1. Introduction

1.1 This Five Year Housing Land Supply Statement sets out Staffordshire Moorlands District Council's housing land supply position as at 1st April 2021. The National Planning Policy Framework (NPPF) seeks to ensure that the planning system, delivers a flexible, responsive supply of housing development land to meet objectively assessed housing needs. It requires Local Planning Authorities to identify sufficient specific deliverable sites to deliver the next five years of housing provision. The NPPF at paragraph 60 states that in order to significantly boost the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed. Paragraph 74 states that Local Planning Authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years worth of housing against their housing requirement set out in adopted strategic policies or against their local housing need where the strategic policies are more than five years old. This paper provides a detailed assessment of Staffordshire Moorlands housing land supply for the period 1st April 2021 to 31st March 2026. It identifies specific sites which the council considers will deliver housing over this period. The five year land supply position is reviewed annually by the Council and the next review will reflect the position as of 1st April 2022.

2. Housing Requirement

2.1 The first step in assessing a Council's 5 year land supply is to establish the correct housing requirement against which to test the identified supply.

2.2 Paragraph 73 of the NPPF states:

“Local Planning Authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their local housing need where the strategic policies, or against their local housing need where the strategic policies are more than five years old...”

2.3 The Council has a Local Plan which was adopted on 9 September 2020 that contains strategic policies for housing. The strategic policies are therefore less than five years old. Therefore it is appropriate to use the housing requirement in the Local Plan to assess the five year housing land supply against.

2.4 The housing requirement for the Plan period 2014 – 2033 is 6,080 dwellings. This target is based on the full objectively assessed need for the district as identified in the 2017 Strategic Housing Market Assessment (SHMA) Update which is expected to meet the projected household increase over this period as well as supporting jobs growth.

2.5 The objectively assessed need for housing as identified in the SHMA Update relates to the District as a whole. As such, this includes the parts of the District that lie within the Peak District National Park. The Peak District National Park Authority have their own adopted Core Strategy which governs development across the National Park. Due to the constraints and purposes of the National Park, the Core Strategy does not include housing requirements. However, in recognition of the fact that the identified housing requirements for Staffordshire Moorlands includes parts of the National Park, the National Park Authority has agreed to an allowance of 100 dwellings being identified in the housing land supply for the Staffordshire Moorlands Local Plan. Whilst the Peak District National Park does not allocate land for housing, the allowance will be factored in to the windfall allowance for the District and housing completions within the National Park will be monitored accordingly.

2.6 The annual housing target established in the Local Plan by Policy SS3 is **320 dwellings per annum**. The housing requirement for the purpose of the five year land supply is therefore 320 dwellings per annum.

Buffer and the Housing Delivery Test

2.7 The NPPF states at paragraph 74:

“...The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:

- a) 5% to ensure choice and competition in the market for land; or*
- b) 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year, or*
- c) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply.”*

2.8 The Housing Delivery Test (HDT) is an assessment which indicates which buffer should be applied. The method for applying the Housing Delivery Test is set out in an accompanying publication, the Housing Delivery Test Measurement Rule Book (HDT Rule Book). The HDT Rule Book sets out in detail the method Government expects Local Authorities to apply in measuring housing delivery. The Government published in January 2021 the Housing Delivery Test: 2020 Measurement Technical note which sets out how the HDT results for 2020 were calculated.

2.9 The HDT Rule Book specifies that the requirement figure to be used is the lower of either the latest adopted housing requirement (i.e. the figure in the adopted Local Plan if the plan is less than five years old from its adoption) OR the minimum annual local housing need figure.

2.10 The HDT Rule Book includes transitional arrangements with respect to the calculation of the minimum annual local housing need figure whereby 2014 based household projections are used to calculate the housing need figures for test year 2017/18. The Housing Delivery Test: 2020 Measurement Technical note states that for the 2020 HDT results, test years 2018/19 and 2019/20 use local housing need instead of annual average household growth for the calculation of the housing requirement.

2.11 To clearly demonstrate, the details of what is used as the basis for measuring the housing need figures for each of the past three financial years is set out below in Table 2.1.

Previous three financial years included in HDT period	Measurement basis	Annual average taken of year
2017-18	2014-based household projections	2017-2027
2018-19	Local Housing Need	2018-2028
2019-20	Local Housing Need	2019-2029

Table 2.1 Measurement basis used each year for HDT results 2020

2.12 In the case of Staffordshire Moorlands the resultant calculations for the HDT 2020 minimum is set out in the table below (Table 2.2). Table 2.2 also includes the number of housing completions recorded in Staffordshire Moorlands and the resultant annual surplus or deficit in delivery compared to the requirement. In the case of Staffordshire Moorlands, it is clear that the household projections and local housing need are lower than the annual housing requirement as expressed in the Local Plan. The household projections and local housing need figure therefore replace the Local Plan housing requirement for the purposes of calculating the buffer.

Year	No of homes required	Number of homes delivered	Surplus/Deficit	Housing delivery test: 2020 measurement	Housing Delivery Test 2020 consequence
2017 - 20	546	529	-18	97%	5% Buffer

Table 2.2 HDT Calculation

2.13 The Housing Delivery Test results for 2020 were published by MHCLG on 20th January 2021 and Staffordshire Moorlands District Council has a HDT score of 97%. This means that the buffer that should be applied is therefore 5%. The results include those

dwellings delivered in the Peak District National Park that lie within the Staffordshire Moorlands boundary. This approach was confirmed by MHCLG in 2019 when it revised the Housing Delivery Test results for 2018 to take account of the Peak District National Park completions and is now the method used.

Shortfall

2.14 Paragraph 31 of the PPG deals with the matter of shortfall. The PPG states:

“...The level of deficit or shortfall will need to be calculated from the base date of the adopted plan and should be added to the plan requirements for the next 5 year period (the Sedgefield approach). If a strategic policy-making authority wishes to deal with past under delivery over a longer period, then a case may be made as part of the plan-making and examination process rather than on a case by case basis on appeal.”

“Where strategic policy-making authorities are unable to address past shortfalls over a 5 year period due to their scale, they may need to reconsider their approach to bringing land forward and the assumptions which they make. For example, by considering developers’ past performance on delivery; reducing the length of time a permission is valid; re-prioritising reserve sites which are ‘ready to go’; delivering development directly or through arms’ length organisation; or sub-dividing major sites where appropriate, and where it can be demonstrated that this would not be detrimental to the quality or deliverability of a scheme.” Paragraph: 031 Reference ID: 68-031-20190722

2.15 The PPG recognises that a strategic policy-making authority may need to address past under delivery over a longer time period than five years. This matter was considered during the examination of the Staffordshire Moorlands Local Plan and following thorough consideration of all the issues regarding housing provision and delivery the Inspector concluded that in the Staffordshire Moorlands the Liverpool method was more appropriate. Therefore this is the approach that the Council continues to adopt.

2.16 Since the start of the Plan period the Council has accumulated a shortfall of undelivered units. Table 2.3 provides the details of the shortfall.

Year	Completions outside the Peak District National Park (net)	Peak Park Completions within Staffordshire Moorlands (net)	Adopted Local Plan Target	Shortfall Against Relevant Target
2014/15	278	4	320	-38
2015/16	99	6	320	-215
2016/17	128	17	320	-175
2017/18	142	11	320	-167
2018/19	165	3	320	-152
2019/20	203	5	320	-112
2020/21	201	0	320	-119

Summary of housing land requirements

2.17 Table 2.4 below sets out how the requirement aspect of the five year housing land supply has been considered. This is based on the application of a buffer of 5% in line with the latest national policy and guidance.

A. Housing Target April 2021 – March 2026 (320*5)	1600
B. Housing Shortfall (April 2014 – 31 st March 2021)	978
C. Housing Shortfall to be met in next five years (Based on shortfall apportioned over remaining Local Plan period - Liverpool Method) (12 years)	408
D. Housing Requirement April 2021 – March 2026 (Housing Target + shortfall + 5% buffer) (A+C x 5%)	$1600 + 408 \times 5\%$ $1600 + 408 + 100 = 2108$
E. Annualised Housing Requirement (D/5)	422

Table 2.4 Requirement Summary at 1st April 2021

3. Housing Supply

3.1 Annex 2 of the NPPF sets out the requirements for a housing site to be considered a deliverable site for the purposes of the 5 year land supply. It states that in order for a site to be considered deliverable it should be:

“Deliverable: To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:

a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).

b) Where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.”

3.2 The Government in May 2020 confirmed in a consent order in *East Northamptonshire Council v Secretary of State for Housing Communities and Local Government* that the definition of “deliverable” in the NPPF is not a closed list. The Consent Order stated as follows in paragraph B:

“The Defendant has carefully considered the Inspector’s decision and the Claimant’s Statement of Facts and Grounds and Reply, and the evidence served in support. He concedes that he erred in his interpretation of the definition of deliverable within the glossary of the National Planning Policy Framework (“NPPF”) as a ‘closed list’. It is not. The proper interpretation of the definition is that any site which can be shown to be ‘available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years’ will meet the definition; and that the examples given in categories (a) and (b) are not exhaustive of all the categories of site which are capable of meeting that definition. Whether a site does or does not meet the definition is a matter of planning judgment on the evidence available.”

3.3 In addition to the NPPF, the PPG under ‘Housing supply and delivery,’ para 007 states which types of sites will require further evidence to be considered deliverable. Paragraph 007 states what the evidence may include in order to demonstrate deliverability:

- current planning status – for example, on larger scale sites with outline or hybrid permission how much progress has been made towards approving reserved matters, or whether these link to a planning performance agreement that sets out the timescale for approval of reserved matters applications and discharge of conditions;
- firm progress being made towards the submission of an application – for example, a written agreement between the local planning authority and the site developer(s) which confirms the developers’ delivery intentions and anticipated start and build-out rates;
- firm progress with site assessment work; or

- clear relevant information about site viability, ownership constraints or infrastructure provision, such as successful participation in bids for large-scale infrastructure funding or other similar projects".

Impact of COVID-19

3.4 The measures to extend unimplemented planning permissions as introduced by the Business and Planning Act 2020 ceased on 1 May 2021. This temporary legislation was to enable certain planning permissions and listed building consents in England which have lapsed or were due to lapse during 2020 to be extended as follows:

- Unimplemented permissions with time limits for implementation due to lapse between 19 August 2020 and 31 December 2020 were extended to 1 May 2021. This happened automatically with no requirement to obtain Additional Environmental Approval. Time limits relating to implementation of outline planning permissions were affected in the same way.
- Unimplemented planning permissions with time limits for implementation due to lapse between 23 March 2020 and 19 August 2020 were also restored and time limit extended to 1 May 2021 subject to Additional Environmental Approval. Time limits relating to implementation of outline planning permissions were affected in the same way.
- Any deadline for the submission of applications for the approval of reserved matters under an outline planning permission which would otherwise expire between 23 March 2020 and 31 December 2020 was extended to 1 May 2021.

3.5 The temporary legislation had a minimal effect on the amount of sites in Staffordshire Moorlands as only four sites of less than 10 units were affected. The Staffordshire Moorlands housing completion figures for 2020-21 indicate a similar level of completions to 2019-20. This is likely to reflect the impact the COVID-19 pandemic has had on the construction industry and it is considered that delivery rates may pick up during 2021-22 compared to the previous year, particularly with a newly adopted Local Plan. This is also recognised by MHCLG who have announced that it will substantially ease the next set of housing delivery test results by subtracting four months from councils' housing requirement figures for 2020/21 due to the disruption caused to homebuilding by the pandemic. Appellants have nationally contested Councils' housing land supply positions on the basis that the COVID-19 pandemic will have a significant effect on housing delivery. However the Inspector of an appeal between Hollins Strategic Land LLP v. Bedford Borough Council (APP/K0235/W/19/3243154) stated the following in September 2020:

"From the Appellant's evidence, I find that the Council's housing land supply has reduced to 5 years. This still leaves a five year supply and so, on this evidence, the tilted balance in paragraph 11(d) of the Framework would not be engaged."

"However, I also recognise that the Covid-19 pandemic has had implications for the housebuilding industry including lockdowns preventing work and customer confidence in buying and selling properties. Noting the Harrold and Wyre Annual Position Statement, that much construction work shut down for approximately 3 months, and the Compass letter and the latest position, I conclude that the pandemic resulted in the Council's housing land supply falling below 5 years, albeit marginally. Whilst a five year supply would not engage the tilted balance, anything below this, however slight, does engage paragraph 11 d) of the Framework and renders the most important policies for the supply of housing out of date."

"Whilst this may have the potential to impact on the Council's supply of housing land which is supported by the Compass Assessment identifying a 10% reduction in delivery, it appears that these impacts are likely to be short term. Indeed, the submitted Barratt letter confirms that sites are open again which I note, and which seems consistent with the suggested 3 – 6 month short term effects. I therefore find that although there is likely to have been a modest reduction in the housing land supply, this would be marginal and reasonably short term and with the potential for a reasonable rate of recovery."

3.6 The Inspector concluded:

"Furthermore, as a result of my conclusions on the reduction in the five year housing land supply based on the information before me and the implications of the Covid-19 pandemic, the provision of up to 81 dwellings towards the housing land supply carries weight and would be a benefit. However, whilst there is currently a shortfall in the five year housing land supply, and so the tilted balance should be applied, this is a marginal shortfall and is for a short period of time, which is through no fault of the Council. I find the weight I afford to this is less than if the shortfall were significant and/or the impacts of the pandemic were demonstrably long term."

"Weighing up all of the material considerations against the policies of the development plan which are not out of date, even though the tilted balance is applied, I have given more weight to the conflict with the policies of the recently adopted development plan and the substantial harm that I have identified in relation to character and appearance and location for housing and to a lesser extent the loss of agricultural land."

3.7 The appeal was dismissed by the Inspector and this case demonstrates that the Inspector considered the impact of the pandemic to only be short-term, and to not have a significant effect upon the housing land supply.

Staffordshire Moorlands Housing Land Supply Components

Small sites with planning permission

3.8 As stated by Annex 2 of the NPPF, smaller sites (i.e. sites that are not major development which are nine or fewer dwellings) and all sites with detailed planning permission should be considered deliverable until permission expires. Lapse rate data was provided as part of the local plan examination. Although the lapse rate varied from year to year, over the period 2015/16 to 2017/18 it was 5.3%. The Local Plan Inspector stated that 'in order for the delivery from commitments to be realistic, a precautionary lapse rate of 10% should be applied to commitments'. The lapse rate for sites in 2020/21 is 4.1% which is substantially below the 10% rate. Applying a 10% discount is therefore considered to be a robust approach to reflect potential lapses and slow build out.

3.9 A list of small sites with planning permission can be found in Appendix 1.

Large sites (non-allocations) with planning permission

3.10 As specified by Annex 2 of the NPPF all sites with detailed planning permission should be considered deliverable until permission expires, unless there is clear evidence that homes will no longer be delivered within five years. Large sites with outline planning permission for major development should only be considered deliverable where there is clear evidence that there will be housing completions beginning on site within five years.

3.11 The Council has undertaken engagement with landowners and developers to support the delivery projections of those sites with outline permission and those with detailed planning permission (for completeness) included in the five year supply. The extent of this engagement is discussed later on in this statement.

3.12 A list of large sites (non- allocations) with planning permission can be found in Appendix 2.

Local Plan Allocations

3.13 The Local Plan makes provision for 2,574 additional dwellings on allocated sites over the plan period. The Council has undertaken engagement with landowners and developers to support the delivery projections of those allocated sites which the Council considers deliverable within the next five years. The extent of this engagement is discussed later on in this statement.

3.14 A list of local plan allocations can be found in Appendix 3.

Small and Large Site Windfall Allowances

3.15 The adopted Local Plan includes windfall allowances for small sites (less than 9 dwellings) and large sites (10+ dwellings). A small site allowance is included for 10 dwellings per annum in each of the towns; Leek, Biddulph and Cheadle and 30 dwellings per annum in the rural area. A large site windfall allowance is made for 15 dwellings per annum in Leek only and 20 dwellings in Biddulph over the whole plan period.

3.16 The windfall allowances are only counted in the final two years of the five year land supply to ensure double counting does not occur with extant permissions. The NPPF para 71 makes it clear that Councils may include a windfall allowance as part of their supply if they have compelling evidence that such sites have consistently become available in the local area and will continue to provide a reliable source of supply.

3.17 This approach has also been recently confirmed by The Planning Inspectorate in the report to Sunderland City Council on it's 5 year Housing Land Supply Annual Position Statement on the 12 October 2021. The windfall allowance included in the Annual Position Statement was accepted by the Inspector as it accords with the approach taken in the adopted Sunderland Core Strategy and Development Plan which was accepted by the Local Plan Inspector in the examination of that plan.

3.18 The Staffordshire Moorlands Local Plan Inspector considered that compelling evidence supported the windfall allowances included in the Local Plan. The contribution of windfalls is being closely monitored to ensure that provision is meeting expected levels. Figures provided in Appendix 4 indicate that all allowances are being met except for small sites in Biddulph which have been slightly less at 7 dwellings per annum instead of 10 per annum. Despite this completions on large windfall sites in Biddulph have already well exceeded the 20 dwellings allowance over the plan period. Large windfall sites in Leek have also been significantly higher than the Local Plan allowance of 15 dwellings per annum contributing on average 44 dwellings per annum since the start of the plan period.

3.19 The Council is confident that windfall delivery will continue to provide a reliable source of supply in the next five year period. The current Local Plan provides scope for infill windfall delivery within the development boundaries of the towns and larger villages and limited infill residential development outside of the development boundaries provided it is of

an appropriate scale and character for the Spatial Strategy and meets the criteria in Policy H1: New Housing Development. Furthermore, flexibility afforded by policies in the NPPF, a more permissive stance regarding change of use from commercial to residential and changes to permitted development rights mean that windfall delivery is likely to continue.

Peak District National Park Allowance

3.20 The Council includes 100 dwellings over the plan period as a contribution from the Peak District National Park Authority (PDNPA) of which 26 dwellings are contained in the 5 year supply. The Local Plan Inspector's Report (June 2020) at paragraph 169 confirms that this is a reasonable approach:

"An allowance of 100 dwellings from the PDNP over the Plan period has been agreed by the National Park Authority. The figure is based on past completions in that part of the PDNP that lies within the District and appears reasonable. It does not infer a development requirement or target for the PDNP."

3.21 As previously explained in paragraph 2.13 of this report, MHCLG also acknowledged in July 2019 that completions in the Peak District National Park which fall within the Staffordshire Moorlands boundary should be counted in the District's annual completion figures.

3.22 Net completions data obtained from the PDNPA (see Table 2.3) demonstrates that 46 dwellings have been completed in the Staffordshire Moorlands area of the National Park over the past seven years (2014-2021). This indicates a higher average delivery rate (6.6 dwellings per annum) than the allowance included in the Local Plan (5.3 dwellings per annum).

Supporting Delivery

3.23 For some time the Council has recognised the barriers to housing delivery across the Staffordshire Moorlands area. In an attempt to drive development, the Council approved the Accelerated Housing Delivery Programme (AHDP) in April 2018.

3.24 The AHDP has two core aims:

- Drive forward the delivery of the Local Plan and maintain 5 year supply by proactive measures and Council led interventions where appropriate.
- Deliver community benefits in the form of increased income from council tax, business rates, New Homes Bonus for reinvestment in the community.

3.25 It also focuses on 4 key delivery areas:

- Open for Business approach to planning applications and the regulatory process
- Facilitating development on sites with unimplemented planning permission
- Accelerating delivery of emerging Local Plan sites
- Council-led proactive interventions

3.26 Promotion of the 'Open for business' approach is a key part of the accelerated housing delivery programme. Working with regulatory services, this is directed towards ensuring developers and house builders get appropriate planning advice and support at

relevant stages of development. Officers are also in regular contact with developers to understand barriers to delivery and prepare a package of incentives to support active conversion from sites with planning permissions to delivery of homes.

3.27 The Council is also working with landowners of allocated sites to quicken delivery now that the Local Plan is adopted. This includes cooperating with private sector landowners to prepare masterplans and delivery options for larger cluster sites identified in the Local Plan such as the Wharf Road and Tunstall Road sites in Biddulph. There is also a Council led intervention to prepare a masterplan for the co-ordinated delivery of The Mill Quarter in Leek.

4. Engagement

4.1 As previously stated, a framework of engagement has taken place to support the delivery projections for the next five years on those large sites with planning permission and those sites that are allocated in the Local Plan where the Council was aware of progress. Set out below are the methods of engagement that the Council has undertaken.

Correspondence

4.2 A covering letter and Statement of Common Ground was sent to the developer/landowner for all large sites with planning permission and allocations where the Council was aware of progress requesting the month and year that the site commenced, and expected delivery rates over the next five years. Any other additional information that the developer/landowner could tell us regarding site progress was also requested. Follow up emails were sent out where a response was not received. A copy of the covering letter and Statement of Common Ground is attached under Appendix 5 as well as a copy of those Statements of Common Ground that were completed by developers/landowners.

Site Visits

4.3 Visits were made to a limited number of larger sites where clarification was required to determine if sites were under construction or completed.

Building Control and Council Tax

4.4 Information on the timing of commencement and completions was gained through the Council's Building Control records. The Council's Council Tax section also provided clarification where necessary.

Development Management

4.5 The Council's Development Management Team deal with sites allocated through the Local Plan and developments that are submitted through the planning application process. Through the officers, information on the discharge of planning conditions and any other site progress information they may have through discussions with the developers is recorded to support the projected delivery rates.

4.6 The Council considers information on delivery provided by the landowner/developer as the most robust source and uses this information to inform the delivery projections over the five year period. In a limited number of cases this has been adjusted with the reasons for doing so included in the 5YHLS section for the site in Appendix 2 or 3.

4.7 Where the developer/landowner did not respond to approaches, the Council has assessed the delivery projections on a site by site basis, taking into consideration the site progress, and the average lead in, build time period and build out rates in Staffordshire Moorlands District for a site of that particular size. The average lead in, build time period and build out rates for Staffordshire Moorlands District are shown below and are based on the Housing Implementation Strategy (HIS) which the Council consulted on in January 2019 and was updated in response to comments received in July 2019. The HIS was also discussed in detail at an examination hearing session in February 2020 and the Inspector's report refers to the fact that the 'delivery assumptions were amended during the examination to more closely correlate with the work carried out on the delivery of large-scale housing sites, adjusted by local evidence, where this is available'.

4.8 For clarity purposes, the lead in times are recorded from the planning permission decision date to the first completions on the site. Year 1 is 1 to 12 months; year 2 is 13 to 24 months; and year 3 is 25 to 36 months recorded from the planning permission. The build out rate is average number of dwellings completed per annum, from the date of commencement to completion. The full analysis is shown in the table below.

Sites	Site size (dwellings)	Lead in times and build out rates (Dwellings per annum)
Allocated sites	0-50	7 in year 3 then 15 onwards
	51-199	15 in year 3 then 30 onwards
	200-499	25 in year 3 then 50 onwards
Sites with outline planning permission	0-50	7 in year 3 then 15 onwards
	51-199	15 in year 3 then 30 onwards
	200-499	25 in year 3 then 50 onwards
Sites with detailed planning permission	0-50	7 in year 2 then 15 onwards
	51-199	15 in year 2 then 30 onwards
	200-499	25 in year 2 then 50 onwards

Table 4.1 Average lead-in times and build out rates

4.9 Where a site is not considered deliverable within the five year period, it is excluded from the five year land supply calculation but may still be included at a later date.

5. Conclusions

5.1 Section 3 of this paper sets out the various components that make up the deliverable supply of dwellings which are expected to be built out over the next five year period. These include sites with planning permission, allocations, the Peak District National Park allowance and windfall sites.

5.2 To assess whether the Council has a five year supply of housing land the amount of deliverable supply must be compared to the requirement as established in Section 2 of this paper. Table 5.1 below sets out this calculation.

Annualised Housing Requirement	Total annual housing requirement (April 2021 – March 2026) including 5% buffer and meeting shortfall over the Local Plan period to 2033		2,108/5=422
Total Deliverable Housing Supply	Large sites with planning permission	382	1,777
	Small sites with planning permission	337	
	Local Plan allocations	880	
	Small sites windfall allowance	120	
	Large sites windfall allowance	32	
	Peak District National Park Allowance	26	
Total five year supply	Supply / Requirement/ (1,777/422)		4.21 years

Table 5.1

5.3 As can be seen from the calculations above using the annual housing requirement from the adopted Local Plan, including a 5% buffer and meeting the shortfall within the next five years using the Liverpool Method approach, the Council cannot demonstrate a five year supply of housing land.

5.4 This statement sets out the Council's position as at 1st April 2021.

Appendix 1 - Supply Details

Small sites with planning permission

Application No	Address	Total dwellings permitted	Completions 1st April 2020 - 31st March 2021	No of units under construction	No of units to be completed remaining as at 1st April 2021
SMD/2017/0648	Late shop 34-36 Picton Street Leek	9	9	0	0

Application No	Address	No of dwellings permitted (net)	Comps pre 01/04/20	Comps 01/04/20 - 31/3/21	No under construction at 31/3/21	Units remaining as at 01/04/21	Site Comments	2021/22	2022/23	2023/24	2024/25	2025/26	5 Year Total
							<p>The site has been cleared and there is an extant permission on the site. The site is included on the Council's brownfield land register.</p> <p>5YHLS Assessment</p> <p>As of July 2019, the PPG states that local planning authorities will need to count housing provided for older people, including residential institutions in Use Class C2, as part of their housing land supply. This contribution is based on the amount of accommodation released in the housing market.</p> <p>Guidance under the Housing for older and disabled people section of the PPG advises that to establish the amount of accommodation released in the housing market, authorities should base calculations on the average number of adults living in households. The average number of adults in all households is 1.8. Taking this into consideration, it is expected that the extant permission for the 57 extra care unit scheme will overall release 32 dwellings onto the housing market.</p>						
SMD/2017/0549, SMD/2019/0564 (FPP)	The Homestead, John Street, Biddulph	10	0	0	0	10	<p>Planning History</p> <p>An outline application SMD/2016/0395 for the conversion of the existing dwelling into 4 flats and the construction of 8 new dwellings was approved on 6th October 2016. A reserved matters application was approved on 20th December 2017 and a discharge of conditions application DOC/2018/0021 part approved on 17th July 2018. A new full application SMD/2019/0564 was submitted on the 13th September 2019 for an amended scheme which reduced the number of new build dwellings on the site to 6. A discharge of conditions application DOC/2020/0085 was approved on 16th January 2021.</p> <p>Current Position</p> <p>New application for 10 units permitted 28/04/2020.</p> <p>5YHLS Assessment</p> <p>The delivery projections are based upon the average lead in times and build out rates for a site of this size in the District.</p>	0	0	10	0	0	10

Appendix 5 - Statements of Common Ground sent to landowners/developers regarding deliverability

10.1 This appendix provides a copy of the covering letter/email and Statement of Common Ground that was sent to landowners/developers for delivery from all sites where at least 10 dwellings were awaiting completion at 31 March 2021. The covering letters and Statements of Common Ground were sent prior to the 31st March 2021 with follow up emails sent in June 2021.

Statement of Five Year Housing Land Supply (as at 1st April 2021)

Dear XXXXXXX,

Projected delivery rates at XXXXXXXX (SMD/XXX/XXXX) from 1st April 2021 – 31st March 2026

As you may be aware, under the National Planning Policy Framework (NPPF), Local Planning Authorities should produce an annual Five Year Housing Land Supply Statement. The Five Year Housing Land Supply Statement must robustly demonstrate that there is a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against a Local Planning Authority's housing requirement. Staffordshire Moorlands District Council adopted its Local Plan in September 2020 and will use the housing requirement set out in the Local Plan to assess the five year housing land supply position.

The NPPF and National Planning Practice Guidance (NPPG) advises that Local Planning Authorities should engage with developers in order to gain an accurate account of projected delivery rates on sites. Written agreements between the local planning authority and site developers are advised to be used as a mechanism to confirm the developer's delivery intentions and anticipated start and build-out rates.

Please find attached to this email a blank written agreement between yourself as the developer for XXXXXX and Staffordshire Moorlands District Council concerning the projected housing delivery rates from 1st April 2021- 31st March 2026. Please could you fill out the table in the written agreement with the annual expected build out rates on your site. Could you also please provide and return any additional information fit to be released into the public domain that you may have on expected submission dates of applications and discharge of conditions applications, any site assessment work conducted, and any other details about site viability, ownership or infrastructure provision. Any additional information you can provide us with will be greatly appreciated and this information will be published in the Council's Five Year Housing Land Supply Statement alongside the given projected build out rates for your site.

We would be grateful if you could please reply by **Friday 30th April 2021**.

Should you have any queries, please do not hesitate to contact the Planning Policy Team at forward.plans@staffsmoorlands.gov.uk.

Yours sincerely,
Planning Policy Team
Staffordshire Moorlands District Council
