based on several objectives:

- 3.2.1 Assist delivery of the Local Plan
- 3.2.2 Bring together the landowners with a co-ordinated vision for the site
- 3.2.3 Devise a strategic vision for the site which can then be promoted to developers and investors.

- 3.3 As part of the masterplan process, a review of the housing market found limited interest from private sector developers. The research suggests that

this was due to Biddulph being a secondary location in comparison to larger towns such as Congleton and Tunstall which offer more amenities and job opportunities. Consequently, the consultants found the sales rates anticipated for new build at Wharf Road would be slightly lower given its rural location and poor public transport links. The consultants also identified it is possibility not a lack of demand, but also lack of development opportunities. No land has been allocated for new residential development since the 1998 Local Plan. The emerging Local Plan identifies suitable land for 3802 homes across the whole the Staffordshire Moorlands over the Local Plan period.

- 3.4 Three options were developed for the site, in line with the emerging Local Plan DSB1 policy. The options focused, not on what should be delivered in terms of residential dwellings or mix, but where on the site it should be located.
- 3.5 Options 1 & 2 focused the retail/ employment element of the scheme to the north of the site, whilst option 3 identified an area in the south of the site for this use.
- 3.6 The Council's preferred option 3 would potentially deliver approximately 471 residential units (including land to the east of Meadow Way) and an additional 145 residential dwellings with the land at BDNEW. Subsequently, following post hearing comments from the Local Plan Inspector in December 2018, the area of land known as BDNEW, which lies to the West of the Biddulph Valley Way has been deleted by the Council (in June 2019) as a Local Plan allocation. The Wharf Road Masterplan had already been commissioned and was nearing completion before the inspector sent his comments to the Council. The completed masterplan therefore recognises this change by providing two options, including and excluding BDNEW.

4. How this report links to Corporate Priorities

- 4.1 The Wharf Road Masterplan seeks to deliver housing growth anticipated in the Local Plan and will therefore have implications the following aims of the Corporate Plan:
 - Aim One - Help create a safer and healthier environment for our residents to live and work
 - Aim Three – To create a strong economy by supporting further regeneration of towns and villages
 - Aim Four - Protect and improve the environment.

5. Alternative Options

- 5.1 Option 1 (recommended) that the Cabinet note the Wharf Road Masterplan, recommendations and next steps. Officers suggest that the masterplan not be formally adopted as an Supplementary Planning Document (SPD) , to allow maximum flexibility in the delivery of the site.
- 5.2 There are no options as the report is for noting only.

6. Implications

- 6.1 Community Safety - (Crime and Disorder Act 1998)
No implications
- 6.2 Workforce
No implications
- 6.3 Equality and Diversity/Equality Impact Assessment
- 6.4 Financial Considerations
A budget of £29,425 was approved by Cabinet in April 2018. There are no further financial considerations going forward.
- 6.5 Legal
No legal implications
- 6.6 Sustainability
The masterplan was prepared according to wider sustainability considerations
- 6.7 Consultation
No public consultation event was held as part of the masterplan process due to the local plan examination process.
- 6.8 Risk Assessment
A risk assessment was carried out of part of the masterplan process

Dai Lerner
Executive Director (Place)

Accelerated Housing Delivery Programme (April 2018)

Contact details

Kate Hall
Regeneration Officer
kate.hall@highpeak.gov.uk

7. Detail

- 7.1 The Council is committed to accelerating housing delivery across the Staffordshire Moorlands area. The District has suffered from low levels of development for many years. Planning approvals are being granted on sites but some are not coming forward to the construction phase. In order to tackle this problem we listened to the issues raised by developers and developed a comprehensive delivery programme to tackle the problem. The Accelerated

Housing Delivery programme was approved by Cabinet in April 2018 and focuses around 2 core aims;

- Deliver community benefits in the form of increased income from council tax, business rates and New homes Bonus for reinvestment in the community.
- Drive forward delivery of the local plan and maintain 5 years land supply by proactive measures and Council led interventions where appropriate..

7.2 The emerging Local Plan identifies the land at Wharf Road, Biddulph as a Strategic Development site (local plan policy DSB1). The development of a masterplan is pivotal in developing the strategic vision for the Wharf Road area to assist with bringing the site forward for development. Therefore Sanderson Weatherall were commissioned back in September 2018 to prepare the plan.

Site details

7.3 The land at Wharf Road is a key mixed use development site. It is in a sustainable location close to the town centre and presents an opportunity to comprehensively plan for a range of uses to make a significant contribution to Biddulph's development needs.

7.4 Local Plan (Submission Version) Policy DSB1 stated the following:

The Wharf Road site is a 23.4 hectare site which is allocated for mixed use development of:

- Housing 20.4ha (approximately 588 dwellings)
- Employment 1ha
- Retail 0.5ha (food store of around 1000m2 net sales floor)
- Retention of school playing field 1.5ha

7.5 Following post hearing comments from the Local Plan Inspector in December 2018, the area of land known as BDNEW, which lies to the West of the Biddulph Valley Way has been recommended for removal as a Local Plan allocation.

7.6 On 26th June 2019, the Council agreed a schedule of main modifications to the Local Plan (Submission Version) to address the Inspector's feedback. This includes the removal of site BDNEW and consequential amendments to the Policy DSB1. They included increased housing densities on the remainder of the Wharf Road allocation in light of the masterplan preferred option, a reduced site area (18.5ha) and revised housing yields (442 homes).

7.7 Consultation on main modifications will take place during September / October before the Inspector draws further conclusions.

7.8 The Wharf Road Masterplan had already been commissioned and was nearing completion before the inspector made this decision. The completed masterplan therefore recognises this change by providing two options,

including and excluding BDNEW.

7.9 The emerging local plan through policy SS6 seeks to enhance the role of Biddulph as a significant service centre and market town and support its regeneration through the following actions:

- Improve the local housing market and range of community facilities by increasing the range of house types available especially for first time buyers, families and older people.
- Create employment growth and increase diversity of employment opportunities
- Strengthen the role of Biddulph as a significant service and retailing centre

7.10 Wharf Road was identified as a priority site for delivery intervention due the large number of landowners, 14 in total (shown in Appendix 2). The landowners comprise a range of stakeholders including the District Council, County Council, James Bateman Junior High School, private investment companies and a range of individual owners with little or no development experience. In addition to the large number of landowners, the site is also heavily constrained and requires a harmonized approach to maximise the development potential of the site. It was felt that the development of a cohesive masterplan would ensure a sustainable vision for the site which will be promoted to suitable private sector investors/developers once the Local Plan is adopted.

7.11 Planning History

7.12 Land at the northern end of the site was allocated for retail, employment and non food retail as part of the Biddulph Area Action Plan (2007) whilst the principal of residential development was identified for the southern section of the site, (previously known as area 4) in the Core Strategy (2014).

7.13

Planning ref	Description	Decision
SMD/2009/0284	change of use of land, erection of garage, office building and parking for 10 coaches	Approve
SMD/2006/0647 SMD/2007/0024	& erection of non food retail units	Outline approval
SMD/2011/0332	erection of 8 retail units (approval of reserved matters)	refused
SMD/2011/0332 SMD/2012/0175	approval of reserved matters relating to 07/00170/ OUT_MJ	Refused & withdrawn
SMD/2006/1224 SMD/2007/0593	& residential development	Refused
SMD/2015/0684	Extra care development	Withdrawn

Masterplan process

- 8.0 The masterplan is split into 4 key areas, each of which will be covered in detail below:
- Market Demand
 - Options
 - Viability & deliverability
 - Recommendations and next steps

Market Demand

- 8.1 The consultants felt the housing market in Biddulph had stalled due to a number of factors, summarised below:
- Very limited major new build residential developments (Uplands Mill in 2012 being the most recent)
 - Identified lack of supply of executive new build detached properties within Biddulph.
 - Sales rates achievable for new build at Wharf Road are slightly less than comparables given its rural location.
 - Lack of public transport links as Biddulph relies solely on bus links.
 - Biddulph is a secondary town and in comparison to larger towns such as Congleton and Tunstall which offer more amenities and job opportunities.
 - Lack of evidence of demand for development opportunities could be due to the limited availability of suitable sites and given the predominant green belt status.
- 8.2 Even though the current housing market has stalled the consultants felt the site offered an excellent opportunity to deliver open market/ affordable housing and suggested the following mix of properties types.
- 1/2 bed apartments – Extra Care/ Sheltered
 - 2 bedroom terrace house- high density
 - 3 bedroom semi detached house – high density
 - 3/4 bedroom detached house- mid density
- 8.3 The predominant theme identified by the consultants was a perceived lack of demand for housing in the Biddulph area. As noted earlier the last major new build development commenced in 2012. It is important to note, that as the consultants identified, it is possibly not a lack of demand, but a lack of development opportunities which has stalled the housing market. This can be directly linked to the Local Plan process where no land has been allocated for new residential development since the 1998 Local Plan. The emerging Local Plan identifies suitable land for 3802 homes across the whole of the Staffordshire Moorlands area over the Local Plan period.

Options

- 8.4 Sanderson Weatherall developed 3 options for the site, shown in Appendix 1.

- 8.5 The 3 options focus on how different layouts would impact on deliverability of the site, rather than the amount and type of proposed development.
- 8.6 The options are summarised below, including the additional land east of Meadow Way:
- Option 1- 482 residential units (627 units including land at BDNEW)
Option 2 - 515 residential units (660 units including land at BDNEW)
Option 3 - 471 residential units (616 units including land at BDNEW)
- 8.7 Option 3 was identified as the Councils preferred option. Due to the Local Plan examination process we were unable to carryout a public consultation event. The decision to move forward with option 3 as the Councils preferred option was made by senior council officers in conjunction with Sanderson Weatherall after reviewing the advantages and disadvantages of each option.
- 8.8 The executive summary shown in appendix 1 highlights the benefits of each option in detail.
- 8.9 Officers felt that option 3 delivered greatest benefit and was the scheme most aligned with owner aspirations. The benefits identified were:
- Sports provision located closer to existing school building
 - Retail/ employment located close to housing, creating a village green surrounded by housing and retail
 - Access to the site in three locations
 - Higher density units to suit extra care / sheltered housing for elderly positioned closer to town centre facilities.

Viability and deliverability

- 8.10 Sanderson Weatherall completed a detailed viability assessment of the scheme which indicates that both scenarios i.e. with or without land at BDNEW are viable and produce positive land values in the region of £113,000 - £125,000 per acre.
- 8.11 The viability section of the masterplan is crucial as it demonstrates to landowners and potential developers that the site stacks up financially, and is worth investigating further. There has already been considerable interest from several discount supermarkets for the retail element of the site and discussions with the County Council are on going.
- 8.12 The most significant challenge to delivering the Wharf Road site relates to the large number of landowner's, 14 in total, or 12 excluding the land at BDNEW. The consultants recommend that, in order to secure a sensible layout and maximise development potential it will be necessary for co-operation between the various landowners. This is a challenge as different owners have different aspirations and levels of willingness to co-operate. There are some landowners who understand the need to work with others collectively to enable the development, whilst others who did not engage with the masterplan

process and may assume that they can deliver their site in isolation. Whilst some landowners did not engage with the masterplan process, all landowners are supportive of the Local Plan land allocation.

8.13 Given the size of the Wharf Road site, the consultants suggest the site be delivered in 3-4 phases. Of critical relevance to the phasing and delivery of the site is the ability to access the land and identify which parcels of land effectively control access to the site. With this in mind there are a number of packages which naturally flow from the landownership and anticipated levels of co-operation which are shown in detail in the executive summary in Appendix 1.

- Phase 1 – plots 1, 2, 6 and 9
- Phase 2 – plots 8 and 10
- Phase 3 – plots 3,4,5 and 7
- Phase 4 – plot 11 (land at BDNEW) (since completion of the masterplan, BDNEW land allocation has been removed from the emerging Local Plan)

Recommendations and Next Steps

8.14 The masterplan recognises that the main challenge to delivering the site is the large number of landowners. To successfully deliver the scheme the landowners will need to work together and agree to sell the land through a formal joint venture or by working with a third party developer and agreeing options to ensure the whole site is delivered, rather than pockets of isolated development.

8.15 While the masterplan provides a good indication of what the site can deliver and demonstrates the site is financially viable, the document will not be adopted as a Supplementary Planning Document (SPD).

8.16 Through the masterplan process, a vision and preferred option has been developed which we feel meets both the Councils and wider landowner aspirations most effectively. It is envisaged that masterplan will promote and stimulate interest in Wharf Road development opportunity. Ultimately it is for the open market, through developers and landowners to a lesser extent to decide how the site will come forward. The anticipated Local Plan provides detailed requirements through policy (DSB1 & SS6) but does allow some flexibility if required.

8.17 Sanderson Weatherall suggested next steps are;

1. Ascertain / acquire ownership of the land that has not been registered
2. Carry out feedback session with landowners to discuss the findings of the report
3. Discuss potential sales value with landowners
4. Carry out formal valuation of residential properties
5. Carry out formal pre-application for the site to help de-risk the project
6. Source development partner through competitive tender

- 8.18 Officers recommend that no further work is commissioned to consultants at the present moment in time. This may be reviewed at a later date once the Local Plan is adopted and market demand for the site has been established. In the mean time officers will proactively work with landowners to understand and explain the findings of the masterplan and the implications this will have on development potential and expected land values.
- 8.19 In order to facilitate and promote development of the site, on adoption of the Local Plan the Council will actively engage private sector developers and promote the site. The Council will also work closely with Homes England to investigate funding opportunities and will bid for funding as and when appropriate.

Sansom, Claire

Subject: Further comment regarding MM12 - Safeguarding of BD062, BD068 and BD087

Follow Up Flag: Follow up
Flag Status: Flagged

Categories: Yellow Category

Dear Sirs

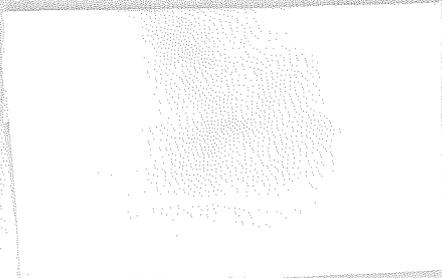

It has been brought to our attention that you omitted part of your evidence base when you made decisions about these sites on 26th June 2019 at the Council Assembly and also omitted was the ecological evidence base and it has also been incorrectly stated that these fields are urban / industrial land, which is not true.

The decision to safeguard fields in Gillow Heath needs reconsidering both in light of your errors and in light of the evidence contained within the emerging Biddulph Neighbourhood Plan (REG14 closing 4th November 2019).

Therefore we would make a further comment that based on the above The SMDC Main Modifications are not Sound and do not Comply with the Duty to Cooperate.

Yours faithfully

BC & BM Webb

Dear Sir

Reference MM12 – Objection to BD062, BD068 & BD087 to be included in Plan as ‘Safeguarded’

I realise the need for safeguarded sites for the future, but I was very surprised to see these 3 sites have been added to the Biddulph Plan having previously been rejected because of their unsuitable location.

These sites must be the most unsuitable sites for residential development in the whole of Biddulph, being on the boundary of the Sewage Works, Biddulph Brook, situated on flood plains with very poor highway access. Two of these sites have already been refused planning permission on a number of occasions over the past years.

The sewerage system from Biddulph town & districts converges into a common collecting chamber at the south end of the sewage works near to the boundary with Essex Drive/ York Close, joining at this point is a large public sewer that runs diagonally (along with others) across BD068, this sewer originates in the A527 Congleton Road area. Although United Utilities have strict guidelines on building over or adjacent to the sewers route, should this very old sewer be damaged during construction work, a major environmental disaster could occur, affecting hundreds of residents and their homes.

All the old sewerage systems carry surface/ storm water as well as sewage. During heavy rain the common collecting and converging chamber at the south end of the sewage works cannot take the volume of water resulting in the inspection cover lifting and untreated sewage overflowing directly into Biddulph Brook (have photo evidence), producing the strong pungent odour that can be detected all across these sites and the surrounding area of Gillow Heath. Untreated raw sewage then flows down Biddulph Brook which rises and overflows onto the flood plains over all the 3 sites (have photo evidence). Leaving this land contaminated when the flood water level s drop. Also during this flooding situation, a sewer backs up from this point and the resulting back pressure lifts a sewer inspection chamber cover in Mow Lane. This then deposits raw sewage into Mow Lane which then flows down residents' gardens and drives. In severe wet weather I understand 2 to 3 others covers have also been known to lift adding more sewage to the existing problem. To add more sewage from these proposed sites would aggravate this problem considerably more, creating a bigger environmental/hygiene problem to the residents and traffic in Mow Lane and to Biddulph Brook. In my opinion no extra development north of Mow Lane should even be considered because of these old sewerage systems and the problems they are creating. As the temperature and rainfall continue to increase due to climate change, this problem will continue to get considerable worse.

I find it somewhat surprising that I cannot find anywhere in these safeguarding proposals any report, survey or comments from the Environmental Agency or for that matter from United Utilities. Why is this? Surely these should be the first agencies to have an input into the suitability of these sites. Based on these reasons I must strongly object to any development on these sites and request that they are restored back to green belt status.

Yours faithfully

Mr B C Webb

Dear Sir

All these three proposed safeguarded sites would cause considerable extra traffic on Marsh Green Road and/or Mow Lane. Our local police consider Marsh Green Road and Mow Lane the most dangerous roads in Biddulph, with the winding narrow roads converging onto the notorious junctions with the A527 combining with the speeding traffic. The last vehicle count I have is as follows and I quote:-

Data provided by Staffordshire County Highways in October 2015 gave the following results for the A527:-
Northbound direction shows that on an average day (24hrs) 7958 vehicles drive along Congleton Road. Of these 7958 vehicles the 85th percentile speeds were 34.4mph. The peak of the volume was at 17:00 hrs with 601 vehicles travelling in this direction.

Southbound direction shows that on an average day (24hrs) 7318 vehicles drive along Congleton Road. Of these 7138 vehicles the 85th percentile speeds were 33.6 mph. The peak of the volume was at 17:00 hrs with 724 vehicles travelling in this direction.

An average weekday peak hour two way traffic flow of 1325 vehicles.

This volume has obviously increased over the last four years and has also been aggravated by the extra vehicles on Woodhouse Lane and Smithy Lane, being the exit roads from the extra 200 houses recently completed by Bovis Homes on the new Uplands Estate. Should BD068 and BD087 be developed this will incur at least an extra 150 vehicles using Marsh Green Road and the horrendous junction with the A527. Similarly extra vehicles would use the equally dangerous Mow Lane junction.

With the proposed safeguarding for development of BD068 and BD087 it would appear that travelling West down Marsh Green Road – a single lane cutting, would encounter an entrance/ exit onto BD068, then immediately onto the existing narrow stone bridge (weight limit unknown), then immediately after the bridge, the entrance/exit into the sewage works and directly opposite this a proposed entrance/exit onto BD087 and alongside the existing footbridge to the public footpath. There are no pavements in this area and this is also the location subject to flooding. It should also be noted that there is no street lighting in Marsh Green Road.

It should be noted that at least once a day an articulated tanker enters and leaves the sewage works having great difficulty negotiating the narrow bridge and lane and added to this, particularly during the summer months, farm tractors and trailers regularly use this route to the local farms. This road leads to the one of the access points to the Biddulph Valley Way and is extensively used by walkers, cyclists & runners who as locals are very much aware of the dangers of using this road now; what an horrendous, possibly fatal accident waiting to happen by the bridge, should this safeguarded land be released for development. I consider that these two sites would create an increased level of danger, not only to the current residents in this location, but to any new residents on these proposed safeguarded sites.

For these reasons, these three sites should not even be considered for development whilst there is this inherent danger to all road users in this area.

Yours faithfully

Dear Sir

I strongly object to these three sites, having been rejected following the 2017 consultation are now being targeted for 'safeguarding'. Nothing has changed with regards to the unsuitability of these sites. BD062 and BD068 are still on the boundary of the sewage treatment plant, along with BD087 they are still on a flood plain and after heavy rain flooding is still an ongoing problem. The collecting point at the south of the sewage plant still overflows cascading raw sewage onto these sites and the flooding causes a backup issue for Mow Lane and until this flooding and contamination is eradicated building north of Mow Lane should not be considered. Having been on a site visit to the sewage treatment works in Biddulph with a local councillor, the engineer conducting the guided tour made it clear that the sewers pipes in Biddulph are obviously very old and some were possibly unmapped so United Utilities were not sure of the location of sewers that cross BD068 and replacing the main sewer from the High Street in Biddulph for larger capacity would be impossible and increasing the capacity by building would, in my opinion, just increase the problem of flooding over these three sites – apart from any increase in rainfall through climate change. Having read numerous documents on the consultation website it appears to me that these sites have been hurriedly included in the local plan albeit 'safeguarded' without any regards for the reasons they were rejected in the first place or any further assessments carried out. My concern is that once these sites are removed from the greenbelt they can never be returned and as far as I concerned safeguarding is more for the benefit of the landowner rather than the residents and I quote Julian Sturdy MP for York Outer whose constituents were facing a 'safeguarding' of land.

"My concern, however, is that once land has been removed from the green belt, it is effectively lost, gone forever as development is practically guaranteed to occur on the site at some point in future. Although local authorities are encouraged to make it clear that safeguarded land is not currently available for development, I fear that, sadly, some weak-willed local authorities may sacrifice the long-term interests of local residents for short-term gain by permitting development ahead of schedule." This transcript is from House of Commons Hansard May 2014, but it is as relevant today.

Document E from the consultation gives five options, options 1 to 4 mention other sites in and around Biddulph and Knypersley, including BD062, BD068 and BD087, for 'safeguarding' however Option 5, the 'preferred' option by the council, omits them all apart from BD062, BD068 & BD087.

Why is this? when these three sites must be the worst pieces of land in Biddulph for development – they suffer from flooding as previously mentioned, access to these sites are down narrow single track roads (which are already busy including tractors and trailers from nearby farms, plus the articulated tanker accessing the sewage works on a daily basis which blocks Marsh Green Road whilst the driver negotiates the access to and from the sewage works on the bridge) with junctions onto the A527 which are horrendous and dangerous. As a user of the Marsh Green/A527 junction I am very aware that it is a dangerous junction and in fact some months ago whilst waiting to exit Marsh Green Road and having to 'inch' out to see the oncoming traffic from both Congleton and Biddulph, because of the dips in the road from both directions close to this junction, an approaching motorist obviously took exception to me having to do this and made a very rude gesture to me! Developing these sites would increase the volume of vehicles and make the junctions even more dangerous - fatal for some poor soul!

Yours faithfully,

Mrs B M Webb

Dear Sir/Madam

RE: STAFFORDSHIRE MOORLANDS LOCAL PLAN – MAIN MODIFICATIONS CONSULTATION

We represent the **West Midlands HARP Planning Consortium** which includes all the leading Housing Association Registered Providers (HARPs) across the West Midlands. Our clients' principal concern is to optimise the provision of affordable housing and to ensure the evolution and preparation of consistent policies that help deliver the wider economic and social outcomes needed throughout the region.

The following comments are made with regard to Local Plan **Policy H3** on affordable housing and its supporting text.

Affordable housing definitions

We notice that the updated definition for affordable housing is absent from the main modifications document. Local Plans should provide an up-to-date national definition for affordable housing in order to clarify which property types are classified as affordable and to help applicants understand which housing types they should look to provide in their applications to be considered policy compliant.

The national affordable housing definition specified in Annex 2 of the NPPF refers to "*affordable housing for sale or rent, for those whose needs are not met by the market (including housing that provides a subsidised route to home ownership and/or is for essential local workers)*" and which complies with one or more of parts a) to d) of that definition, and not to 'intermediate affordable' housing. The definitions have specific in perpetuity retention or subsidy recycling requirements, and it is those differences that make it important for local plans to specifically reference the national definition to capture the range of affordable housing that can be delivered to meet different local needs.

Affordable housing target

The SHMA (2017) identifies that there is a net annual need of between 224 and 432 affordable dwellings per annum. The Local Plan has proposed an objectively assessed housing target of 6,080 dwellings over the plan period, equating to 320dpa. The main modifications document states that this requirement is "*seen to be 'aspirational but realistic' when considered in the context of an historic average delivery rate of 161 homes per year*", also adding that the 320dpa will 'help' to address affordable housing need. Comparing the annual affordable and market housing need it is clear that a large proportion of housing delivery would have to comprise solely of affordable housing. This is recognised in the SHMA which claims that Staffordshire Moorlands would need to provide "*at least 75% of its total annual housing requirement to comprise affordable housing if it is to meet all of its need even under the most favourable assumptions*".

Considering all of the above, it would be unrealistic to assume that that such high levels of delivery would be achievable when considering the effects of viability (among other aspects) on housing development. Therefore, all other efforts must be made by the Council to deliver as much affordable housing as reasonably possible within the District in order to ensure that delivery is striving to meet identified affordable housing need.

Affordable housing threshold

We are pleased to see that the affordable housing thresholds have now been revised to align with the Planning Practice Guidance which states that affordable housing should only be sought on residential developments that are major, i.e. a development where 10 or more homes will be provided, or the site has an area of 0.5 hectares or more.

Regarding the supporting text at **paragraph 8.56**, we would like to remind the council that its wording on seeking a 'target' of 33% affordable housing on-site too openly invites developers to offer affordable housing at below this level. However, it is encouraging to see that the wording for **Policy H3(1)** has been amended to provide a minimum affordable housing contribution while omitting the use of the word 'target' and allowing for deviation from the 33% where it is demonstrated to be necessary through viability evidence. We would recommend removing the word 'target' from paragraph 8.56 in order to ensure consistency between **Policy H3(1)** and its supporting text.

Affordable housing mix

The affordable housing mix set out within **Policy H3(2)** is too rigidly defined, giving little flexibility for discussion and negotiation as required for individual sites. Whilst the proposed 60:40 tenure split reflects the evidence of the SHMA, the wording should be revised to reflect the range of affordable housing types as set out in Annex 2 of the NPPF to ensure consistency with national policy and effectiveness in meeting needs. As previously mentioned, local plan policy regarding tenure mix should refer to parts a) to d) of the NPPF definition, and not simply just to affordable rent and 'intermediate affordable' housing.

Affordable housing mix policy should also allow flexibility to ensure that the tenure split brought forward on individual sites reflects local housing need, the need to provide mixed and balanced communities, and to deliver viable development. The affordable housing mix should also refer back to the NPPF affordable housing definition which includes a wide range of affordable housing products.

We would like to be notified when the Plan has been submitted for Examination, by email only to consultation@tetlow-king.co.uk. Please ensure that the **West Midland HARP Planning Consortium** is retained on the consultation database, with Tetlow King Planning listed as its agent.

Dear Sirs

Re: Main Modifications Consultation /
Additional Modifications Consultation
- September 2019 - Local Plan

Further to my telephone conversation today with your David Davis, I wish to make comment/representations as follows:-

Some 30 years ago members of my family purchased the property known as:-
"Mayfield", Stanley Road, Stoekton Brook and which included about 7 acres of land.

The property was already in a derelict condition and a change of use was considered for use as a private hotel because we were aware grants were available and a planning application was therefore submitted.

The Planners at SMDC recommended approval for the application but the Planning Committee turned it down.

At the subsequent appeal at the Public Enquiry (because the property had suddenly become a listed building) the Inspector gave approval for the change of use and also ruled SMDC must pay all our costs.

However we only received a fraction of the costs and all the grants which were available were not available any more.

I never dealt with any of the issues relating to "Mayfield" at the time,

() was the person dealing with "Mayfield" but I am aware a further application was submitted for a house fronting Stanley Road which did not receive approval.

It is understood repair work was done on the "Mayfield" property which did not initially have Listed Building Consent which was done to stop it falling down and to date the work has never been completed and has become a case of throwing 'good money after bad'

Now coming to the Local Plan Modifications, at the initial stages the SMDC Housing Local Plan we were aware housing had been recommended on part of the 7 acres of land at "Mayfield" ie. it was a possible site for housing development and already had a proper access roadway onto Stanley Road.

However at the last stage / final plan the location of "Mayfield" had been deleted from the plan without any known reason and when this site is a 'blot on the landscape' and 'crying out' for rejuvenation due to dereliction of the site.

In contrast a garden site at Endon is included in the final plan and therefore making the final plan unsound in the extreme when a comparison is made with the Mayfield site which is derelict.

Not including the "Mayfield" site amounts to an abuse of process of the Final Local Plan of SMDC.

I have previously made representations / comments some months ago about "Mayfield" not now being in the Local Housing Plan which I assume have to be on file in your system.

There can be little doubt that "Mayfield" has cost family members a lot of hard earned money and that SMDC are to blame in this respect.

It is hoped this letter will lead to further consideration for the 'Mayfield' site which was initially proposed for housing and it is considered a wider spread of housing would mean less 'grid lock' in the towns.

Thanking you,
Yours faithfully,

(Dennis Weston)

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Re: Site Option Consultation. Biddulph - BD087, BD68 & BD062..

I am writing to express my strong objections to and concerns about the development proposed as BD087, BD68 & BD62.

I object to these developments on the following grounds :-

1. Green Belt / Green Field Sites.
2. Environmental considerations / Flood Plain.
3. Disposal of Sewage.
4. Highways / Road Safety issues.
5. Infrastructure.
6. Noise.

I strongly object to the proposed site 087, BD068 & BD062 on the grounds that it would create many adverse effects.

I ask that this planning site option should be rejected.

Yours sincerely,

1. Green Belt / Green Field.

Proposed land for development forms part of a Green Belt / Green fields around Biddulph. The Biddulph valley is a beautiful place to live or visit. The close proximity to Biddulph Grange of these three sites detracts from the overall rural views.

The purpose of Green Belt is to protect land around urban centres from urban sprawl and to preserve and protect habitat for wildlife and conservation issues.

The proposed sites are home to many types of wild animal, included badgers, owls, wild duck, bats, newts, frogs and buzzards.

The concern is that development of these sites will impact on the environment and habitat of the wild animals in this area.

2. Environmental considerations / Flood plain.

Proposed development will run south to north along Biddulph Brook. Proposed land is 60% flood plain and the flood plain is on the local water table line.

The brook is around 2 metres wide, fast flowing and the depth is only 1.5 metres below the flood plain.

There was major flooding in the field approximately twenty years ago. The proposed development is to be built on the same flood plain.

BD087, BD68 and BD62 are proposed development of over 100 houses built to the east and in close proximity to the brook.

The brook narrows at its north end and, with the developments total waste water going directly into the brook, the increased volume of water would have the potential to cause severe localised flooding to the site. Increased flow rates in the brook would also cause severe bank erosion and flooding of properties and major roads downstream.

3. Disposal of Sewage.

The proposed development is approximately a few metres from the Sewage Works boundary and therefore a restriction on any further expansion of the works to cater for the new properties.

Sewage from the proposed houses to the north would require sewage to be pumped back up to the Sewage Works.

The proposed development site is higher in the south than in the north and the sewage tank and pump would need to be located at the lowest point of the flood plain.

At some point this area will be flooded therefore how will the flood water be prevented from entering sewage and inevitable leaking contaminating the brook and adjacent land.

4.. Highways / Road Safety issues..

Access to sites is proposed off Marsh Green Road, currently accepted as the most dangerous road in Biddulph.

Access from Marsh Green Road will require considerable excavation work to make the lane wide enough for two lanes of traffic and in addition the bridge over the brook would need to be made wider and strengthened, the work causing major traffic congestion and access to the sewage works will need to be closed as the tankers which service the works will not be able to access the site.

Marsh Green Road narrows to 2.5 metres and has insufficient room for two vehicles to pass, reducing to single track further along.

The absence of a pavement in Marsh Green Road is a major road safety concern due to the potential increase in traffic, including large and heavy vehicles.

Beaumont Close is extremely difficult to access from Marsh Green Road and is only wide enough to take one vehicle at a time.

The junction of Beaumont Close and Marsh Green Road is at an angle of 90 degrees. . This would prevent large vehicles, such as lorries, from turning into Beaumont Close. At the present time any large vehicle is unable to drive into the close and has to be reversed in from Marsh Green Road..

The junction of Marsh Green Road and Congleton Road is only 5.5 metres wide, including the pavement. There is currently only room for two cars side by side which would exclude lorries from using the junction at the same time as any other vehicle.

The junction of Marsh Green Road and Congleton Road is in a dip in the road reducing visibility from either direction and a potential road safety hazard. Currently Congleton Road has a recorded flow rate of up to 1000 vehicles per hour, add into that the traffic from all the proposed development sites which will use Marsh Green Road. This would mean a substantial increase in the volume of traffic and would require major alterations to the junction and Marsh Green Road. This also raises major concerns about road safety, particularly for pedestrians.

5. Infrastructure.

There are major concerns that the majority of the proposed developments are in the north of the valley thus putting new population at the wrong end of the valley from available schools and amenities. Most of the schools are to the south of the valley, thereby causing increased traffic flow through the town at peak times, increased volume of traffic in Marsh Green Road and the junction with Congleton Road. Vehicle movement would also increase as there is no public transport service from the north of the valley into the town centre.

6. Noise pollution.

There would be disturbance and noise pollution resulting from 100+ additional houses, which would mean at least a possible 300+ new residents in this small area. The proposed site BD087, BD68 &BD62 is in a valley that produces an echo effect which will amplify any additional noise which would be an unacceptable intrusion.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Re: Site Option Consultation. Biddulph - BD087, BD68 & BD062..

I am writing to express my strong objections to and concerns about the development proposed as BD087, BD68 & BD62.

I object to these developments on the following grounds :-

1. Green Belt / Green Field Sites.
2. Environmental considerations / Flood Plain.
3. Disposal of Sewage.
4. Highways / Road Safety issues.
5. Infrastructure.
6. Noise.

I strongly object to the proposed site 087, BD068 & BD062 on the grounds that it would create many adverse effects.

I ask that this planning site option should be rejected.

Yours sincerely,

[Redacted signature area]

1. Green Belt / Green Field.

Proposed land for development forms part of a Green Belt / Green fields around Biddulph. The Biddulph valley is a beautiful place to live or visit. The close proximity to Biddulph Grange of these three sites detracts from the overall rural views.

The purpose of Green Belt is to protect land around urban centres from urban sprawl and to preserve and protect habitat for wildlife and conservation issues.

The proposed sites are home to many types of wild animal, included badgers, owls, wild duck, bats, newts, frogs and buzzards.

The concern is that development of these sites will impact on the environment and habitat of the wild animals in this area.

2. Environmental considerations / Flood plain.

Proposed development will run south to north along Biddulph Brook. Proposed land is 60% flood plain and the flood plain is on the local water table line.

The brook is around 2 metres wide, fast flowing and the depth is only 1.5 metres below the flood plain.

There was major flooding in the field approximately twenty years ago. The proposed development is to be built on the same flood plain.

BD087, BD68 and BD62 are proposed development of over 100 houses built to the east and in close proximity to the brook.

The brook narrows at its north end and, with the developments total waste water going directly into the brook, the increased volume of water would have the potential to cause severe localised flooding to the site. Increased flow rates in the brook would also cause severe bank erosion and flooding of properties and major roads downstream.

3. Disposal of Sewage.

The proposed development is approximately a few metres from the Sewage Works boundary and therefore a restriction on any further expansion of the works to cater for the new properties.

Sewage from the proposed houses to the north would require sewage to be pumped back up to the Sewage Works.

The proposed development site is higher in the south than in the north and the sewage tank and pump would need to be located at the lowest point of the flood plain.

At some point this area will be flooded therefore how will the flood water be prevented from entering sewage and inevitable leaking contaminating the brook and adjacent land.

4.. Highways / Road Safety issues..

Access to sites is proposed off Marsh Green Road, currently accepted as the most dangerous road in Biddulph.

Access from Marsh Green Road will require considerable excavation work to make the lane wide enough for two lanes of traffic and in addition the bridge over the brook would need to be made wider and strengthened, the work causing major traffic congestion and access to the sewage works will need to be closed as the tankers which service the works will not be able to access the site.

Marsh Green Road narrows to 2.5 metres and has insufficient room for two vehicles to pass, reducing to single track further along.

The absence of a pavement in Marsh Green Road is a major road safety concern due to the potential increase in traffic, including large and heavy vehicles.

Beaumont Close is extremely difficult to access from Marsh Green Road and is only wide enough to take one vehicle at a time.

The junction of Beaumont Close and Marsh Green Road is at an angle of 90 degrees. . This would prevent large vehicles, such as lorries, from turning into Beaumont Close. At the present time any large vehicle is unable to drive into the close and has to be reversed in from Marsh Green Road..

The junction of Marsh Green Road and Congleton Road is only 5.5 metres wide, including the pavement. There is currently only room for two cars side by side which would exclude lorries from using the junction at the same time as any other vehicle.

The junction of Marsh Green Road and Congleton Road is in a dip in the road reducing visibility from either direction and a potential road safety hazard. Currently Congleton Road has a recorded flow rate of up to 1000 vehicles per hour, add into that the traffic from all the proposed development sites which will use Marsh Green Road. This would mean a substantial increase in the volume of traffic and would require major alterations to the junction and Marsh Green Road. This also raises major concerns about road safety, particularly for pedestrians.

5. Infrastructure.

There are major concerns that the majority of the proposed developments are in the north of the valley thus putting new population at the wrong end of the valley from available schools and amenities. Most of the schools are to the south of the valley, thereby causing increased traffic flow through the town at peak times, increased volume of traffic in Marsh Green Road and the junction with Congleton Road. Vehicle movement would also increase as there is no public transport service from the north of the valley into the town centre.

6. Noise pollution.

There would be disturbance and noise pollution resulting from 100+ additional houses, which would mean at least a possible 300+ new residents in this small area. The proposed site BD087, BD68 &BD62 is in a valley that produces an echo effect which will amplify any additional noise which would be an unacceptable intrusion.

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:

29. Ox Pasture West and 30. Ox Pasture East

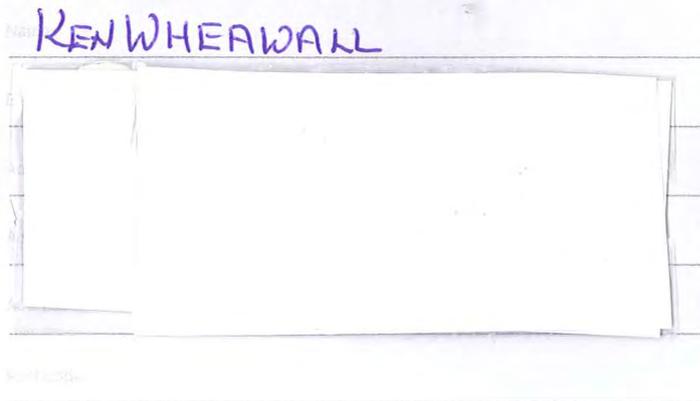

How can you help?

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the [Local Plan website](#) and in the [Statement of Representations Procedure Document](#) on the SMDC website.

If you would prefer to make a representation by yourself please email forward.plans@staffs Moorlands.gov.uk or by post to Freepost RRLJ-XCTC-JBZK, Forward Plans, Staffordshire Moorlands District Council, Regeneration Services, Moorlands House, Stockwell Street, Leek, ST13 6HQ. **Please make sure you include your name and address.**

For more information visit www.cheddletonresidents.org

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment

The fields are a very good refuge for birds, hedgehogs, and other wildlife, to lose the fields to housing is a total waste. I use the footpath on regular bases as the young & old to get to and from the church, school, tearoom and the pub to meet up with family, friends and local community.

Version 0.5

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

BD062/FID12

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant

Sound - Positively prepared

Sound - Justified . No

Sound - Effective . No

Sound - Consistent with national policy . No

Complies with the Duty to co-operate

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Failing in duty to have regard to biodiversity Badgers, Foxes, rabbits inhabit that land Access roads too narrow, already too busy (Mow lane is dangerous to pedestrians and I fear for our children walking to school) The land gets waterlogged and in extreme weather conditions (which are becoming more regular) raw sewage floods into the brook at the bottom of Essex Drive

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Widen the roads and mend the copious amount of potholes the volume of traffic create To build that near the sewage works when at times the smell that reaches Essex Drive is absolutely disgusting, I regard as farcical!

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

Summary of response

Object to inclusion of BD062 due to: - Failing in duty to have regard to biodiversity. - Highway safety. - Flooding. - Proximity of sewage works - odour issues.

Officer Response

Refer to standard officer response to MMC179.

Recommendation

No change.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12

Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X

Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

<p>Access to BD 068 and BD 087 - Road Safety Issues</p> <p>Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?</p> <p>The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have</p>
--

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How you can help.

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected. We have prepared some examples that may help you below, or on the attached document, but please use these as a prompt to come up with something special to you.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment:

Tony Williamson

The character and feel of this wonderful village is dependent on areas of green space such as these Ox Pasture fields. To take this away would be a tragedy. A village like ours needs these spaces to maintain the rich wildlife and preserve the access to the local school and church. 2019-10-30

Please find below my comments on the Main Modifications to the SMDC Local Plan, MM12. Safeguarding of fields in Gillow Heath.

I notice that you omitted part of your evidence base when you made decisions about these sites on 26th June 2019 at the Council Assembly.

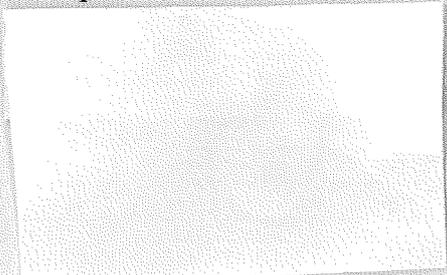

You omitted the ecological evidence base and also incorrectly stated that these fields are urban / industrial land, which is incorrect.

The decision to safeguard fields in Gillow Heath needs reconsidering both in light of your errors and in light of the evidence contained within the emerging Biddulph Neighbourhood Plan (REG14 closing 4th November 2019).

The SMDC Main Modifications are not Sound and do not Comply with the Duty to Cooperate. Please acknowledge my comment.

Kind Regards

Stephen Willott

Willott S MMC79.pdf

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM12

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant

Sound - Positively prepared

Sound - Justified . No

Sound - Effective . No

Sound - Consistent with national policy . No

Complies with the Duty to co-operate

No

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

See attached document

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

See attached document

Option to Upload Document

Willott S MMC79.pdf

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

See standard summary in MMC256.

Officer Response

Refer to standard officer response to MMC256.

Recommendation

See MMC256.

To whom it may concern,

Please find below my comments on the Main Modifications to the SMDC Local Plan, MM12. Safeguarding of fields in Gillow Heath.

I notice that you omitted part of your evidence base when you made decisions about these sites on 26th June 2019 at the Council Assembly.

You omitted the ecological evidence base and also incorrectly stated that these fields are urban / industrial land, which is incorrect.

The decision to safeguard fields in Gillow Heath needs reconsidering both in light of your errors and in light of the evidence contained within the emerging Biddulph Neighbourhood Plan (REG14 closing 4th November 2019).

The SMDC Main Modifications are not Sound and do not Comply with the Duty to Cooperate.

Kind regards,

Stephen Willott

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be built along the river bank. The access road onto BD 087 is on the narrow side of the river bank approximately 10M wide. I believe that an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land. I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (please select all that apply)

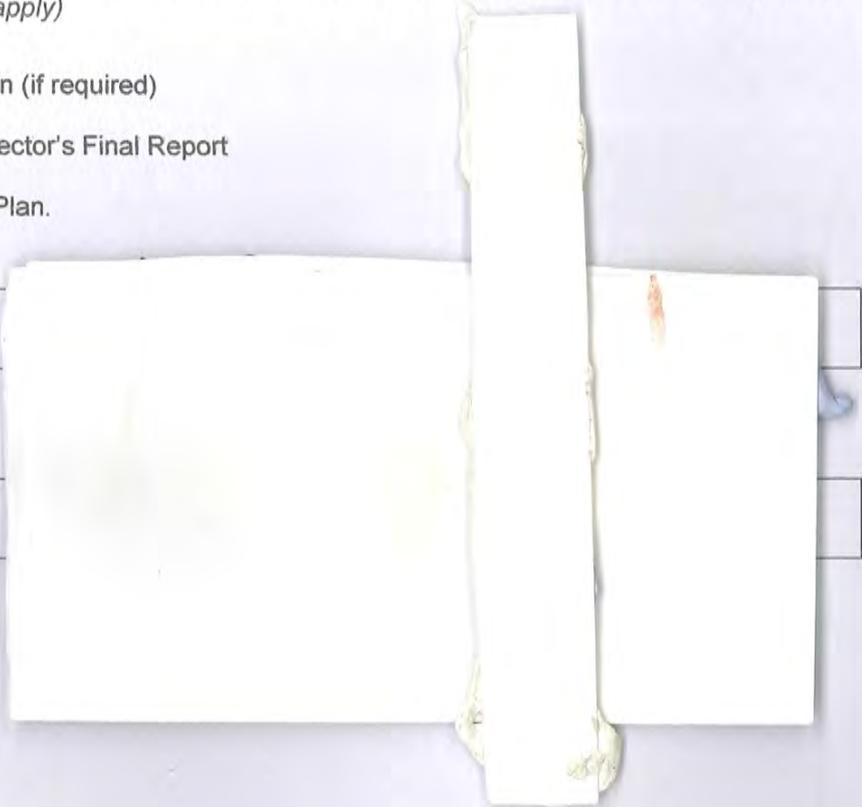

Further hearing session (if required)

Publication of the Inspector's Final Report

Adoption of the Local Plan.

Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Buy in is key to developing any plan – there is no buy into this plan by any of the people in Biddulph – this cannot be dressed up. No due process has been followed. To push this modified local plan through at break neck speed can only lead to an expensive legal outcome. SMDC has had 8 years to get this local plan right, this Modified Local Plan has taken 3 months from 26th June, no public face to face consultation, and a hurried last minute consultation period with almost no one informed. Only the Site Owners have been kept up to date. Why!

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you would wish to attend these Hearing sessions to discuss your representations, should the inspector deem this necessary

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (please select all that apply)

Further hearing session (if required)

Publication of the Inspector's Final Report

Adoption of the Local Plan.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues

Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?

The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have to be built along the river bank. The access road onto BD 087 is on the narrow side of the river bank approximately 10M wide. I believe that an investigation would be required before these sites were approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land. I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/12

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Buy in is key to developing any plan – there is no buy into this plan by any of the people in Biddulph – this cannot be dressed up. No due process has been followed. To push this modified local plan through at break neck speed can only lead to an expensive legal outcome. SMDC has had 8 years to get this local plan right, this Modified Local Plan has taken 3 months from 26th June, no public face to face consultation, and a hurried last minute consultation period with almost no one informed. Only the Site Owners have been kept up to date. Why!

4. Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

POST ROOM
REC'D - 9 SEP 2019

1st September 2019

Fao Mr Mark Dakeyne

Dear Sirs,

Redevelopment of site BD 087

I wish to object to 20 new properties to be built on the above land.

This area is a flood plain which floods both winter and summer. With the expectation that weather will become more unpredictable and changeable due to climate change it seems senseless to build on a natural flood plain which has already been turned down for use as a cemetery. Surely if the land is not suitable for the deceased it should not be suitable for the living.

There will be a lack of privacy to any new homes built as the existing houses on Congleton Road are some 10 metres above site BD 087. Some of us have no mains drainage and depend on septic tanks. We must be able to have access to our pipe work which crosses the field to drain into the brook. Four houses have right of way across this land as stated on our deeds.

Access to this site must be from Marshgreen Road which is very narrow and has no foot paths or lighting. There is also a bridge across the brook which is totally inadequate to take the weight of lorries and construction vehicles. Who is to pay for the work to widen the road, put in street lights, pavements ect.? Is it to be the developer or the ratepayer. I think questions will be asked if this expense is to be bourn by the average man in the street. This is for only 20 houses none of which I am sure will be so called affordable houses.

Unfortunately the planning department of Staffordshire Moorlands District Council seem to wish to destroy one of the few remaining areas of beauty and wild life in Biddulph. There are many areas in close proximity to Biddulph which could do with regenerating but this does not suit their purpose. This is one of the only green belt areas in the vicinity with a great variety of trees, hedges and wild life. We see on a regular basis herons, sparrowhawks, ducks, kingfishers, rabbits and bats which require the hedge rows for navigation and food. I myself have a badger which digs in my garden to feed on larvae. This is a protected animal. As it is seen locally there must be a badgers set nearby which must not be destroyed.

My late husband and I bought this property three years ago. He had terminal cancer and wished to die at home in peace and quiet in a lovely rural location. When this valley is desecrated it can never be returned to its former beauty.

Yours faithfully

Mrs V Woodward

Cc Staffordshire Moorlands District Council

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

<p>Access to BD 068 and BD 087 - Road Safety Issues</p> <p>Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?</p> <p>The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have</p>
--

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. 1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Local Plan Consultations

Between 18th September and 5pm on 31st October the District Council is consulting on modifications to the new Local Plan. The plan protected two sites in Cheddleton from development by designating them as Local Green Space (LGS). Unfortunately, the government Inspector reviewing the plan has asked for these designations to be removed.

Main Modifications 61 & 73 remove the designations from the fields Ox Pasture East and West, and this means that the local community of Cheddleton and its elected representatives have not been allowed to exercise their discretion to designate these fields as LGS despite demonstrating that both fields meet the National Planning Policy Framework (NPPF) criteria for designation. Denial of rights conferred on communities by the NPPF and the Localism Act make this aspect of the plan unsound and possibly unlawful.

Which sites are affected?

The following Cheddleton sites are in danger of losing their designation:
29. Ox Pasture West and 30. Ox Pasture East

How can you help?

Please help by submitting your representation. Representations must be attributed to named individuals. They are available for public inspection and cannot be treated as confidential. More details can be found on the Local Plan website and in the Statement of Representations Procedure Document on the SMDC website.

If you would prefer to make a representation by yourself please email forward.plans@staffs Moorlands.gov.uk please make sure you include your name and address.

The important bit...

When you write your response (in the comment box below) it's very important to say why the 2 fields are special to you and the community and why you want them protected.

It won't help our cause if our responses are all the same. We all have our own reasons as to why the fields need to be protected.

Comment

Green spaces are vital. The most obvious thing is that greenery and a lovely view makes one feel better, but it is so much more than that. Trees and plants give out oxygen, which means they can make us healthier without any effort on our part! This benefits the NHS and Social Care services. I am sure that when I am even older and need care I will need less if I can be near a green space rather than among houses and tarmac. The powers that be are at last realising the genuine physical and mental benefits from being in green spaces.

Everybody's health is at stake. Building on green spaces means more pollution, leading to more asthma and respiratory disease. Less green spaces means less healthy and attractive places to walk. Who wouldn't rather walk in a wood or a field than on a pavement?

These 2 fields provide a setting for the historical centre of Cheddleton, leaving space between this and the newer housing development and giving access to wonderful and valued public views of the area.

They are important locally for biodiversity. My garden adjoins both fields, and I keep a record of visiting bird species – over 40 to date – as well as badgers, foxes, hedgehogs, grass snakes, frogs, toads, bats and many more insects and small animals. My own observations are borne out by recent ecological surveys. These fields are foraging areas and refuges for wildlife, and are part of the network of the wider Churnet Valley.

All this will be lost if the designation of these sites as local green spaces is removed from the local plan.
This must not happen.

Comment ID	MMC31
Response Date	24/10/19 11:55
Consultation Point	1 Main Modifications Consultation (View)
Status	Submitted
Submission Type	Web
Version	0.3

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM7

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant	<input type="checkbox"/>	Yes
Sound - Positively prepared	<input type="checkbox"/>	Yes

Sound - Justified . No
Sound - Effective . No
Sound - Consistent with national policy . No
Complies with the Duty to co-operate . Yes

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

The "other rural areas" section now contains the phrase "where development is normally unacceptable." This is factually incorrect as there are many aspects of countryside life which fall within the definition of development in the Act but are permitted by the GPDO.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

add the word "residential" in front of "development."

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

No

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

The "other rural areas" section now contains the phrase "where development is normally unacceptable." This is factually incorrect as there are many aspects of countryside life which fall within the definition of development in the Act but are permitted by the GPDO.

Officer Response

The 'Other Rural Areas Strategy' Policy SS10 and the supporting text makes it clear that all development in these areas will be strictly controlled.

Recommendation

No change.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Question 1

Please identify which Main Modification (MM) from the MM Schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/document reference

MM73 Page284

Question 2

In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please select relevant box/s):

Legally compliant

Sound - Positively prepared

Sound - Justified . No

Sound - Effective . No

Sound - Consistent with national policy . No

Complies with the Duty to co-operate . No

Question 3

Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

It was proposed to allocate the greenspace east and west of Dorset Drive as Local Green Space. However, the Inspector has recommended their removal which puts them at risk of future development. Paras. 99-101 of the National Planning Policy Framework allows for the designation of Local Green Space, and the proposed designations clearly meet with the criteria. We, the undersigned, petition Staffordshire Moorlands District Council to robustly challenge the Inspector's recommendations and retain the greenspace off Dorset Drive as designated Local Green Space.

Question 4

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Maintain Dorset Drive East and West as Local Green Space as recommended in the Neighbourhood Plan

Please note

Your representation should cover succinctly all the information, evidence and supporting information necessary to support/justify the representation and the suggested modification, as there will not normally be a subsequent opportunity to make further representations based on the original representation during the examination. After the current consultation on modifications, further submissions will be only at the request of the Inspector, based on the matters and issues he identifies for examination.

If deemed necessary by the Inspector, further hearing sessions may take place on 17th and 18th December 2019.

Please specify if you wish to attend these Hearing sessions to discuss your representations, should the Inspector deem this necessary.

Yes

Notifications

Please specify if you wish to be notified of the following stages of the Local Plan process (*please select all that apply*)

- . Further hearing session (if required)
- . Publication of the Inspector's Final Report
- . Adoption of the Local Plan

Summary of response

Dorset Drive East and West clearly meet the LGS designation criteria so should be retained as LGS. Deletion of the designation puts them at risk of future development.

Officer Response

Refer to Inspector's Post Hearing Advice – Main Modifications and Related Matters – paras. 32 & 33. (EL6.004) and subsequent Inspector's letter (EL6.008). On the basis of the Inspector's recommendations, the Council agreed main modifications to delete the Local Green Space (LGS) at

the Council Assembly meeting on 26th June 2019. The green space at Dorset Drive is still designated as open space which offers protection under Local Plan Policy C2 (see MM31).

Recommendation

No change.

the Council Assembly meeting on 26th June 2019. The green space at Dorset Drive is still designated as open space which offers protection under Local Plan Policy C2 (see MM31).

Recommendation

No change.

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akesmoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question. Please could you confirm that all due diligence has been completed up front and not left to a later date when these sites could be rejected. This could prove to be a very expensive waste of time for all concerned.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Lack of due process control

On 26th June 2019 the Staffordshire Moorlands District Council voted to amend the SMDC Local Plan to include three sites surrounding the Biddulph Water Treatment Works (BWTW). It was stated at the meeting by the SMDC Planning Officer that United Utilities had No Objections to these sites; no mention was made of Environmental effects or concerns raised by the Environmental Agency. The modified SMDC Local Plan reintroduced sites BD 062, BD 068 & BD 087.

Past Information supplied to the SMDC - The Environmental Agency stated – *“When choosing which sites to allocate in this plan the council will need to demonstrate how they have steered development away from the areas of highest risk land and ensure any new development is safe and where possible reduces flood risk elsewhere. Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.*

In 2015 the Environmental Agency and United Utilities requested that the SMDC Planning team consider all other options and 27 sites before using the above sites. The Environmental Agency went on to state – Development that increases flood risk to neighbouring land or elsewhere in the catchment will not be permitted.

1. To support sites (BD 068 & 087) being taken forward as Preferred Options for Safeguarding then a Level 2 SFRA would be necessary to support this decision. This is to ensure that both sites are capable of actually supporting future housing development – SMDC identified this as a need in March 2016.

2. To develop these sites will require extensive modification to the brook. A video of the brook during a flash flood (2.6M high) is available, photographs are available yet the SMDC Planning team did not request this information. Last Flash flood Tuesday 28th July 2019.

The failure to have this process conducted before any decisions are made would potentially render the final decision on the Modified Local Plan as futile. I would recommend that the Environmental Agency is requested to carry out a site inspection to ensure all their concerns are registered - such as potential Site Evacuation Plans etc. What is the point of Safeguarding these sites if no building will be allowed in the future. BD 087 has already been rejected 4 times in the past 20 years.

Please note BD 087 is a Flood Plain and housing may be built on a Level 1 Flood zone this has been stated in writing - the access road and bridge onto this site may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

In a letter to the Planning Inspector dated 1st July 2019 - The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not considered!

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Health Concerns

In a letter sent on the 27th May 2016 United Utilities stated “The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a water treatment works”

There are a number of issues that I feel I should bring to your attention -

1. Smell and Odour – The site owner has supplied a survey to SMDC stating that this is not a problem. This is peculiar as since 1979 there have been numerous complaints about the Smell, Odour and leakage of sewage from BWTW into the brook. Even United Utilities concede that there is an odour issue.
2. With proposed housing for BD062 & BD068 being within 10M of the water treatment boundary and the change in the climate conditions, being hotter

both in summer and winter there could be a marked increase in insect numbers. What happens if an infectious disease were to breakout? I believe United Utilities and the Environmental Agency need to identify a minimum safe distance from the BWTW boundary line for any new housing to be built. This may very well reduce the number of potential housing on these sites and therefore their overall viability.

3. United Utilities may also wish to develop a Risk Assessment Plan and consult with their legal team over potential future lawsuits against the company from any newly built sites and perhaps investigate a contingency fund plan I believe you need to take into account the position United Utilities and the Environmental Agency may take in any future development of these sites. These BD 062 and BD 068 may be unviable. I would recommend before any decision is taken to safeguard these sites a full viability report is produced using a real life scenario not a wish list and United Utilities and the Environmental Agency confirm a safe distance from the Water Works for housing to be built. may be built on a Level 2/3 Flood Zone. BD 068 access road may be built on a Level 2 Flood Zone. In past documentation no account has been taken of any potential surface water issues.

The Government has stated that Flood Plains should be avoided when other sites are available, Flood Prevention in the Congleton Area must be a Top priority, these sites will only add to this problem. All other areas that this river passes through downstream need to have their input.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Out of date information used to develop the Modified Plan

The SMDC Planning team stated at the meeting on 26th June that they used findings from 2014, 2015 and 2016 to justify their development / conclusion to support the Modified Local Plan. This excluded information from 2017, 2018 or 2019.

The SMDC Planning Team was requested in 2015 to develop a SFRA Level 2 Flood risk analysis for BD 087, in checking with the Environmental Agency (2nd September 2019) this has not been completed. There is only a SFRA Level 1 on record.

In a letter dated 26th August 2015 from the Environmental Agency to the SMDC Planning Team it clearly states that all other sites should be considered before this site. Sites BD 062, 068 & 087 were originally excluded during the first round of consultation in 2016. In the Modified Local Plan the SMDC Planning Team has only

identified 12 sites from the original housing plan in 2014; there was originally a total of 27 sites identified in the plan. The three sites chosen as Level 1 - BD 062, 068, 087 were all considered at great length and excluded.

1. The SMDC Planning Team reintroduced these sites in May 2019 after the SMDC Local Plan was rejected by the Planning Inspector – Reason for rejection – A site called BDNEW was to be removed from the Local Plan as it was on Green Belt land. All 3 of the above sites are all on Green Belt land.
2. In the 2015 Green Belt report commissioned by the SMDC (costing tens of thousands) stated that all 3 sites (BD 062/68/87) should only be considered under Exceptional circumstances. But the same report stated that land to the south of Akemoor Lane on which BD NEW is situated should be considered for future development. Why has this report not been used as a factual base for the development of Biddulph?
3. Biddulph Town Council had rejected all three sites from the Local Plan in 2015. The Biddulph Neighbourhood Plan issued 24th September 2019 (which is the most up-to-date report on the area and has been conducted with all due diligence and public participation) - has identified these three sites as a nature corridor and natural green space.

The Executive Director for SMDC clearly stated on 26th June that the SMDC Modified Local Plan is supported by information that is potential 3 /4/ 5 years old. It is also clear that the SMDC Planning Team has not carried out all of the processes necessary to ensure that these three sites can be safely safeguarded for future building needs. It is also clear that all other sites in the Staffordshire Moorlands or the Biddulph area were not considered. I believe without full process control in developing this modified proposal this version of the Modified Local Plan should be sent back to the SMDC for reconsideration. Hopefully this will allow time for the SMDC to get Local input into their Plan for Biddulph.

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

Return BD087, BD068 & BD062 to Green Belt land

Part B – Representations

Please submit a separate form for each Main Modification that you wish to comment on. You may also refer to the supporting documents to the Main Modifications in your response.

Please use a separate Part B Form for each representation and ensure that one copy of Part A (Personal details) is attached.

1. Please identify which Main Modification (MM) from the MM schedule this representation relates to. If your comment relates to content of supporting documentation such as the Sustainability Appraisal, please identify the document and paragraph/page number etc.

MM/ document reference	MM/12
------------------------	-------

2. In relation to the Main Modification or supporting document reference that you have identified, do you consider that the Local Plan as modified is (please tick relevant box/s) :

	Yes	No
Legally compliant	<input type="checkbox"/>	X
Sound - Positively prepared	<input type="checkbox"/>	X
Sound - Justified	<input type="checkbox"/>	X
Sound - Effective	<input type="checkbox"/>	X
Sound - Consistent with national policy	<input type="checkbox"/>	X
Complies with the Duty to co-operate	<input type="checkbox"/>	X

3. Please give details of why you consider the modification is not legally compliant or is unsound or fails to comply with the duty to co-operate. Please be as precise as possible. If you wish to support the legal compliance or soundness of the Main Modifications to the Local Plan or their compliance with the duty to co-operate, please also use this box to set out your comments.

Access to BD 068 and BD 087 - Road Safety Issues
 Public Safety Issue - The land proposed for the access road for BD 068 and BD 087 & bridge onto BD 087 is only 1.5M above the normal river height (Flash Flood Height reaches 2.6M). This land has been identified as Flood Risk Level 2/3. It is the only access road and bridge onto BD 068 and BD 087 both enclosed sites. What happens in a flash flood – will there need to be an Emergency Evacuation Plan in place, have the Emergency Services been involved in pre-selection of this site?
 The Maximum rise of the river during a flash flood is 2.6M (video evidence can be supplied). The Environmental Agency has specifically stated that this river cannot be cultivated. In order to build a 6M wide (4M + 2M) single access road and bridge onto these sites a support wall will have

Be approved for Safeguarding in order to demonstrate it is actually possible given the ground condition is Marsh land.

I would ask you to dismiss the Safeguarding of BD 068 and 087 from the SMDC Modified Local Plan until the SMDC Planning Team have liaised with all vested interests (not just the site owner) and provided all the necessary information (including an SFRA Level 2 Flood Risk Assessment & Public Safety Risk Report and Soil sample reports and a Staffordshire County Council Transportation report) in order to ensure that BD 068 and 087 can be put forward in the future for planning consideration.

If the SMDC Planning Team has not carried out the necessary proprietary works required for Safeguarding of this site, then they are pulling the wool over people's eyes. Question, has Staffordshire County Council committed to funding the development of a new road for Marsh Green from the junction of the A527 to the 2 proposed access roads approximately 200M? This will involve the compulsory purchase of land and would be required to be completed before any building could be undertaken. Could the SMDC (as stated at the meeting on 26th June – a new road would be required) please confirm they have an agreement with the Staffordshire County Council to fund and complete such a road project including an agreed timescale within the next 10 years?

Please set out what amendment(s) you consider necessary to the modification identified above in order to make the Local Plan legally compliant or sound, having regard to the test you have identified in the question above where this relates to soundness. You will need to say why this modification will make the Local Plan legally compliant or sound. It will be helpful if you are able to put forward your suggested revised wording of the Main Modification in question (if applicable). Please be as precise as possible.

No Buy in by the people of Biddulph

Short cutting of the Modification selection process is not acceptable.

Why have these sites been deemed Level 1 Building land given that they were all excluded in 2016 as unsuitable? These sites are on a Flood plain and have soil issues - any housing or infrastructure to support the housing on this site would not be capable of being insured. Thus with no Building insurance available to the proposed houses, there would be no mortgage availability. Who would be responsible for the public liability insurance on these sites?

I object to the very late modification to the SMDC Local Plan. The addition of Safeguarded land without proper investigation especially into public safety issues and clear lack of public consultation could lead to legal action and in the end proves very expensive to the local council.

The SMDC Planning Team identified 12 out of the original 27 Biddulph sites in the SMDC Local Plan 2015 and ranked the above three sites BD 087, 068 & 062 as Ranked 1 prime building land – No other site in Biddulph is Ranked 1. Sixteen of the original sites identified in the 2015 SMDC Local Plan for Biddulph were not even considered.

At the meeting on 26th June 2019 the Executive Director was asked 3 times why this land was Rank 1 in Biddulph given that two of the sites have Flooding Issues and why no other sites were Ranked 1 – No answer was given. In order to understand the logic of the SMDC Planning Team perhaps you could ask the question we cannot get an answer.

Failure to consider other sites together with lack of or no consultation since 26th June 2019 by SMDC Planning Team leave open to question, why these sites?

I do not believe that due process has been followed and that this is leaving the motives of the SMDC Planning open to question.
